ANARCHIST THREATS.

Palm Sunday Services Omitted in the Royal Chapel in the Spanish Capital.

ANOTHER DYNAMITE EXPLOSION IN PARIS.

An English Anarchist Arrested in France—Executed Will Not Appeal.

By Telegraph to the News.

THE ANARCHISTS.

Rumors of the Stealing of Dynamite in Spain.

MADRID, April 10.—Madrid, the capital, was crowded today and excited in prison. In an interview today Del Bosch declared himself a follower of Pandemonium and the Devil, and spoke with the enthusiasm of fanaticism. He is a Catalonian and an Anarchist. A representative explosive gunpowder more formidable in proportion were found on a detective night at the gate of the hospital to any purchaser. The state is revived by the news that Pallas, the Anarchist, who was shot under fire in the Royal Chapel today, mortally wounded of the Queen Regent's indignation, but really on account of anarchist threats. Further arrests have been made in the provinces and in Bilbao.

Rumors exist that no warning for the fate of others. As a result of his declaration warrants of arrest were issued.

ANOTHER EXPLOSION.

PARIS, April 10.—A tin cylinder filled with gunpowder exploded on the windowsill of a house occupied by a magistrate at Compiegne today. The magistrate was slightly injured and the house otherwise damaged, but nobody was hurt. The magistrate recently imposed severe sentences on anarchists.

SENTENCE.

Extended dispatches that he will not appeal against the decision of the Chamber of Accusation and he wants the other anarchists to follow his example, so that their trial may begin on the 25th inst.

ENGLISH ANARCHISTS.

Malinko comes being an accomplice of Ravachol. An English anarchist named Pocket has been arrested at Hesdin. Gerarger, Devaldo's confederate, has been sentenced to imprisonment for life at hard labor.

GERMAN POLITICS.

The Formation of a Clerical Party—Socialists Active.

BERLIN, April 9.—When the Landtag reassembles April 26th, an important struggle of parties will be inaugurated. The indications point to a coalition of the Moderate Conservatives (men with the Liberals, which will result in the formation of a Clerical party, leaving none on the benches of the old Clericals. The split between the Ultra Conservatives and Moderates has practically destroyed the Conservative majority in the Landtag and also places the party at a tremendous disadvantage for the general elections. State aid has been at a premium, so the divergence is unpronounced. If a strong coalition is effected, the government will follow the policy of a modified National Liberal vote. The bill of the Conservatives affords that there is to be no chance to change the relations of the government by abolishing the primary elections.

After the Easter holidays, the Socialists will announce a new programme, the gold of which will probably be the defeat of Conservative principles. The public like the political uncertainty. Even the repeal of Von Caprivi's uplifting after Easter in favor of Von Eulenburg does not aid the general pulse.

PREPARING FOR MAY DAY.

The preparation of the socialists for the May day celebration are keenly watched by the authorities. The Austrian socialists have decided to hold a demonstration on the 1st of May, and desire the Germans to hold a simultaneous celebration. Von Caprivi proposed to influence the employers to refuse the men a holiday on May 2nd. Miquel advised his colleagues to treat the day as a recognized labor holiday, and, if the celebration to fall Monday, to close the government factories, and even suggested that prices at the theatres be reduced, and military bands be ordered to play in the public gardens. The other ministers did not go so far as Miquel, but agreed not to oppose the demonstration. In Berlin a number of meetings are arranged for Monday, to be no processions. If the unlikely attempt to create disorder, they will break with instant and severe repression. Von Vietsch has been interrogated by a discussion of the labor question. Another section proposes to hold another procession. Throughout Austria, excepting Vienna, the celebration will take place Sunday. In Tenth the police have been ordered to prevent the meetings and processions.

A dispatch from the Cologne Gazette from St. Petersburg says that

THE CZAR AND CZARINA

and family will leave for Copenhagen April 22nd, to attend the golden wedding of the King and Queen of Denmark. The announcement of the Imperial's intended visit to Copenhagen.

The report that the Emperor and King of Saxony will witness the Austrian army manoeuvres is untrue.

THE HUNGARIAN REVENUES

for the first quarter in 1892 show a decrease in trade, compared with the same period in 1891. It is alleged to be due to the reciprocity treaties of the United States, affecting the German sugar trade to the West Indies and South America. From Berlin the increase is 300,000 marks and from Hamburg 500,000 marks in sugar exports alone. About 100,000 marks of the Berlin decrease is on the cheapest kinds of heavy goods, which were shipped out to the Southern States.

THE HORSE SHOOTING CLUBS

will send a gold cup to the New York sharpshooting clubs in memory of the rifle festival held in Germany in 1886. The cup is a bronze inclosed in a case, and bears on the cover the figure of a riflemen in outlined silver.

SUPERLATIVE HOAX.

Jule Verne's Idea About to Be Realized.

DUBUQUE, Iowa, April 9.—The homeless submarine boat, which was built here the past winter, today was given a trial trip and under adverse circumstances proved little success to every particular. With a crew of three on board, the boat was submerged, going down gradually and under perfect control of the pilot. Under water the boat was able to attain a speed of over ten miles an hour, both propelling and rudder with the greatest ease. In sinking or rising, the boat maintained a horizontal position, a matter of great importance in a submarine boat. The boat is equipped to run with steam power while on the surface, but underneath the water the motive power comes from a powerful electric storage battery. The coils being charged with the same engine that runs the boat on the surface. The present boat was built only as an experiment, and the improvements, if any, will be made in the future. The boat is equipped with two small cannon, which can be fired
