DESERET EVENING NEWS.

Tuesday, - - March 3, 1894

FRAGMENTS.

The City Council will meet tonight. There are several matters of importance to come up for consideration.

The regular meeting of the Pioneer Democratic club will meet at the office of Judge Norris in the Wasatch block this evening.

Concerts are announced for the evenings of Nov. 8 by Farrer's Cornet Band, Tuesday evening, April 10, at Lyceum. The series will take place at St. Mark's church, and the church choir will assist. The entertainment supper and dance afterwards will be at the Temple.

Bishop William Willes, an old Salt Lake newspaper man, who disappeared from the city soon after the celebration in the Tabernacle, has been returned to his former home in Illinois after a period during which his experience is more than half of the story of the Union. He has lost some of his sky and commanding characteristics and the fraternity welcome him to their midst again. Bishop says there is no place like Salt Lake and that he stands prepared to prove it.

Sunday School Conference.

The annual meeting of the officers, teachers and workers of the Deseret Sunday School Union will be held in the Tabernacle, Salt Lake City, Sunday evening, April 8, 1894, at 7 p. m. All interested in the Sunday school cause are cordially invited to be present.

GEORGE Q. CANNON,
GEORGE GOODALL,
JOHN MORGAN,
General Superintendency Deseret Sunday School Union.

WORKINGMEN MEET.

Ill Advised Remarks by Some of the Speakers—Sentiments, Resolutions and Regret.

The Workingmen's Association held a meeting in the Karrick building at the corner of State and Second South streets last night. There was a good deal of talk, and tell a little of it was unexceptionable to the City Council. Members were affectionately called by nicknames and dubbed as "arrogant bankers who didn't seem to care whether workingmen had anything to eat or not." The time had come when the Council "must do something to relieve their condition."

Later on another speaker is quoted as referring to the City Council as being "most monstrously of the donkey." There was much more talk of a similar strain after which the following resolutions were passed:

Resolved, That we do hereby give notice to the City Council that we cannot and longer without work. We, as an association, have appealed in all nearly ways for immediate relief, to be disappointed, yet, all. We, as an association, cannot and will not be responsible for the bad results of crying women and children from hunger and distress upon the part of the citizens of Salt Lake.

Resolved, That in view of the fact of so much distress in our midst, we request the list of the Council considering a bill for certain public work for $10 to $100 to workers who would only be able to pay about to make a job for labor, and another resolution passed at Salt Lake association, to the effect:

Resolved, That the Council shall be and are hereby requested to consider of economy in the employment of Salt Lake workmen and women, whenever labor is done or paid for by the Council.

Resolved, That we request the City Council to give consideration to the resolutions already passed and that the Council report positive recognition of our petition.

It was also moved and carried that J. H. Hastings and E. W. Rose act as a committee to present the resolutions to the Council.

Resolved, That we elect a delegate to stand our cause before the City Council. Some strong speeches were made on the body to give recognition to our petition of the Council Ever.

Mr. Hockings was chosen as such delegate, but he declined to accept the honor and Mr. Rose was chosen in his stead.

W. S. S. Meeting.

A business session of the Utah W. S. S. will be held at 11 a. m. on Wednesday, April 4, in the Office of the Deseret Evening News, room 210. Constitution building, Main street, territorial officers, honorary vice presidents and all officers and delegates from the territory are cordially requested to attend. Also a meeting of the Utah W. S. A. will be held on Wednesday afternoon, April 4, in the Fourteenth Ward Assembly Rooms, commencing at 2 p. m., when it is confidently hoped there will be a good attendance of officers and members from the entire territory, when prominent people have been invited to address, and the meeting will therefore be an interesting one.

E. R. WELLS, President.
NELLIE LEWIS, Secretary.

Mr. Sagstuhr Will Lecture.

Mr. Sagstuhr has written a reply to the letter published in last evening's News asking him to defer his lecture until after the delivery of his lecture on the British Conquest of India. He says:

MR. M. H. Walker and others:

Gentlemen—I am much gratified by your flattering invitation and am happy to bring aid to assist in your request. Hoping that you may not be disappointed owing to the honors of the general interest in it.

I am, very respectfully yours,
H. SAGSTUHR.

The lecture will occur on Tuesday night in the Salt Lake Theater.

Medical Practitioners.

It was late last night when the board of medical examiners completed its labors. The following members were present: Doctors Fowler, Dart, Hollenbeck, Richards, Carstensen, Graves and Allen.

The meeting was long and very one. Questions were propounded as follows:

Obstetrics and surgery, Dr. Joseph S. Richards.

On regular therapeutics and materia medica, Dr. Allen.

On eclectic, Dr. Carstens.

On eclectic and gynecology, Dr. Graves.

On physiology and the practice of medicine, Dr. Dart and Fowler.

On obstetrics and gynecology, Dr. Carstens.

All applicants were required to reach an average of 75 per cent before a license could be granted. The following physicians passed successfully and received and received their certificates permitting them to practice: Dr. Jones, Dr. Jones.

Louis P. Hill and Lucy J. W. Allen, Pleasant Grove; Dr. C. Dewey, Salt Lake; S. D. Hunter, Salt Lake; V. Cowley, Springville; W. Rees, Salt Lake; E. L. Rich, Ogden; G. W. Lewis, Salt Lake; E. L. Rich, Ogden; J. Lewis, Salt Lake; A. Hale, Ogden.

The following examiners were appointed for March 1, 1894, were present:

E. A. Hackness, Salt Lake; Milton Williams, Brigham.

The following new graduates were passed:

John E. Wooley, Salt Lake; Margaret C. Sheets, Salt Lake; M. E. Allen, Springville; A. Lucy, E. Cooper, Salt Lake.

The following were declared to give diplomas:

Robert Walker, Joseph E. Robbins, Charles Parry, Annie L. Jones, Mrs. L. E. Morrow, Walter E. Bennett and F. M. Fowler.

A public meeting will be held on Monday the 12th inst.

CHEMICAL CLASS.

Copper and Lead Are Sold in of Dr. Jennings's Lecture Last Night.

The lecture delivered at the Deseret University, last evening, by Prof. J. E. Talmage was a study of the two metals copper and lead.

Copper, as we understand, occurs in the uncombined state in nature as native copper, which is the case with but few of the metals. This is one of the most important metals to the arts, not only because of its use as pure copper for plumbing purposes of the importance of the compounds containing copper. It has no value, large amounts are found on the southern shores of Lake Superior. But in this case the ore metal is not brittle, therefore can be worked, and being alloyed is tempered, and the expense is not high to work it.

The metallurgy, when copper is obtained as an oxide, is very simple; the copper oxide is mixed with metal which robs the oxygen of its oxygen forming carbon dioxide and metallic copper. But generally the metal is either in combination with sulphur, or a sulphid, or combined with some other compound containing copper. In this case the ore is first roasted, driving off part of the sulphur, then some other ore is added which will unite with any other metal which is present, such as iron, which is then removed as slag, leaving a matt, or copper sulphid, this is roasted until only copper and copper oxide remain, a process is then resorted to which will produce nothing is then performed and the metallic copper obtained.

Its principal use is for its alloys, such as bronze, nickel, brass, bronze, bell metal, gun metal, etc.

The principal compounds, in the arts, were named, their most characteristic properties illustrated with experiments, among them being copper sulphate by electrolysis.

Several tests were given to determine the presence of copper.

Lead is rarely found native, uncombined. In the ancient manuscript being given, which is found in Utah, its metallurgy was given and described, two processes being in use the reduction process and the roasting process, the latter being usually employed.

Lead occurs in the arts as sheet lead, used for roofing, etc., and as lead pipes for conducting water, where it is desirable to have water drink the water, several tests were given for determining the presence of lead, also.

Led by a Utah Boy.

John J. McClellan, a Utah student now at Ann Arbor, receives the following mention in the Washtenaw Times:

The excellent manner in which Mr. McClellan led it was given at the Easter service in St. Thomas's church showed the thorough manner in which St. Thomas's choir has entered the work. Sixty-two pages of difficult music rendered at this mass was yesterday morning, shows the qualities of the choir and the training it has received from its organist and choir master, John J. McClellan, of Provo, Utah. The morning voluntary was rendered by B. C. Jones on specially equipped for the occasion, the last was so specially rendered by W. Cregory jr., Jos. Cowan (of the Miss Gerhardt Company), Henry Fay and Cadmon de Grey, young men and talented, and was a great satisfaction to all. Miss Clifton gave two lady solos, one accompanying cornetist and organ, the other of an air, in an artistic manner. The Sunday cornetist, also A. Hasbrook, Bond, playing accompaniments. Miss Gerhardt, of Det. jr. gave Gounod's "Ave Maria" during the offertory. The choir, under Organist McClellan's direction has done this month and now seems to rival other, even the choirs of yesterday. Master "Magnificat" was rendered a surprise but evening in a meeting manner, making an important musical day's work.

Terrestial Bows.

The people of Fairview, Iron county, are attempting to get in a new flour mill.

The mild fruit of last week is now nearly frost-bitten in a place in Sanpete county, Utah.

There is no longer a cause about Kingston having a cancer actively, says the Expo. The cancerous cow, only recently the property of Mr. Kingston, has been killed. Mr. Kingston's cow is compared that chance of total immunity. Mr. Frank has had a little experience in cancer making, and he will work out his own remedy. He will be seen in Kingston. The monstrosity will have a capacity of handling more than a million cats.

Dr. J. Smith and J. H. Farr, of Sevier, dropped in Cedar Wednesday on their way to Beaver Dam, only a few miles north west of St. George, where they have purchased 320 acres of land, lying on the Big Virgin river. They have well made with plenty of water, says the Iron county record, and will do their spring planting immediately. These gentlemen are working on a colony scheme for the purpose of settling up some 1,000 acres of land in the locality. They were at Iron Springs, Iron county, and will do their spring planting there also
