THROWS DOWN THE GAUNTLET.

New Board Refuses to be Bound by Its Agreement.

WILL MEET AT 6 O'CLOCK.

Business was Heavy on the Old Exchange, but Not So Much On the New Board.

Calling off its recent agreement with the old board the new exchange has thrown down the gauntlet and announces tomorrow's call for one o'clock, which means that hereafter it proposes to pursue regular business during the afternoon, rather than allow the time for curbing, as was the object and purpose of the contract now violated.

As announced in the "News" several days ago, the new board submitted to its neighbor a resolution setting forth its disposition of a seeming infringement of the new order, and asked that another agreement be entered into that would prove more satisfactory to itself. The settlement. This matter was discussed by the governors of the old board after this morning's call, and was finally left with President Jackson for an adjudication such as he, in his judgment, thought best. As the same time it was the sense of the meeting that no further agreement be entered into, as, argued the governors, a violation of No. 3 would be implied on the part of its successors, and therefore would be of no particular benefit either one way or the other. Before reaching an agreement, however, the new board took it in itself to change the time and did so, yet the resolve is what they may. And the fight is still on.

THE DAY'S BUSINESS.

Sales Amounted to 170,000 Shares for $35,721.25.

On the exchanges today business amounted to 170,000 shares for which buyers paid the sum of $35,721.25. The old board had an exceedingly active call and dealt in a total of 147,000 shares of $33,676, while on the new exchange business was somewhat light, the sales reaching 20,700 shares, represented by a value of $3,045.25. All told the day was a bummer in mining stock circles, and the business done reflected credit on those who did it.

BIG DAY IN THE PIT.

Old Board Sells 146,300 Shares of Stock—Joe Bowers Brisk.

With a total of 146,300 shares to their credit, and a selling value of $33,676, the members of the Salt Lake Mining Exchange filed out of the pit today as proud as peacocks. It was no wonder, either, for the call was one of the best since the busy days of 1896, when such a record was an every-day occurrence. The sales sold ranged from the big dividend payer in the humble prospect, so that in this respect there was no favoritism shown, each stock receiving attention according to the existing demand. In the trading Joe Bowers was a leader, sales in this security reaching a total of 51,500 shares, which went at figures ranging from 14 to 20 cents a share, the higher price being for future delivery. The clamor for this stock was highly interesting, and when it was over a dollar each for making a peach of the new brass railing, he it said to the gentleman's credit the exaction was promptly paid in each instance.

Dimy was the first seller, the stock being freely dealt in between 42½ and 47½. Hyzer-Marion was taken at 19 cents, after which Mammoth sold at $1.30 to $1.72. Monarch at 46-32½ and Lower Mammoth between 78 and 79½. Bullion was brisk in Northern Light at a higher figure, the stock making transfers up to 42, while Omaha went at 44½ and South Swansea subscribed 100 shares in the block going at $1.25½. Sacramento was dealt in at 49 cents, Star Consolidated at 41 and 42½ and Showers Consolidated at 47½ to 48, these sales being followed by Sunshine, which did business at 91 to 92½.

Stocks of a lower order had a leader in Bullion-Beck Tunnel, which sold 5 cents. Dalton followed at 3, after which Prince was dealt in at 10 and 9½, and Golden Eagle found takers at from 6½ to 7. Following business in Joe Bowers came sales of Bowers Extension at 9½ and 9¾, while May Day made transfers at 13 and 14, Monarch at 7½, Midnight Bowers at 5, Manhattan at ¾, Sea Swan at 3 and Valeo at $1.30.

The closing figures were as follows:

ON THE NEW BOARD.

With the Call Forced Through, Business Was Rather Light.

The call on the new exchange was pushed through with dispatch, and the result was that sales were rather scarce and amounted to but 20,700 shares, which sold for the sum of $3,045.25.

In the trading Daly was dealt in at 47 cents, while Eagle sold for 8¾, and Joe Bowers changed hands at 19. In Bowers Extension there was business at 9½, after which Midnight Bowers made transfers at 4½, and Monarch was dealt in at a cent, while Oaks sold for 6¾. Star Consolidated for 41½, and Showers at 48½, Silver City Consolidated had takers at 5½, and Twelve-Thirty displayed activity at 2½, while West Mountain was a purchaser of 10,000. The property is looked upon as a valuable acquisition to the new board, and, as a ground attack, in its development, has already shown splendid values in gold, silver and copper.

The Mines of Bingham.

Bingham Bulletin.

It is learned that one of the big deal at head of main canyon includes also a number of good properties on the Dalton & Lark side. Many prospects have slated Copper gulch and tributaries during the past few weeks.

Reports from Boston concentrate from Bingham for the year ending March 1st show a total of 8,000. This is due to partial or entire suspension of some of the heaviest shippers. Jordan's Montana mine was shut down two weeks ago, and Ontario has been very light, small. Also, during the year shipments from Highland Boy and Dalton & Lark were small.

It transpires that the reported sale last week of the Fortune group of mines was not the result of a cash payment down does not exactly track with facts. The Fortune company held a bond and lease on the Fortune mine, and "had to have it" as its developments are connected with and in fact form a part of the Fortune workings. Negotiations resulted, and school $10,000 in cash has been paid on the Keystone bond, which bond has been for short of $5,000. This is a partial or entire suspension of some of the heaviest shippers. Jordan's Montana mine was shut down two weeks ago, and Ontario has been very light, small. Also, during the year shipments from Highland Boy and Dalton & Lark were small.

Work at the Daly-West.

President J. J. Daly and Director O. J. Salisbury came out from Salt Lake Thursday night, and remained at the Daly-West until yesterday afternoon, when they returned to the city. Mr. Daly informed the "News" that work was going on smoothly at that property. The force has been increased by seventy men. Work in the shaft is being continued, and will be until an additional depth of fifty feet is reached. The mill will be started up some time next week, and will more than likely be in charge of Mr. W. A. Wilson, formerly superintendent of the Marion. He is a competent and thorough millman, and the very best man that could be obtained for the management. The part lacking to the air compressor has not yet arrived, but it is looked for every day. Much of the work on the Daly-West will be running full blast.—Park Record.

Location Notices Filed.

Provo, March 27.—Notices of locations of mining claims in Cagle Placer district, Uinta county, have been filed with the county recorder as follows: Lake View, Lake View No. 1, and Wind Storm, by L. S. Mosher; Lucky Jim, by Jas. C. Paul; Water Witch, by Logan M. Paul.

MINES AND MINING MEN.

Broker E. M. West is on the sick list.

A. W. Wisberg expects to go south in a day or two to look after mining interests.

The Cubs at Bingham is showing five feet of ore which will average nearly 12 per cent copper.

Josh Dennington: At the Bullion-Beck and Champion the boys on last Sunday's night shift broke into a fine vein lots of ore on the 700 level. One of the miners engaged in the conversation in which this information was gleaned, said: "Many have also struck it on the 1,000 level."

The Silver Hidden and Mining company has filed articles of incorporation. Capital stock, $500,000. Twenty-five thousand has a capital of $100,000 in shares of $1 each each. James E. Jennings is president; David C. Dunbar, vice president, and Joseph E. Caine, secretary and treasurer.

Articles of incorporation of the Orion Mining & Milling company have been filed with the county clerk. It has a capital of $1,000 in shares of 10 cents each, and has claims in Little Cottonwood. Jesse Rex Blank is president; Carlos Rigby, vice president, and Arnold Gardner secretary and treasurer. Then with E. A. Hammeyes and Thomas Winter make up the directory.

STOCKS.

New York, March 27.—Important advances in the London market for Americans gave a stimulus to the local market. Heavy buying of the specialties also acted as a favorable factor. Federal Steel jumped 3¼, Continental Tobacco 2½.

The buoyant start of the specialties tempted realizations by traders who had purchased futures in anticipation of a heavy outside demand. Their liberal offerings covered sharp breaks in Federal Steel, Continental Tobacco and Sugar.

Subsequently the market developed an increasing tendency to harden. As the morning waned the improved tendency became more pronounced the buying embracing the well known shares and a sprinkling of the usually dormant speculation. The Power stocks were the leaders, Manhattan and Brooklyn Transit making exceptional progress. Local speculation generally was buoyant, Metropolitan bringing 2½@3. Heavy buying of the Granger and New York Central strengthened the railway group generally.

CLEVER SCHEME OF BURNHAM.

Preposes to Get a Control of the Joe Bowers.

HE IS THE PRESENT BUYER.

Northern Light Strike Denied—West Rockeye Development—Blackbird in Change Hands.

According to reports Charles F. Burnham has adopted a novel scheme to get even with the Joe Bowers Mining company. For several days past trading in the company's stock has been decidedly active, and it now looks as if that the buyer is none other than Mr. Burnham himself, who, it is said, proposes to gather in a controlling interest, and then, having practically no opposition, he will settle his claim and thus straighten out the present difficulty.

Mr. Burnham, it will be remembered, is the gentleman who lays claim to a half interest in the Joe Bowers mine, and in the manner above indicated he proposes to see his claim satisfied. It is understood that the company offered to compromise by giving him 50,000 shares of stock and $1,500, but this, it is claimed, he would not agree to accept. On both boards today transfers of the stock amounted to nearly 35,000 shares, while on the curb the affair, the generally conceded feature, Bowers bringing 2½@3. Heavy buying of the Granger and New York Central strengthened the railway group generally.

No Strike, says Mr. Alvin.

"If there has been a new strike in the Northern Light, I know nothing of it," said Superintendent Alvin this morning. "The fact is, however," continued the gentleman, "the mine is in good shape and has a sufficient supply of milling ore ready for treatment as soon as we can get the plant started, but I have been advised of no change in the workings."

West Rockeye Development.

A. W. Wisberg, Jr., who has more mines on his hands than some people have fingers and toes, came in from Tintic last week after a critical examination of the West Rockeye. The gentleman says it is in splendid shape and that the ever-valuable compound shaft has struck bedrock at a depth of 220 feet. The present contract will carry them about 20 feet further after which it is the intention to drift to the east to catch the Joe Bowers city. The property consists of eight claims and, as its name implies, adjoins the Rockeye on the west. Mr. Wisberg visited the Bullion Hill and Bright Light, both of which he pronounces progressing slowly.

Blackbird in Change Hands.

The "News" is informed that the Blackbird group of claims, under bond to the Diamond Consolidated of Tintic, is about to pass into the hands of that company as a payment of $10,000. The property is looked upon as a valuable acquisition to the Diamond, and, as a ground attack, in its development, has already shown splendid values in gold, silver and copper.

ENGLISH SCURRY AFTER MONEY.

London Financier Says it Will be Rampant This Week.

MARKET IS NOW VERY BARE

Advance in Discount Rate Expected—Credit Basis is Too Narrow—Continental Markets Still Worse.

New York, March 27.—The Times financial correspondent cables from London:

"We shall have a scurry after money this week, for the opening market is now very bare. Notwithstanding its hot expostulation, the government has gathered into its coffers a possible to be credit in the Bank of England, or within about 1,000,000 pounds a year, and the market has less, or relatively much less in the way of resources now than it had. As more business is doing and a larger weight of sovereigns has to be carried, it follows that the credit pinch next week may be extreme and I shall be surprised if it does not. Just at present now and the 10th instant, the Bank of England has advanced on loans six to seven millions sterling, and these amounts and added sums it has already lent will suffice to hold the market in the 4½@5 per cent quarter for some 10 days, almost from mid-April. Thus the debt of the market to the bank is temporarily lessened, and, meanwhile, the British and Indian dividends paid and available for the market, are 4,000,000 pounds—a sum equal to 2,000,000 sovereigns in addition to the heavy disbursements for public services, may be counted on, so that April promises to be a short time low rates of interest. But they cannot last and such is the state of affairs everywhere in Europe that you will doubtless pay for a troubled London market all through the spring.

"Note also that we are so far retain a single ounce of the new gold sent on. We had upwards of 800,000 pounds worth pass through our hands since this time a year ago, and the Bank of England is now more than three by 500,000 pounds. It bears metal weekly on balance, and experienced dealers in credit always do so anticipate an advance of the discount rate soon. This is not immediately probable and next week's arrivals may not be interpreted of in that way. Now the less is it true that our market is liable to harden and sharp upon the slightest provocation. All European money markets, as well All European money markets, as well dependent upon them and all others are at present in corts or less narrow circumstances.

"The monetary conditions, present and prospective, explain continued lethargy in the stock markets. Small people are afraid to operate and the large ones have as much as they can do to keep quotations hard. After easter a dash may be made to try and renew the activity of last summer, but it cannot be sustained because the credit basis is too narrow for new dealings. We have less than we had twelve months ago and in the meantime securities created and issued since then of the old issue we have about 400,000,000 pounds to be absorbed by cash. All of our credit resources will therefore be engaged up to the hill. Had you not taken large quantities of your railroad stocks we must have ceased playing before now and since you have nearly stopped your purchases we have become increasingly unable to play the old, old game alone, even for a single week at a stretch.

"After all, our position is easier than that of Paris or Berlin or Vienna, where the money markets are so tight to be kept before the world as good securities is fast becoming unmanageable. I say nothing about the copper shares which have got to a point where no sane person touches them. Nor need I say anything about the Russian bond of Spanish securities, both government and railroad, although they do mean an unsteady market for all other stocks in sympathy to the French market and the people.

"Share dispositing even than these indigestible masses is the inchoate jumble of so-called industrial corporations, which have been thrust out and flung at the commercial public in the last three years. At first the shares of the Forties worthless, but they went through the free use of the premium bait, but this charm has ceased for ever. Time is work, and today the French banks and finance houses are smothered in unsalable paper. They struggle along partly under the load of credit obtained on bills discounted in London. What every sane person on the markets may be worked off or kept for some time from the eventuating crisis. I do not wish to alarm you but merely indicate in broad, clear lines the chief features of both the credit and the stock market situation, which are sensible, and hoist that it contains elements of a dangerous and even an explosive kind, which should make your operators and bankers more than ordinarily cautious. They must expect to hold their own on risks if they are pushed into a corner."

AN EVIDENCE OF PROSPERITY.

It is generally conceded by economists, who study the commercial situation of the country, that the great arteries of railway travel are a sure indication of its condition. A depression in commercial lines means abandoned business trips and the cancellation of pleasure travel, while a healthy condition of affairs means business trips and an increase of passengers on pleasure bent.

A good evidence that a business revival has now broadbaned over the country is the "Lake Shore Limited," the star train of the Vanderbilt system, between New York and Chicago, which is daily comfortably filled. With a view to taking best possible care of its patrons, the New York Central has arranged to increase the equipment of this train by adding an additional standard sleeper on the trains leaving New York and Chicago Tuesdays, Thursdays and Saturdays. To the region of transcontinental travel and conveniences of this train, it is hard to tell if you have never made a trip on it, but one is to yourself to see and enjoy the advantages in comfort and luxury in modern railway travel. Between the fare is no higher on this train, except between New York and Chicago, while the accommodations and service place this particular train conspicuously in the front of the line when compared with other lines.—Albany Journal.

The Famous Pennsylvania Limited

Departs from Chicago Union Station every day at 5:30 p. m. on its twenty-four hour run to New York. Rapid transit in luxury is the purpose it serves in the highest degree of perfection attainable in the service. Its composite car, dining compartment and drawing-room sleeping cars and library and observation cars combine the luxuries of cloth, hotel, drawing-room, and boudoir of magnificent modern homes. For details write Geo. T. Fitzhugh, Traveling Passenger Agent, 1401 Tilth St., Denver, Colo., or H. R. Derling, A. G. P. Agt., 248 South Clark St., Chicago.
