UTAH WEATHER AND CROPS.

Severe Frosts in the North Damage Tender Vegetation.

Fair Weather in Other Localities and Fruit and Vegetable Prospects Promising.

Last week's Weather Crop Bulletin which was to have this morning reached us was not received.

WEBER.

The interest of the week was marked by warm and pleasant weather and several inches of moisture. Rain was beneficial to the growth of grass and grain in all sections of the County, as rather late warmth and moisture generally in the southern portions, which were strange to the corn and vegetables by the severe cold weather, remained in the ground and it is. There was little or no complaint of damage this week, and there have been sufficient of a variety of water to serve certain purposes. Up to the time this week has been pleasingly favorable.

CACHE.

Notwithstanding the cold days during the latter part of the week, the temperature averaged above the normal, and the moisture is in good condition for the growth of crops. Farmers report that the work was good for farther planting, and the planting per week (principally oats), the work was pushing and well advanced, which is most gratifying to all concerned. The fruit prospects are reported to be considerably damaged by the cold, which, however, and the spring wheat is very forward, and is looking well. The prospects of fruit and vegetables is very promising.

Reports of Correspondents.

CORRESPONDENTS.

Paron—Fine weather and seasonably since. A few days ago, slight snow storm. Alfalfa, much new feed present; some fine. Rye, has advanced nicely. Some fears that the cutworm may good prospects for fruit of all kinds.

Lehi—The past week has been good for growing crops, and most of the wheat is expected from the fight frosts we have had, so crops look well; both alfalfa well in progress.

Lake View—The weather has been fair throughout the week. Heavy rains and on the 18th some more damage to sugar beets. Heavy rain on night of 18th, slightly damaged potatoes and grass. Small grain looking good; lucern growing rapidly.

Lake Shore—Corn and potatoes are being planted; sugar beets looking well; grain crop growing fine; fall wheat Rye, lucern growing fast. Heavy frost on nothing of little.

Fairfield—During the first part of the week the weather was very favorable for crops, warm and pleasant, severe frost on 5th and 15th which, it is feared, greatly damaged the fruit crop.

MILLARD, PIUTE, SANPETE AND SEVIER COUNTIES.

Scipio—Seedling weight days all week. Farm crops are doing well, potatoes and corn being planted. Frost on the 8th, 15th and 17th has injured the fruit prospects very much.

Meadow—Heavy frost on the 15th injured beans, potatoes, corn and vegetables; no damage to fruit or wheat. All fruit trees have blossomed unusually heavy; spraying has commenced; excellent prospect for good crop.

Holden—Fine growing weather but cold nights. Frost has nipped early potatoes and beans but not enough to hurt; good prospects for hay, good water.

Kanosh—The middle of the week was quite cold; blossoming of fruit trees showed signs of frost; time are forward; but now; farmers are busy getting in potatoes.

Monroe—Warm and dry week; lucern and grain making good showing; heavy frost on four nights; have not noticed any damage yet.

Salina—All crops look well; frost on 15th damaged fruit.

Moroni—Grain looks well; fruit damaged by repeated frost; lucern; lucern looks high.

Tuscarora—Fine and seasonable; lucern and potatoes blossoming; crops nearly all planted except late corn and sugar cane.

WEST BELOW, YAMPA, BOUGAN, BOX, WEBER, DAVIS AND SUMMIT.

Morgan—Fine on 15th killing tender plants. Will take executive everything this week; grain and lucern coming along nicely.

Wilson—Weather favorable; warm; is doing and farmers are beginning to irrigate. Grasshoppers are making their appearance and fruit trees are full of the blossoms they may do. Fruit is nearly all over, and prospects are favorable for good crops.

Henefer—Fruit and lucern and spring and fall grains are very promising and promise.

Taylorville—Fruit and lucern and spring and fall grains are very promising and promise.

Uinta—Good demand for lucern and fruit on the trees are forward.

Uinta Creek—Crops doing fairly well, killing frost night of 15th; water for irrigating scarce; fruit trees growing.

Lewiston—The past week has been seasonable and good work; the cutworm is the most destructive pest; fruit trees high; late crop in Hong; cool; planting continues active.

Ogden—Cool nights, warm days; fruit trees are very forward; lucern and grain are doing well.

Hooper—Fruit and lucern are doing well; fruit trees are very forward.

Kaysville—Fruit and lucern are doing well; fruit trees are very forward.

Farmington—Fruit and lucern are doing well; fruit trees are very forward.

Bountiful—Fruit and lucern are doing well; fruit trees are very forward.

Centerville—Fruit and lucern are doing well; fruit trees are very forward.

Bingham—Fruit and lucern are doing well; fruit trees are very forward.

Farmington—Fruit and lucern are doing well; fruit trees are very forward.
