CEMENT COMPANY'S PLANT.

Now Completed and Thoroughly Equipped with the Most Modern Appliances.

Has a Power Capacity of 60 Barrels Daily Which Will Soon be Doubled—Big Contracts to Fill.

The Utah Portland Cement company has just completed the erection of its new plant at the mouth of Mill Creek and Eighth South streets, and is now practically ready for the fray. The plant has been erected on the site of that formerly occupied by the Utah Mill and has been in process of construction for a little more than a year, the work being carried on with as little delay as possible, considering the nature of the work and the care required in erecting machinery of the kind. The Utah Portland Cement company is the successor of the Utah Mill and Elevator company, which was organized in Denver, Colo., in 1890, for the purpose of manufacturing cement from the rock found in the Point of the Mountain district, and which for a time did a fair business, but finally went into the hands of a receiver. The company's plant was then sold to
