The University Alumni.

There will be a meeting of the Alumni Association of the University of Deseret on Wednesday evening at 8 o'clock, in the University building. All graduates are invited. The object of the meeting is to elect officers for the ensuing year, and to make arrangements for the next annual meeting. It is very desirable that a full attendance be present on this occasion, as it is proposed to make the future meetings more formal and systematic.

Released from Prison.

Tals morning Brother C. L. Thorpe, of Ephraim, Sanpete Co., was released from the penitentiary, after serving a four month's sentence for unlawful cohabitation. He also paid a fine of \$100 and costs. He spoke well of the manner in which Warden Pratt conducts the prison. He says that the official is strict, so far as the enforcement of the rules is concerned, but the regulations are of a nature that they can be lived up to without difficulty, and none of the prisoners are treated unjustly. The strictness that exists is not accompanied by any undue harshness.

THE "BOHEMIAN GIRL."

It Will be Repeated Thursday Afternoon and Friday Evening.

The "Bohemian Girl" has had its third presentation at the hands of Professor Stephens' Opera Company, and the enthusiasm created among the music-loving public becomes stronger and more the great success achieved is contemplated. The audiences on Saturday afternoon and evening marveled at the glorious treat afforded, and the wonderful work accomplished by Mr. Stephens and his classes. It was known that of more than a hundred persons who took part all but two were entire strangers to the stage. But the effectiveness with which they sang, the correct precision shown, and the earnestness and spirit manifested carried the audience so completely that they passed lightly by the evidences of amateur acting, regarding them rather as the dark shades which caused the light to shine more brightly. But the work of last evening showed more fully than ever the magnitude of Prof. Stephens' undertaking and the phenomenal success which has accompanied his labors. The first two performances served to brush away much of the timidity that existed, and last night the entire company shone more brilliantly than ever. There was greater freedom and more naturalness in the acting, while the singing was even better. If it could be taken before, The applause, when it was bestowed was rapturous, and was well earned by the recipients. But the large audience seemed at times to forget to applaud, so interested were they in the scene before them.

Prof. Stephens and the individual members of his classes deserve to be highly commended for their labors. They took up a difficult work for them, and by earnestness and persistency accomplished it, so that when they asked for the public patronage, they gave full value in an entertainment that class in every respect. The management did well in deciding to give two more performances, on Thursday afternoon and Friday evening, for there were many who were unable to do so, and a large portion of those who did are anxious for another opportunity.

With Friday night closes the appearance, for a season, of the opera company. It is to be hoped, however, that all will find sufficient encouragement in what has been accomplished to continue in the labors so well begun, and that ere long Prof. Stephens will again delight Salt Lake with another feast in the same line.

Knocked from a Train.

A young man belonging to the "tramp" fraternity was brought in on last evening's D. & R. G. W. train in a lamentable state, and was taken to the Catholic Hospital. He was in an unconscious condition, the result of an accident, and whether there is any hope for his recovery has not yet been ascertained. Yesterday morning he was found in the D. & R. G. W. tunnel at Grassy Trail, Utah, where some section men discovered him lying insensible alongside of the track. He was considerably bruised, and from his injuries it was supposed that he had been riding on the top of a box car in No. 9 a freight train which had passed a short time before, and that the timbers of the tunnel had knocked him off the train. He was immediately sent on to the city, but is still unconscious, and in a critical condition. His name and address are unknown, as there was no found on his body by which he could be identified.

Ogden Jottings.

Court will be held in this city next Saturday at 10 a.m. It is not thought that anything of importance will be transacted until after the Supreme Court has adjourned, on June 22d.

On Friday evening Miss Annie Pool, on foot from a step ladder while cleaning the windows of Caver Brothers' store, in Flain City, and broke her left arm. It was set by Dr. John Drury, of Ogden, and she is now doing well.

On Sunday afternoon about 3 o'clock a little boy, son of A. G. Bowman, residing near the Eagle Mills, was climbing up on a stack of lumber, probably to get a better view of the street than he could obtain from the ground. The lumber had been piled very loosely and when the little fellow reached the top of the pile it tumbled, throwing him to the ground with the sad result of breaking his right thigh. Dr. Powers was immediately summoned and gave the patient all the attention he felt his skill and ability could afford him. The boy suffered intensely for some time, but is now as comfortable as he can be under such distressing circumstances. Dr. Powers thinks that he can save him from becoming a cripple for life, though great care must be used.—Ogden Standard.

The Exposition Car.

The following dispatch was received last evening by H. W. Lawrence, Esq., from H. L. A. Culmer, in charge of the Utah exposition car:

COUNCIL BLUFFS, June 11.

The car is a tremendous success. We entertained 300 visitors on Monday and Tuesday, and the day before, including prominent capitalists and the best citizens. We have here tonight for Cedar Rapids, Elgin and Chicago.

It is anticipated that the City Council will have business of importance this evening.

PRACTICAL SUGGESTIONS

Relative to the Disposal of the Sewage.

June 9th, 1888.

Editor Deseret News:

I see by minutes of last City Council the committee on sewerage "have decided that the main sewer for the disposal of sewage may be built from a suitable initial point in the northwest of the city, running thence west to a point at or near Seventh West Street; thence northerly through the western limits of the city, and between the Hot Springs Lake and Jordan river to some point sufficiently remote," etc.

Doubtless, under existing circumstances, they felt compelled to recommend something rather than nothing, having called in an engineer. Engineers, like doctors, are supposed always to have advice in stock, and when called upon are supposed to give the best they have, which, no doubt, has been given in this case. But in the absence of a survey?

BETTER AUTHORITY.

In that matter and in that particular locality, in my mind, would be the men who have taken observations and have the secular experience of water-masters and canal cleaners year after year in that locality. It probably is well known by them that the fall is so little from about Sixth or Seventh North streets to the Hot Springs Lake, and that the water at any stage unable to carry the ordinary sediment any considerable distance.

The experience of city watermaster Wicken and local watermaster Col. R. Smith might be of value to the committee, for the constant force of a considerable body of water running through Mr. Pegg's millrace would not carry the ordinary sediment into the Hot Springs Lake, it is.

DIFFICULTY TO SEE.

how the limited amount of water that can be spared by Salt Lake City in the direction indicated by the committee, can carry the sewage of the city a longer distance in the same direction; especially considering that the waters of each year flow higher in that locality than in any other, and that an outlet can be found, unless it is taken into Davis County, to which there must be some objection. And then the question is, how to get it there on so level a plane.

The plan proposed, if it was possible to carry it out, would, in all probability, between high water and low water operate a good deal upon the principle of a man filling up his stomach with food for a period of time, with a view to the stomach, after several weeks, clearing itself. If it should succeed, it would, to say the least, of it, somewhat contrary to nature. Most people would think it a dangerous experiment.

It is quite possible, if the committee look around every direction, chemically as well as geographically, that they may decide to recommend an entirely different system, and it might be quite in keeping with the age. That revolutions should take place in sanitary matters or systems should not be startling. It might possibly be discovered that Moses was not only a good legislator but also understood how to combine the elements so as to produce the best.

SANITARY RESULTS.

"Oh," says one, "Moses did business on a small scale." He did not. What is said on the subject is only a key to it. There were a great many more of his followers than there are citizens of Salt Lake or will be, and as to the scale, there is a vast amount of room to enlarge it, if in your minds it looks too small.

I have noticed among other things that the Scripture writers had a peculiar knack of not telling quite all they knew, nor quite all they did. They have left a good deal for somebody to finish.

Another thing I have noticed, where the people of Salt Lake have tried the dry earth system, it has been found very satisfactory; and still another thing that has come under my observation, is that where the system is used satisfactorily and effectively in one family it can be done in hundreds of families upon the same principle. Enlarge your scale, prepare your facilities, and you have the system complete.

Yours truly,

AN OLD CITY COUNCILOR.

On a Visit.

Mrs. Mills, of St. Louis, is in the city on a visit. She has a large number of friends in Utah, by whom she can be found at the residence of Mrs. Catherine Anderson, 607 First West Street.

THE STAKE LIBRARY.

An Epistle to the Public From the Directors.

For over one year now has the Stake Library been open to the public, with but encouragement from some, and discouragement from many other sources. It has been a struggle, and a slow building up, both in the facilities of the reading and number of volumes of books and papers, until from the small beginning of 188, there are now over 800 bound volumes and many smaller ones, and daily, almost, are either newspapers or other books coming in and being added to the list.

The board of directors have but this request to make, viz: Will those who have any magazines, books or papers, bring them to No. 12, E. Main Street, and thus aid the institution, and thus aid the cause of public support.

We here give a list of required books and magazines, and any persons who have them will confer a great favor on the institution by sending them to the Reading Room, as above addressed:
