## FRAGMENTS.

LEAD quotations, per 100 lbs., \$3.75.

Mr. Jessor and family leave for San Francisco tomorrow.

Mike Sullivan was fined \$5 for drunkenness this morning.

FIFTY-FIVE tourists from California will arrive in the city tomorrow.

THERE is another case of diphtheria in the family of John Vincent, Sixteenth Ward.

SILVER quotations, corrected daily by Wells, Fargo &amp; Co.: New York, \$1.06 1/2; London, 49 3/16 d.

J. ALLEN and wife, of Park City, started over the D. &amp; R. G. this morning, on a visit to Liverpool.

M. A. AYERS, agent of the Home Sewing Machine Company, will leave for Denver tomorrow, via the U. P.

AFTER July 1st, persons can visit their friends at the Penitentiary only on the first Thursday in each month.

SINCE the fishing season commenced numerous parties visit the canyons daily and try their fortunes with the rod and line.

BISHOP O. F. WHITNEY will deliver his lecture on the subject, "What is Education?" in the Ward Assembly Rooms this evening at 8 o'clock.

McCORMICK &amp; Co. today received one car Hammer ore, value \$2,000; one lot Quicksilver of the Hills ore, value \$1,300; Nevada ores, \$1,000; total value, \$4,300.

In the account of the drowning of Bishop Hamilton's child, in the News yesterday, the father's name was printed Joseph C. instead of James C. Hamilton.

THE Territorial Library is not permanently closed, as some have supposed. It will re-open in a few days, as soon as the cataloging of the books is completed.

THE game of baseball that was played yesterday on the Eighth Ward Square, between the employees of S. P. Teasdale's store and the Z. C. M. I. shoe factory, resulted in favor of the latter by four runs, the score being: Teasdale's, 30 runs; Z. C. M. I. S. F., 8 runs.

FOUR youths, Arthur Curtis, Hyman Curtis, Lucien Adams and Joseph Rae, were before Justice Speirs this afternoon, for stealing \$2.50 worth of cigars and nuts from a store on South Temple Street. The boys were locked up in jail, and the cigars returned to the owner.

WE are sorry to be under the necessity of announcing the death of the wife of W. J. Bateman, who is secretary of Z. B. B. S., she having ended her mortal career this morning, in her 24th year. The funeral service will be held on Sunday, in the 20th Ward meetinghouse.

A crowd of young hoodlums indulged in a *charivari* in the Fifth Ward last evening, and the air was resonant with yells, howls and the noise of beating on the cans. If some of these disturbers of the peace were caught and punished, the salutary effect it would have would be appreciated by the community.

BISHOP S. A. WOOLLEY, of the 9th Ward, lost a small pocket book two weeks since, containing among other things valuable to him, a note of J. M. Leffer's with the Bishop's name endorsed on the back of it. If the party who found it will return it to the owner he will be rewarded for his trouble and honesty.

THE funeral service over the remains of the daughter of John Vincent, who died of diphtheria, yesterday morning, was held yesterday afternoon at the residence, and conducted by Counselor Francis Cope, who, together with William White and Peter Gillespie, made consolatory remarks to those who were assembled.

SISTER ELIZA R. SNOW SMITH returned eight before last from a visit to Box Elder County, extending from the 18th instant. During her absence she held six meetings in Brigham City and two in Willard City, among the several ladies' organizations of those places, greatly enjoying the trip and comes home in good health and spirits.

## LOCAL NEWS.

**Sudden Death.**—The acquaintances of the family of Counselor James W. Philpotts, of the 16th Ward, will doubtless be surprised to learn that he died during last night. Although she has been all for some time with rheumatic fever and sciatica, it was not generally thought that she was in immediate danger of dying; that she seemed rather better yesterday than she had been, and retired about ten o'clock last evening, feeling that she was going to get some rest and sleep. She was soon asleep and continued so, apparently free from pain, until about twelve o'clock, when she was noticed by the watchers around her bedside to be breathing with some difficulty. The family were soon aroused and everything that could be done to revive her, but all in vain. She died shortly afterwards.

Sister Philpotts was an exemplary wife and mother, and was much respected by all who knew her. We sympathize with the bereaved family.

**Selling Liquor on Sunday.**—This afternoon James A. Fitzgerald, proprietor of the Horn Silver Fountain den, was tried before Justice Speirs, on the charge of selling liquor on Sunday, contrary to law.

Thos. Feeny testified that he was bartender for defendant, did not recollect having been told either to sell liquor on Sunday or not; but turned all the proceeds over to the defendant, who ever made any inquiries as to whether the money was received from the sale of liquor or the proceeds of the lunch stand.

James Bateson testified that on the 7th of June, 1888, he and Mr. Crow went to Fitzgerald's saloon; they found three or four persons there; Feeny was behind the bar as far as drugs and food were concerned; witness called for drinks, and got a couple of glasses of sherry and one of beer, for which he paid 25 cents to Feeny, who placed the money in the tin. Cross-examined: This was about 5 minutes to 11 a.m.; witness lived at West Jordan, and had been employed as a policeman; saw defendant first last Monday night to know him.

At the conclusion of this witness' testimony the defendant smiled derisively at him.

Mr. Crow corroborated Mr. Bateson's testimony, and both sides rested.

The court adjudged the defendant guilty, and imposed a fine of \$50. An appeal was taken to the District Court, and the bond fixed at \$100.

**The Teacher's Institute.**—The two day's session of the Teacher's Institute of this county commenced at 10 o'clock this morning, in the 14th Ward Assembly Rooms.

After the usual opening exercises, Prof. T. B. Lewis gave an interesting address. He expressed great pleasure at seeing so many members of the Institute, and visitors from other counties, present. In choosing a subject to treat upon, he said he was in a quandary, but he thought that anything concerning schools would not be amiss.

He claimed that every county superintendent of schools, and as far as possible, every trustee should be a practical teacher and qualified for his position. The school-room is the best place to form a judgment of the condition of a community, and it also forms the only true basis of testing a teacher. A teacher's certificate is but a poor index to his abilities. His work should be his test.

The teacher's duty is to lead the mind of the child in the channel through which God ordained it should run. He should study both the physical and the mental nature of the child so that his growth may be healthy. When a teacher has entered into the mind of the child the principles of self-government he has achieved one of his greatest objects and laid the foundation of success for that child. He should impress upon the minds of his pupils that there is no royal road to knowledge, and no amount of study will hurt him, provided proper hygienic laws are exercised.

Wendell Phillips had said with considerable truth that hard study is one of the lost arts, and the speaker urged strongly its restoration. The use of text books should be accompanied with other instructions, and the child should never be forced to commit to memory.

A death in the family caused the absence of Misses Kate and Clara Snedaker, so they took no part in the program.

Mr. G. M. Ottlinger on "How to read a picture" followed. He said, as familiar as we were with pictures we could not read them correctly. But one in a hundred actually reads a picture. He said we look and see, but we do not study it. The artist produces his pictures according to a geometrical rule, and supposes the spectator to read it in the same manner. For illustration, he painted a picture of a man in a suit, and he placed his subjects at the proper distances. In order to read a picture we must learn the school of the artist, and compare his work with what you have seen in nature. He urged the necessity of drawing being taught in the district schools.

Miss Sadie Tripp recited "The Old Actor's Story."

Some exercises of a primary class by Mrs. C. F. Wilcox, were very interesting, and enjoyed much especially by the little ones who took part.

After singing, benediction was offered by Mr. D. R. Allen.

**From the Australasian Mission.**—We had the pleasure of greeting Elder Charles Heyborne, of Cedar City, this morning, who returned last evening from a mission to Australasia. He left here on the 1st of May, 1888, and on his arrival in New Zealand was assigned to labor among the Maories on the North Island, where he remained two months, after which he was transferred to Australia, and spent some little time with relatives in Sydney. There also he met Elder James Bastow, and in company with him went to Victoria, and in and about Melbourne spent ten months endeavoring, with but poor success, to awaken an interest in regard to the Gospel. The people of that region are generally in good circumstances, and their attention is so completely engrossed with business and pleasure that they pay little attention to religion, especially the religious of the Latter-day Saints, against which they are most terribly prejudiced.

Mrs. Stenhouse has been through that country lecturing against the "Mormons" and selling her anti-"Mormon" book, and as a result the most exaggerated ideas prevail there in regard to the Saints, and few can be induced to investigate their doctrines. Those who do so in response to the appeals of the Elders generally admitted that they were both scriptural and reasonable, but they manifested little or no disposition to embrace them.

From there Elder Heyborne returned to New Zealand, and during the remainder of his stay labored in the South Land district among the white population. There he was more successful, and baptized seven persons. He found the climate of that region very bad, owing to the sudden and extreme variations of the temperature, and he suffered considerably in health from that or some other cause; indeed, he has not regained his health yet. As is generally understood, the southern part of New Zealand is the southwest corner of the continent, and the weather there is as much as five feet in depth, occasionally proving very destructive to the flocks of sheep which there abound. The winter weather was just settling in when he left the island. In the summer time it rains about three-fourths of the time, and during the excessively hot weather, when clothing of any kind is almost unbearable, a cold blast is liable to come from the southwest at any hour almost chilling the marrow in the bones of the inhabitants, and rendering overcoats and warm wraps immediately necessary.

The chief work now being done by the Elders in New Zealand is among the Maories, who are receiving the gospel in great numbers. About 1,000 of them have been baptized within the past two years, and the prospect for further work among them is very bright.

**Instantaneous.**—The firm of Fox & Symonds was the first to put in the country to adopt the art of taking instantaneous photographs, a practice which all who have had pictures taken by the old process will appreciate. The negative is taken in an instant, thus avoiding long and tedious sittings, and the artist is able to get a good picture of children at the first sitting. They also make a specialty of coloring photographs, and to judge by the finish of their pictures, they are real artists in this line. Besides their abilities in these branches, they have the advantage of possessing the only place in town, with a photograph gallery on the ground floor, thus obviating the tiresome necessity of ladies and children having to climb a flight of stairs. They also keep in stock a fine assortment of engravings, and having lately gone into the manufacture of picture frames, they carry a large stock of moldings of the most fashionable patterns. Besides their place of business opposite the Masonic Hall, they can also be found at their new gallery, 222 Main Street, opposite the St. James Hotel. See adv.

A sudden death occurred on the U. C. train last evening, coming from the south. A woman and two children got on the train at Santiquin to ride to Provo, and before reaching Spanish Fork only a few miles distant, one of the children had died. The woman, who was the mother of the child, was taken to the hospital, but she died before the child was buried. The child was taken to the hospital, but she died before the child was buried. The child was taken to the hospital, but she died before the child was buried.

## TERRITORIAL ITEMS.

**CULLED FROM LATEST EXCHANGES.**

—Hans P. Borg, of Uintah, has been placed under \$500 bonds to await the action of the grand jury, for an attempt to shoot a young man named Garner with a shotgun.

—At Anaconda, Idaho, on Tuesday last, a man named Harrington provoked a row with a drunken peddler, Pat Duane, and bit off a piece of the latter's ear.

John Cleveland, John Murphy, Wm. Clark, Julius De Wance, George Wilson, and Charles Coleman have been bound over at Ogden City, in \$2,000 each to await the action of the grand jury. They are charged with having broken into a Central Pacific car at Blue Creek station in Box Elder County, and stealing therefrom several articles, consisting of cigars, boots and shoes and other merchandise. The robbery was committed about June 1st, and since then Mr. F. T. Burke, California detective employed by the C. P. Company, has been searching for the perpetrators. He went to Blue Creek Station last Sunday, accompanied by Marshal Ballantyne and Sheriff Belnap, and succeeded in finding a quantity of the goods stolen and arresting the defendants. In default of bail being furnished, they were committed to jail.

An accident occurred at the Anaconda mine yesterday afternoon, by which John Farrell, one of the shift bosses of the mine, received some very painful injuries. It appears that a gang of miners were engaged in the east drift of the 800-foot level, making connection with the west drift. The men had a round of holes drilled and loaded with powder, yesterday afternoon, and were about to blast, preparatory to quitting work for the day. It was supposed that the men had several feet more to run before connecting with the west drift, and Foreman Mike Carroll and Farrel went into that drift for the purpose of lining to the blast, thus determining how much ground remained to be mined. A moment after, an explosion took place that connected the two drifts, but which also came near killing both Carroll and Farrel. The latter gentleman received the full burden of the blast about his face and body, and for a time it was feared that the unfortunate man had lost the use of his eyes. This, however, is not the case, and when the sufferer was brought to the surface, he was found that he had escaped with a few very severe cuts and bruises. —Butte Miner, June 17.

**Broken Bridge.**—A gentleman from Mill Creek called in this morning to state that the bridge over a creek which crosses the street running past the Mill Creek Ward House, between the State Road and the upper county road, is in an impassable condition. There is a large hole in the centre of the bridge, and the surface is so washed away. A considerable amount of traffic is thus impeded, and the bridge should be promptly fixed.

**Closing Exercises.**—The Ninth District school closed yesterday for the season and in the afternoon an examination and review were held, showing very satisfactory progress made by the pupils during the term. In the evening a dance was given to the school, at which the principal, Mr. A. M. Woolley, was present, and the pupils with a beautiful gold pen, with a pearl handle, enclosed in a case, and an ink bottle, accompanied by a written testimonial of their esteem. He also received a great number of handsome bouquets from the same source, all of which, as may naturally be expected, he greatly appreciates, especially as they were totally unexpected.

**"Private Secretary" and "Professor."**—As the engagement of the Madison Square Theatre Company approaches, so does the interest increase among the theatre-goers of Salt Lake. "The Private Secretary" will be given on Wednesday and Thursday evenings, June 24th and 25th, as well as at the Saturday Matinee, and "The Professor" on Friday and Saturday evenings only. Wm. H. Gillette, who has created such a success in the title roles of both plays, of which he is the original exponent, appears, aided by a very competent company, the best comedy organization we are informed that has come this way for some time. As "The Private Secretary" has been such marked successes in the East, it is an accepted fact that everybody will want to see them here. The sale of seats for the entire engagement opens Monday morning at the box office of the theatre.

**A Model Cottage.**—Jos. M. Watson, Esq., builder, has just completed on his premises in the Seventeenth Ward a new brick cottage that is a model of neatness in architectural design and general appearance. The house consists of six rooms, exclusive of bath room and closets, with a basement under the back part; the woodwork is handsomely painted and each room conveniently fitted up. The front view is especially very attractive. The large window is built of colic—known as Sanpete whitestone—instead of wood; the steps and trimmings around the door and windows are of the same material, and in contrast with the red brick, the structure presents a handsome and substantial appearance. The words "Temple Cottage" are set in a neat stone panel over the door.

## BUSINESS NOTICES.

**REMOVED.**  
P. W. Madden's furniture store to 51 and 53, First South Street.

**FLY DOORS**  
AT  
CO-OP FURNITURE STORE

**POPULAR PHYSICIANS.**

There is a growing demand on all sides for remedies which are both safe as well as beneficial in effect, and the leading physicians and druggists are warmly recommending a new remedy, all preparations possessing real merit and value. It is now admitted by all who have tried the new remedy, which is having such an immense sale, that it is the most agreeable and efficacious preparation ever discovered. If you are afflicted with any of the following ailments, try this remedy: Cough, colds, croup, whooping cough, influenza, sore throat, tonsillitis, laryngitis, bronchitis, asthma, hay fever, neuralgia, sciatica, rheumatism, gout, migraines, indigestion, constipation, diarrhoea, dysentery, hemorrhoids, piles, skin diseases, etc. It is a powerful and reliable remedy, and is sold by all druggists and chemists. Price 25 cents per box.

For sale at Z. C. M. I. Drug Store.

**BUCKLEY'S ANEMIA SALVE.**

The Best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Fetter, Chapped Hands, Chills, Blisters, Itch, Scalds, Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box.

For sale at Z. C. M. I. Drug Store.
