MINING, BUSINESS AND STOCKS.

NEW SHAFT STARTED AT THE ELY CENTRAL

Mine Manager Hoffman Receives Orders From President Turner to Increase Force, Begin New Work.

(Special to The News.)

Ely, Nov. 13.—Work has been started on the new shaft at the Ely Central property and work will be pushed from now on declares Mine Manager Ed Hoffman. The latter has just received word from President O. A. Turner, who is in New York, to start work at full blast. The new shaft will be put down near the old workings. It will be close to the center of the Clipper claim.

The shaft is to be a three compartment affair, each compartment being four by four feet, or 16 by six feet over all.

In the incline from the cross-cut in the Eureka shaft, the ore has been followed for 65 feet and is running 10 per cent copper and better. The ore also carries from $4 to $6 in gold and silver. No assays have been made thus far as to the iron, silica and lime contents, but Mr. Hoffman is certain that the ore will make an excellent fluxing base. In the Eureka, which is the main or working shaft, three shifts of four men each are now employed in the bottom of the shaft. The shaft is down 210 feet and at the depth a station has been cut. A station pump has been installed as well as a tank. Two No. 7, Cameron pumps are now taking care of the water.

At present 34 men are at work and Manager Hoffman has orders to put on 15 more as soon as room is made for them.

The new shaft is being put down in the iron gossan close to the contract of the iron and porphyry. If the ground breaks easily the manager expects to be putting in one set of timbers a day.

MARKET WEAK TODAY.

Colorado, Grand Central and Mason Valley Lower on Exchange Today.

The remarkably weak condition of the market on the Mining exchange was again exemplified today when several of the most worthy stocks were hammered down several points below yesterday's figures. At $1.12½ Colorado was thought to be low yesterday afternoon, but without any reason assigned the stock went to 1.07½ this morning. From all that can be learned, the mine is just as good as when the stock was selling a few days ago at $1.32½. Mason Valley, with its wealth of ore, was also weaker at $1.80, and Grand Central, with the mine looking better than it has done for a long time, weakened to $2.20, with the offering of a few hundred shares.

Investors are asking themselves what is the matter with the mines, and it may be said the mines are all right, but the trouble is that local people are loaded with paper in the shape of stock certificates which in many cases are worth less than 10 per cent of their actual cost a few months or a year ago. This shrinkage in prices, which has been helped by the organization of so many million-share corporations, has, for the time being, partially destroyed the confidence of the public in mining stocks as an investment, and many people who have money are holding off, stating that the mining stock market is too uncertain at the present time.

Victoria came out with a small block of stock today, and sold at $1.65, and Joe Bowers, which in the old days sold about 30 cents, recorded the first sale in months today at 1¼. Red Warrior hung around $2.87½, while New York sold at 12, and Uncle Sam at 48. Sioux was little weaker after the spurt of yesterday afternoon and fell away to 51. Closing quotations were as follows:

REPORTS OF STRIKE IN SIOUX.

(Special to The News.)

Provo, Nov. 13.—It was reported here yesterday that the Sioux had struck pay ore on the 400-foot level. This is above where the ore is at present being taken out. The report could not, however, be confirmed at the companys offices.

Transfers of the New West Nos. 1, 2 and 3, and the Nightingale and Nightingale No. 1 mining claims in American Fork canyon to the Steele Consolidated Mining company, have been filed with the county recorder.

CUMBERLAND-ELY STATEMENT.

Fractional Shares in Nevada Consolidation Will Not be Issued.

(Special to The News.)

New York, Nov. 13.—A statement has been issued by the Cumberland-Ely Copper company relative to the exchange of that company's stock for shares of Nevada Consolidated on the basis of three and a quarter of the former for one of the latter as follows:

"No fractional shares of stock will be issued, but the stockholders of Cumberland-Ely shall have the privilege: First, of receiving from the Nevada Consolidated company in lieu of any fractional share to which they may be entitled, cash for such fractional shares on the basis of $24 per share; or, second, of paying the Nevada Consolidated company for a fractional share sufficient to make a full share upon the basis of $24 per share."

WILL INSTALL A HOIST.

Tintic Combination Plans Active Campaign—Strike in Bullock.

Supt. B. H. Bullock of the Tintic Combination Mining company operating in East Tintic was in town today looking over machinery for that property, which will consist of a steam hoist and probably a compressor, with which to begin an active campaign of development this winter. The company has a shaft down 204 feet on the property and it is proposed to drive from this level under the hill to the east in order to cut the big vein which shows on the surface all of 75 feet wide.

Mr. Bullock also brought with him a sack of ore from the Bullock mine in the same district for the purpose of having tests made by the A. S. & R. Co. The ore was taken from the recent strike on the 210 level, where the north drift is said to have a full face of copper-silver sulphide ore at a distance of about 125 feet from the shaft. The management is making preparations to stope this ore, and a car of ore is promised for the market in a short time.

NEW EXCHANGE OPENS MONDAY.

After Twelve Years Renting the Exchange Enters Its Own Home.

Monday morning at 9:35 the Salt Lake Mining exchange will hold its first session in its new home in Exchange place, which has been built and furnished at a cost of approximately $80,000, the site being donated by Samuel Newhouse. During the week all the seats were taken from the old quarters at west Second South to the new building, and under the direction of Secretary Shorten, the rest of the fixtures will be removed this afternoon, so as to have everything in readiness for Monday's call. The stock board will also be taken away, and as the new board has not arrived from the east yet, the old one will be used until its arrival.

The exchange has been located in its old quarters about 12 years, during which time it has seen some lively times, when standing room was at a premium, as well as some dull times similar to those which are now being passed through. A vast amount of business has been done in that time, running into many millions of dollars, and the membership of the exchange has greatly increased. It is expected that in its new home the business and usefulness of the exchange will continue to grow.

COPPER STRIKE IN THE OPOHONGO

Fine Body of Twenty Per Cent Ore Reported in Drift From Black Jack Workings.

Reports from Tintic state that discoveries of a very encouraging nature have recently been made in the Opohongo mine through the workings of the Black Jack. A returned visitor to the camp says that 14 mine cars of copper ore containing 20 per cent in the red metal, have been taken this week from the new strike, which was made at a point 700 feet below the surface. This depth, it is stated, was reached from the 500 level of the Black Jack, the drift intercepting a fissure in the Opohongo property containing ore. This fissure has been followed, the same authority says, a distance of 40 feet on ore all the way and the ore mined was taken out in development work only.

The property is controlled by William Hatfield, Ed Loose, and others, who are already said to be contemplating driving a tunnel into the property to obtain greater depth. It is stated that the strike will mean increased shipments from the Opohonga.

COPPER COMBINE RUMORS.

Feeling Growing in New York That a Giant Combine Is Being Planned.

In spite of the fact that President John D. Ryan of the Amalgamated Copper company is quoted as saying that there is nothing whatever in the rumors concerning a copper combination, or the curtailment of output with the view of increasing the price of copper, the belief that a movement is on foot to effect some sort of a combination seems to be growing. Reports from New York state that the formation of a giant copper combine will be started in a few days by the Guggenheim interests associated with the Amalgamated Cole-Ryan properties, having a capital of upwards of $350,000,000. It has also been reported that negotiations are under way between the United Metals Selling company and the Guggenheims for the inauguration of some sort of a cooperative policy which will tend to give stability to copper.

A prominent member of the Copper Producer's association is quoted as saying that if there is to be any combination of copper producers it will be merely the gathering together into one corporation several of the so called Cole-Ryan properties. This same authority acknowledges that the copper situation has not improved since the passing of the new tariff as many expected it would. Many of the producers had counted upon a consumption which would carry the price to 15 cents in spite of the increased production. In this they have been disappointed, though the consumption today is said to be very gratifying, but in spite of that the price continues to hang around 13 cents, which while it affords a good margin of profit for the porphyry mines where the cost of production is between 7 and 8 cents a pound, cuts things too close for mines like the Amalgamated which cannot produce copper at less than 10 to 12 cents a pound.

TINTIC ORE SHIPMENTS.

Eureka, Nov. 13.—The following shipments were made during the week ending yesterday from mines of the Tintic district:

CONCENTRATES.

Reports from Boston are to the effect that the Guggenheims have an option on a large block of stock of the First National Copper company, which expires next month.

A party of Salt Lake capitalists including Henry Newell, Frank Judge, W. J. Halloran and F. M. Wilson have secured control of the Rosedale Mining company which owns a group of claims about 16 miles east of Virginia City. The formation is said to be similar to the Comstock lode and the property has been partially developed by a 700-foot tunnel.

Supt. E. C. Coffin of the Lower Mammoth says he has demonstrated that the east fissure in the company's property does not turn into Black Jack ground as was formerly supposed, by means of a drift from the shaft east to the Black Jack line, a distance of 225 feet. In this drift the east fissure was encountered about 85 feet from the shaft. The fissure was well mineralized but contained no pay ore. It is the intention of the management to run to the ledge on the 1,700, 1,800 and 2,000 levels, and prospect to the south where ore has been found above.

COMMERCIAL.

New York, Nov. 12.—Narrow money resources have kept the speculation under restraint this week. The substantial recuperation effected by the Bank of England did not wholly quiet apprehension in foreign money markets. Exports of gold from New York and renewed demands from the interior depleted the slender banking surplus and necessitated some calling of loans. The coming congressional progress was the occasion of some disquiet and the demands for increased wages made by railroad employes suggested a problem to be met. Coppers showed strength on reports of large buying for exports and rumors of a coming combination of the principal producers.

The changes shown by the opening prices of stocks today were insignificant and the dealings were very light.

Gains and losses were quite equally distributed. Utah Copper sold at an advance of 1. Interborough-Metropolitan declined ⅝.

A firm tone permeated the market, the copper stocks showing notable strength. Utah Copper was bought in round amounts up to 57⅝, a gain of 4½. Advances in other stocks of this class were less noteworthy.

Railroad stocks were not materially altered from yesterday's final prices. Tennessee Copper and American Smelting moved up 1. Rio Grande and Amalgamated Copper 1¼. Anacondas 1⅝ and Pressed Steel Car 1½. International Harvester lost a point.

The market closed firm and active. The movement in the copper stocks was the only feature. The rise in Utah Copper reached 6⅝. Anaconda 2⅝. Tennessee Copper 2, and Amalgamated Copper 1½. Pacific Coast second preferred declined 5½.

WOOL.

St. Louis, Nov. 13.—Wool, steady. Territory and western mediums, 28@29; fine mediums, 24@26; fine, 18@20.

BOSTON.

Boston, Nov. 12.—The Commercial Bulletin of Boston will say of the wool market, Saturday:

Business is comparatively quiet, although a number of mills are in the market. Wool manufacturers are buying clothing in moderate quantities at top prices, while worsted makers are picking up occasional lots to fill in with. The market is strong, with no apparent relief from high prices.

The shipments of wool from Boston up to Nov. 11, inclusive, were 211,273,964 pounds, against 161,581,186 pounds last year. The receipts to Nov. 11, inclusive, were 278,016,256 pounds, against 268,334,217 pounds for the same period last year.

PRODUCE.

CHICAGO.

Chicago, Nov. 13.—The wheat market was weakened today by bearish foreign advices, crop news from Argentina and Australia being decidedly favorable and offerings from Russia liberal. Trading at the start was quite heavy, but the selling pressure soon subsided and the market became a dragging affair.

At the opening prices were ⅛ to ¾ lower, with December at 1.06 to 1.06⅛.

During early trading the price held within that range.

Unsettled weather in the corn belt was the chief influence affecting the corn market. Sentiment in the pit was somewhat bullish, although the heaviness of wheat tended to restrain buyers.

December opened a shade to ¼ higher at 59⅝ to ⅝@¾. After touching 59¾, the price dropped to 59⅜@½.

Oats were quiet and easy, the weakness of wheat being the principal factor in the situation. December oats opened a shade lower at 39½@¾ and sold off to 39¼.

Fresh advances were made in provisions as a result of the unusually light receipts of live hogs the last few weeks. January pork was especially strong and advanced 45c from yesterday's close. Prices opened unchanged to 15c higher.

Wheat—The market was heavy all day and became extremely weak in the final hour on week and liquidation. December sold down to 1.06¾. The close was weak with December ⅞ lower at 1.05⅞.

Corn—The market continued firm the remainder of the day. For December the high point was reached at or. The close was firm with December up ¼ at 59⅝@¾.

Close—Wheat—Dec., 1.05⅞; May, 1.04½@¾; July, 96½@¾.

Corn—Dec., 59⅝@¾; May, 60@61⅞; July, 60¾.

Oats—Dec., 39¼@⅜; May, 41¾; July, 29½@¾.

Pork—Jan., 22.60; May, 20.50.

Lard—Nov., 12.25; to 13.30; May, 11.50@11.82½; Jan., 12.05; July, 11.37.

Ribs—Nov., 11.25; Jan., 10.50; May, 10.55.

Rye—Cash, 59@54; Dec., 72; May, 76.

Barley—Cash, 52@66.

Timothy—Nov., 3.75; March, 4.10.

Clover—Nil.
