MINING, BUSINESS AND STOCKS. THE THE PARTY OF T

MARKET WAS NOT SO STRONG.

Lower Mammoth Slumped to \$4:30 on the Exchange.

MAY DAY IS ADVANCING.

Ajax Was Weaker-Con. Mercur Higher-Sacramento Softer-Star Fluetuates-Yankee Con. Firm.

Business closed on the Mining Exchange today with the sale of 47,225 shares for the sum of \$25,640.50. Trading was quieter today and the sales was restricted to fewer stocks than usual. Among the features of the call were Star Con., and Lower Mammoth. The former opened at 55 and was let down to 501/2, from which figure it reacted to 551/2 on the closing sale. Lower Mammoth hit the toboggan at \$4.65 and \$4.30 at the close. Ajax evidently weakened in sympathy with Lower Mammoth. Sales were made as low as \$1 per share at the close. Con Mercur was much stronger today owing to the high quotations on the stock in Boston. Sales were made on the local exchange between \$3.50 and \$3.531/2. May Day opened at 77 and closed at 76%, while Sacramento declined to 41 but was a little stronger at the close. South Swansea was active at 64. Valeo was in better form today when it moved up to 20½. Ben Butler weakened to 11%, while Boss Tweed dropped 1,000 shares at 15. Martha Washington fluc-tuated between 16¹⁴ and 17. Yankee Con. was quite firm between 80 and 83, while West Morning Glory was traded

THE STAR CON. ANNUAL TODAY.

Report Showed the Company to be \$18,000 in Debt.

TREASURY STUCK NOT SOLD

Which Makes the Company About Even With the World-Report from the Ely Mine.

The shareholders of the Star Con. Mining company met in annual session this morning and listened to an interesting report from the president and secretary of the company. This report showed that \$73,000 had been received from the sale of ores since the present management took hold of the property on May 1st, 1900. At that time the company was in debt \$55,500, the greater part of which was due on account of a voluntary assessment made by the shareholders over a year ago. The management has paid off debts amounting to \$35,184 during the year, \$4,500 of which was due to the purchase of the Willie Gundry lode.

The company is now \$23,000 in debt, but it has \$5,000 in the treasury, which reduces the indebtedness to \$18,000. As an offset to this debt the company has 30,000 shares of treasury stock on hand, which, at present prices, makes the company practically even with the world. In the reduction of the debt from \$55,000 to \$18,000 the company has showed an earning capacity of \$27,500 in the past 11 months, which is considred a very good showing.

The officers of the company are as follows: Milan Packard, president; R. A. Deal of Springville, vice president, and A. O. Packard of Springville, secand A. O. Packard or Spring with M. retary and treasurer. These, with M. O. Packard, C. F. Packard and C. S. O. Packard, C. F. Alvactorate, C. F. Davis constitute the directorate. Packard still continues as superintendent of the mine.

President Packard, who has been very sick for some time, came to the city today for the first time in many weeks. He confirmed the reported strike on the 300 level, though it is understood that the ore is low grade. Its values are lead, silver and copper. No attempt is being made to explore the big cave on the 600, though when the company is more flush with funds an effort will be made to get under it by sinking the shaft. Mr. Packard says he will make a mine of the Star Con yet, though it will take a good deal more money to do it. He wishes now that he had not paid any money on the assessment, as he would have had a larger surplus which will be needed in the working out of the plans. The monthly expense of the company is about \$2,600. Two cars of silver-lead ore and 2 cars of gold ore are being loaded at the mine. The report is just about what was expected and it was thought it would not materially affect the stock.

LOWER MAMMOTH REPORT.

Supt. Ball Says that it Will be a Short

Time Before Ore Chute is Tapped. Superintendent Ball of the Lower Mammoth stated today that he is drifting in the vein to get under the ore chute. Such was the news conveyed to Manager Simon Bamberger today by 'phone, Copper is found in the workings but Mr. Ball says he has not reached the main ore chute though he is confident that he will catch it in a short dis-

ELY MILL EXTRACTION. To be Improved by 20-inch Screens - New Cave Struck.

Superintendent Wickham of the Ely mine at Ely, Nev., writes that he has reached the mine and finds everything moving along quite satisfactorily, though an improvement is looked for when the new screens reach the mine They were made in the city and dis-patched to the mine today. Heretofore the ore has been crushed to 15-mesh size, but with the new screens the company will crush it 20-mesh fine . A bet-ter extraction is expected by the change. The first clean-up will be on the market in a few days. It is learned that a big cave has been encountered on the tunnel level about 700 feet from the old workings. The cave is lined with ore but no assays had been made when the letter was written.

DENOUNCEMENT FAILS. Controversy Over Salamon Copper

Mines Decided.

Havana, April 11.-The controversy over the Salamon Copper Mine at Las Minas has been decided in favor of the present holders, Messrs, Gustavus mon and Hugh Reilly, of New York. The land on which the mine is situated was purchased by them in 1899. After they had expended \$2,000 in developing the property other parties claimed pos-session by an old denouncement. The courts have now decided that this denouncement did not cover the Salathis mon mine, but rather an asphalt mine in the vicinity. Work will be recommenced on an extensive scale.

Reduction in Price of Lead.

The big mining companies who tied up their output with the American Smelting company for a year or more seem to have the best of the bargain, as far as the lead output goes. The drop in the price to \$3.90 per hundred does not affect them, but it will be felt by a number of small shippers during the present season. Chances are more than even that another cut will shortly be made, owing to the excessive produc-tion. There are those who look for lead to go down to \$3.60 before long. Still it only affects the shippers who have not contracted for the output.

Value of Zinciferous Ore Dumps

The Leadville correspondent of the Denver Post says that the Gusgenheims have been offered \$90,000 for their dumps at the A Y. & Minnie, in that camp, and that it had been refused. This and that it had been refused. This gives a slight idea of the value of the hundreds of dumps in this district, which at some future day will be treated and shipped at a profit. Every year brings some improvement in ore treat-ing processes, and the time is not far distant when our dumps will be of great distant when our dumps will be of great value. With proper treatment these dumps, if the zinc can be separated from the iron, will be worth double the amount named. While they appear to

ne practically worthless, ther are mil-lons tied up in them.

A number of our prominent mining men are studying the subject. European | form at any price.

experts spent several months here last year examining the situation and figur-ing on different processes of treatment. They are chiefly interested in the zincif-

The same is true of the Utah camps, and it will cause mine owners to re-joice greatly when the successful treatment of zinciferous ores is an accomplished fact.

Syndicate to Mine Sapphires.

The new sapphire mines syndicate will in a few days resume operations at its mines near Yogo, and the managers anticipate the most successful season they ever had, although there is some reason to fear that the season may be a short one, as there is probability of a scarcity of water, says the Great Falls Tribune. Last season was the longest the company ever had, there being a good supply of water early in the year and it not freezing until late in the fall Contrary to the usual custom, the com-pany has had quite a large force of men employed during the winter pre-paring for the season's work, and the most important preparation made is the building of a line of galvanized iron pipling, in which will be caught the water as it pours from the slutce boxes. It may then be carried back and used several times in washing the gravel and

A very large quantity of the clay and gravel formation in which the sapphires are found has been exposed all winter. It is a peculiar property of this forma-tion that exposure to the air causes it tion that exposure to the air causes it to slake, rendering it easily movable. In this condition, it will go through the sluice boxes like gravel. The sluice boxes are fitted with rifles, which cause hoxes are fitted with rifles, which cause the sapphires and gravel to become separated from the clay and be held in the boxes, and the sorters may then easily sort the precious stones from the worthless ones.

MINING NOTES.

President McIntyre of the Mammoth went out to Tintic last evening.

The Carisa of Tintic reached the market today with 6 cars of ore.

Two cars of ore from the Diamond of Eureka reached the market today. The Taylor-Brunton sampler reported cars of ore from Tintic and 2 from Nevada today.

Col. E. Wall and a party of Montana gentlemen were visiting the Lower Mammoth today.

Two cars of concentrates will be marketed tomorrow from the Columbia of Bingham.

The Utah of Fish Springs has another car of high grade silver-lead ore on the way to market.

The Banner group of five claims, located in Gold Mountain district, has been sold for \$20,000. Orson Keeler and Gideon Snyder are the purchasers. An afternoon session of the Mining Exchange will be held regularly in place of the "open call" which has been

in vogue for several weeks. Some very fine samples of copper ore were seen today from the Cygnet company's property at Stockton. A trial shipment of 2 cars will shortly be on the market.

Vice President John Dern of the Con. Mercur returned today from a trip to Fremont, Nebruska, where he has many interests. He reports the winter wheat lacking well and the late grows wheat looking well and promise very good crops this year.

A big body of oxidized ore is being opened up near the Lizzle workings of the Con. Mercur. The ore carries from 36 to \$16 in gold. It occurs in the mid-36 to \$16 in gold. dle vein of the camp. Its size has not been fully determined but the faces of several drifts are in good ore.

Spokane Review: A very rich body of gold ore has been encountered in the intermediate level above the 400 foot level of the Republic mine. As high as \$1,200 per ton has been obtained. The average across the face is \$128 per ton.

Logan Nation: Attorney George Q. Rich is displaying some remarkably rich placer dirt which he recently brought down from his claim near Blackfoot. He states he will shortly begin active operations thereon, having perfected his title. perfected his title.

President Pat Ryan of the Golden Star enters a vigorous denial to the statement that the Golden Star has passed into the hands of the Kimberley crowd who previously owned almost the control. In spite of this there are some who persist in believng that the control has finally changed hands.

The case of Matt Cullen vs James Barrett, which involved the title to the Barrett, which involved the title to the Burning Moscow property in Beaver county, has been decided in favor of Matt Cullen. Barrett, who owned a certain interest in the property, tried to dispossess Cullen for certain reasons but the court did not sustain him.

Pocatello advance: A. J. Schultz of the Colorado Gold Mining company is building a dredge in the Snake river below Blackfoot. He is putting in the latest improved and modern machinery with a capacity of 2,000 cubic yards per day. The plant will be in operation about the last of May. The machinery is now on the ground waiting completion of the boat.

Manager Trenam of the Stockton Gold Mining and Milling company expects to make connection with the old workings of the Lion Con. within 60 days. The new shaft is now down about 300 feet. The company will have clear sailing when the work is done as enough shipping ore is said to be in sight to pay operating expenses.

Articles of incorporation of the Deer Articles of incorporation of the Deer Creek Mining company were filed to-day in the office of the county cierk. The capital stock is placed at \$1,000.000 in a like number of shares of the par value of \$1 each. The officers are: W. H. King resident; C. W. Johnson, vice president and J. D. Weimer, secretary and treasurer. The other directors are H. J. Twomey and J. F. Hammond. The company will develop twenty-two placer claims in Gold Mountain district, Piute county. trict, Piute county.

DECLINES AND ADVANCES.

Were Not Uniform, With Wide Fluctuations Among More Active Stocks.

Speculation Very Feverish at Times-Heavy Selling of Steel Stocks Sent Some Prices Down.

New York, April 11.-Trading during the first hour in Wall street presented the same "spotty" appearance as on yesterday. The declines and advances were not uniform and wide fluctuations were frequent among the more active stocks. In some cases, the opening advances were wiped out and important stocks, such as Northern Pacific, Burlington, Atchison, Lackawanna, Tennessee Coal, New York Central and the Smelting stocks, were from a fraction to 2 points below yesterday's close. Coincident with these points of depression material progress was made up-ward by Sugar, Tobacco, Consolidated Gas, Anaconda Mining, Amalgamated Copper and Union Pacific, Amaigamat-ed Copper rising an extreme 3% and Consolidated Gas 5½. Northwest had sold off ¼ to 199, but when it was rushed up to 212 it pulled Burlington above 192 and carried St. Paul and Rock Island 154@34 above last night. The speculation was very feverish at 11 o'clock and top figures were not well held, reactions running from 1 to 4 points in some of the active stocks. Northwest fluctuated as widely as 5 points between sales and the preferred made equally wide advances, rising 11 points over last night. Sales to realize were interrupted by occasional feeble rallies and prices fell sharply. Reces-sions from the earlier best prices were from 2 to 5 points in the stocks which made the largest gains. Heavy selling of the grangers and United States Steel stocks exerted an influence on all other stocks and prices of many sold under yesterday's close. Norfolk & Western, Mexican Central and Colorado Fuel were advanced 1@1½ in the face of general selling. Sugar was manipulated up to 1.46½ just before noon, but it had but little influence on other stocks. Bonds were active and steady.

Prices moved listlessly in the last hour. There were some recoveries, but prices of the important stocks touched the lowest of the day. Burlington sold at 187, and Amalgamated Copper fell back to 114. United States Steel de-clined 2% from the top and the pre-vanced 2½. There were some slight ral-lies but they were not well held. The closing was rather dull and weak at the lowest. the lowest.

Boston, April 10.—The American Wool and Cotton Reporter will say: The wool market is decidedly more quiet, and a very marked falling off in the volume of business is noticeable. The large consumers have apparently supplied their needs for the time being, and although quite a number of the smaller mills have been in they have taken on only small lines, the aggre-gate of which is figured at 3,608,000 pounds. This quieter condition of af-

fairs was not unexpected and is unnatural, after the enormous business previously transacted. It would have been strange indeed if such a pro-nounced activity had been longer maintained in view of the fact that the great bulk of the purchasing was for consumption. Probably not a pound of the large total given last week was

of the large total given last week was bought for speculation.

Although there has been such a marked falling off in the volume of trade, there is no weakening whatever in prices. The sales for the week in Boston amounted to 3,393,000 pounds domestics and 215,000 pounds foreign, making a total of 3,608,000, against a total of 11,485,000 for the previous week, and a total of 3,692,900 for the corresponding week last year.
