MINING, BUSINESS AND STOCKS.

REJUVENATION OF WEST DIP MINES

Manager George H. Dern of Con. Mercur Samples Daisy and Finds Ore Carries Good Values.

The success of the Dern slime process, which has been in use at the Con. Mercur for the past two years, and which has led to the revival of the Sunshine mine, now also lead to the West Dip mines taking on new life in the near future. Plans having this object in view are now being considered, and as the assays obtained yesterday by Manager George H. Dern of the Con. Mercur show gold values of between $4 and $5 per ton, which is very satisfactory, there is great probability that the rejuvenation of West Dip will occur at no distant date.

In the past, the values in the Daisy of West Dip were high enough to justify treatment by the cyanide process, and great hopes were entertained of the property, but they were never realized because the ore was so talcy. This talc made so much slime in treatment that the values went into the dump. The process in use at the Con. Mercur and the Sunshine overcomes this to a great extent and makes a greater margin of profit than was possible in the days when the West Dip was booming.

Mr. Dern said today that he has spent two days at West Dip, during which time he sampled the Daisy mine, and the assay returns which have just been received show satisfactory values as stated above. Mr. Dern acknowledged that he has been invited to make one of a company to take hold of the Daisy and West Daisy and make them pay. There is a large quantity of ore in sight, and the Daisy has been extensively developed. Considerable expense would have to be incurred in remodelling the mill and getting things in shape for production, but the prospect is said to be a good one and Mr. Dern is seriously contemplating going in to the West Dip project.

The Sunshine is said to be doing well. Since it was started up last April, the mill, in its remodelled condition, is handling 125 tons of ore a day and making a little velvet for the stockholders. It has already paid three dividends and another one is promised next month. The ore is lower than samples taken at the Daisy, running only about $3.50 per ton.

The new method of treating slimes has already materially increased the life of the Mercur camp, and if it is applied to the ores of West Dip successfully it will mean something of a boom for Utah's old gold camp.

STOCK MARKET SLUMPY.

The market was in a decidedly slumpy conditions on the mining exchange this morning, and new low records were made by a number of stocks. Iron Blossom opened at 91 and fell back to 87 with 5,100 shares sold. There is some talk on the streets of manipulation by insiders but the condition of this stock is probably due to the fact that the investing public is largely leaving mining stocks alone in the effort to forget their losses and hope for the sun of prosperity to shine again. This is expected to take place this fall, though the condition of the metal market, in the minds of some people, precludes the possibility of an early revival of the drooping stock list.

Grand Central sold down to $2.10 today in spite of the fact that the mine is said to be looking better than it has for a long time. Colorado was also weak this morning, selling ex-dividend as low as $1.37½, though at the close it was firmer a $1.40. Sloux Consolidated sold this morning as low as 70 ex-dividend, while Uncle Sam was traded in at 57 cents. Silver King also released a small block at 44 cts. A few of the smaller stocks were sold, such as Utah Consolidated and Crown Point, the former selling at 7 and the latter at 8. Closing quotations were as follows:

DEVELOPMENT OF THE DALY JUDGE

Manager Lambourne Pleased With Conditions at the Coming Park City Bonanza.

After spending a couple of days at the mine, Manager George Lambourne of the Daly Judge company, was at his desk this morning in the new offices of the company in the Newhouse building. He brought back with him samples of the latest find in the property, which was made in the first cross-cut to the fissure run the drain tunnel. In upraising at this point the management has run into a small body of the best ore yet found in the mine, carrying in addition to a high percentage of lead exceptional values in silver.

The rumor of a cave which was started a day or two ago on the street was explained by Mr. Lambourne to be nothing more than a large body of water which had been tapped some time ago in the second crosscut to the fissure from the drain tunnel. This body of water rushed out at the rate of 800 or 1,000 gallons per minute when it was first struck and is now flowing in a big stream, but it has done no damage beyond preventing the extraction of ore at that point. A diminished flow is recorded at another point further on in the great fissure apparently on account of this water being tapped, which, Mr. Lambourne says, the management was glad to see.

An important piece of work for the mine in that it will insure perfect ventilation will be completed in a few days, when the 2,500 foot drain tunnel will be connected with the back crosscut leading from another part of the mine.

Mr. Lambourne was not able to speak much of the new strike for the reason that the work of proving it is proceeding slowly. There is every indication, however, that it will prove to be as valuable as any yet made in the mine.

CONCENTRATES.

Manager J. J. Trenam of the New Stockton Mining company left yesterday for the east.

The employment of several additional men for development work has been ordered by Manager George R. Raymond of the Ely Resurrection Copper company.

Reports from the Tintic Standard Mining company today state that the shaft is down 580 feet, and timbered to the depth of 571 feet. The shaft is said to be well mineralized.

The new scale which has been installed at the United States assay office in this city, will weigh one-hundredth of an ounce, and is susceptible to the weight of a hair.

J. T. Breckon reports the tunnel on the property of the Utah Gold & Copper Mines company now in 660 feet. A force of 14 men is engaged in development work and extracting ore, which is of shipping value, containing silver and lead.

Conditions at the Round Mountain Mining company's property are said to be good. The mine is responding satisfactorily and production is being kept well above the point necessary to insure the quarterly dividend of 4 cents a share. The September bullion output is said to have been $34,000.

Nearly 2,000 men are employed at the plant of the Steptoe Valley Smelting and Mining company, where the ore mined at the Nevada Consolidated is treated. Four reverberatory furnaces and four stands of converters are now in commission, which means an increased production of blister copper this month.

General Manager L. Q. Cannon of the Nevada Northern road is in the city from East Ely, Nev., on business. He reports the ore carriage over his line as remarkable, with 7,000 to 10,000 tons per day being hauled to the smelter at McGill from the Nevada Consolidated mine. The mine is being worked on the same style of operations as Utah Copper, only that they are far more extensive, with an enormous cave being carried out of the side of the mountain.

Practise Hiking is Over—The practise marches of the Fifteenth infantry for the season have concluded with the return last evening of the third battalion from the Warm Springs hike. An innovation was made at the camp yesterday, by giving the men raw rations and having them do their own cooking. The number of cases of consequent indigestion is not stated. However, the soldiers all managed to march back to the Fort.

A TOWN HAS SPRUNG UP IN SIX MONTHS

Opening Last Night of Tooele Hotel a Milestone in History of the New City.

Six months ago an auction sale of town lots was held at Tooele, the townsite of the big smelters being built in Pine canyon. It was on April 15, and on that day surveyors' stakes denoted the streets, the building lots and very little in the way of improvement was to be seen. Last night Kenneth Kerr and President McGurrin of the Salt Lake Security & Trust company with a party of ladies visited the same scene by auto. The occasion was the opening of a modern three-story hotel, the Tooele hotel, a steam heated, electric lighted and modern structure in every respect. The dining hall was lively with gay supper parties, music was furnished by an orchestra and it seemed incredible that half a year ago the site was nothing but a patch of wild grass. Flanking the hotel is a row of modern store buildings, other hotels, barber shops, newspaper offices, drug stores and all the trimmings to a modern town. The new depot is nearing realization and the new town has almost swallowed up the old one. Tooele today is a busy place and is not at all the characteristic mushroom town that is so familiar to the west. It is showing signs of permanency and last night's affair was only one more evidence of the great strides that are being made in the building of a town that is to be the greatest smelter city in the west, in the expressed opinion of those optimists who are making possible its development.

REGISTER IN DIVORCE COLONY.

Judge Ritchie Enters Two Decrees This Afternoon in Friday Matinee.

Two new members of the divorce colony registered today when Judge Ritchie granted decrees to Nonaite Molyneaux and Charles F. Eilers. His honor is hearing this afternoon the story of Edward E. Bartlett, who was committed to jail for refusing to pay his wife $25 per month alimony and $50 attorney's fees growing out of a divorce action.

The allegations of Mrs. Molyneaux against her husband, Harry B., who is chemist for the Smith, Bailey, Drug Co., were borne out by Sarah West, who was called as a witness. She said that Molyneaux had not supported his wife for six years and that she was compelled to earn her own livelihood as a dressmaker. The decree granting her the custody of their only child, Bernard, 10 years of age, was entered. They were married in St. Louis, Dec. 2, 1896.

Charles F. Eilers said that his wife had refused to come west with him when his business brought him here as a railroader. They were married in Cleveland, Pa., July 12, 1879, and in 1904 he came west. She has three married daughters living in the east and she answered Eilers' charges of desertion by saying that she wanted to be near them. Eilers says that his wife is keeping house for a wealthy rancher. The decree was granted.

Blind Give Entertainment—An interesting program of vocal and instrumental selections was given last evening in the workshops for the blind adjoining the Lion House. A special feature was the performance of a blind instrumental quartet, and a generous response was made to an appeal to help along the cause to assist the blind. A public reception will be held next Thursday evening.

STOCKS ACTIVE, CLOSED FEVERISH

New York, Oct. 15.—Excited trading in United States Steel was the feature of the opening dealings today. A single 100-share lot was quoted at 92½ followed by simultaneous sales of 25,000 shares at 92¾ and 92⅝ compared with 91 last night.

Denver & Rio Grande rose 1⅝. Pressed Steel Car 1½, Union Pacific 1⅜, Reading 1⅛, Union Pacific, Cleveland, C. C. & St. Louis and Anaconda and St. Paul, Great Northern preferred, Rock Island preferred, Norfolk & Western, New York Central, United States Steel preferred, American Smelting and Central Leather large fractions.

Realization had only a trifling effect on values and there was a further advance. The demand for stocks was varied, with the railroad group making the best exhibition of strength. Prices were shaded all around at 11 o'clock. American Sugar gained 3½, Union Pacific 2, Reading 1⅝, Amalgamated Copper 1⅝, Consolidated Gas 1⅛ and Atlantic Coast Line, Southern Pacific, Colorado Southern, Delaware & Hudson, Denver & Rio Grande preferred, Missouri Pacific, Great Northern Ore Certificates and Virginia-Carolina Chemical 1.

The buying movement attained force again and carried prices higher all around. Reading rose 2⅝, United States Steel 2⅛, Rock Island preferred 2½, American Can preferred 1¾, St. Paul and American Smelting 1½ and a number of others a point or more. American Woolen declined 1½. Prices showed the effects of realizing at noon in reactions which ran to a point in some cases.

Bonds were irregular.

St. Paul and Union Pacific were bid up to their high prices and United Stated Steel also rallied a good fraction but they all slipped back again when the rest of the list did not respond. Subsequently, St. Paul was advanced again at extreme 2 points and the tone became steadier.

There were frequent fluctuations of a good fraction either way. The market showed an inclination to run off when trading grew light.

Central Leather lost a point, Pacific Telephone advanced 2@3.

The market closed irregular and somewhat feverish. Rock Island gained 2, the preferred 1⅝, Kansas & Texas 1¾ and St. Louis-Southwestern 1½. Dealings in Rock Island issues were heavy. The market had lost a lot of realizing sales, which forced back Union Pacific, Reading and United States Steel a point. Prices came up again after this realizing had been absorbed but dropped somewhat in the late trading.

LIVESTOCK.

Chicago, Oct. 15.—Cattle—Receipts, estimated at 4,500; market steady to 10c lower. Beeves, 4.10@8.75; Texas steers, 4.00@5.10; western steers, 4.25@7.10; stockers and feeders, 2.90@5.25; cows and heifers, 2.30@7.50; calves, 5.00@7.50.

WOOL.

St. Louis, Oct. 15.—Wool, firm. Territory and western mediums, 21@28; fine mediums, 22@25; fine, 12@18.

PRODUCE.

Chicago, Oct. 15.—Early business in grain and provisions here today showed a firm market in all the pits with a moderate range of prices, wheat opening at an advance of ⅛c over yesterday's close. Continued heavy milling demand reinforced by an advance in Liverpool figures gave support to the market. December opened ⅛c over yesterday at 1.06⅛ to 1.06⅛, advanced ⅜c and steadied at 1.06¼.

Anticipation for a large movement of the new crop gave a bearish tinge to the corn market but hedging of short interests, together with lighter receipts to day counteracted the bearish tendency and held the pit firm. December showed a gain of ⅛c over yesterday at the opening at 48⅛ to 48⅜, and swayed slightly up and down. Steadying at 48⅜.

Some commission houses' trade bolstered up the oats pit and held quotations firm. December opened ⅛c higher than yesterday's closing market, at 29⅝ to 40 and trading was within a narrow range.

Moderate receipts of live hogs together with a normal demand gave the provisions market an upward slant ranging from 2½ to 5c higher than the last sales yesterday. January products opened: Pork, 18.50 to 18.55; lard, 11.00; ribs, 9.35.

Wheat—The market fell off for a short time after the early trades and sagged ⅛@⅜c below yesterday's close. Recovery was prompt, forced by increased demand from northwest millers, coupled with heavy buying in the pit. The market was boosted steadily, touching 1½c above yesterday's close, December closing at 1.09⅝.

Corn—Fluctuations in corn were within a narrow range, December closing ⅝c higher at 49.

Close—Wheat—Dec., 1.09⅝; May, 1.07⅛; July, 99⅞.

Corn—Oct., 49½; Dec., 48; May, 51⅝; July, 49⅝@⅝.

Oats—Dec., 40¼; May, 42½; July, 40⅝.

Pork—Oct., 22.00; Jan., 18.45; May, 18.22½.

Lard—Oct., 12.17½; Nov., 11.80; Jan., 10.95½; May, 10.70.

Ribs—Oct., 11.15; Jan. and May, 9.70.

Rye—Cash, 73@74; Dec., 72.

Barley—Cash, 49@65.

Timothy—Oct., 3.80@4.00; March, 4.30.

Clover—Nothing doing.

BUTTER AND EGGS.

Chicago, Oct. 15.—Butter—Steady. Creameries, 29; dairies, 28.

Eggs—Steady, at mark, cases included, 18; receipts, 8,141; firsts, 23; prime firsts, 25.

Cheese—Firm. Daisies, 16@16¼; Twins, 15@16; Young Americas, 16@16¼; Long Horns, 16@16¼.
