MINING, BUSINESS AND STOCKS

MAY DAY FIRM, NEW YORK DOWN.

Tintic Stock Continues in Demand With Little Change From Last Week's Quotations.

SALES OF BUTLER - LIBERAL.

Bingham Favorite Stiffens Slightly—Victoria Bought at $2—Closing Quotations and Sales.

Tomorrow, being election day, there will be no session of the mining exchange. Calls will be resumed as usual on Wednesday morning.

Notwithstanding the political campaign now drawing to a close has a tendency to detract interest from mining stocks, the brokers operating on the Salt Lake Stock and Mining Exchange did considerable business this forenoon.

May Day did not move very much either way and the quotations show it to be about where it was yesterday. New York Bonanza came into the pit in a tottering condition and it failed to recuperate: instead, it went lower; the stock sinking to 13½ cents on the open board. While Consolidated Mercur failed to participate in the sales it remained firm in the bidding. Daly-West offered at $13, found no takers. Butler-Liberal strengthened considerably, while Tetro continued weak. Uncle Sam Consolidated was not in demand to any extent, only one lot of 500 shares changing. Victoria, offered at $2, had no difficulty in finding a taker. For Wabash 24 cents was bid; it was offered at 35 cents. The latter price was reported bid for it later on the curb.

The closing quotations and sales were:

AS A SALT PRODUCER.

Utah Ranks Sixth Among the States—Work of Geologist Eccles.

Washington, Nov. 6.—Great Salt lake as a salt producer has always been a theme that enlists interest. Edwin C. Eckel of the geological survey has passed some time there in the study of the industry. He finds that salt manufacture from the waters of the lake began with the arrival of the "Mormons" in 1847. The only salt harvested at first was that obtained from evaporation during the summer of the water contained in little lagoons, or natural basins, along the shore of the lake. About the year 1860 dams were built to hold large quantities of water in low places for evaporation. These ponds were flooded in the spring and the salt deposited durng the summer by solar evaporation was gathered into piles along the banks and carried over from one year to another. About this time the chlorination process for the reduction of silver ores was discovered, and the demand for milling salt increased very rapidly. The output for all purposes reached a total of 50,000 tons in 1890, whereas not more than 500 to 1,000 pounds were gathered in 1848. At present Utah ranks sixth among the states as a salt producer, so far as quantity is concerned, and fifth in the value of the product. The production has increased from 96,760 barrels in 1880 to 417,501 barrels in 1902.

The brine pumped from Salt lake carries more than 20 per cent of saline matter, and is, therefore, free from calcium sulphate, which has been deposited naturally at an earlier stage in the evaporation of the lake water. Great Salt lake is but the remnant of an immensely greater body of water, called Lake Bonneville, which was reduced by evaporation to its present size, while at the same time it became a highly concentrated solution. The water of Great Salt lake has varied considerably in its degree of concentration, even during the comparatively short period that has elapsed since the settlement of Utah. If the records can be trusted, it was at its point of maximum concentration in 1850. rom that date until some time in the '70s the lake gradually became fresher, reaching its least recorded concentration in 1873. A reverse process then set in and the lake has now alomst reached the concentration pont of 1850.

JUMBO DIFFICULTIES.

A Receiver May be Appointed for Goldfield Property.

According to late advices from Goldfield, the fight between the members of the board of directors of the Jumbo Mining company, is likely to result in thte appointment of a receiver.

A letter has been sent out by H. C. Parrett to stockholders asks them to join him in resorting to the courts to straighten out the affairs of the corporation. The circular contains the following:

"To the minority stockholders of the Jumbo Mining company of Goldfield, Nev.: I am a stockholder in thte above company and have come to Goldfield to look after various mining interests. I have casually investigated present conditions governing the Jumbo mine. I find that certain lesses expired on Oct. 31 and that certain officers of the company not only participated in the profits derived from said leases but that a new lease has been made on perhaps the richest part of the mine to certain officers and ex-officers, wherby they divide 75 per cent of the income from said lease among themselves.

"It is reliably estimated that within the next two months they will take out thousands of dollars, which rightly belong to the stockholders, and by reason of this and other conditions that prevail, incinding internal trouble in the management, the stockholders are being deprived of their rights and their insterests are bing sacrificed.

"If the minority stockholders will cooperate with me, I will take the initiative and bring this matter before the Federal court of this district, and ask, not only for an injunction restraining these officers and those interested with them from operating this lease, but to give an accounting of the money received by them under the fomer leases, and also ask for a receiver to look after our interests.

"When this notice reaches you by publication, or otherwise, please communicate with me at once at Goldfield as to whether or not you are willing to come in and bear your prorata share of the expenses, whichh will not be large on any one. I am willing to contribute my share of said expense and will freely give my time and attention to the prosecution of the suit; having already spent considerable time and money with reference to same, but do not feal justified in bearing the entire burden. I shall therefore expect every stockholder to contribute in porportion to his holdings, which will be nominal for each shareholder.

"Let me hear from you at once."

THE OQUIRRH-BINGHAM.

Good Showing of Copper in a Tunnel Now Being Run

At the Oquirrh-Bingham property in Bingham, Supt. H. A. Brown is working a small force of men in driving a tunnel to cut some cross fissures which, he believes, will turn out to be productive of ore of a good grade. A good showing of malacite and asurite of copper is coming in the face of the tunnel.

The mine is owned pinaplly by Chicago parties.

MINING IN MONTANA.

Edward B. Jones Working the St. Julien Mine at Chico.

Edward B. Jones, who is managing the properties of the St. Julien Mining company at Chico, Mont., has returned from the north, having come down in time to participate in tomorrow's election.

The property is equipped with a good mill.

Since his arirval Mr. Jones has received a message to the effect that the St. Julien ledge, towards which he has been driving a tunnel, has been encountered and that it has a width of from six to twelve feet. The general average of the vein, Mr. Jones states, will run about $20 in gold to the ton. About 50 per cent of the values can be saved on the plates and the balance by concentration.

A Big Underwear Special!

Everybody knows that CARTWRIGHT & WARNER'S ENGLISH underwear are the Finest Made Goods.

We have some broken lots of their Fine Wool Cashmere Shirts, 34, 42, 44, 46, 50.. Drawers all sizes from 28 to 50.

Usually Sold from $4 to $6 per garment. Special

$1.50 Each.

Siegel's

61-63-65 MAIN STREET.

PROSPERITY IN BEAVER COUNTY.

Supt. Freudenthal Bringing the Majestic Properties Out in Great Shape.

IS SHIPPING LOTS OF ORE.

President Mucklow Expected to Arrive Next Week—General Good Feeling Prevails Everywhere.

W. M. White, the civil engineer, returned from Beaver county this forenoon, where he has been for the past week on professional business. Mr. White says conditions in the southern county have not been quite so prosperous in a long time and the feeling now prevails that the country is not going to receive any more serious set backs, such as have been experienced in the past. Under the direction of Supt. E. F. Freudenthal the Majestic properties are coming out splendidly and while he is opening up some great ore bodies he is sending enough ore to market to go a long way towards keeping up the operating expenses.

"Supt. Freudenthal has been working like a beaver," said Mr. White, "and is sticking mighty close to the mines over which he has charge. He doesn't go anywhere, except around the mines, and is determined to bring the Majestic properties out on top, as he said he would do soon after his appointment to the superintendency."

About eight cars of ore are being marketed weekly. President William B. Mucklow is expected to reach here next week and probably during his stay will release information bearing on the starting of the smelter again. When he was here last he thought this would occur about the first of next year and there is every reason to believe the program will be carried out.

That the Copper Mountain mine has fallen into the hands of parties of strong financial standing there is not the slightest doubt and within a very short time it is expected this property will be one the active list. Under the right direction this mine will soon make a good showing for itself.

All around Milford much activity is in evidence. The stamp mill at the Estella mine in the Star district is doing satisfactory work, according to late advices and the whole region, in fact, has taken on an air of prosperity.

CONCENTRATES.

Will C. Higgins, editor of the Mining Review, visited Bingham yesterday.

Cashier Hayes of the Utah Copper company spent yesterday in Bingham.

Capt. T. Egan and wife, returned last night from a trip to the St. Louis fair.

The Wild Bill mine, near Stauntie, Beaver county, will soon resume operations.

A message from Captain Duncan McVichie today announced that he is still in Boston.

James A. Pollock, president of the mining exchange, returned yesterday from a trip east.

The Daily West dividend of $72,000, was posted by the directors of the company on Saturday.

J. C. Lynch returned yesterday from a trip east. While away he visited his former home in Illinois.

Secretary Frank Westcott of the Keith-Kearns mine at Park City visited that property yesterday.

'Quil Blades, salesman for the Utah Mining Machinery & Supply company, was a Sunday visitor to Bingham.

In Boston the opinion prevails that the directors of the Utah Consolidated will post a $600,000 dividend next month.

E. H. Mead, the well known mining man, visited the United Bingham and Silver Shield mines in Bingham yesterday.

D. C. Jackling, manager of the Utah Copper company, departed yesterday for Colorado, to remain until after election.

Manager Whitley of the American Smelting & Refining company is expected to return from the coast within the next few hours.

The ore and bullion settlements reported late Saturday were as follows: Crude ore and concentrates, $21,300; base bullion, $33,300.

C. C. Jones, the mining engineer, has returned from a professional trip to Idaho. Mr. Jones has some phosphate interests in the Gem state.

During the month of October the Ohio Copper company marketed 14 cars of concentrates and four cars of crude ore. About 450 tons of the former and 200 tons of the latter.

A number of local mining men visited the Honerine mine at Stockton yesterday. Among those who accompanied Manager W. F. Snyder were: W. G. Filer and L. H. Farnsworth.

Enoch Meuer of Germany, who has been making a tour of Utah smelters and mining properties, is at the Knutsford. He went to Bingham this morning to look at the mines of the great copper camp.

Charles Richards, owner of the Five Points gold mining claim, lying twenty-three miles south of Moapa, has just struck a four-foot vein of high-grade quartz carrying black hemetite of iron and coarse gold.—De Lamar Lode.

The annual meeting of the stockholders of the Balchinch Mining company was held here last Monday and the following board of directors elected: D. F. Adams, C. F. Sanchi, James Crooks, James Morgan and George Adams.—Eureka Reporter.

The new mining district at Derby, in which the rich strike was made Oct. 1, promises to develop into one of the most productive mining camps of the state. Good ledges have been opened up, running in value from $15 to $150 per ton.—De Lamar Lode.

James H. Muffet has succeeded in securing a renewal of his lease on the Creole for another six months. This property has proved a well paying proposition since Mr. Muffet started work on it, and he is still taking out ore.—Park Record.

Louis Moore, a well known Cincinnati capitalist, and president of the United Bingham Mining company, who arrived from the east last Friday, went out to Bingham yesterday on a tour of inspection. Mr. Moore is also a director in the Silver Shield Mining company.

EUREKA BRAND BUTTER

"NOTHING BUT BUTTER."

We are also manufacturing Hazelnut butter which is fancy. It is made from selected cream, best modern methods used in making it. This butter is wrapped with parchment, each pound enclosed with a parafined carton which is sealed with an outside lithographed wrapper. Ask your grocer to get it for you.

Since the first of the present month the force of the May Day mine has been increased considerably, and at the present time there are thirty-three men upon the pay-roll. The mine made a splendid record during the month of October, and will do much better this month.—Eureka Reporter.

The conflict suit brought by C. S. Vadner against the Bingham & New Haven Copper & Gold Mining company has been dismissed by Judge Lewis upon stipulation. The property involved is the area in conflict between the Complex Fraction and Center claims in the West Mountain district.

Supt. James Hickey of the Comstock returned Monday after on extended visit in the metropolis. He found everything in first class condition at the mine, and is well satisfied with the appearance of things there. He has at present no information to give out regarding the proposed improvements at his property.—Park Record.

Martin Connor and George Black, owners of the Vulture gold copper group of claims south of Goode Springs, have just received assays from ore taken from a 100-foot shaft in a seven-foot ledge showing values of 24 per cent and 56 per cent copper, running in black oxide and azurite, and from $4 to $13.50 gold per ton.—De Lamar Lode.

The flurry in New York Bonanza stock has been the sensation of the local stock exchange this week, although no definite reason for the rapid raise in the value of the stock can be given. A streak of rich galena ore was opened up the fore part of the week, and this is considered a very favorable indication by those in charge of the property's development. The work is now at a stage where interesting disclosures are looked for at almost any time.—Park Record.

Forty-nine carloads of ore were shipped from the Eagle & Blue Bell mine during the month, and Supt. James Creighton says that a somewhat larger output would have been sent out but for the fact that he experienced considerable difficulty n geting cars from the railroad companies. Sinking is now in progress, and while this work is being done the shipments of ore will not be quite as heavy as usual, but about sixty tons a day will be placed upon the market.—Eureka Reporter.

MARKET TOOK AN UPWARD COURSE

New York, Nov. 7.—The course of the market was upward on a steady absorption, with the industrials in the forc and United States Steel stocks the feature of the market. United States Steel touched 25½ and the preferred 83⅞. Steel Foundries preferred rose 6¼. Republic Steel preferred 2⅝. Pressed Steel Car and Colorado Fuel 1¼. Pipe 1½ and Locomotive 1. Chicago Great Western debentures advanced 4⅝ and American Tobacco preferred certificates 2⅝. The advance in the railroads reached 1 in Atchison, Rock Island and Norfolk & Western. With a rise of a point in Amalgamated Copper the market was firm at noon.

Bonds were firm at noon.

LIVESTOCK.

LOCAL MARKETS.

Utah laid eggs are still on the rise, as the local hens continue on their strike and refuse to "come down to business." So the wholesale price is now ranging as high as $8 per case. The wholesale price of turkeys is down to 20 cents, but the retail remains unchanged. Milling wheat is now $1.10, but wheat for chicken feed remains at one dollar. In groceries, green peppers are out of the market, but there is an accession in the shape of fresh consignments of bananas. Grapes are falling, like the "last run of shad," and will not last much longer. Fresh oranges will be in the market before long. The prices obtaining in the local markets are as follows:
