Lehi, July 18.—Since the Sugar company acquired the Saratoga hot springs the distributors have been a great many improvements made which has changed the look of the place very materially, and just by free the large crowds who come out of Salt Lake, Lehi, American Fork and other adjacent towns, the place is not destined to become a great resort for people.

It is the intention of the Sugar company, and the 30 odd people who thus bought it, to make of this place a best sugar beet farm, and undoubtedly next spring from fifty to one hundred acres of the choicest land of this ranch will be utilized for this purpose, as it is the opinion that the soil and all other conditions of this farm are adapted to the growing of sugar beet seed.

THE RESORT'S ATTRACTIONS.

The large bath house which was erected by John Sharp is capable of accommodating 150 bathers at a time, and the mineral water from those springs being so invigorating, many people remain at this place weeks at a time taking a bath every day.

Special care will be done that is possible to make it pleasant for those wishing to spend an evening there.

Another very attractive feature, the resort is located right on the west shore of Utah lake, and a large pier is now being built out into the lake and a number of row boats and a large sailing yacht capable of seating twenty people have been secured, so those who wish boating can take a spin on Utah lake.

Right north of the bath house a large pavilion is to be prepared, and the manager of the resort is negotiating with two ball teams, who will undoubtedly be the very best future play at such game at this place.

The idea is to be a day resort exclusive to the springs, and it is expected that the young people and a great many others will flock to it in the future.

Very nearly every evening for the past month there has been either a baseball game or lake party down at this resort.

FARMINGTON.

Quoting Sheep Camps and Flocks from Moderate Streams.

Special Correspondence.

Farmington, Davis county, July 18.—The officers of Davis county are preparing to wage an aggressive campaign against sheep camps in Davis county, selling sheep on the highways or streams of water which are used for domestic purposes in the settlements here and which are used for culinary and household purposes.

Deputy Sheriff Hunter received word of thousand with his flock about a month ago, and gave the lads a fearful lecture to understand that he was going over to Farmington. Morgan county, so he has been informed, has had experience of that sort, and, from what we can learn, the sheep herders are not the proper water. The officers are determined to prevent this if possible, and we expect to see some fun. This particular herder, however, is under protest, he claims he is temporarily, however, adults is to have.

OUR NEIGHBORS.

IDAHO.

Weather and Crop Bulletin.

WEATHER.

Boise, Ida., July 18.—There was a rise of temperature in all sections during the week with an average of 3 degrees for the State, or a daily excess above the normal of 4 degrees. This is the most uniformly warm week of the season. Frequent thunderstorms, which caused considerable rain, occurred in many sections of the central and southwestern counties on the 9th, 10th, 14th and 15th. Damaging hail attended some of the storms and a fall of rain on the 12th damaged farm and orchard property in Nampa county (Canyon). Several good local rains from thunderstorms also occurred in the southwestern sections.

CROPS.

Many heavy local rains having occurred during the past week in the sections (southwestern mainly) where drought has been prevailing for many weeks, the tone of crop and other reports has changed. The showers visited many sections where water for purposes of irrigation is not available, some grain, hay and vegetables on dry land have been injured, and there were many fields of grain so dry farms that were cut for hay. Showers materially improved the pastures, and the grass was bounding states. There is only an occasional complaint of musty or sour hay, caused by rains. Water is abundant, as a rule, with the prospects of a sufficiency for the remainder of the season.

Harvest of the hay crop made good progress, and the first cutting is about done. Interruption from showers was experienced in Bannock county, where a second crop of alfalfa is in fine condition, and, if not injured by the rains, will yield a good crop. The Mormon Bluff, a fine crop, and vegetables are
