# MINING, BUSINESS AND STOCKS.

## MINING ACTIVITIES IN TINTIC DISTRICT

**Centennial Eureka Pushing Its Big Tunnel—Eagle and Blue Bell Will Resume Sinking.**

(Special to The News.)

Eureka, Nov. 20.—With the completion of the big 5,000-foot tunnel which the Centennial Eureka mine is running, next April, some important changes will take place at this mine. The company will purchase and install a big power plant for the operation of pumps, compressor and cars which will be used in the tunnel, and this power plant will be located on the ground which the mining company recently purchased near the entrance to the tunnel. The carpenter shop, office and other buildings will probably be moved from the mine and rebuilt at the mouth of the tunnel. The tramway will be dispensed with, and a great many other changes will be made. Already over 600 feet of tunnel work has been done.

Most of the Tintic mines have paid the incorporation tax and it is estimated that when they are all through with the payment of the tax, on Dec. 15, that they will have furnished a large amount of the $70,000 paid into the state treasury as the result of this tax.

Diamond drills for the Raymond-Illinois arrived this week and are now being installed in the mine. These drills will be operated by compressed air and will be used in sinking from the 1,500-foot level.

E. W. Redmond and W. H. Moeller have completed the assessment work for the Cuba claim in North Tintic, and Mr. Moeller is now doing the annual work on the Pioneer and Star claims, which he owns and which are situated near the Dagmar, also in the North Tintic district.

The Dragon Iron mine at Silver City resumed the shipment of ore the early part of the week, the output going to the United States smelter. The mine shipped 15 carloads this week under the new contract and it is understood that the output for weeks to come will be larger. With this mine it is just a question of how much iron ore the smelter can use, as the mine is able to furnish almost any amount.

The Montana property in the eastern part of the district has reached a depth of 195 feet in its shaft, and the company will go a depth of a few hundred feet further before any cross-cutting will be done.

The Eagle & Blue Bell will be sinking again within a day or so. The engine has been installed on the 1,000 level, and the sinking will be started at the 1,100 level and continue to the 1,200 level. In the property splendid ore deposits have been recently opened up in the lower levels, and increased shipments will no doubt be in order.

At the Southern Swansea near Silver City work has again been taken up. It is thought that the ground contains the south extension of the Swansea ore vein and while the property was being worked the early part of this year a stringer of ore was encountered. At this time drifting is being carried on both north and south upon the vein at a depth of 140 feet.

### COLUMBUS THE FEATURE.

**Stock Erratic This Morning, but Closed Strong—Red Warrior Climbing.**

With the exception of Columbus Con., which was somewhat erratic this morning, the market was featureless on the mining exchange. Prices were generally unchanged, the only exceptions being Columbus and Red Warrior. The former opened stronger than at the close on Saturday, the first sale being made at 1.60. From this figure it fell back to 1.45, afterwards closing around 1.60. Altogether more than 15,000 shares changed hands during the session. Red Warrior, which has moved from 2.50 up to 4.00 since it was listed a short time ago, sold today at 4.05, which should be very gratifying to the stockholders.

Colorado was very active this morning, but in spite of a good demand for the stock, the market declined from the opening price of 81, to 78, advancing to 79 at the close. Tintic Central moved up a notch or two, selling from 5¾ to 6¼. Iron Blossom was traded in at 59, and Ohio Copper fell back to 5.50. Sioux was unchanged at 44 and Mason Valley was in slight demand at 1.85.

### EASTERN COPPER BOOM.

**Conservatism Advised—Greater Demand for Shares Than for Metal.**

Anent the veritable copper boom which took place in the Boston market last week, when the daily sales of copper stocks were larger than they have been at any time for months past, the Boston Financial News has the following to say:

In the midst of the excitement there is here and there a note of conservatism sounded. There have been so many wild statements made regarding the consolidation that perhaps the realisation of the fact may not bring about all that was expected. Metal authorities say that except for some exceptionally large orders in the early part of the month there has not been the great rush to buy the metal that has marked the buying of the shares.

A prominent broker says: "While a consolidation of producers to mark up the price of copper is almost an accomplished fact, the price of the metal has advanced only about one-half cent a pound in the past few weeks. It is probable, however, that while the share prices may not advance in leaps and bounds for the next few weeks, or even upon the actual announcement of the completion of the consolidation, the coppers are in for a big improvement in the next year."

### A NEW MINE WILL SOON SHIP.

Reports from Price state that coal shipments will be coming down from the Miller mine by the 15th of December. J. Jordan, of the firm of Tibbey and Jordan has a force of carpenters at work on the tipple, which will be finished about the end of the present month. There is also about a mile of track to be finished between the tipple and the mine, but the four-inch water pipe line from Miller creek to the tipple, about 5,000 feet, and the 1,600-foot pipe line to the mine are both completed. The company's payroll at the mine last month is said to have been close to $10,000.

### GOLDEN PRINCE ORE BODY.

**Streak in Fourteen-Fissure Rich in Silver and Lead.**

According to reports from Pioche the strike reported last week in the Golden Prince has surpassed the most sanguine expectations of mining men in the camp. The Pioche Record says that astonishing disclosures have been made on the 500 level, where the company has followed ore largely of commercial grade for more than 90 feet on the bedding planes. The fissure, which is said to have been cut last Monday, proved to be 14 feet wide, the entire mass being shipping ore. In the fissure the same authority states a 12-inch streak has been found which assays 129 ounces silver, 58 per cent lead and $3.84 in gold. The balance of the vein is said to contain metals to the value of $25 per ton.

### MINING PATENTS FILED.

Provo, Nov. 20.—The following U. S. mineral patents have been filed with the county recorder. For the Little Fred, Myrtle and Francelin in Tintic mining district to Yankee Consolidated Mining company.

### RICH ORE IN THE RYE PATCH.

Samples of rich looking ore from the Rye Patch property in this county have been sent to the Salt Lake officers of the company, says the Goldfield Tribune. The ore was encountered in the tunnel now being worked in at a point about 55 feet from where it is expected a big body of ore will be encountered, and the presence of the stringers from which the samples were taken is taken by the management as an indication that the deposit now being driven for may be struck sooner than was anticipated. The tunnel is now in over 600 feet, and will cut the ore at a depth of about 280 feet from the surface. Officers of the company say that plans are being formulated for the development of the Ry Patch on a more extensive scale than heretofore.

### COPPER STOCKS SOARING.

**Amalgamated Leads List With Gain of $24,000,000 During Month.**

(Special to The News.)

Boston, Nov. 22.—A forcible illustration of the effect of the proposed consolidation of copper interests on copper and smelting stocks is given in the following table, which shows the rise in a number of the leading stocks during the past month. The total appreciation of the stocks named is more than $93,000,000, and of this enormous sum it will be seen that Amalgamated has gained $24,717,674. The figures are as follows:

| | Shares Outstanding. | Appreciat'n. |
|---|---|---|
| Amalgamated | 1,532,879 | $24,717,674 |
| Anaconda | 1,200,000 | 10,650,000 |
| North Butte | 400,000 | 4,550,000 |
| Butte Coalition | 1,000,000 | 6,625,000 |
| Cumberland Ely | 1,200,000 | 2,437,500 |
| Nevada Con. | 1,434,881 | 7,891,845 |
| Giroux | 1,500,000 | 4,500,000 |
| Greene-Cananea | 2,322,500 | 8,709,375 |
| Inter. Smelter | 100,000 | 2,500,000 |
| Utah Copper | 734,000 | 8,624,000 |
| Utah Consolidated | 299,980 | 1,312,408 |
| Calumet & Arizona | 2,000,000 | 2,300,000 |
| Sup. & Pittsburg | 1,500,000 | 4,312,500 |
| Am. Sm. & Ref. Co. | 500,000 | 4,250,000 |

### CONCENTRATES.

One car of machinery arrived two weeks ago for the London and San Juan Oil company and has been unloaded and started to the Bluff oil fields, says the Dolores Star. More machinery is expected.

A Salt Lake man with some local help is doing some assessment and development work on his company's gypsum claim four miles southeast of Salina, says the Salina Call. Some surveyors were recently there and went over the great deposits and every indication points to a mill being built there soon. Eastern capital is being interested there and something big may be looked for soon.

Walter Fitch, president of the Chief Consolidated, reports a splendid condition of affairs existing at the mine in Eureka.

The old Mammoth mine on the 2,100-foot level, is reported to have struck a streak of ore going about $500 in gold to the ton.—Mammoth Record.

The Knight smelter will be able to start up again on account of their interest secured in Nevada mines where ore of a desirable quality exists.—Mammoth Record.

Samuel Newhouse is expected back from New York this evening.

The only active stock among the unlisted on the open board this morning was McDonald Ely, 600 shares of which changed hands at 35.

Besides the teams of the Judd-Lund-Olson company and the Pioche transportation company several Panaca teams have been pressed into service in hauling ore from the Prince Con. to the railroad for shipment to the United States smelter in this valley. Before the end of the week the company expects to be shipping close to 50 tons of ore a day.

WILL SELL

Will buy Elk Coal shares.

### M'DONALD FIRM LOW BIDDER.

There were only two bidders for the contracts at Fort Douglas for officers' quarters and quartermaster's storehouse, which were opened Saturday afternoon, they being Atkinson & Co. of Colorado Springs and A. & J. McDonald of this city. The latter was the low bidder, their figures being $14,575 to Atkinson's $14,665 on the officers' and $17,775 to Atkinson's $17,815 on the storehouse. The results were sent to department headquarters at Denver, and the awards are expected in a short time, so that construction work may begin.

### FACES TWO CHARGES.

**Furey Must Answer for Robbery and Grand Larceny.**

John Furey, who was arrested by Patrolman Emil Johnson a few days ago, faces charges of robbery and grand larceny filed against him by County Attorney Job F. Lyon, in connection with the holdup of Finch's cafe, Oct. 12. Furey denies that he had anything to do with the holdup, and claims that he can prove an alibi. He was released from the state prison Oct. 8, just six days before Finch's cafe was robbed, and he says that he can prove that he was with friends at the time the holdup occurred. Joseph Sands, head waiter in the safe, has identified Furey as one of the holdups.

### OVERTAKES CLEVER FORGER.

**Chase Across the Continent Lands Garrett in Los Angeles.**

After a chase that extended back and forth through the southern and eastern states and then clear across the continent, Granville C. Garrett, alleged to be one of the cleverest forgers that ever fooled the banks of Washington D. C., and other cities, was captured in Los Angeles a few days ago, and is now on his way back to Jacksonville, Fla., in custody of Deputy Sheriff J. A. Vinzent, of that city. The officer arrived in Salt Lake with his prisoner this morning. Garrett was lodged in the city prison, pending Vinzant's departure for the south.

Garrett, it is alleged, has committed a number of forgeries, including the certification of a teller's name to a fraudulent check on a Washington bank, which was cashed by the Guarantee & Trust company of Jacksonville for $316. It is said that Garrett is also badly wanted in the national capital on other charges of a similar nature.

### BUS PASSENGERS

Simon L. Wilt of Oakdale, Pa., associated with the Standard Oil company, arrived here last evening accompanied by Mrs. Wilt, enroute to Los Angeles, where Mrs. Wilt is going for her health. Mr. Wilt, who has headquarters at Pittsburg, was seen this morning at the Cullen, shortly before his departure for the coast. When asked concerning the recent order issued by the U. S. circuit court of appeals, Judge Sanborn presiding, at Minneapolis, dissolving the Standard Oil corporation, Mr. Wilt did not wilt, but smiled an expansive smile and said: "I am inclined to think there will be another chapter to that interesting story." And that is all he would say about the Standard Oil. He said this is his first trip to the west; that he thinks the country great; that it has a great future before it, and that Salt Lake City is one of the most beautiful he has visited.

### BUSINESS AND REALTY

Five hundred and fifty dollars a front foot was the price paid by W. J. Halloran and A. Fred Wey, for a lot on Third South between State and Second East street. The former owner was Frank Morgensen and the dimensions were 50 by 150. The deal was completed Saturday afternoon and is for investment.

The Aetna Real Estate investment company has sold for S. W. Morrison to O. E. Greene, at First avenue and Q street a plot 5 by 10 rods for $5,000; for Susan B. Smith to M. Griffin a house and lot on Third West for $5,800; for the Jacobs Realty company to U. U. Hiskey a lot on Auerbach avenue for $2,700.

# WOMAN IN BLACK IN CLEVER GANG

**Similarity in Two Recent Robberies Leads Police to This Conclusion.**

**MAKE BIG JEWELRY HAUL**

**Jacob A. Kahn's Home Looted Last Friday Night and Brewery's Local Branch the Night Before.**

That one of the cleverest gangs of thieves that ever operated in this city is working here now with the aid of a smooth woman for "lookout," is a conclusion that has been forced on the police by the similarity in methods discovered in several jobs within the last week.

It is almost certain, so the police say, that the same "mob" that attempted to break open the safe at the Anheuser-Busch Brewing company's office last Thursday night, is the same crowd that burglarized the home of Jacob A. Kahn, at 416 Third East street, last Friday night, when the thieves got away with $1,200 worth of jewelry between 7:30 and 10 o'clock.

The morning after the attempted safe-cracking in the Anheuser-Busch office, numerous prints of French-heeled shoes indicated that a woman had kept watch outside of the place while the "yeggs" smashed the combination knob and tried to punch holes through the safe to make the tumblers fall back. It appeared from the way that the tracks were traced that this woman had seen some one coming, and that she ran up to the window and warned her pals.

A peculiar feature of the burglary at the Kahn home is that the neighbors noticed a woman, dressed in black, standing on the walk for a long time Friday night. The Kahns returned home about 10 o'clock, after having visited some friends.

From these circumstances, the police conclude that the same gang turned both tricks, and that the thieves were aided by a woman "lookout."

The burglars who robbed the Kahn residence were quite particular as to what they took, as they rifled every room in the house, ransacked bureaus and all the drawers they could find, but were careful to take nothing but fine jewelry.

# PRESIDENT LOVETT ON INSPECTION TRIP

**General Manager Bancroft Meets Party Of New York Magnates At Pocatello.**

General Manager W. H. Bancroft of the Oregon Short Line has gone to Pocatello to meet President R. S. Lovett of the Union Pacific road, Mr. Harriman's successor, who is accompanied by Julius Krutschnitt, J. C. Stubbs and E. O. McCormick from Chicago. The trip of President Lovett is to familiarize himself with the operation of the transcontinental line and the conditions obtaining in the country along the lines of the Harriman system. It is not known as yet whether they will come to Salt Lake; but may do so after their trip to the Pacific coast.

### DEAN IS SUPERINTENDENT.

**Leaves M. P. at St. Louis to Go to Denver Officers of Rio Grande.**

Announcement is made from Denver that J. W. Dean, superintendent of the Missouri Pacific at St. Louis, has been appointed general superintendent of the Denver & Rio Grande. Mr. Dean has been with the Gould roads for many years, formerly having begun railroading with the Santa Fe. He was first a division superintendent with the Rio Grande, but in 1905 resigned to become a trainmaster on the Colorado & Southern. In 1904 he was made superintendent of the National Railway of Mexico, and in 1905 was made superintendent of the Missouri Pacific with headquarters at St. Louis. There has also been a shake up at Pueblo, where Master Mechanic Purves has resigned and J. E. Enright, superintendent of machinery of the International & Great Northern has been appointed to his place.

### SCHUMACHER A VISITOR.

**New W. P. Traffic Manager Talks of The Future of the New Road.**

Thomas M. Schumacher, vice president and traffic manager of the Western Pacific road arrived in this city Saturday evening and spent the night at the Alta club, of which he is a non-resident member. He left for the west Sunday morning. He said while here that his present trip was to settle up matters connected with the El Paso & Southwestern road of which for the last three years he has been the general traffic manager; and when this is done he will actively enter on his new duties, with headquarters in San Francisco. Mr. Schumacher says no staff appointments have been made, or will be made until after Dec. 10, intimating that no appointments are to be expected from the Denver & Rio Grande staff. He expressed marked satisfaction with the rapid growth of the city since he left the Oregon Short Line in 1905. He remarked that while the Western Pacific at present runs through a sagebrush country, the Union Pacific did the same when it was built. In a few years, this same sagebrush region will be under the irrigating ditch and made productive. Said he: "We have the track, one of the best in America; we have the rolling stock; we have the country, and we have Salt Lake at one end and San Francisco and the Pacific at the other end. What more could any road ask? The Western Pacific and the Denver & Rio Grande form a new pathway from the Atlantic slope to the Pacific coast, and Salt Lake is where the two roads meet."

### CHANGES ON RIO GRANDE.

A number of changes in Denver & Rio Grande local agencies have been made, on account of the transfer of Agent Ayle of this city to San Francisco. A. J. Cronin of Ogden comes to Salt Lake as Mr. Ayle's successor; Frank Fouts of Provo is transferred to Ogden, W. N. Mitchell goes from Springville to Provo, and W. M. Bird from Eureka to Springville.

### CHURCH FILES PETITION.

John H. Latey filed a petition in the Third district court Saturday asking that the Second Church of Christ, Scientist, of Salt Lake be disincorporated. A meeting of the incorporators was held recently and it was decided to dissolve the corporation.

# STOCK MARKET LIQUIDATING ONE

New York, Nov. 22.—After a fairly quiet opening of the stock market today there was a general outburst of liquidation due to further consideration of the decision in the federal court against the Standard Oil company. Prices in many of the more active issues fell from 1 to 2 points under the flood of selling orders.

Notwithstanding the support of banking interests manifest, the market opening prices fell steadily. Amalgamated Copper sold off 2 points from Saturday's close, while a heavy volume of selling orders in United States Steel common sent that stock off 2½. Union Pacific went off 2¼ points, while Utah Copper sold down to 61¼, a decline of 3 points from Saturday's close. Smelters fell 1 point from the close of Saturday, while Chesapeake & Ohio sold off 2 points to 88. There were fractional rallies at 11 o'clock. After a decline of 40 points in Standard Oil that stock was quoted at 660 bid and 680 asked.

There was a subsidence of liquidation toward noon and with the covering of shorts and some investment demand prices rose generally about a point from the low figures.

The market's position was animated by Reading, which on heavy buying was 4 points above the close on Saturday after the first two hours of trading today.

The disturbance in speculative sentiment due to the decision against the Standard Oil company in the government's suit, caused a feverish and irregular movement in prices on the stock market opening today. Vigorous supporting measures caused general advances in a few stocks but the majority of issues were lower under free offerings. Losses ran in American Cotton Oil and Allis-Chalmers to 1½ and Amalgamated Copper and American Telephone 1⅝. Amalgamated Copper rallied a point immediately after the opening but the general movement continued very feverish.

Efforts to hold the market during the first half hour, centered on Reading which was run up a point over Saturday's close. The general list responded only moderately and prices crumbled before 11 o'clock. General Electric, Union Pacific and United States Steel broke 2½, Amalgamated 3, Utah Copper 3¼, Southern Pacific, Chesapeake & Ohio, St. Louis-Southwestern preferred and Colorado Fuel 2 and the list generally 1 to 2 points. There were fractional rallies as the hour expired.

There were numerous rallies of a point and upward induced by the buying which developed on the break. Reading was again lifted 3 points over Saturday's close and Consolidated Gas 2¾, Utah Copper rallied 2⅞ and Amalgamated Copper 1⅝. The tone was unsteady again at noon.

Bonds were weak.

Reading continued to move upward and gained 4 points in all, which put it at the level of last Friday's close, before the Standard Oil decision came out. The rest of the list was quiet but sustained at midday rally.

Profits were taken in Reading which lowered it about a point. Other stocks also went off a fraction but there was some recovery later on a light demand.

The market closed irregular.

Support was offered when prices declined to go lower, but there was no indication of positive strength. The dealings were very dull, Utah Copper got ⅝ below Saturday's close.

## LIVE STOCK.

CHICAGO.

Chicago, Nov. 22.—Cattle—Receipts, estimated at 40,000; market 10 to 20c lower. Beeves, 3.80@9.00; Texas steers, 3.70@4.20; western steers, 4.00@7.25; stockers and feeders, 3.10@5.25; cows and heifers, 2.00@5.60; calves, 6.00@8.50.

## WOOL.

ST. LOUIS.

St. Louis, Nov. 22.—Wool, unchanged. Territory and western mediums, 24@29; fine mediums, 22@26; fine, 14@20.

## PRODUCE.

CHICAGO.

Chicago, Nov. 22.—Bullish foreign advices and unsettled weather in the northwest caused a strong opening in the wheat market here today, initial quotations being unchanged to ¼@⅜ higher compared with Saturday's close. Pit traders and commission houses were inclined to the buying side of the market which resulted in the opening advance being well maintained during the early part of the day.

The principal factor in the foreign situation was the unexpectedly light totals of world's shipments for the week, the movement being about 2,000,000 bushels less than had been estimated. This decrease in movement affected the Liverpool market which was but lower and in turn the market here. The December delivery opened at 1.09⅝ to 1.09⅞, sold at 1.09⅞ and then rallied to 1.09. May advanced to 1.09@1.09⅛ after opening at 1.08⅞ to
