MINING, BUSINESS AND STOCKS.

STOCKS WERE ACTIVE TODAY.

Ajax and Tesora Were the Features of the Mining Exchange.

LATTER WAS VERY STRONG.

Lower Mammoth Weaker—May Day Firm—United Sunbeam Advancing—South Swansea Sells.

The mining stock business shows little or no signs of abating for the summer season. Stocks were very active today and prices were generally quite strong. Ajax and Tesora were the center of attraction. The former opened at $1.55, but sold down as low as $1.53¾ at the close. The highest sale was made at $1.68. Tesora was much higher compared with yesterday morning's figures. It was much stronger last evening when it sold as high as $1.30 per share. May Day was active as high as $1.62, while Lower Mammoth weakened to $3.74½ after opening at $3.77½. South Swansea was traded in round 58, while Ben Butler fluctuated between 15½ and 17. Sunbeam Con., did a large amount of business at prices ranging between 76 and 90. La Reine was away off, sales going at 35, while Star was traded in at 47½. Tetro sold at 16 while West Morning Glory was active at 5. Yankee Con. was offered at $4.80, with $4.50 bid, while Little Chief was released at 16.

ORE CHUTE IS AS RICH AS EVER

Carisa's Ore Body Opening Up Excellently on 300 Level.

SILVER BELL IS IMPROVING.

Ore Body Widens in Winze—Bingham Deal—Gold Coin Builds Mill—Tiernan Looks Well.

The Carisa of Tintic has made a reputation for high grade shipments during the past few months, and present indications point to its record being kept up for many more months. Manager Cary said today in response to a question that the main ore chute has been opened up on the 300 level, where it is as rich and strong as on the levels nearer the surface. At this point the chute is between 30 and 40 feet long and about 15 feet wide. The values are copper, silver and gold. Mr. Cary declined to give the exact values in the ore, but stated that the gold values run between three and four ounces in some shipments in addition to copper and silver. The new shaft will be completed to the 350 level as quickly as possible, when the rich ore chute will be intercepted at greater depth. The owners are taking down the returns from 30 to 40 cars of ore per month, four or five of which are taken from the Northern Spy ground.

SILVER BELL IMPROVING.

Vein Much Wider in Winze Below Tunnel Level.

Foreman Fred Raube, who is in charge of the Silver Bell Mining company's property in Park City, reports an important change in the winze from the tunnel level. At the depth of about 23 feet the fissure has widened and this has been followed by a widening of the ore body. When the winze was started, an eight-inch streak of ore was in sight, but this has widened to between two and three feet. The owners are much encouraged over the change. The values are said to run about $20 per ton. It is not what the owners are looking for, but they have hope that a further improvement in the size and value of the ore streak will be noted as the winze secures greater depth.

BINGHAM DEAL.

Messrs. Moffatt & Daly Sell Interest in the Western Group.

James Moffat and Major Daly, who were at one time identified with the Star of Pine canyon, have just closed a deal which puts about $7,500 into their pockets. The deal is the outgrowth of a bond which was secured on the Western group in Bingham in the spring of 1897. The group consists of the Copper Chief and 6 other claims which were afterwards consolidated into the Copper Boy mining company. The owners of the Western group were given one-third of the stock of the new company, which has been bought in by members of the company for nearly the price stated.

The Tiernan is Improving.

Newt Dunyon came in from North Tintic last evening after inspecting the old Tiernan group, which is being developed by Pennsylvania capitalists. The drift in the lead ore body below the tunnel level has been extended about 100 feet and the drift is in solid ore for all that distance. Nothing has been determined as to size of the ore body, and Mr. Dunyon is not able to say anything further as to the length and width of the chute further than that the drift has been run for the above distance in a body of high grade lead ore. A force of twelve men is employed at the property.

Transfer of Uncle Sam Claims.

Special Correspondence.

Provo, July 3.—The deed from Jesse Knight and Amanda M. Knight to the Uncle Sam Concolidated Mining company, conveying the Uncle Sam and adjoining mining property in the Tintic mining district, which have lately been sold to the Uncle Sam Consolidated Mining company by Mr. Knight, for $500,000, has been filed with the county recorder.

New Mill for Gold Coin.

Joe Dederichs the well known mill builder came in today from Idaho after starting a force of men at work on a mill in the Seven Devils country. The plant is being constructed for the Gold Coin Mining company whose properties are located near the Black Lakes. The mines produces a gold rock which is said to be an excellent cyaniding proposition, and the present plant with a capacity of 50 tons per way is being built to treat the ore. The altitude of the mine is such that as much as 15 feet of snow lies in drifts adjoining the mill.

Ancnt Mammoth Dividend.

Prest. Samuel McIntyre of the Mammoth Mining company reached town yesterday from his big ranch at Hallack, Nevada. The superintendent of the mine is expected in tomorrow to confer regarding the company affairs, but the outlook for a dividend this is said to be very slim. Mr. McIntyre said today that it is hardly likely a dividend will be posted before the latter part of the month. The condition of his Hallack ranch is reported to be very good, though the season has been backward and the frost has nipped some of the lucern.

Returns from Nevada.

I. N. Dunyon, the veteran Deep Creek prospector, has just returned from Tecoma, Nev., where he located 4 claims in company with Lewis Martin. Mr. Dunyon says very little work is being done at the old camp. Three parties of leasers are at work and some ore is being extracted and marketed in Salt Lake, but things are generally quiet. Mr. Dunyon says he will go out to Deep Creek in the fall to start work on the Kinsley group, which gives every promise of turning into a bonanza when railroad transportation shall be secured.

Big Machinery Order.

The Engineering & Mining Journal says the machinery for the 1,000-ton plant of the United States Mining company, to be furnished by the Allis-Chalmers company of Chicago consists in part of 6 blast furnaces 42 in. by 180 in., 6 converter bowls 84 in. by 126 in., with 2 stands and the hydraulic accumulator and pumps for same; the blowing engine for converter; one tandem compound Reynolds power engine; 3 large blowing engines for the blast furnace. These blowing engines are used in preference to the rotary blowers ordinarily used, the 3 named having a displacement of 75,000 cu. ft. of free air per minute at 2½ pounds pressure. The blowing cylinders are all of the well-known Edwin Reynolds design, and are driven by cross compound condensing Reynolds Corliss engines. Added to this order is a 50-drill Reynolds air compressor, with Corliss compound steam end and compound air end.

MINING NOTES.

J. C. Griffiths has gone East on a mining deal.

The Ophir Hill marketed 10 cars of concentrates today.

Two cars of ore were on the market today from Diamond, Nevada.

Tomorrow being July 4th, there will be no call on the mining exchange.

Manager Thomas Weir of the Ajax went out to the mine last evening.

The Centennial-Eureka of Tintic had 21 cars of ore on the market today.

Manager Simon Bamberger of the Lower Mammoth went out to the mine today.

A car of concentrates was on the market today from the Tiewaukee of Bingham.

The new Tesora mill is said to be turning out about 30 tons of concentrates per day.

Engineer V. P. Strange returned last evening from an inspection of the mines around Godiva mountain.

The Chicago Oil Co., filed articles of incorporation yesterday, as foretold in the "News" several days ago.

Superintendent Morris Nebeker of the Ajax came in to town last evening. He reports no change at the mine.

The Taylor-Brunton sampler reported 10 cars of ore from Stockton, 1 from Bingham and 2 from Nevada today.

The Anchor company is reported to be the purchaser of the Smith-Ehenger group at Park City, which has just been sold for $36,000.

Manager A. L. Jacobs of the Ben Butler reports 5½ feet of fine galena in the upraise from the tunnel level, a car of which was to be settled for late this afternoon. The east drift is said to be improving and an ore body is expected there shortly.

The machinery for the Century of Park Valley is all on the way and Manager White says it looks as if the company will have its enlarged plant running by August 1st. Small stringers of quartz are appearing in the face of the lower tunnel indicating the near approach of the vein.

The first location for petroleum bearing land ever filed in Beaverland county, Mont., was placed on record in the office of the clerk and record on June 24th of this year, says the Dillon Examiner. The claim embraces 160 acres. The name of the claim is the Columbia, and it is situated about 14 miles from Dillon.

MARKET WAS SLUGGISH.

The Price Movement at the Opening Was Scarcely Perceptible.

Principal Dealings Were in U. S. Steel—Selling a Game Checked—Spasmodic Rises.

New York, July 3.—The opening of the stock market was listless and so sluggish that the price movement was scarcely perceptible. The principal dealings were in United States Steel, which opened up ¼ on the declaration of the dividend but ran off ⅞ on large realizing. Large offerings were small elsewhere, but concessions had to be made to find buyers, causing losses. At 11 o'clock prices were on the mend. Not much progress toward a higher level could be made, as the persistent selling of United States Steel on such a narrow speculation as prevailed effectually checked spasmodic rallies. On the other hand there were no losses of importance, the market ruling only a shade below yesterday's close. Missouri Pacific rights brought 29@21¼ for large blocks. Bonds were steady.

There was some increase in the selling pressure and prices touched the lowest. The decline reached 1⅛ in Steel and 3¼ in the preferred. Only a handful of the principal stocks suffered to the extent of a point. Northwestern lost 2½. The closing was moderately active and easy.

When you buy a ticket over the Burlington, you deal with but one concern. If you have any cause for complaint—or think you have, which amounts to the same thing—you do business with but one railroad. You are not told that "we're not responsible for this," or "he shouldn't have said that," or "we'll refer this to our Chicago office."

Leaves Denver 4:00 p. m. for Omaha, Peoria, Chicago, St. Joseph, Kansas City and St. Louis. Another good train leaves at 10:00 p. m.

Train for Black Hills, Montana, and Puget Sound leaves Denver 11:30 p. m.

ONE NIGHT OUT.

Rock Island Inaugurates Fast Train Service

COLORADO TO CHICAGO.

On June 18th, the Rock Island will establish "One Night Out" train service, Denver and Colorado Springs to Chicago. Trains will leave Denver daily at 1:15 p. m., Colorado Springs at 1:30 p. m., arriving at Omaha at 6:00 a. m., Des Moines at 10:05 a. m., and Chicago at 7:00 p. m. Connections made at Omaha with connecting lines for Minneapolis and St. Paul. The equipment of this train will be up to date in every way, containing all modern improvements both for comfort and safety, and will consist of composite library car, sleeper, chair car and diner. The high class service of this "One Night Out" Rock Island train together with the exceedingly low rates to the East in effect on that road beginning June 20th, will insure a most liberal patronage.
