Filed.

THE NEW CITY JAIL.

Regarding the erection of the new city jail the committee on jails reported as follows: Your committee has given much time and careful consideration to the various plans and designs submitted by the various architects in response to the advertisement calling for competitive plans, and, while all the presentations are good in many respects and worthy of attention, we have come to the conclusion and recommend that the plan of Mr. Wm. Carroll be adopted and your committee be authorized to advertise at once for bids on his plans and specifications. We further report that the cost of the new jail shall not exceed the amount specified, viz: $25,000.

The report was adopted on the following vote:

Ayes—Beatley, Evans, Ross, Kelly, Moran, Roth, Stowell, Waddell—8.

Nays—Bell, Hardy, Earlek, Lewis—4.

Excused—Folland—1.

THE OLD FIGHT OVER AGAIN.

The committee on waterworks reported in the matter of soliciting bids for the purchase of water pipe, and submitted the following bids:

Howard Harrison Iron Company	$[illegible] per ton
Gandee M. Stone & Co.	[illegible] per ton
Morris, Tyler & Co.	[illegible] per ton
Moshe Bros.	[illegible] per ton

All based on delivery on cars at Salt Lake City for the federal tax equal to a rate of [illegible] of a dollar and equal to the tax of [illegible] cent per pipe.

Bids were solicited from four other pipe concerns, but they declined to make a proposal. The committee recommended that the pipe be purchased from Rhodes Bros., as they were the lowest bidders.

Hardy—I move that the matter be referred to the Mayor.

Moran—The Mayor told me personally that he would have absolutely nothing to do with the matter.

Hardy—I think that matter should go to the Mayor with the committee associated, with power to act.

Waddell—I think that Mr. Hardy should approbate our action. There is no use at all to make such reference as the committee and the Mayor cannot and will not agree. When they come together there is always friction.

Moran—There is one thing that always puzzles me when I come into this council chamber to meeting and it is this: Any committee excepting the committee on water works can do as it pleases apparently, but let the waterworks committee do a single thing and the Mayor will find fault. We see that other committees can advertise for buildings even when $25,000 are involved in the transaction all right. Something is wrong and you should all understand it.

Lawson—There is no mistake as to the Mayor being opposed to the work of the committee.

Bell—I know that there is no use to consult with the Mayor and therefore I am now prepared to stand by the committee in its conclusions. The pipe is needed and badly, too.

Rich—Several days ago the committee on waterworks to whom power was given to secure bids for the purchase of this pipe sent in this council chamber to open the bids, but the recollection of the old fight came vividly before us. Then, in order to be on the safe side we waited for nearly two hours before opening the bids in order that that work could be done in the presence of the mayor but that official declared that he would have nothing to do with the matter and informed the committee that if they persisted in carrying the work on he would veto the matter as soon as it reached his hands. He wanted us to understand that we were infringing on his rights. This being the case we should bear in mind that it is useless for us to do anything unless we have ten votes to carry it over the mayor's veto.

Hardy's motion was noted down after which the report was adopted on a vote of nine to two, Moore, Folland and Hardy voting against the motion to adopt.

THE DINWOODEY GRADE.

Henry Dinwoodey and fourteen others sent in the following communication:

We, the undersigned property owners of the south side of First South street between Main and West Temple streets, respectfully petition that the sidewalk grade in front of our property be allowed to remain as given us by Mr. Dinwoodey and established by the city engineer in 1889 and that said sidewalk in front of the Deseret News, Dinwoodey property and the Eagle Emporium property be changed so as to conform with said grade so established in 1889, and that the said sidewalk now existing on the north side and in front of said Dinwoodey property and the Eagle Emporium property be made to conform to said grade plus referred to at the expense of Salt Lake City, it being understood that Mr. Dinwoodey will pay his share toward the regrading and reconstruction of the same.

The committee on streets recommended that the grade be raised as suggested, and that the matter be referred to the city engineer with power to act. The report was adopted.

HUNTER'S ICE POND AD. LEGRED.

The committee on Jordan canal and irrigation reported as follows in the matter of the communication from the waterworks with reference to Hunter's ice pond, asking for instruction with reference to the damaging of City Creek by Mr. Hunter: "We have considered the matter and recommend that inasmuch as the Eighth West street canal has been permanently dammed up at Eighth South street, that there appears to be no longer any need of the Ninth West street canal from Third South to North Temple streets, the following resolution be adopted:

Resolved, That the street superintendent be and he is hereby authorized and instructed to take necessary steps to have the canal on Ninth West street filled up and and remove all obstructions and others who open said street for the public use.

Adopted.

$200 FOR HOUSE FOUR.

The special committee reported that in the matter of the complaint received from Waterworks Harney and Street Superintendent Hunter asking that they be compensated for the use of horse and car at the rate of $7 per day, that they have carefully considered the matter and would recommend that each be allowed $200 per annum, payable in monthly installments of $16.66.

After considerable discussion the matter was left on the table for one week.

TO PLANE THE AQUEDUCT.

Roth offered the following motion:

That the street superintendent be and is hereby authorized to plank in the fashion of the streets all portions of North Temple street opened adjacent to the aqueduct thereof.

Adopted.

TO LOWER A PLUGS.

Folland offered the following which was adopted:

Resolved, That the water master lower the plugs at the intersection of South Temple and Second West so as to conform to Second West street grade.

The Council then adjourned until Friday night next.

FOURTH PRECINCT STATION.

Property Owners Who Object to the New Fire House Being Erected on the Site Selected.

Regarding the location of the Fourth precinct fire station P. G. Collier and fifteen others have filed objections with the City Council as follows:

We the undersigned property owners and residents of the northeastern part of the city, hereby protest against the fire station recently ordered by your honorable body, being located on H street as contemplated by the committee, and ask that the same be located further east for the following reasons: In the section lying east on F street between South Temple and Fourth streets are upwards of forty houses mostly frame, representing an outlay of more than $150,000 which is close proximity to each other and that building is going on there at a rapid rate. A fire occurring there would be two miles from the central station and nearly one mile from the site selected, with an up hill run or walk all the way. On the other hand, in the vicinity of the site selected by the committee, the houses are mostly brick or adobe cottages, wide apart in which there would be no danger of conflagration, and in which there would be a down hill run from M street or at any point east. Property in the vicinity of the site selected can be simply protected from the central station and the residents of this vicinity have never asked for a fire station. The petition on which the fire station was ordered, was signed almost exclusively by residents and property owners east of F street. The location of this fire station at H street would be practically useless in the section first named and would be satisfying a special class at the expense of this city. We ask to be heard through our committee.

The Gravity Sewer System.

Editor Deseret News.

I notice in your paper of Monday, December 12, over a column of matter touching the gravity system, and by your leave would like to make a few suggestions on that subject.

In the interview with the city engineer, which you give, it seems to me that that gentleman, by implication at least, doubts his ability to decide so momentous a question as this, which he admits will cost the city if carried out $150,000, else why should he ask for the employment of an expert engineer to confirm his findings? Before the City Council decides upon so expensive an experiment as is suggested, I think myself that it would be well to employ some engineer of known ability to report upon it. I am not a good judge of engineers, perhaps, but if one may judge of the capability of an engineer who entered upon a 6-foot sewer on a street as South Temple street was a few years ago, and completed it into the roadbed that it now is, it might be safely concluded that his capacity could be improved upon. But aside from this, it seems to me that the expenditure of a large sum as Mr. Duronne seems would be too great a piece of extravagance for Salt Lake City to engage in at present. Why, for instance, should the present population of say 60,000 people be called upon to mortgage all their possessions in order to borrow $3,000 to be expended in making gravel-ones for 240,000 people who may or may not come here.

Salt Lake City has been settled fifty-five years, during which time only 60,000 people have become inhabitants, and as quite a large majority of them were induced to come here under the auspices of a boom, which it is hoped will never be repeated, it is not reasonable, I think, that the number will be increased to 240,000 for many years to come. However, desirable it may be to make pay-dirt for the health and comfort of those who are now here, prudence would seem to obtain economy in the public expenditure of money in anticipation of what a doubtful future may bring forth.

C. [illegible]

Mrs. Brown's Way.

I overheard the conversation between two well-dressed ladies on an elevated train yesterday:

"Yes, I hear they have been away all summer—up in the country."

"Did you chaperon your boys?"

"No, I did not; young people in."

"Anybody I know?"

"No, they were strangers to the city—nice people from Vermont."

Pause.

"I shouldn't think you would like to have anybody in your house during your absence."

"Well, I'll tell you." She inverted her voice. "You see, the house was full of—of—of those dreadful summer—boys, you know—and the young woman looked as cool as a pin."

Simple.

"Did she get them out?"

"I haven't seen one since I got back."—New York Herald.

Anti-Vaccination of Cholera.

In previous epidemics the value of sulphur and sulphurous acid as preventives was demonstrated, and when Koch discovered the comma bacillus he also noted that its existence was possible only in alkaline media, and that acids destroyed it. In corroboration of these findings, Hueppe, who wrote long before anything of this nature was known, records that the tissue, or lower small intestine, is the main seat of the pathological changes caused by cholera. This lower small intestine is the seat alike the and the farthest from the normally acid stomach. The large intestine, being acid, does not suffer.—Science.

From Connecticut comes a tale of a young woman who has attained the age of twenty two without being persuaded to come into contact with any human beings save her maternal and prosaic and quite cross parents.

A mouse started across the room in a North Adelaide house and a girl screamed so loudly the mouse fell over, the parlor it up it was found to have died of fright.

Liebig COMPANY'S Extract of Beef

For twenty-five years the standard for purity, flavor and wholesomeness. Its quality never varies, and it is the same today as when first put up by its inventor, the great chemist, Justus von Liebig, whose signature it bears, thus:

J. v. Liebig

It is the pure essence of most lean of selected Beef Tea, free from fat or gelatine, and indispensable in Improved and Economic Cookery.

BACK VOLUMES

OF THE

DESERET WEEKLY.

The sixth volume of the DESERET WEEKLY in the present form is now bound. A limited number of copies of these six volumes can be obtained at the Deseret News Office, Salt Lake City, in bound form at $2.50 per volume. It is the best history of current events to be obtained, and by far the cheapest, and the time is not far distant when they will be eagerly sought after by students of history, and those to be informed of the stirring events which have transpired within the past three years—the most interesting period of the history of the Latter-day Saints. Every person who can afford it should secure these volumes while they are to be had for future reference, and especially should they be obtained for every Sunday School, Improvement Association and Ward library. Apply early to make sure of getting them.
