DAILY-WEST IS WANTED

Stock in the Big Park City Mine Suddenly Came into Demand.

LOWER MAMMOTH STOCK WAS QUIET.

Contract Bell in the Ph. Green-Marion and Chloride Recording the Only Sales.

Daily-West is in demand. There stir in the market for the stock in the pit for the first time in weeks. It is at the bottom entirely and may be with prices now will there not believe the stock at the mine situation and the number of prospective runs in the pocket of the latter is sufficient to have its affect upon their respective. It is not the only stock that seems to put under the blue line of the brighter prospects for the white metal. Money the market of incoming cases on change is a result of some one in the stock of the Mammoth mine.

LOWER MAMMOTH.

Nothing New or Definite Heard From the Big Strike.

No new thing has been heard from the promised big strike at the Lower Mammoth mine. Harry Joseph and the men on top are keeping things quiet. They have now in their possession the key of information, and when it and yet public property, the world will be the gainer. Kirby of the Daily-West visited the mine and down in the only outside up and down to the right and left, without sign of a vein, and that with every pick he or is expected. The Daily-West the big strike was put to work on which had been uncovered in the crosscut seven feet without sign of the lost vein. The ore is of very inferior quality and has all a tendency of that in the Grand Central, where the body was first discovered. Lower Mammoth stock is held in a very quiet way, and it is a pretty safe bet that if this new ore body shall make its appearance in the Grand Central, Lower Mammoth figures must advance. Operating industrious, as it is, there is no stock in the pit at $1 a share. Big buyers passed up to this figure in the morning, but the market in the afternoon, leaving the bears to cover their shorts. The market for the stock is for the power at that time.

Here is the way the stocks stood at the close of today's call:
