ARBITRATION

In the Behring Sea Question Looked Upon as Possible in a Near Future.

POPOLO ROMANO EXPRESSES AN OPINION.

Why the Rothschilds Withdrew from the Negotiations of the New Russian Loan.

(By Telegraph to the News.)

THE BEHRING QUESTION.

The London "Times" Discusses the Matter Editorially.

LONDON, May 9.—The *Times* in an editorial this morning on the Behring sea correspondence says: "Secretary Blaine's important concessions make it possible that arbitration may still be given long before the Hayward case is decided; therefore, it is scarcely necessary to discuss his last argument." In the meantime the question is close the time for sealing is most pressing and Blaine's delay causes daily increased surprise.

Annexation of Territory.

LONDON, May 9.—England has annexed a strip of territory which she has hitherto protected on the western frontier of Bechuanaland, in order to prevent the threatened "rush" of Boers and Danianas.

Executed for Murder.

OTTAWA, Ills., May 9.—William Rudolph, alias Charles Ford, was hung at 10:11 this morning. It was discovered that the real name of Charles Ford, who was hung today for complicity in the murder of Davis Moore, a traveling hunter salesman of Ottawa, was Wilhelm Rudolph, and that, instead of being of Irish antecedents, his parentage was German. Up to the last moment Rudolph displayed nonchalant nerve which characterized him from the beginning of the trial and, with the exception of the emotion displayed at the meeting with his wife, no other signs of feeling was shown by the murderer.

How "Popolo Romano" Views It.

ROME, May 9.—The *Popolo Romano* says: It will be impossible hereafter for any civilized country to make any treaty with the United States based upon reciprocal protection of the lives of the citizens of either country.

Russia and the Rothschilds.

ST. PETERSBURG, May 8.—The *Novoje Vremja* declares that when the negotiations for the new loan were about concluded in Paris, the Rothschilds made demands in regard to the treatment of the Hebrews in Russia which the Russian minister of finance rejected. "The Rothschilds," the *Novoje Vremja* adds, "thereupon withdrew from the negotiations, but the object in view, the depression of the Russian securities, failed. Although the Rothschilds may cause a temporary delay in the projected conversion of foreign debt, they cannot influence the conversion of internal debt.

A Boycott Affecting 100,000 Men.

NEW YORK, May 9.—In view of the fact that a boycott has been declared against one of the lumber dealers of this city by the labor Union, because his men refused to go out when the recent strike went into effect, the United Lumber trade of New York, Brooklyn and Jersey City have determined not to deliver any lumber to any building in New York City, after Saturday, May 9th, until the boycott is raised. About 100,000 men are affected.

Destroyed by Fire.

BOONE, Iowa, May 9.—A fire at Manning this morning destroyed almost the entire business portion of the city. The loss is about $125,000.

No Amnesty for Rioters.

PARIS, May 9.—The Chamber of Deputies rejected the proposal to grant amnesty to the May day rioters.

Killed as the Result of an Old Feud.

ST. LOUIS, May 9.—A dispatch from Lagrange, Texas, says that Fritz Rimpath has been shot and killed by Ex-U. S. Marshal Rankin. The killing was the result of an old feud.

Definitely Settled.

PITTSBURG, May 9.—The *Post* is authority for the statement that the affairs of the Westinghouse Electric company have been definitely and satisfactorily settled. The negotiations for placing preferred stock have been completed. Pittsburg parties have taken six hundred thousand dollars, Boston people $1,400,000 and New York capitalists, among them August Belmont, Jr., have promised to take the remaining million. The details will not be made public until the meeting next week. It is stated that among the Boston parties who came to the Westinghouse company's kit were the Thomson-Houston company and Edison Electric company, which, if true, may mean that the three great companies will hereafter work in harmony.

Lead Ores.

WASHINGTON, May 9.—The collector of customs at Eagle Pass, Texas, has been instructed by the treasury department to treat as lead, alleged silver ores composed of a mixture of ore concentrates from different mines, pending the review by the district court of Texas of the decision of the board of general appraisers, sustaining the protest of an importer against the collector's assessment of duty on certain alleged silver ores.

Recent statistics published by the Mexican government show that the exports from Mexico and the United States have increased so rapidly that the people of this country now take all but twenty per cent. of the merchandise exported from Mexico, although the manufacturers of the United States do not furnish more than half the imports of that republic. Of the exports of precious metals the United states takes 66 per cent., England 21 per cent., Germany 5.7 per cent. and France 7.7 per cent.

Railway Consolidation.

ST. LOUIS, May 9.—A dispatch from Topeka, Kansas, says the Missouri Pacific has consolidated its Kansas lines and branches under the name of Kansas and Colorado and Pacific Railway. It is under the control of the Missouri Pacific company and the lines are consolidated for the convenience of the management.

Fire in a Mine.

MAHON CITION, PA., May 8.—A fire is raging in the Lehigh Coal and Navigation company's colliery at Summit Hill. All miners except one, Hugh Sharp of Lansford, got out of the mine safely. Several received severe burns while escaping.

Another Gladstonian Victory.

LEICESTER, May 9.—The Gladstonians won the victory in South Leicestershire, yesterday, in the election of Logan, their candidate, for the Commons, over Hardy, the Conservative nominee.

The Escaped Chilian Vessel.

WASHINGTON, May 9.—It was not apparent this morning that the Navy Department is exercising itself greatly to recapture the Chilian steamer *Itata*. Secretary Tracy left the city early this morning to confer with Commodore Folger to inspect officially the new ordinance providing the ground at Indian Head, about forty miles down the Potomac river, without leaving any "of order relating to the matter. If there is any serious disposition on the part of the Navy Department to send the *Charleston* in chase of the *Itata*, it would appear to have been abandoned, but there is reason to believe that there is some hope entertained by the government officials, that the *Itata* did not start at full speed for Chili. In the first place, it does not appear that she received the arms carried by the schooner *Robert and Maria*, and in the second place, the dispatches stated that she started northward, which certainly is not the route from California to Chili. There is a strong suspicion that she is hiding somewhere in the neighborhood of San Diego, awaiting an opportunity to get the arms from the schooner.

Assignment of a Large Tea Company.

NEW YORK, May 9.—McBride Bros. & Co., doing business as the Union Pacific Tea company, having branches in the States of New York, Massachusetts, Maine, New Hampshire, Vermont, Rhode Island, New Jersey, Ohio, Pennsylvania, Indiana, Kansas, Nebraska, Minnesota and Missouri, made an assignment today without preference. The firm did business in tea, coffee and other groceries, and had headquarters in this city.

Suicide in the Presence of His Bride.

PITTSBURG, PA., May 8.—Frank Nott, the well-known young sewing machine agent, committed suicide by shooting himself today. In the presence of his intended bride, Miss Mary Powelson. The young lady is well connected and highly respected. There is no cause assigned for the deed.

ODDS AND ENDS.

Tell me whom you love and I'll tell you who you are.

The majority of people live poor in order to die rich; it is a great deal wiser to live rich and die poor.

Happiness is the health of the soul; therefore the soul is always sick.

You have sometimes known happiness, eh? Yes, the happiness of others.

Don't let us speak ill of our enemies; they are the only persons who do not deceive us.

One of the saddest things about the late war is that those who "hate the writer's paint" a generation ago still continue to bore almost everybody who will listen to them.

A process of making cloth out of spun glass is said to have been invented. This will give the ladies who go to the opera a chance to display their charms and preserve their health at the same time. This is the first step in the right direction.

"What will Ingalls do?" asks a Western contemporary. "Beyond saying that he is a Kansan he discloses nothing." Why should he? If Mr. Ingalls devotes his entire time to being a consistent Kansan, he will have his hands full.

"I don't see why she refused me," complained young Wabash. "I asked her in French."

"Idiot!" exclaimed his friend, "why didn't you stick to English? She was born in Paris."

The Hon. Jeremiah Simpson is no longer spoken of as the "Sockless Jerry." The time is drawing near when his head and not his feet will be the chief centre of attraction. Demosthenes wore no socks, neither did Cicero, and both were tolerably fair orators. When Mr. Simpson enters Congress let him remember this fact, and let his efforts be to guard against acquiring for himself the epithet "Stainless Jerry Simpson, of Kansas."

Under the Earth.

The workmen in the deepest mines in Europe swelter in almost intolerable heat, and yet they have never penetrated over one seven-thousandth part of the distance from the surface to the centre of the earth. In the lower levels of some of the Comstock mines the men fought scalding water, and could labor only three or four hours at a time until the Sutro tunnel pierced the mines and drew off some of the terrible heat, which had stood at 120 deg. The deepest boring ever made, that at Sperenberg, near Berlin, penetrates only 4172 feet, about 1000 feet deeper than the famous artesian well at St. Louis. While boring and mines reveal to us only a few secrets relating solely to the temperature and constitution of the earth for a thousand feet below the surface, we are able, by means of volcanoes, to form some notion of what is going on at greater depths. There have been many theories about the causes of volcanoes, but it is now generally held that though they are produced by the intense heat of the interior of the earth, they are not directly connected with the molten mass that lies many miles below the immediate surface of volcanic energy. Everybody knows that many rocks are formed on the floor of the ocean, and it has been found that a twentieth or a seventh of their weight is made up of imprisoned water. Now, these rocks are carried in time under overlying strata, which serve as a blanket to keep in the enormous heat of the interior. This must turn the water into super-heated steam, which seeks the highest place, and when the steam finds a fissure in the strata above it breaks through to the surface with such energy, that we have a volcano. We find that these outpourings that have lain for countless ages many feet below the surface are well adapted to serve the purposes of man. Many a vineyard flourishes on the volcanic ashes of Vesuvius, and volcanic mud has clothed the hills of New Zealand with fine forests and its plains with luxuriant pastures. The most wonderful display of volcanic energy is seen in the northwestern corner of our own land, a region of lofty forests and great fertility.—Goldsmith's Geographical Magazine.

EXCITEMENT AT PROVO.

The People Preparing for the Reception of the President.

PROVO, May 9.—[Special to the DESERET NEWS.]—It is an ideal May morning in the Garden City. Nature has done her best and the people are emulating her. The town is assuming a holiday aspect. Flags are floating on all public buildings and the citizens are on the tiptoe of excitement. Some disappointment was felt when, at 8 o'clock this morning, the news of Bush's telegraphed from Salt Lake that it seemed impossible to arrange for the Presidential party to come up town and that they will have to hold the reception at the depot. The public school children will have a prominent position assigned them and will make a fine appearance, as they will have a profusion of orchard and mountain flowers. Several extra committees were appointed yesterday and all are doing their best to make the brief stay of the President a pleasant one.

THE QUICK AND THE DEAD

WOOD'S PLASTER is QUICK. Others is concerned are slow of death. Wood's Plaster. It Penetrates, Relieves, Cures. At Druggists.
