MORTUARY REPORT.

Monthly Statement issued by Salt Lake Board of Health.

The Salt Lake board of health has issued its report of vital statistics for April, during which period the death rate numbered 240 persons, twenty less than for March, and only three more than in April, 1898. The ages under 5 years of age, and twenty over the age of 40 years. The classification of mortality shows it as follows: Preventable diseases, 7; constitutional, 3; parasitic, 1; zymotic, 5; organic, 4; diseases of the digestive organs, 4; respiratory diseases, 7; nervous, 2; Puerpery diseases, 1; by violence, 1; other causes, 4. The deaths were twenty-five males, the number of females and children were better represented. Pneumonia was active of death. The births numbered 240, equalling those of the month before, but showing a slight increase over those of April, 1898. The births were distributed as follows: Twenty-five males, one hundred and twenty-five females, one hundred and twenty-one all white, four colored. Twenty-one of twin births were reported from outside the city, and one were sent away for the benefit of their health. There were no deaths from measles, scarlet fever, or whooping cough. Diseases reported were: Twenty-nine, all scarlet fever cases.

LOCAL BRIEFS.
