MINING, BUSINESS AND STOCKS

INGOT ATTRACTS ATTENTION AGAIN.

Important Find in Upraise One Hunred Thirty Two in Con Mercur Mine.

NEAR THE INGOT SIDE LINE.

Chances Good for Latter Develop..g Into a Mine—Ore for 40 Feet.

After a silence of many months, Ingot is displaying activity. Last week some trading was done in this stock, and upon investigation it was found that the orders came from Mercur. On Saturday afternoon one brokerage firm filled an order for $10,000 shares at 2 cents, and during the forenoon call today, another order for the same amount of shares sold at prices ranging from 2¼ up to 3 cents a share.

A telephone message from Mercur early in the day conveyed the information that the buying was due to late developments in raise 132 in the Consolidated Mercur mine, not far from the Ingot side lines. In this raise, it was stated, some important developments were made last week. Apparently a large ore body has been disclosed there, for the raise has penetrated it for a distance of 40 feet and assays show values of from $16 to $24 in the base and $9 in gold and silver in the oxidized ores. Nothing, it was said, short of a miracle, can prevent this ore going into the Ingot ground. In the past Ingot has displayed much encouragement from time to time, but developments there failed to encounter ore that could be considered of commercial value.

When Manager G. H. Dern was in the city last week he knew that raise No. 132, which is within the domains of the original Mercur company, was showing a decided change for the better, but did not release any information beyond the official family for fear that it would not pan out. Developments since however, have disclosed the fact that the discovery is important, and will be the source, in all probability, of considerable revenue to the Consolidated Mercur, and may also result in making a mine out of the Ingot.

FORENOON ON 'CHANGE.

Daly-Judge Quoted Higher—Closing Quotations and Sale.

On the floor of the mining exchange this forenoon, a total of 22,950 shares were transferred, for which the investor paid $4,028.62. No stock on the broad attracted quite as much attention as Ingot did, which has awakened from a long slumber for a spell of activity. There was a marked demand for Daly-Judge, but the bidders could not bring out a single share, although 5,77½ was bid for it. One broker offered the stock at 6.25. May Day continued in the weak condition in which it was left on Saturday. New York, starting at 42 cents, stiffened a few points. Wabash, its neighbor, which has kept the talent guessing with its series of fluctuations, closed slightly lower. Naildriver came out at 40 cents. Victoria sold at 2.00.

The closing quotations and sales were:

Cripple Creek Dividends.

Cripple Creek, Colo., Jan. 15.—The initial month of the year has started out well from a dividend standpoint. One new company, the Findlay, has already declared a dividend that will be continuous throughout the year, and the United Gold Mines company has resumed the payment of dividends. The indications are that the sum of approximately $350,000 will be distributed to shareholders of Cripple Creek mining corporations during the month. Dividends have already been declared by the following companies: Gold Sovereign, first dividend, $9,000; Portland, $180,000; El Paso, $50,000; United Gold Mines company, $20,000; Findlay and Elkton, $12,500 each. Other corporations that will distribute dividends this month are the Vindicator, Mary McKinney, Strong (a close corporation) and in all probability the C. K. and N. and Cripple Creek Homestake Mining & Milling company.

LEAD DURING LAST YEAR.

The Trust Has Almost Complete Control Of Market.

The annual review number of the Engineering and Mining Journal, which reached Salt Lake readers yesterday, contains a world of information of interest to mining men.

Of the lead situation a special article from the pen of W. R. Ingalls, contains the following:

"The lead business has been without any extraordinary features in 1904. The control of it by the American Smelting & Refining company is so firm that production can be closely regulated to the consumptive demand and price adjusted so as to get the maximum possible out of the business. This is profitable to the company, but is also profitable to the miners, who so far have escaped any such low range of prices as there used to be. This community of interest between the smelting company and the more important of the silver-lead mining companies is recognized in the long-time contracts relieves the smelting company to a large extent from the danger of competition. It has also continued its policy to centralize the smelting of lead ores and the refining of lead bullion. The independent producers, mainly in Missouri, again benefited largely by the high values ruling during the year, and the output in that producing center is still on the increase.

"At the present time the only silver-lead smelters outside of the trust between the Missouri river and the Pacific coast, are the Ohio & Colorado Smelting company of Salida, Colo., and the other smelters were already powerful bidders for certain competitive classes of ore.

"The Coeur d'Alene has continued to be the largest lead-producing district of the United States; some promising new discoveries have been reported therefrom in 1904.

"The average price of pig lead during the year under review was only slightly higher than that for the preceding 12 months. Consumption has been very heavy, the demand for electrical purposes, cables, etc., especially showing a large increase. On the other hand, production has been fairly well under control, the American Smelting & Refining company exercising its influence to maintain an equilibrium between supply and demand.

"The many changes which occurred during the year—although very often due to natural causes—at times produced serious hardship to the independent consumers; that is, those who included in the United States Lead company, which is supposed to be in the course of time the number of smelting works not controlled by the trust will increase, thus giving a new stimulus to mining operations and assuring wholesome competition.

ARE AFTER CONTROL.

Local Shareholders of Daly-West Are Recipients of Circular Letter.

It has been common talk for sometime that it is the intention of the Cincinnati shareholders of the Daly-West Mining company to take vigorous steps towards gaining control of the company at the next annual meeting. Evidence of this is contained in the following, sent out in the form of a circular letter to shareholders:

"A large number of the stockholders of Cincinnati and vicinity intend sending a committee to attend the annual meeting of this company in February. Stockholders are requested to send their proxies to the undersigned, or write him for blanks and particulars."

The letter is signed by H. S. Livingston, secretary of the committee.

REMEDY SMELTER DEFECTS.

H. C. Bellinger Now Serving U. S. Smelting Company.

Announcement has been made that Manager Fitch of the United States Mining company has secured the services of H. C. Bellinger in a consulting capacity to remedy some of the defects in the company's smelter at Bingham Junction. Mr. Bellinger has had charge of the re-construction of the Yampa smelter at Bingham and is recognized as being one of the foremost smelter experts in the country. Mr. Bellinger will continue to serve the Yampa company, he only dividing his time in order to convenience the management of the United States.

SO. COLUMBUS ANNUAL MEET.

Company Has Expended $15,112.93 On Its Aita Property in Past Fifteen Months.

DRIVING THE TUNNEL AHEAD.

Two Hundred Feet More Will Take It To Ledge—This Can be Done in Sixty Days.

The annual stockholders' meeting of the South Columbus Mining company was called to order during the forenoon and, after the reading of the financial statement by Secretary A. E. Snow, an adjournment was taken until this afternoon.

Since Oct. 7, 1903, the company has expended in the development and equipment of its mine at Alta the sum of $15,112.93. Of this amount, $8,500 was expended in mine development. The treasury contains a small balance. The company has a large asset in the treasury stock unsold, which will be placed on the market.

An official of the company stated this morning that owing to the company's inability to get power sufficient to keep its drills in operation constantly, coupled with the hard rock encountered in the tunnel, progress has not been as rapid as the management anticipated would be the case. Power is obtained from the Columbus Consolidated, which, owing to the scarcity of water, has not had very much power to spare after keeping its own properties supplied. The tunnel is now about 800 feet in length.

It will require about 200 feet more tunneling to reach the objective lode, where the company expects to get marketable ore. It will take possibly 60 days to reach this point.

A new board of directors will be chosen at the meeting this afternoon.

TINTIC MINING NEWS.

Godiva Mine May be Equipped With Milling Facilities.

Special Correspondence.

Eureka, Jan. 14.—Major Dillon and John Maloy have just completed 30 feet of tunneling on the Hobson group of claims, located in North Tintic. The property is owned by James Weldon, John Kirbey, William Ball et al.

The work of cutting a station on the 800-foot level at the Eagle & Blue Bell mine has been completed and a drift will be run a distance of 150 feet to tap the main body of ore. The shaft will be sunk from the 800 to the 1,000 level, where another station will be cut.

A load of good ore is loaded and ready for shipment from the Hope group, near Silver City, by Messrs. Juch and Osborne, who have a lease on the property. A fine body of ore has been opened up in the mine and the prospect of the leasers making a splendid stake are very favorable.

Supt. C. W. Jones of the Bonanza mine, located in West Tintic, was in Eureka this week, and reports everything in a flourishing condition there, and at adjoining properties. The main drawback in that section is isolation from the railroad, necessitating a long haul. The proposition of erecting a mill to handle the ores is meeting the approving of the property owners. There is any quantity of low grade ore which could be made profitable by the mill.

Assessment work is being done one the unpatented ground of the Raymond Mining company, just north of this city.

A new compressor will be installed at the Eagle & Blue Bell mine the latter part of this month.

The Gemini Mining company has practically decided to install two large pumps to be used in carrying the water from the lower levels of the mine. One of the pumps will probably be installed on the 1,000 level and the other on the 1,600 or 1,700 level.

The Godiva Mining company is considering the advisability of erecting a mill for the reduction of the large ore bodies in its property, of which thousands of tons have been blocked out, in addition to the large tonnage on the dump. The mill, if built, will be similar to that of the Uncle Sam Mining company.

J. A. McVichie, brother of Capt. D. McVichie, was in Tintic Thursday, making an examination of some valuable mining property.

Sheriff James B. Whitehead will leave for the Spring Creek mining district to conduct a sheriff's sale of some mining property, located near Fish Springs.

Manager J. E. Darmer and R. L. Andrews made an extensive examination of the working of the May Day mine the early part of the week and reported everything in fine condition.

Leasers in the Gold Blossom mine, situated in the northeastern portion of the district, are said to have struck a new body of galena ore the rst of the week. The ore was found in a tunnel being run under the old workings. Rich ore was shipped from this property during the tarly days of the district, but that section had been neglected of late. The new find has awakened an interest in the claim owners in that vicinity and prospects are being prepared for active operations.

Some fine mineralized quartz was taken from the property of the McKinley Mining company this week, and the prospects of opening up good ore grows brighter with every shot.

The ore shipments from Tintic are lighter this week than for several months, only 83 carloads being sent to the smelters. The following mines furnished the ore:

Carisa, 1; Grand Central, 3; Mammoth, 5; Victoria, 2; Victor, 2; Gemini, 10; Centennial-Eureka, 43; Bullion Beck, 4; Eagle and Blue Bell, 6; Godiva, 1; Uncle Sam, 1; Yankee Con., 2; May Day, 1. Total 83 carloads.

CONCENTRATES.

A car of E. & F. ores reached the market today.

Ten cars of Tonopah ores are at the samplers today.

The average New York price of lead during 1904 was $4.309 per 100 pounds.

W. C. Thomas of the Newhouse staff is in the city today from Newhouse.

Captain Henry Stern, president of the Yuma Smelting company, has arrived from the east.

Supt. E. F. Freudenthal of the Majestic Copper Mining & Smelting company is in the city today.

The $450,000 dividend of the Utah Consolidated Mining company is scheduled for distribution today.

President William B. Mucklow of the Majestic Copper company expects to leave for the east tomorrow.

J. A. Vandemoer, Denver manager of the Engineering and Mining Journal, is in the city on a brief business trip.

The annual meeting of the shareholders of the Silver King Mining company is scheduled for this afternoon at the company's office in Park City.

T. A. McIntyre and company, New York representatives of James A. Pollock and company, announced today that the December copper output from the Green Consolidated of Arizona was 6,905,569 pounds, which was sold at an average of 15.12-100 cents per pound.

J. A. Jacobson has returned from a pilgrimage to Nevada, where he has been on a bonanza chasing expedition. While away Mr. Jacobson looked over the Bullfrog and surrunding districts and finally located a copper property not far from Sodaville. He will remain here about a week or 10 days, when he will return west again.

LOCAL MARKETS.

In today's local markets there has been a slight advance in corn and oats, and a fall in the prices of oranges, and a weakening in the wholesale price of eastern eggs. Otherwise there are no changes of note, and ruling prices to day are as follows:

A DIFFICULT POSITION.

The Rev. M. A. G. Himalaya, whose sun machine has been one of the features of the St. Louis fair, was talking the other day about the troubles of the St. Louis aeronauts.

"My friend," he said of one of the aeronauts, "was placed, as it were, on the horns of a dilemma, for on one side was the peculiar construction of his balloon, on the other side were the peculiar rules of the committee.

"My friend's plight resembled," said Father Himalaya, "the plight of a certain clergyman in Lisbon. This clergyman, in the middle of a sermon, suddenly paused. He looked about him thoughtfully. Then he said in a strange voice:

"'Now, my beloved brethren, I find myself in a position of some difficulty; for if I speak too low those at the farther end of the church will be unable to hear me, and if too loud I shall awake our honorable fellowtownsman, Don Alfonso Gonzales.'"

STOCKS DISPLAY GOOD STRENGTH.

At Opening Majority of Them Were Higher and Also Were Active.

HEAVY DEALS IN THE PACIFICS.

Various Specialties Bid Up Vigorously, Particularly the Metals.

New York, Jan. 16.—The majority of stocks today started higher than on Saturday, but there were a few important exceptions, including Pennsylvania, B. & O., St. Paul and Rock Island. Business during the first hour was very active, especially in Union Pacific and Southern Pacific. The steady absorption of thousands of shares of these leaders had an inspiring tendency on other stock and the entire market responded sharply. Stocks identified with iron and steel trade made a good showing. The principal advances were St. Paul, Colorado Fuel, Smelting, estinghouse Electric 1; Union Pacific, Pressed Steel Car and Duluth South Short—Atlantic 1¼, and Amalgamated Copper 1⅝. Northern Securities on the curb sold up to 148. Realizing sales became effective toward 11 o'clock and the entire market weakened. Amalgamated Copper and St. Paul gave way a point. Union Pacific sagged below 120, Union Pacific met pressure above 120, but contested it and got up to 120½. The general list showed some hesitation, especially the coalers and eastern railroads. B. & O. was carried down a point. Bonds were firm at noon.

Missouri Pacific, Saulte Ste Marie, Norfolk & eWstern preferred and Union Pacific preferred rose 1.

Various specialties were bid up vigorously at intervals, particularly the leading metal stocks. United States Steel preferred was lifted to 95. The railroad stocks were rather quiet around midday, but were ruling well up to the best.

Stocks were under pressure during the greater part of the afternoon. Practically all of the rise in Union Pacific was lost and Southern Pacific was driven below last weeks close. Des Moines and Fort Dodge lost 2. Prices stiffened again before 2 o'clock.

LIVESTOCK.

CHICAGO.

Chicago, Jan. 16.—Cattle—Receipts, 32,000; market 10@15 cents lower. Good to prime steers, 5.65@6.25; poor to medium, 3.70@5.40; stockers and feeders, 2.25@4.25; cows, 1.25@4.25; heifers, 2.00@5.00; canners, 1.25@2.50; bulls, 2.00@4.00; calves, 3.00@7.00. Eggs—Strong. Western fancy sellected, 31; do, average best, 30.

THE BETTER COURSE.

The Rev. Heber Newton was educated at the University of Pennsylvania, and a Pennsylvania man said of him the other day:

"Newton, I remember, came back one October from a walking trip in high glee. He had a story to tell us, a story that appealed to him.

"It seems that on his walk he had put up the second night at a farmhouse. The farmer appeared to be a rather gay dog. He talked about beer, cards, cock fights—subjects that Newton disliked. Finally, after supper, as he finished his pipe by the kitchen stove, the man said to his wife:

"'Mary, I am goin' down to the tavern. If I ain't back by 10 o'clock, don't wait for me.'

"'No, I won't. If you ain't home at 10 o'clock I'll come for you,' retorted the wife, compressing her lips in a grim way."

UTAH, IDAHO, THE WORLD.

Three new maps, just issued, Utah and Idaho on one side, the World on the reverse side, including population of countries and towns according to the 1900 census, with a brief sketch of every country in the world. Size 27x31½ inches, value 75cents; sent to any address for 25c. Address Deseret News Book Store, Salt Lake City, Utah.

TEA

Not 1 in 1000 who buy Schilling's Best wants the money.

Schilling's Tea is a good foot-rule to measure.
