MINING, BUSINESS AND STOCKS.

GOOD SPRINGS CAMP OF GREAT RESOURCES

Stock Manipulation Stops Work at One of the Mines, While Others Are Going Ahead.

Good Springs, Nev., Sept. 23.—A writer of fiction and well acquainted with the facts as they existed in the early days of this camp, could tell with more truth than poetry of a certain isolated spot at the foot of a prominent mountain peak not 20 miles distant from where the writer sits today where the ore (I guess you call it "high graded") was packed from various points and there milled with hand mortar and gold pan at a profit until the practise was stopped by dint of close and careful work on the part of the owners of the ground. You may see the ground from which the ore was taken.

Gold, however, is not our predominating ore on the entire source of our revenue. Or gold I mention the Keystone, as the only one in the district which has been worked for the metal entirely. The mine is now idle and has been for some years. The fact that it is idle is no fault of the property for it has been or would have been a paying mine from its grass roots to a depth of 1,100 feet, incline shaft, had the operators been mining men or men with any idea except that of stock manipulation. The Keystone mine today is better than it ever was, but it is a stock company and a black spot upon the record of our district.

NINETY-NINE MINE.

Of copper, I will mention that the "99" here is a prospect, or a mine in the prospective stage, which has paid all legitimate mining expenses from the time Judge C. M. Oren first put a pick into it until the present time. The property is now being worked by the "99" Copper company of Salt Lake City, under the management of J. B. Jenson.

The Columbia mine is another property strictly copper and has produced many dollars for its former owners who worked it on its merits. The Boss mine has been a good producer and would be today only for the fact that it is patented and the owner doesn't need the money. The same can be said of the Campbell estate grounds, consisting of 23 patented mines and none of them being worked. I believe they could be under proper conditions and make money for the investor. They have paid expenses in the past when the ore was hauled by wagons 70 miles and any one who knows of or who knew A. G. Campbell knows he would not patent 23 worthless mining claims. Come and see them and you will see others just as good, and in my next letter I am going to tell you of the Yellow Pine Mining company's ground—how big it is and what it has produced in the way of tonnage of lead-zinc ore, and if space permits will say something of the Monte Christo zinc mine and its production.

It was less than four years ago that anyone knew we had a zinc camp, and now we don't know how much we have but there is zinc everywhere except in places where copper or lead predominates.

MONTANA STRIKES LIME.

Formation Believed to be Kind That Makes Ore in Tintic.

According to information received this morning by stockholders of the Montana Mining company in East Tintic the shaft has reached the dolomite lime and is in a formation similar to that struck in the East Tintic Development and other properties before ore was reached. The main shaft is only down a short distance from the surface and already there is some ore coming into the workings.

Superintendent John Baundy feels greatly encouraged over the showing. He declares that he has no doubt but when the company will get carbonates and sulphides closer to the surface than many of its neighbors.

The company owns 14 full claims in the district and is in a very promising part of East Tintic. It is directly to the south of the Tintic Standard and East Tintic Development properties. It has also an ideal location for deep mining.

TALKS OF TINTIC CENTRAL.

A. N. Hosdawa, general manager of the Tintic Central Mining company has issued the following statement relative to the work now being done at this Tintic property:

"The Tintic Central is certainly in line for favorable development. While the water encountered in sinking the big shaft interferes with rapid progress, it will amount to nothing when the lime is reached, where it will be absorbed. In fact it is difficult to find a pumping equipment small enough to take care of the 100 or 200 gallons per hour. The increase of water has been very small and we have sunk 80 feet since first striking water. And while a pump will not be needed after reaching the lime, yet the company has ordered a small pumping equipment to run by electricity, which will be used while sinking to the objective point, which is 500 feet. Development in Iron Blossom also confirms the fact that 500 feet or over will be necessary in Tintic Central for the reason that the ore body goes lower to the south."

PUTTING UP FURNACES AT TOOELE SMELTER

Steel Up for Sampling Mill—Expect to Finish Concrete Foundation for Chimney This Week.

Work at the Pine canyon smelter of the International Smelting & Refining company is moving ahead rapidly and good advances have been made in the past few weeks. Material is coming in just fast enough to keep the contractors hustling to keep from under.

Already 12 of the 22 McDougal furnaces have been put up at the plant. The others will be put in as rapidly as the men can do the work. The power house has nearly all been bricked in and only a small amount of work remains to be finished.

The concrete foundation for the big chimney will be finished this week. This big smoke stack will be one of the highest in the country and will be 220 feet high. The laying of brick for the flue to the chimney has commenced, and a greater part of the retaining wall has been put in.

Work has started for the laying of the foundation for the reverberatory furnaces. It is expected that all the excavation work necessary at the plant will be finished within the next two weeks.

CARRYING TRAM ON BURROS.

Animals Used to Transport Material For Utah Consolidated.

Several pack trains of burros are now working at hauling material up the side of the mountain from Pine canyon for the tramway that is being built by the Utah Consolidated, between Bingham and the smelter site in Pine canyon. On the Bingham side of the work, the foundations of concrete have been put in and the setting up of the towers commenced last Saturday. The work of putting in the foundations has been completed a short distance beyond the summit. On the summit it is necessary to put up a control station and a double tension station.

A camp has been established at the Copper Boy mine and from the summit and Pine canyon forces of men are working toward each other. Another force of men is at work from the smelter site along the plateau that leads into the canyon. To reach this plateau from the canyon it will also be necessary to put the pack trains into service.

Work is being pushed through at a rapid rate and there is no doubt but what the tramway will be finished early in January.

PROVO IS HEADQUARTERS

(Special to the News.)

Provo, Sept. 23.—Amended articles of incorporation of the Mountain Lake Extension Mining company have been filed with the county clerk. The amendment changes the general plan of business from Salt Lake City to Provo city. J. Wm. Knight is the president, and H. E. Allen the secretary.

The Mid-Vale Mining company has also filed amended articles of incorporation changing the general place of business from Salt Lake City, to Provo city. Jesse Knight is the president, and H. E. Allen, secretary.

CONCENTRATES.

Work is to be resumed shortly at the property of the Seven Brothers in the Ploche mining district. The deep tunnel will be pushed ahead. Nearly a car load of ore is now on the dump awaiting shipment.

Manager I. G. Burton of the Revenue Consolidated Mining company in Beaver county has received word from the property that the new cross-cut tunnel started has struck ore. The vein is running parallel with the one toward which the tunnel is being cut.

At a meeting of the directors of the Emma Copper company yesterday afternoon the company paid off $6,500 of its debts and made arrangements for putting a number of men to work immediately upon the property. All the big stockholders of the company have paid their assessment and in order to allow the smaller stockholders to get in the directors extended delinquency day to Oct. 1.

The Goldfield plants during the last week treated ore valued at $250,000. The big mill at the Goldfield Consolidated has been handling 600 tons of ore a day and the grade of ore has been about $30 a ton. The combination mill has been treating 20 tons a day of the same kind of ore. The tonnage handled for the week was: Florence, 850 tons; Western Ore Purchasing company, 400; Goldfield Con., 5,065; Nevada-Goldfield Reduction company, 535. The total valuation of the ore was $238,175.

A. N. Robertson has returned from Eureka where he has been securing the assignments of mineral rights of the citizens to property they own in that city. Mineral right to all but about 35 lots out of a total of 687 lots and 192 subdivisions in the townsite of Eureka have been assigned to the Eureka City Mining company. The office at Eureka has been closed. The company set aside 350,000 shares for the purchase of mineral rights. The rate was 1,000 shares for each acre. The company agrees to expend $100,000 before selling any of its treasury stock.

EL PASO BOMB WAS ONLY A PEPPER BOX

El Paso, Texas, Sept. 23.—It developed today that there was no plot connected with the finding of a supposed bomb in Juarez, Mexico, last night.

The "bomb" proves to be a small pepper box 3 inches long, 1½ inches in diameter and captaining a substance like paraffine poured over the top. Even had it been explosive, it would have done no harm.

The police have arrested an American tramp who has been sleeping on the premises of Senor Arguelles and who had been ordered away. The tramp had made threats that Arguelles would be sorry. American Consul Edwards examined the "bomb" today and found it harmless.

STOCKS LOWER, CLOSING STRONG

New York, Sept. 23.—Opening prices of stocks today averaged a fraction lower; changes were generally small and many stocks started unchanged. There was also a proportion of gains. Pennsylvania rising a point and National Lead ¾. Illinois Central declined 1½ and American Car 1. The dealings were only moderate volume.

Selling orders increased and the whole list sagged ⅛ to 1 point. Canadian Pacific, Chicago & Alton, Wabash preferred and a half dozen minor specialties yielded a point. Pennsylvania led a subsequent rally which carried the market up again to a parity with yesterday's closing. Pennsylvania's gain reached 1½. Lackawanna jumped 5, to 256.

The advance halted at about last night's and prices sagged back. Reading yielded to 167. Louisville & Nashville fell ¾ and Toledo, St. Louis & Western, Erie first preferred. American Sugar and Westinghouse Electric 1. Mackay Companies rose 2½. St. Louis-Southwestern 1½, the preferred and Mackay Companies preferred 1¼ and Western Union 1⅛. The tone was firm and very dull at noon.

Bonds were easy.

A keen demand prevailed for a number of specialties and industrials, in which United States Steel rose to above 85. Larger gains were made by the cable and telegraph issues and there also was a substantial recovery in the railroad list. The Mackay Companies bounded up 5¼. Consolidated Gas and Western Union 2½, American Sugar 1⅝ and Union Pacific, Interborough Metropolitan preferred, Third Avenue, Central Leather, Republic Steel, United States Rubber and United States Steel preferred 1¼. Lake Erie & Western preferred declined 3 points, Delaware & Hudson 1¾ and Virginia Iron 1½.

The activity came to a halt and prices eased off. Southern Pacific advanced a point, while Reading second preferred yielded 3.

The market closed easy. There were 1-point gains established in Reading, St. Paul and Brooklyn Transit, and American Sugar rose 2¾. The higher prices were taken as a basis for renewed selling and Reading was forced back to 1¼ below last night. Pressed Steel Car preferred fell 1½. Wabash 1¼ and Union Pacific, Ontario & Western and Southern Railway preferred 1.

PRODUCE.

CHICAGO.

Chicago, Sept. 23.—Lower cables induced general selling of wheat during early trading today which resulted in weakness. Australian prospects were reported favorable for the new crop of wheat and advices from Argentina claimed conditions in that country were more satisfactory.

The market opened weak with prices ⅛ to ¼ lower, the latter loss being in the September delivery, which sold at 1.04⅛. Initial quotations on December were at 99⅝ to 99¾. Shorts took advantage of the break in the price in the September option and in their efforts to cover bid up the price to 1.05⅛. The deferred months, however, failed to show any recuperative power, and for a time held within the opening range.

Failure of killing frosts to materialize in the corn belt prompted general selling of corn early in the day which caused declines in all deliveries. Prices at the opening were unchanged to ¼ lower, December being at 60 to 60⅛. Early in the session December dropped to 59⅝.

Slack demand for the cash grain and a constant increase in stocks caused weakness in the oats market at the start. December opened ⅛ to ¼ lower at 39⅞ to 39⅝ and sold off to 38⅝.

Provisions were quiet and firm. A brisk shipping demand and light local stocks contributed to the firmness. Prices at the opening were a shade lower to 2½@5 cents higher.

Wheat—The market became still weaker later on in the day by selling by influential houses. September declined to 1.02⅛, while December sold off from 99⅝ to 98⅞@98⅞. The close was weak with September off 1⅜ at 1.03⅛. December was down ⅝@⅞ at 98⅞@98.

Corn—The market continued weak all day. For December the low point was 59¼. The close was weak, with December off ⅝ at 59½.

Close—Wheat—Sept., 1.03⅛; Dec., 98⅞@99; May, 1.02¾@⅞.

Corn—Sept., 65⅝; Dec., 59½; May, 61⅛.

Oats—Sept., 39⅝; Dec., 38¾@⅞; May, 41⅝@⅞.

Pork—Sept., 24.15; Jan., 18.15@18.17½; May, 18.00.

Lard—Sept., 12.00; Oct., 12.27½; Jan., 10.77½; Nov., 11.80@11.82½.

Ribs—Sept., 11.92½; Oct., 11.72½; Jan., 9.00.

Rye—Cash, 71@72; Sept. and Dec., 70.

Barley—Cash, 56@66.

Timothy—Sept. and Oct., 4.00.

Clover—Cash, 13.75; March, 14.25.

PLANS FOR CHILDREN IN SUNDAY'S REVIEW

Committee Issues Definite Instructions Regarding Their Participation.

The complete program for the children's review and the living flag was completed this morning. Superintendent D. H. Christensen will meet with the principals of the schools this afternoon and issue to them the final details for the school children. Capt. Joseph E. Caine will meet with the heads of departments in the review at 4 o'clock this afternoon in Superintendent Christensen's office and final instructions will be given to them. The following is the complete program and will be strictly adhered to:

Streets to close for traffic at 8 o'clock.

Assemble on Brigham street at 9 a. m.

All entrances to close at 9:30 a. m.

Review begins at 10 o'clock.

Disperse by signal.

The utmost promptness will be observed.

Brigham street will be roped from fence line to fence line at the east side of State street and at the west side of Q street, and all cross streets between State street and Q street will be roped from fence line to fence line at the line of intersection with Brigham street. Two policemen will guard the entrance to Brigham street at each intersection between State and Q and they will admit by ticket or badge only.

Each school or kindred body shall constitute one section. Each section shall be subdivided into groups of about 25 under one adult and each group should have its proper assignment of space within the space allotted to the section. A map with this apportionment of space should be in the hands of the adult in charge of each group.

The sections along each block including the street at the west shall constitute one division under one chief, excepting at A street, which constitutes a division. All orders to the respective sections will be given by the marshal through the chief of the division.

The following divisions shall constitute the line of review:

State street to A street—University of Utah, J. T. Kingsbury; Agricultural College of Utah, John A. Widtsoe; Salt Lake High school, Geo. A. Eaton.

A street—Living flag, John S. Welch.

A street to B street—L. D. S. high school, division A, Willard Young.

B street to C street—St. Mary's academy, All Hallows' college, Rowland Hall, Bryant, Gordon academy, division B, J. F. Tobin.

C street to D street—Bonneville, Onequa, Jackson, division C, J. Leo Fairbanks.

D street to E street—Poplar Grove, Riverside, Franklin, division D, D. W. Parratt.

E street to F street—Grant, Lincoln, division E, Elwood Brown.

F street to G street—Washington, Fremont, Union, division F, Guardello Brown.

G street to H street—Waterloo, Emerson, division G, A. O. Goodale.

H street to I street—Lafayette, division H, J. H. Coombs.

I street to J street—Hamilton, Sumner, division I, A. O. Garrett.

J street to K street—Oquirrh, Longfellow, division J, J. O. Conville.

K street to L street—Lowell, division K, William Bradford.

L street to M street—Granite district, division L-M, H. N. Garff.

N street to O street—Training, Webster, division N, John Hansen, Jr.

O street to P street—Murray, Wasatch, division O, A. C. Nelson.

Each child is to wear his school badge, or to carry a ticket issued by his school. Children without tickets or badges are not to be admitted and adults in charge of children are expected to wear badges or to carry tickets.

Each school or other organization is expected to provide each of its members with a small flag. Flags should not exceed 12 inches in length.

The depth from front to back should not be greater than eight rows, but the whole of the allotted space should be occupied at the front in order that the line be continuous.

All children are to receive in advance definite instructions concerning the proper method of assembling, line formation, dispersing, and the waving of flags.

All children are to remain in their respective places until the principal or the head of the section receives the signal from the head of the division for dispersing when they are to march in order to a point of dispersing previously decided upon. Every reasonable effort should be made to avoid unnecessary noise and confusion when the children finally disperse.

AUTO DEALERS TO MEET.

Plans Under Way to Form an Association and Big Show.

The automobile dealers of the city, of whom there are 14 or 15, will meet this evening at 8 o'clock in the Commercial club for the purpose of considering the advisability of forming a dealers' association, and also for the purpose of discussing the proposed automobile show in November. A meeting was held on Monday evening, when the dealers' association was talked over in an informal way by the few who were present. Since then all the dealers have been visited and a full attendance is expected this evening when something decisive may be accomplished.

IDAKO PROSPERING.

Bishop Orrin P. Miller was at his desk this morning in the presiding bishop's office after his vacation in Fremont county, Idaho. Bishop Miller reports splendid crops of grain, beets and alfalfa on the Egin bench, near Sugar City, though some damage to the grain and hay has resulted from the heavy summer rains. The new concrete stake house at St. Anthony is up to the square and work on it is being pushed.

DR. CARVER'S WILD WEST SHOW AT FAIR

Directors Close Contract Today for Big Attraction at Forthcoming Inland Exposition.

The directors of the Utah State fair have closed the contract today for the biggest attraction of this or any other year by wiring Dr. Carver an acceptance of his proposition for the exhibition of this celebrated Wild West show for the whole of fair week. This is the most expensive attraction on the grounds and costs nearly $2,500. Included in the show are 22 horses and 12 people. The horses include "Montana Bessie," the $5,000 bucking cow, said to be 1,000 bucking broncbos rolled up in one cowhide. Also "Sun Dance" the terror of all Texans, known as the worst horse ever shown in public. Other notorious horses are "Mamma's Baby," a living cyclone from the plains, and "Funeral Wagon," a horse which is said to go perfectly insane when the cowboy mounts him. Then there will be "Prosperity Bill," a big-horned steer on whose back reserved seats are furnished free to any one who cares to venture.

One of the hair-raising performances of the show is the high dive on horseback from a tower 60 feet high, in which a woman is said to shake hands with death. One hundred dollars in gold is the reward to any one who will do the same stunt.

Secretary Ensign states that the entries for the harness events at the races, which closed last night, are more satisfactory than those of any previous year.

STUDENTS WANT GRANT BACK ON THE TEAM

A petition signed by practically all of the student body of the University of Utah is being presented to the faculty this afternoon in behalf of Benera Grant, the crack quarterback, who was barred last fall from all student activity, following an unfortunate incident at Logan.

Grant is one of the best athletes of the institution; good in track work and a fine quarterback. He is needed on the team and every effort is being made to have him reinstated.

Race track specials leave Union depot prior to the races. Only way to get to the track.
