BAPTISM OF WATERS

Impressive Blending of America's Jordan and Dead Sea.

CEREMONY AT BEAUTIFUL SALTAIR

"Utah," Pioneer, Sego and the Four Winds Comprise the Chorister.

At Sunset this evening beautiful Saltair will be the scene of a novel unique and pretty ceremony. At that time there will be a figurative blending of the waters of the Jordan and Dead Sea at Salt Lake. The participants in the ceremony are Utah, Pioneer, Sego, East Wind, West Wind, North Wind, South Wind, Triumphant, made of water, fire, earth, air.

The school boy and his sweetheart, young in age, arrangements have been made for the interested in active progress for the interesting event. This morning, Miss Cora Harper, who has had charge of the affair, and selected world to the beach to prepare for the reception of Utah and her sister. It was her day to go to Saltair this afternoon that the day was set. Not alone at the last so that the water was so special and a place in the kind of a place. The ceremony will take place on the south corner on the east side of the tunnel. Hall of the railway has been fitted up with a canopy the high which covers by a canopy the high which Utah, Sego, and Pioneer will take place. Utah and her mate their sister at the corner of the building, sounding the pleasing, sweet.

The following will be observed at the ceremony, as written by Judge O. W. Powers. It is as follows:

BAPTISM OF THE WATERS.

Dramatic Pageant.

Utah—Miss Sophie Carson.
Pioneer—Mr. Van Cott.
Sego—Mr. Emery.
East Wind—Miss Ethel Beatie.
West Wind—Miss Ida Taylor.
North Wind—Mrs Olof Thomassen.
South Wind—Miss Hortense Hyman.
Triumphant.
Hosts of Angels, Pages, Servants, etc.
Assembly people assuming the group scenes and Utah, sounding the pleasing, sweet.

Utah
Land of Pioneer Holiday Day!
From the Hills I come, bearing water
From the River Dead Sea and the Historic Jordan
Sego lilies and Paradise camelia.
Tis the land, where in life,
Another's enlightenment of the Holy Ghost
Has the waters of our Salt Lake
Shall know the crystal crops brought in vessels
Passing by the height Rim of Galilee
The lake of Pacific sense into its wine
Where the weary, wandering Pioneers one and half century ago,
Found peace and sweet contentment.
Hymn by the Choir.
Utah
Well, if I My Faithful Trumpeter!
Summon hither the four winds that may aid in these fitting ceremonies.
Triumphant mounts, potential, and to be a coat to the soul.
East Wind Approaches:
Listen to the voice of the rising sun!
Listen to the call to the world!
I am the Pioneer Wind!
Trumpeter blows a blast toward the East.
West Wind Approaches:
Wave swaying zones and the purple hills of earth and gold
Are hung the fairest drapery over the hospitable arch of the city.
I make the mighty pulse!
I am the West Wind!
Trumpeter blows a blast toward the West.
North Wind Approaches:
From the land of the midnight sun!
Where the great hot geysers well in the Magnetic pole.
I come to your city!
I am the North Wind!
Trumpeter blows a blast to the North.
South Wind approaches:
From the land of flowers!
I bring the fragrance of darkness and sunshine.
I am back loved by many a grape
Are scented and flowery wreaths.
I make earnest over flagged streets on which we tread.
Speak to the Pioneer as lay as painted sage upon a painted reserve.
I have come the glorious sunshine upon the lonely or tired patriots.
Are the four winds
Now gathered and well joined Utah,
We my summon great Sego
Lilies, the year of Jubilee!
Let Sego go to beach and make your
Land of peace
That weary man amid the giant
Hills.
And sego, the sisters of this silent
Or lonely cities,
Of the lands the mountains of eternal
Peaks.
Are children both graces
Of the Creator of all things!
Sego are sent Pioneer in land, being
Met by the sego and make in
Peace, and they are overjoyed before
Pioneer, Sego, and, as they approach,
Page Angelus. They blow bugle
Calls.

Neuman
Bringing the water from the Dead Sea, says:
Water from the Dead Sea.
President
Bringing water from the river Jordan in Utah, says:
Water from the river Jordan!
Utah
Oh! Then Dead Sea of America!
O! Thou mystic Dr.!
O! Thou Mystery of Nature,
Within whose breast are buried the secrets of the ages.
To thee we render homage,
What hast thou seen?
What stories relate? How tell it thy waves had tongues!
Thou hast rippled past eras piled by men and nations,
Whose history is buried in the dim of memory-moved ages.
With this, Eras are but yesty,
And centuries seem like fleet g boats.
Once upon a time thy banks reached out and frames were the
One thousand feet above, upon the mountain's side.
Then, then sat young,
And yet, kingdoms had risen and kingdoms and passed into nay
While thou enjoyest thy existence,
The waters, gathered from the giant hills,
Rest for a time within the shores of Utah lake,
A reproduction here of the Sea of Galilee.
The crystal rivulets which dance with laughter to thy embraces,
Are fed by living springs beneath the bow of Nebo.
Even as the Dead Sea pulses to it and is a tribute
From the sparkling fountains of Mt. Hermon
Thy valleys, lake and mountains,
With bending cities circling round.
Mark with perfect configuration in the Western West.
The outlines of holy palestine
Here are the Jordan all fifty years ago,
Here their children celebrate their coming.
I now mingle with thy waters, which,
In their journey hither, kissed the death face from the dead
And brought fresh tears and flowers
And gray mead with, to give life to thy
The water which gushed from holy hills
And rolled along historic Jordan,
Even as thine, oh Jordan
Hath held thy pearly drops within its
Are now, wedding the Old World in the New,
With sparkling crystals of the Dead Sea, I bequeathed
Mingling with thy history sometimes
Of the sacred beds,
With the water of the river Jordan I baptize thee!
Pioneer
Peace be with the client one!
Utah continues:
Hail! Sego lily! Hail Columbia and ex
Circles clear.

HALL OF RELICS EXHIBITION.

Great Crowds Visit it and Inspect its Interesting Pioneer Relics.

When the proposition to erect a hall of relics in which the historic memorials of pioneers could be exhibited, there was considerable speculation on the part of not a few as to whether it could be made a success. Those who entertained that idea would have been compelled to speedily change their views had they been in attendance last night and today when the beautiful white building with its interesting contents was crowded to its utmost capacity by visitors from all sections of Utah and from surrounding states and territories.

As the number of pioneer relics and articles that were connected with pioneer life and pioneer experiences increased widely to their recollection they seemed to become longer since passed into history. Its relics cover a wide range and a detailed description of them can not be easily given in a newspaper sketch, however, that visitors may not be unacquainted with reference to what the Hall of Relics contains a brief and interesting catalogue has been prepared under the auspices of the committee. It is filled with valuable information and will be worth preserving when the Jubilee is over.

A decidedly interesting feature in connection with the Hall of Relics is the old time violin and accompanying music. Prof. C. C. Pender, Geo. O. Smith and Wm. Foster, these veterans play upon their old time instruments in a manner that evokes admiration. Prof. Pender is the best point where they can scarcely abstain from dancing or tripping round in some Moses Pender, Foster and Smith will give entertainments every afternoon and evening during the Jubilee.

Slower Than Pony Express.

LAKE TOWN, Rich county, Utah, July 12, 1897. As a reminder that we are not so backward in this part as some may have people think we be, I would note that a pony express (mounted) is ready to leave P. O. 32, I. mon Cove Hotel on the morning of the 15 to Bear Lake, 1897, ride continuous, and arrived in Salt Lake next morning. Ride, one, July 15, at 8:00 p.m. (mounted with security bonds, six O. orders, the postal authorities of Salt Lake City). Get back of Bear Lake to ride the difference between Silverwork. Also signature to certify as form of carrying to U.

JOSEPH TOWER.

BEAVER LAKE MINES.

O. S. Carver Talks Interestingly of That Section.

HE IS FATHER OF THE DISTRICT.

Rich Ore in the Wasatch Company's Ground—5 Miles from Tunnel—That Is Just Transfer.

Father O. S. Carver, the original locator of the ground now owned by the Beaver Lake company and a man who knows every inch of that district, was in the city attending the Jubilee. He was interviewed by a News reporter today and spoke in glowing terms of that part of the country. Said he, when questioned as to the camp's worth of mine properties: the Pacific road from Salt Lake to Alaska that I have never to mention to anyone the other parts we have been in, I mean to 1876 and have been there ever since. The camp has the finest appearance of any I ever visited."

Mr. Carver then spoke of the different mines of the district. The O. K. a property owned by Adam G. Compell of that city, has a shaft 200 feet in depth and the last 4 feet displayed ore which has assayed 30 per ton, or equal to silver and gold. The Wasatch Company's claim is good to the tunnel. The tunnel is 5 miles in length, and is nearly 2,000 feet in depth. Work with a force of 30 men is rapidly developing into a bonanza.

The Beaver Lake mine has attained a depth of between 42 and 47 feet in the shaft, and is showing ore further 18 and 20 per cent copper, 10 ounces in silver and 30 gold. The property is free from debt and the owners are interested in other properties.

On the Silent Friend claim there is an outcropping carrying values of 23 per cent copper, $12 gold and 23 ounces in silver to the ton. This claim is in the property of the Wasatch Mining company—in fact, the Wasatch Mining company owns all the claims from the tunnel. In this property are one hundred thousand dollars in sight and the tunnel is 2,000 feet.

$150 IN SILVER

and 40 per cent lead is the ton. There are 40 men now working the mine, which is incorporated in the Beaver property in the district.

In the Tree Climber mine there is a showing of one which yields values of 15 per cent copper, 35 ounces silver and $20 in gold.

The Golden mine is also in good shape. It has a vein 10 feet deep and the values are 15 per cent copper, 35 ounces in silver and $5 in gold. The Rusty claim is located adjoining property upon which work is progressing slowly. It is 1,000 feet in length and the values are $11 in gold and 6 ounces in silver to the ton.

Mr. Carver says the intention of the district is to develop and connect the properties by a tunnel and tramway. The tunnel is almost more than a mile.

NEWS FROM TINTIC.

The Second Extension for Coal Supply at Increasing Rates.

The C. S. again advanced yesterday morning.

Since the starting up of the Homestake the coal has been driven down to 1 cent.

The Grand Central closed down yesterday morning for a few days in order to give the men a an opportunity of laying up some dollars.

Joe Jackson and Peter Anderson who are sinking a 100-foot shaft on the Blue Tweed extension, are now down 70 feet and are sinking west.

Up in the Sheridan and a half miles of the Cherry Creek pipe line has been laid and the force of workmen will be increased in a few days.

Joseph Jones and William Jenkins have secured a contract for rock of a 100-foot tunnel on Jesse Ralphs's property at Diamond, and started work last week.

At the Mammoth mill the battery is now running at its full capacity and so soon as the present supply of ore is exhausted another lot of Yankees will be started.

C. W. Sender, who has been sawyer at the Mammoth mill for many months, has resigned his position. As Colorado is the Yankee sawyer office to run Lake arrived in camp last Sunday and is filling the vacancy.

Prof. Samuel F. Emmons has completed his geological work in the camp and has gone to Marion to start the work there. He will leave in a few days for Ruby. The geological survey report may will not be completed before November.

At work will be suspended at Colorado Tintic 72 working and all of the remaining mill running night. Superintendent Nash has shown courage in this hard, it is the hope of all who are interested in the Mammoth mine to give the miners at the Mammoth mine an opportunity to stand for Jubilee.

Major Goodson Fleming has secured the patent on the new claim locator which he recently invented, a drawing is in Summit of the with provisional Utah and Nevada.

THAT AJAX TRANSFER.

Supposed to Have Been Made for a Handsome Price.

In connection with affairs of the Ajax mine has reported transfer of the Ajax of Messrs. Ryan and Schwarzer, the Mammoth Bonanza.

It is generally understood that the transfer has been made to Attorney Dixon in order that the Ryan Estate Bonanza an opportunity to carry the mines and thus bring harmony out of chaos. It is said that the work has been carried on in the Ajax and the ore taken to the Bonanza. It is said that the Mammoth will be pushed on from to a impossible depth and the ore taken to the Bonanza. It is known that within the property has been uncovered a depth of many feet but has been reached, which is considerably less than the 7,000 feet in the center of the district. The Ajax is a fine mineral property and if it can be handled properly should bring large returns to the Bonanza. It is said that the work will be carried on and
