MINING, BUSINESS AND STOCKS.

MARKET DULL, BUSINESS LIGHT

Nearly All Stocks Were Quoted Lower This Forenoon.

CON. MERCUR AMONG LIST.

Silver Shield Held Up to Saturday's Figures—May Day Remained Steady—Closing Quotations.

The week opened with the sale of 10,220 shares of mining stocks during the forenoon calls of the mining exchange. The same being the equivalent of $3,368.13.

The market, as will be seen from the foregoing figures, was extremely dull while prices tended generally lower. Con. Mercur, which pulled through the past week in splendid order, was weaker. May Day survived the call unchanged. Sacramento was an exception; it selling up to 26 cents, closing a half cent under. Silver Shield remained attractive to those in the pit; there were few offerings, consequently the sales were limited. For Butler-Liberal, 14 cents was bid, with no offerings recorded.

The closing quotations and sales were posted as follows:

DRIVING A TUNNEL.

Progress Being Made at an Idaho Mine—Local Parties Interested.

A letter received today from Supt. C. B. McKinnon of the McKinnon Gold Mines company, operating at Silver City, Ida., brought the information that in 60 shifts, worked during the month of July, the main tunnel was driven 42 feet through a hard granite formation. Mr. McKinnon states that he will have to go about 80 feet further to tap the Pride of the West ledge, from which in the past has been extracted considerable rich ore.

The company, so Mr. McKinnon writes, has acquired a valuable millsite which may be of vast importance to the property in the future.

Salt Lake and eastern parties are extensively interested in this mine, which according to reports from disinterested parties, seems to be favorably situated

CON. MERCUR MILL.

Within a Very Fews Days the Moore Process Will be Installed.

Manager George H. Dern will leave for the big Consolidated Mercur mine at Mercur tomorrow morning. He will make a general inspection of the property and when he returns expects to be prepared to say definitely when the remodelled plant will be ready to go into commission, thoroughly equipped for business with the Moore slimes settling tanks. The event will probably take place, however, somewhere between the 10th and 15th inst.

The installation of the new process has taken considerable more time than was first anticipated. It has been on the order of rebuilding an old house—an entirely new plant could have been constructed more quickly. While the changes have been taking place the mill has been kept in operation under the old process and that, too, has added to the inconveniences.

To-day's Metals:

SILVER, Bar, 54 3-4 cents

LEAD, $3.50.

CASTING COPPER, 12 1-4 cents a lb.

NEW YORK METAL PRICES

Lead, quiet, 4.40@4.50.
Copper, quiet, 13.00@13.25.

MAKES SILVER FROM GOLD.

Also a New Metal From Slate from Which Gold is Expected.

STORY COMES FROM OREGON

Calls the New Discovery "Rixum"—Something of How it Is Produced And What is Expected.

Merlin, Or., Aug. 3.—J. A. La Rix, chemist and metallurgist, has made silver from gold and developed a new metal from slate, from which he expects to produce gold. From his notes, which were scanned by the government inspectors, it seems he has developed a new metal from commercial slate, abundant here, which has an affinity for the atom of gold and silver, which he calls "Rixum." The theory he has been working upon is the disintegration of the atom into unitions and the substraction from gold and the addition of rixumions to the silver atom.

The process consists of a strong acid solution combined with powerful electricity currents and long exposures to their action, causing the destruction of a portion of the ions in the atom by electrical conveyance into a similar solution of rixum.

BLUE ACRE FINANCES.

Company Gets Its Development Funds in Monthly Installments.

The annual report of Manager Henry M. Crowther of the Blue Acre Copper company, was released on Saturday afternoon.

The financial statement shows that during the year the company has sold for cash and on contract account $42,500 worth of stock. Of this amount $18,166.25 has been collected, leaving a balance due of $24,333.75. Money is being received at the rate of more than $3,500 per month so the company is in condition to push work quite vigorously on its Beaver county proposition. The corporation is free from debt, according to the manager's report.

Black Vault Incorporated.

The Black Vault Mining company is the name of a corporation which has come into existence in Provo, its principal place of business. The company owns the Dad Lander, Peter Elliott, Bishop, Hulsh and Judge Dana claims, all situated in the Eldorado mining district. The following are the officers and the amount of stock subscribed by each: President, M. M. Warner, 5,000 shares, Provo; Amasa Smith, Springville, vice president, 5,000 shares; N. C. Larsen, Provo, secretary, 5,000; W. E. Cooper, Springville, treasurer, 10,000 shares; W. P. Davis, Springville, director, 5,000 shares. The capital stock is $50,000, divided into shares at the par value of $1 each. The company has had some very promising assays from the property.

Utah Copper Contracts.

The management of the Utah Copper company, on Saturday afternoon, placed an order with a local machinery firm for 18 vanning machines which are to go into the big concentrator to go up at Bingham; with the same firm was placed an order for two tables and one Janney mill. The contract for the grading was captured by Holt Brothers, which firm is now making dirt fly at the Yampa smelter site.

Other contracts will be awarded during the next few days after which Manager Jackling will leave for Colorado to look over the plants in his charge there.

BROKER [illegible] HOME.

Visited the California Resorts and Saw the Camp of Tonopah.

Broker Ed Sheets returned this forenoon from a trip to California and on the way back took a run over to the big camp of Tonopah. This was his first visit to the Nevada camp, which has become renowned during the past year or more. Like most all others who have gone there he formed a good impression and believes that it is one of the coming big districts of the country. The camp is quiet just now and a good many merchants are offering some complaint. Like all new camps business has been overdone, but as far as the mines are concerned there is nothing discouraging in the situation. There is an immense amount of low grade ores developed in and until the matter of transportation is solved, as well as that of providing for milling facilities, these ores will remain practically valueless.

It is the opinion of Mr. Sheets that it will take a couple of years to work out the milling problem. When that is once done employment will be furnished for a great many additional men and the camp will grow into greater importance. Some of the mining companies have trimmed their forces until such time that present difficulties are overcome.

TWO UTAH MEN FROM HANNA MINE

State Mine Inspector Thomas and William Reese Return.

IS MUCH WORK TO DO YET.

Will be Six Months Before Mine is Cleared—Sixty-One Bodies Recovered—Water to the 20th Level.

From present indications it looks as though it would be six months before the Hanna coal mines would be cleaned out and before it can be ascertained with absolute certainty just how many lives were lost and what damage was done.

This is the word brought back by William Reese of Bingham, who went with State Mine Inspector Gomer Thomas to assist in the rescue work. Both returned last evening. Mr. Reese was there 18 days and says that during that time 13 bodies were taken out, making a total of 61 up to the present time. During this period the 17th level was blocked out and the 16th was opened and explored.

He reports that the mines are full of water to the 20th level and with gas from there up. Last Friday Manager Brooks, assisted by others in opening the bulkhead at the stables on the old 17th level, encountered fire, which they fought back 200 feet, where they put in new bulkheads. He says that it is difficult to keep men there owing to the fact that so many get sick, due probably to the gases.

MINING CONCENTRATES.

Will J. Lawrence departed on a brief business trip to Cheyenne yesterday.

President W. B. Mucklow, of the Majestic Copper company, has gone east. He left Saturday evening.

J. W. Taylor, manager of the Ima Consolidated, of Idaho, has gone to New York on mining business.

Capt. Duncan McVichie, manager of the Bingham Con., returned from a trip to California this forenoon.

The new boarding house at the Liberty mine at Park City is completed and has been placed in commission.

Dr. M. N. Buck, formerly interested in Utah mining properties, arrived in the city today from Los Angeles.

In Colorado, the new Waunita gold camp, situated in Gunnison county, is attracting considerable attention.

The annual meeting of the stockholders of the Yankee Consolidated Mining company is being held this afternoon.

Will C. Higgins, editor of the Salt Lake Mining Review, will leave tomorrow morning with his family for a week's outing near Alta.

The shipments from Park City last week, as reported by the McIntosh sampler, amounted to 5,318,720 pounds, as follows: Daly-West, 3,787,000; Silver King, 1,531,720.

The third payment of $10,000 on the purchase price of the Sevier mine in the Gold Mountain district has been made to Charles Lammersdorf, the former owner.

James T. Fulton, familiar to the broker's fraternity on Second South street, has returned from Tonopah, expecting to remain here for several weeks.

Warren and Ed Loose are reported to have purchased a property in the gold camp of Bodie, Cal., for a consideration of $75,000.

The shaft at the Creole mine of Park City has reached 300 feet depth and will be continued another 100 feet before cross-cutting.

E. W. Griffith returned Saturday evening from a trip to Tonopah, very much pleased with that camp. He has bonded the Sapho group of claims near there upon which he intends to promote a company.

Morris Dusseldorf, who formerly conducted the management of the Comstock mine at Park City, has recuperated from his recent illness sufficient to be released from the hospital.

Frank A. Van Patton, who has been the resident engineer in charge during the construction of the Majestic smelter, has gone to the Imperial company and will have charge of the work at the Comet.—Milford Times.

Load after load of machinery and supplies for the Johnny are arriving daily and it will now be but a short time until a great deal more activity will be going on around that property.—Stateline Crawle.

The Mammoth company of Tintic is marketing ores at the rate of 1,500 tons per month. The second class product, which is left in the mine at the present time, it is said, will average about $12 per ton. Negotiations for more favorable smelter charges are still pending.

A Nevada paper says: Curtis L. Knight of Salt Lake City, United States mineral surveyor, has been engaged some weeks surveying for the Old Imperial Mining company, Cherry Creek, and left on Tuesday to do some work for the Grand Deposit company at Muncy.

Abe Fartheringham, one of Milford's well known citizens, has unearthed an old slag dump in the Beaver valley bottoms in which he finds values averaging about $100 to the ton. The slag was deposited there years ago, before the science of smelting ores was as well understood as it is today.

Judge Morris Sommer, one of the directors, confirms the report of a strike of considerable importance in the Steele Con. mine of Park City. The ledge encountered is well defined. The pay streak along the hanging wall assays away up in gold, while it is thought the entire ledge will average very well.

At Pilot Knob the Giroux Consolidated company has a force of men at work cutting out for a station on the 450-foot level, and are making preparations for the commencement of sinking the Morris shaft below the 200 level, for the purpose of still further developing the large body of copper sulphide ore found in that property, which, coupled with the showing in the Giroux shaft on the 350-foot level, makes their company the possessor of one of the biggest copper mines in the state.—White Pine News.

An Ely, Nev., paper says: At the McKinley company's Saxton drifting from both the 300 and 500-foot levels is making rapid headway into new territory, with indications favoring the existence of large copper ore bodies in the immediate future. In the Jupiter shaft the company is experiencing some difficulty with bad air in the drift from the 200-foot level of the shaft. Some very good gold and copper ore has been taken out here in the past two weeks, and still the vein continues in the same character of ore.

Superintendent John Rhodin reports excellent progress being made on the American Flag. Good looking ore was cut in the shaft at a depth of 660 feet, and great things are expected when the vein is explored. Mr. Rhodin says cross-cutting will commence when the 700 level is reached, and stoping of ore will shortly follow. A force of men are also at work in the shaft in the Thunderer tunnel, where the prospects are very encouraging. The American Flag is all right and will surely be one of our future producers.—Park City Record.

Timbers are now being put in place on the 2,000 level of the Ontario, on which will be installed a compound duplex pump, which will be in readiness in case of emergency, should a large volume of water be cut and prove difficult to handle. The pump is one formerly in operation on the 1,300 level and has a capacity of at least 1,000 gallons a minute. Bunches of ore are being cut in both drifts as work progresses on this level, and quite a large quantity has already been raised and is being stored for the new concentration.—Park City Record.

The Naildriver has reached the tunnel level and will now drift north to connect with the face of the tunnel—a distance of 110 feet. When connections are made it will afford perfect ventilation and also enable the miners to go to and from their work during the bad winter weather. Ore will undoubtedly be encountered in running this drift, but cross-cutting or stoping will not be commenced until the present shaft is sunk to the 700 level, which will be pushed as fast as possible. When this point is reached, all energy will be devoted to uncovering the ore bodies and making the Naildriver a big producer—which it is certain to become.—Park City Record.

THINGS TO EAT.

What it Costs Today to Get Them—Prices in Detail.

Changes in the local markets continue to be light. There is a slight decline in flour as a sort of prologue to a heavier move in that direction later on when the new wheat crop begins to come in. Oranges are on the rise, cherries are becoming scarce, but local apples are showing up, noticeably from Utah county. There are some slight changes in the fish market. As some classes of fish go out, others take their place, and notwithstanding this distance from sea water, fish arrive in good shape.

STOCKS MOVED DOWNWARD

Traders Offered the Pacifics Very Freely.

WESTERN PROFITS OFF.

General Market Was Almost Lifeless—Everything Showed an Inclination to Yield.

New York, Aug. 3.—Prices were inclined to yield in the early dealings. Rock Island, Atchison and Union Pacific fell off fractions, but there were no offerings of consequence elsewhere. A few advances of note occurred in the inactive quarter, including 4½ in Minneapolis, St. Paul & Salt Ste Marie preferred and 1½ in Realty preferred, Corn Products preferred and North American. Kansas City Southern declined 1½, and Minneapolis, St. Paul and Sault Ste Marie 1. Dealings in stocks during the forenoon were the smallest of the year and prices did not move perceptibly except in a few cases. Metropolitan securities rose 2%, New Haven 2 and American Woolen 1½. Virginia-Carolina Chemical lost 1⅝; rubber preferred a point and Realty preferred lost its rise.

Bonds were dull and irregular at noon. Traders offered the Pacifics more freely and lowered Union Pacific 1¼ to 73¾. Western stocks generally sold off additional fractions and there were losses of 1 to 1½ in Sugar, Ice preferred and Railway Investment preferred. Pullman and Tennessee Coal were fifted a point.

Missouri Pacific became more prominent in the downward movement and lost ¾, making the second only of the representative stocks in which the day's movement got near a point. Minneapolis, St. Paul & Sault Ste Marie preferred regained 2½ and Leather preferred lost a point. The general market continued almost lifeless but was somewhat firmer at 2 o'clock.

LIVE STOCK.

CHICAGO.

Chicago, Aug. 3.—Cattle—Receipts, 8,000, including 2,000 Texans, 400 Western. Steady to strong. Good to prime steers, 5.00@5.60; poor to medium, 3.75@4.90; stockers and feeders, 2.50@4.50; cows, 1.25@3.30; heifers, 2.00@4.00; canners, 1.25@2.70; bulls, 2.00@4.00; calves, 3.00@6.00; Texas fed steers, 3.00@4.50.

Hogs—Receipts, today, 35,000; tomorrow, 30,000; left over, 3,400. Steady to strong. Mixed and butchers, 4.90@4.45; good to choice heavy, 5.25@5.30; rough heavy, 4.50@5.00; light, 5.25@5.65; bulk of sales, 5.00@5.25.

Shepe—Receipts, 18,000. Sheep and lambs strong. Good to choice wethers, 3.60@3.90; fair to choice mixed, 2.75@4.50; western sheep, 3.00@3.50; native lambs, 3.25@6.25; western lambs, 4.00@6.00.

KANSAS CITY.

Kansas City, Aug. 3.—Cattle—Receipts, 7,000, including 3,000 Texans. Strong to 10c higher.
