MINING, BUSINESS AND STOCKS.

BIG ADVANCE IN MERCUR STOCK

It Has Shot Forward About 75 Cents Per Share Since Saturday.

STAR CON. STRONGER TODAY

Ajax and Grand Central Are a Little Weaker – Yankee Con. and Joe Bowers Show a Falling Off.

TODAY'S METALS:

SILVER 62¼

LEAD, $4.00

CASTING COPPER 15¾

The statement of the Consolidated Mercur company published on Saturday has had the effect of strengthening the stock very materially. No sales were reported on the exchange today, but the price of the old Mercur company's stock went up to $7.10 per share in the bidding, while the stock of the Con. company was held at $4.75, with $4.20 bid.

Star Con. was stronger today probably because of the fact that the last car of ore sold brought the company something over $5,000.

Ajax was a little weaker today, selling at 49, while Daly did business at $2.20.

Grand Central dropped 100 shares at $5.10. May Day did not hold up to the price of the first sale but dropped to 44¼.

Yankee Con. was quite active at lower figures. After recording its first sale at 22¾ the stock declined to 20 flat and closed an offering at that figure with 19¾ bid.

Joe Bowers shows a falling off today. From 1¾ the stock was traded in as low as 1⅝.

Chloride Point was released on a bid of 8.

Tetro was stronger today owing to encouraging reports from the property.

ANHEUSER-BUSCH BREWING ASS'N.
Sold by all druggists.

Thousands suffer with torpid liver, producing great depression of spirits, indigestion, constipation, headache, etc. HERBINE will stimulate the liver, keep the bowels regular, and restore a healthful buoyancy of spirits. Price, 50 cents. Z. C. M. I. Drug Dept.

Take life as it comes, and make the most of all circumstances, but for a bad cough or cold, take BALLARD'S HOREHOUND SYRUP, the best known remedy for quick relief and sure cure. Price 50 cents. Z. C. M. I. Drug Dept.

TABLER'S BUCKEYE PILE OINTMENT is not a panacea, but is recommended for blind, bleeding or protruding piles, and it will cure the most obstinate cases. Price 50 cents in bottles. Tubes, 75 cents. Z. C. M. I. Drug Dept.

If you are troubled with inodorous breath, heart burn, flatulency, headache, acidity, pains after eating, loss of appetite, persistent melancholy, or low spirits. You need a tonic, a few doses of HERBINE will give you the recuperative force to remove these disorders. Price, 50 cents. Z. C. M. I. Drug Dept.

A GIGANTIC MINING DEAL.

American and English Investors to Pay 13 Million for Colorado Mines.

TAKES CAMP BIRD AT OURAY

Mammoth Making a Better Record This Month—Cash to be Paid the Miners—Items from Camps.

A dispatch to the "News" from Denver today says: The News announces this morning that Mr. Thomas F. Walsh will receive $13,000,000 for his Camp Bird mine at Ouray Colo., from a syndicate of English and American investors, headed by Alfred Beit, the South African diamond king and J. Pierpont Morgan, the New York banker.

It is said that a draft covering the first payment is now on deposit at the First National bank. John Hays Hammond, the mining expert, arrived at Ouray today to make a final examination of the mine on behalf of the syndicate and it is expected the deal will be closed within ten days.

AT THE MAMMOTH.

The Present Said to be a Banner Month—Change at Pay Day.

Bullion amounting to $6,300 was shipped East to the refinery today by the Mammoth Mining Company. The company is reported to be increasing its surplus at a good rate this month. Secretary Wilkinson says the dividend and the $25,000 pay roll are already provided for. The company's receipts therefore for about one-third of the month will go into the surplus fund which has now reached a handsome sum.

Regarding the pay roll the secretary announced today that beginning with this month the men at the mine will hereafter be paid in cash instead of checks. These checks have heretofore been cashed at the store and it has been necessary to send the money down with which to meet them. The men will hereafter receive their pay in cash which will not only be an accommodation to their but will save the secretary some work and also save the company a few dollars a month in revenue stamps.

AT THE SHOEBRIDGE.

Good Copper Ore is Found on the 525-foot Level.

The Shoebridge-Bonanza has a body of copper-iron ore on the 525-foot level, from which assays of eight per cent copper and eighteen ounces silver have been obtained. A general sample of the dump is being tested today, and if the tests are as satisfactory as the one above which was made at the mine, Col. Heffron will instruct Superintendent Carruthers to begin stoping on the body, which is three feet wide in its widest part.

The Tesora is reported to be looking very good. The drift on the 300 level in the direction of the Independence claim has been run about 200 feet on ore all the way. The ore body pinched on the 275 level some time ago, but the management has now entered a solid ore body eighteen inches wide.

COAL NEAR PIOCHE.

A Seam of Good Anthracite Coal Found at Grassy Mountain.

Coal has been discovered at Grassy mountain, about thirty-five miles northwest of Pioche, says the Pioche Record. Messrs. James Tullock and I. N. Garrison have been working out there for the last month. The coal is of the anthracite variety and is good coal. They started in on a small seam of coal that came to the surface, and sunk to a depth of about twenty-five feet, when the seam took a slight dip. This was followed down on the dip for twenty-feet further. At the bottom of the shaft, which is about six feet in width there is considerable coal being mixed with coal and clay seams the entire width. During the sinking of the shaft bunches of pure coal the size of a man's head were encountered. Mr. Tullock believes again he sinks a depth of about 150 feet that he will encounter the ledge.

SILVER CITY STRIKE.

Ore Averaging Over $3 Per Pound in the Idaho District.

Charles A. Dinsmore, editor of the Idaho Mining Journal, returned last evening from Owyhee county, having been on Reynolds creek looking at the King group of mines, near Joseph Babbington's place. While this group looks well, it is overshadowed for the moment by the latest strike in the Silver City district, from which Mr. Dinsmore has reliable information, bringing out some of the ore.

This strike was made not more than 750 feet from the War Eagle hotel, right in the heart of Silver City, near the old Potosi claim. It was made by a prospector named Dyer, who was out for Major Reed and Dr. McKenzie. The ore is a quartz, and it will average over $3 per pound, some of it running up to $16. It has created an excitement even in a town where big strikes are very common, and many others are now out looking nearer than heretofore.

Development has begun, and so far a streak six inches in width of this material has been uncovered, in a perfect fissure, and with everything denoting its permanence, not only of body but in value. Six inches of a ledge does not sound very big, but one inch of this kind of material is enough to make a number of men rich.—Boise Statesman.

AT THE MIDLAND.

Assays From the New Strike Are Very Encouraging.

Further developments at the Midland are proving the strike in lower tunnel, mentioned in these columns last week, to be of a character bordering on the sensational. There is apparently about 2½ feet of the rich gold streak, while tunnel face is all in mineral.

Assays from rich streak obtained by Manager Hal Bemis this week returned 15 per cent lead, 5.1 ounces silver, 2.7 ounces gold, 15 per cent lead, 3.9 ounces gold, 9.5 per cent lead, 3.4 ounces silver and 2.85 ounces gold; other vein matter—17 per cent lead, 5.1 ounces silver, 0.52 ounces gold; 5.6 per cent lead, 1.2 ounces silver and 0.31 ounces gold per ton. Also assays from ore now coming from upper (Damphool) tunnel show 8.4 to 22 per cent copper, 15 to 45 per cent lead, 1.4 ounces silver and 0.08 to 0.2 ounces gold per ton.

At face of lower tunnel vein matter is soft and running, so that it will take some days to fairly estimate its character. There is no doubt, however, that the company is warranted in entertaining high expectations.

Midland long tunnel has its mouth in cain canyon, a short distance above West Mountain placer pumping station. By putting in a short switch ore from it can be dumped directly into Rio Grande Western cars.—Bingham Bulletin.

Park City Items.

In its weekly resume of mining affairs in the camp the Park City Record says: Superintendent Kirby of the Daly-West was down Thursday. When asked by the writer as to the work on the Daly-West 1,400, he replied that without a survey he was unable to state just how far the workmen now were from the 1,300 ore chute, but he estimated the distance at about fifty feet, and driving steadily ahead at the present rate, only a short time will intervene until they are under the 1,300 winze. When this point is reached an upraise of about thirty feet to connect with the winze will have to be run. On the 1,400 they have now 200 feet of ore on the strike of the vein, and how much further it will extend is indefinite. Meanwhile the regular output of this great mine of the past few months is being steadily maintained, and the property looking well throughout.

Superintendent Henry Sutton at the Constellation, with two shifts of three men, is drifting on the big gold vein south from the shaft. They are in on this drift about fifty feet, and the vein matter is steadily improving in appearance. The property is looking well throughout.

Robert Parry and partners are developing the Beware, group of claims in Nigger Hollow. One shift of two men is employed. Work has been prosecuted in the tunnel, now in about 350 feet, and at present they are crosscutting the blue lime hanging wall of the King carbonate belt. The hanging wall material is getting very soft and they are evidently approaching the vein. This property is considered a valuable one.

Adam Peterson and W. H. Gray left yesterday afternoon for the Bell Mining company ground, about ten miles from Grantsville, where they expect to remain at work all winter. The property is looking well as development work proceeds, and some rock taken out last week assays $19 gold with small values in other minerals.

During the month of August the Silver King mill turned out concentrates to the amount of 1,456,180 pounds. This represents about three and one-half times this amount of crude ore that passed through the mill that month.

ORE SHIPMENTS.

Following are the shipments of ore from the Mackintosh sampler for the past week:

Silver King	1,500,000
Daly-West	1,250,000
Anchor Con.	264,000
Ontario	88,000
Barnes	33,000
California Con.	25,000
Total number of pounds	3,164,000

At the Checkmate Mine.

George H. Wyman, superintendent of the Checkmate mine at Willow Creek, Idaho, reports the new part of the mill is running smoothly, and a large amount of ore is being put through. The water supply is a little short, owing to the dryness of the season. The water is pumped back, but even with this arrangement there is not quite enough to enable them to run the mill to its full capacity. The mill will reduce 60 tons a day easily, but it does not quite reach that amount as a regular thing, owing to the water scarcity.

The company is shipping 11 tons of ore and concentrates daily. Of this 1-3 is crude ore and 2-3 concentrates. The hauling of the product to Boise keeps 17 teams busy. At one time the mill was away ahead of the teams, 2,000 sacks of ore and concentrates being piled up. The lead has now been reduced somewhat. The mine is holding out finely. There is no indication of the ore bodies becoming less valuable as they are opened, and at every point the mine retains the best appearance its has ever made.

Change in the Tetro.

The Tetro Mining company's stock was stronger on the exchange today owing to reports of a change which is occurring in the company's ground in Tintic. An officer of the company said that pay ore has not been encountered, but low values are being encountered and the outlook is considered very encouraging.

MINING NOTES.

A decline of ⅛ of a cent an ounce is recorded today in silver.

The May Day has three cars of first-class ore at the sampler.

The Utah of Fish Springs is loading another car of ore at Oasis.

The Carisa of Tintic reached the market today with a car of ore.

The Uncle Sam of Knightsville was on the market today with five cars of lead ore.

The Taylor-Brunton sampler reported six cars of ore from Tintic and one from Nevada today.

Another car of high grade copper ore has been shipped from the Mammoth mine at Tintic.

A shipment of several hundred pounds of cyanide product was reported today from the Chloride Point.

The Conklin sampler reported seven cars of ore from Tintic and two lots from Bingham today.

A lot of concentrates and a lot of crude ore were on the market today, from the Northern Chief at Bingham.

Five cars of crude ore and two cars of concentrates were to be sold today by the Mammoth Mining company.

A carload of concentrates was marketed today from the Glasgow and Western company's Nevada properties.

The rich car of ore from the Star Consolidated was marketed on Saturday afternoon on controls showing 14.58 ounces gold and 18 ounces silver per ton.

Mantl Messenger: J. W. Hoggan, manager of the Black Pine Mining company returned home last Sunday from Idaho. He reports everything favorable for the company and feels confident that the mines will prove a success.

John A. Hunt is in town from Tintic, and reports a nice body of lead ore on the 100-foot level of the May Day. The mine is said to be improving and the outlook is said to ve very encouraging in the shaft.

The debris has now been cleaned up at the Lower Mammoth and Judge Ellis says that in all probability the men will begin breaking down ore on the 700 level tomorrow. Prospecting is being pushed above the 600 level, where a streak of copper ore is being followed toward the east vein.

Western Mining World, Butte: The American Smelting and Refining company has made another great step toward owning its sources of supply of flux for the East Helena smelter by the purchase of the Monarch and Montant Central iron mines at Elkhorn, from Benjamin and Foster and other men in Butte and Boulder. The mines contain a large body of high grade hematite iron ore containing such an insignificant proportion of sulphur and phosphorus as to make it very valuable for fluxing.

STOCKS SHOWED WEAKNESS

But a Change Came, and Prices Rose Above Saturday.

London Market Was Low—Live Stock and Produce Steady—Wool is Dull.

New York, Sept. 17.—The London stock market followed the weakness here and internationals were sold down large fractions before the opening here. Large blocks were thrown on the market at the opening, but some support was accorded and prices did not fall to the London parity. The steel stocks showed conspicuous weakness. Short sellers of Saturday took the offerings by outsiders and prices advanced rapidly in an active market. Gains in the railways did not exceed fractions, but many of the specialties rose from 1 to 2 points.

The strong demand lifted the market well above Saturday's final figures. Comparisons with the opening prices showed recoveries generally from 1 to 3¼, the latter in rubber. The coal roads were well supported.

Bonds showed irregularity.

The drift was downward in the last hour and prices generally approached Saturday's closing level. The closing was dull and easy with net changes generally reduced to small fractions.

Barley—No sales; cash barley, 72½.

ST. LOUIS WOOL MARKET.

St. Louis, Sept. 17.—Wool, quiet, and tending lower.

SLAYER OF MARTIN MOCK

Board of Pardons Has Released Benjamin Egginton.

Mark A. Smith, Convicted of Forgery, is Pardoned—Numerous Petitions Are Denied.

At the regular monthly meeting of the board of pardons Saturday, Benjamin Egginton, convicted of voluntary manslaughter on January 17, 1894, for the killing of Martin Mock at Sandy, and sentenced to six years in the State prison, was pardoned.

The board pardoned Mark A. Smith convicted of forgery at Heber City and on May 26, 1900, sentenced to one year's imprisonment.

Applications were denied in the cases of John C. Roberson, convicted of burglary at Ogden and sentenced February 5th, 1900, to fifteen months imprisonment; Oscar Forrey, convicted of grand larceny at San Juan county, and sentenced November 23rd, 1898, to five years; Abner B. Kofford, convicted of grand larceny at Emery county, July 5th, 1898, and sentenced to five years; Christian M. Petersen, convicted of grand larceny January 20th, 1900, at Sevier county, and sentenced to one year; B. F. Woods, convicted of burglary in this city February 27th, 1900, and sentenced to one year; David W. Palmer, convicted of grand larceny at Emery county June 21st, 1900, and sentenced to one year.

Petitions for commutations of sentence were denied in the following cases: Isaac Hughes convicted of grand larceny in this city on September 9th, 1899, and sentenced for four years; Thomas J. Benjamin convicted of burglary at Provo June 12, 1897 and sentenced for eight years.

The case of John Harvey convicted of burglary at Provo Feb. 5th, '98, and sentenced for four years; postponed one month.

The application of John Howarth for parole was continued one month. Howarth was convicted of adultery at Ogden Feb. 25th, 1898, and sentenced to two years.

Rehearing was denied in the case of George McKee convicted of grand larceny in Uintah county on February 26, 1897, and sentenced to four years' imprisonment.

DON'T FEED SHEEP FOR FAT.

A correspondent to the American Sheep Breeder, writing from Weld county, Colorado, writes: "We are growing alfalfa more and more every year, and some of us are thinking that it may be overdone. We understand it will not make sheep fat, and buyers want fat sheep to supply the markets. Will be pleased to have your judgment on this question."

To this the editor of the Sheep Breeder replies: "You must understand that fat is waste. It runs off in the cooking, and our people are not greasers; they want good, tender, lean meat on quickly grown animals, and what fat there is in it they want it mixed evenly among the fibers of the meat. Now, alfalfa does this very thing. Its composition is such that it has every element in the right quantity and proportion for making good flesh meat, with fat interspersed among the fibers so as to make the meat tender, juicy and easily digested. Then what feed does this for a sheep's carcass does the very same for the fleece. In fact, sheep may be fed and finished for market on alfalfa hay cut when the blossom is in full, and cured without over drying. Very little corn is needed to finish lambs or sheep fed on alfalfa."

He Owes His Life to the Forethought of a Companion.

While on a camping trip in Webster county, Mr. S. I. Stump, of Normantown, W. Va., had a severe attack of bloody flux. He says, "I firmly believe that I owe my life to the forethought of one of the company who had taken along a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. Moral—procure a bottle of this remedy before leaving home. It cannot be obtained when on a hunting, fishing or prospecting trip. Neither can it be obtained while on board the cars or steamship, and at such times and places it is most likely to be needed. The safe way is to have it with you. Thousands of travelers never leave home on a journey without it.

Corn-huskers' sprained wrists, barbed-wire cuts and sprains, or cuts from any other cause, are quickly healed when BALLARD'S SNOW OINTMENT is promptly applied. Price 50 cents. Z. C. M. I. Drug Dept.

WHITE'S CREAM VERMIFUGE is essentially the child's tonic. It improves the digestion and assimilation of food, strengthening the nervous system and restoring them to the health, vigor and elasticity of spirits natural to childhood. Price, 25 cents. Z. C. M. I. Drug Dept.

PREACHING AND PUBLIC SPEAKING."

Of the 5,000 copies of this popular book published last year only three or four hundred remain and the author has decided to sell these through the ordinary agencies for Church publications. Your local agent will order the book for you or it will be sent postpaid from the Deseret News Office. Cloth, $1.50; Half Morocco, $2.00.

DAY EXCURSIONS.

If you want to pass a pleasant day out of the city, take the beautiful autumn trip to Heber or through Parley's canyon to Park City. The Provo canyon is at its best during the autumn. For rates inquire R. G. W. ticket office, Dooly Block corner. Get a copy of "Side Trip Folder" at the same office.

LIFE OF A PIONEER.

Autobiography of Capt. James S. Brown, 520 pages, bound in cloth. Price $2.00; for sale at the Deseret News. Special terms to agents.

BIND YOUR MAGAZINES

Old Books, Music and Magazines. Put them in strong new covers for preservation. Many records of value can be saved by having them bound. The News bindery can do the work in any form at any price.

MERCHANTS' PRINTING

Turned out on short notice at the Deseret News. A big shipment of new types and supplies just in. Our facilities for letter heads, bill heads, tags, envelopes, pads, etc., etc., are unexcelled by any establishment in the West.

JOB PRINTING AND BINDING.

The Job Printing, Bindery and Publication departments of the Deseret News now include all the type, machinery, presses and supplies of the combined plants of the News and Geo. Q. Cannon & Sons Co. Estimates furnished on contracts of any size. Rush orders a specialty.

MUNYON'S

A cold is dangerous. Don't let it get the start of you. A few doses of my Cold Cure will break up any form of cold in a few hours and prevent grippe, diphtheria and pneumonia. It should be in every house and every vest pocket. It is better than a life insurance policy. MUNYON.

At all druggists, 25c. a vial. Guide to Health and Medical advice free. 1509 Arch st., Phila.
