MINING, BUSINESS AND STOCKS

MARKET OPENED WITH PRICES WEAK

Carisa and New York Bonanza Displayed a Disposition to Soften.

DALYS WERE NOT IN DEMAND.

Wabash Offered at $1.89, Could Find No Takers—Closing Quotations And Sales.

The mining stock market opened today with a tendency to soften and, when the forenoon calls ended, several of the stocks active during last week had scaled down the line several notches. Carisa was the first to suffer and it dropped 1¼ cents during the call. Daly held about even and came out at $2.45, while May Day came out at 23 cents. Daly-West and Daly-Judge failed to attract, and New York Bonanza seemed to strike an uncertain tone, and was inclined tobogganward. A bid of 10 cents for Star Consolidated brought it out without the slightest difficulty, while Ingot of Mercur found willing takers at 2 cents. Victor Consolidated stiffened slightly, but Uncle Sam Consolidated was attacked with a spell of weakness. Wabash, offered at $1.89, was not wanted at the price. For Beck Tunnel, 8 cents was bid, and one broker had it to sell at 9¼ cents.

The closing quotations and sales were as follows:

GEOLOGICAL SURVEY.

Government Report on Development at Tonopah About to be Issued.

A government report that is likely to appeal to the investing public is a paper entitled "Development at Tonopah, Nev., during 1904," which Mr. J. E. Spurr of the United States geological survey has written for the annual bulletin (No. 260) entitled "Contributions to Economic Geology, 1904."

"The general conditions for mining and profitable production of ores," says Mr. Spurr, "are decidedly better than they were a year ago."

The greatest advance has been in the building of a railroad to Tonopah, connecting with the Carson and Colorado Railroad at Rhodes, near Sodaville. This has lessened the cost of transportation, so that supplies have become cheaper and ores can be profitably marketed which are of lower grade than what was regarded as "shipping" ore during the period when a 60-mile haul in wagons was necessary. The roads are inadequate, however, for the needs of the district.

The supply of water for the town seems to be somewhat more abundant than last year, though there is still much to be desired. Part of the supply still comes from the wells of the Crystal Water company four miles north of the town, while another portion is derived from the Rescue shaft, which is practically within the town itself.

Until recently there have been only three principal producing mines in the Tonopah district, although a number of others have shipped small quantities of ore. These producers have been the consolidated Mizpah and Valley View mines (Tonopah Mining company), the Montana Tonopah, near by, and the Belmont company, whose properties are operated throught the Desert Queen shaft. Recently, however, another mine—the Tonopah Extension—which ranks in importance with those above mentioned, has been discovered and developed, and from this new mine shipments of considerable amounts of ore have already been made.

The success of Tonopah brought to the region an army of prospectors, who have been searching the desert for other ore deposits. The most notable result of this prospecting is seen in the new camp of Goldfield, which lies about 28 miles south of Tonopah. Already this camp equals or exceeds in population, and far exceeds in activity the parent camp of Tonopah.

The prediction made n Mr. Spurr's report of last year that new veins belonging to the productive period of the earlier andesite would probably be discovered underneath the later overlying lavas has been fulfilled during the past year by the discovery of several such veins. Large bodies of rhyolite dacite have also been encountered which frequently contain quartz veins. On account of the resemblance of these veins to those in the earlier andesite veins they have been the object of a good deal of exploration and development-work, whose average results have been decidedly unprofitable.

The developments of the past year, however, have added to our knowledge of the underground geology of the region and increased our basis for future estimates. The actually productive area has been slightly but not greatly enlarged. The complicated faulting, characteristic of the district, has entailed more or less serious hindrance to mining operations. The chief exploratory work has been done in areas lying east and west of the productive region, but the results cannot be called highly gratifying. Work from which a larger measure of success could, perhaps, have reasonably been expected has been carried on in the area west of the productive region. In this area, the Tonopah Extension has been successful, while the other workings have developed nothing of importance. The exploratory shafts sunk during the last year in the region around the productive area indicate that the earlier andesite, with its productive veins, if indeed it can be found in any large amount in these regions, lies under an average great thickness of the subsequent barren formations.

NEW YORK BONANZA.

Park City Paper Confirms Reports Sent Out About Conditions There.

A Park City Record reporter visited the New York Bonanza again Wednesday evening and was courteously taken through the property by Manager McGill and Supt. Morgan. Every drift, stope and crosscut at the mine was gone through and examined and we now feel fully justified in saying that the condition of the Bonanza confirms the most flattering reports that have been sent out regarding it. Especially on the 800-foot level, is the outlook encouraging and the work of the next 30 days, if indications are true, will open up one of the biggest and richest properties in the camp. In the east and west drifts from the 800, and especially the latter, bodies of high grade ores have been uncovered, and what is taken as a most favorable indication by the management is the fact that these "strikes" are in place, as they have not been in the upper workings. It may truthfully be said that there is ore everywhere on the 800, and while the main body has not yet been encountered, it is reasonably supposed by those in charge and all who have examined the property that the smaller bodies so far uncovered will eventually lead to the desired quantities. This is why the next 30 days' work will be so important and on the 800 level there are both chloride and sulphide ores. At the 640 level high grade ore is being taken out right along and on the 600 a little prospecting is being done. Small streaks of ore have been gophered on for considerable distances, and rich product taken out. About 45 tons of it have been shipped this week, returns from which will be known in the near future. If there ever was a promising looking proposition in the Park it is the New York, and if a big mine is not opened up there, it is hard to imagine where one s to be found in the entire camp.

Manager C. L. Rood of the Ontario returned to the city yesterday after having spent several days looking after affairs at Ontario drain tunnel. Mr. Rood stated that when he left the tunnel yesterday there were 11 3-inch pipes through the face of the drift around the cave and that a large volume of water was flowing through them. The first one was sent through last Sunday and the work of putting them in is still going on. It is not known just how many pipes will be necessary to draw the water off, but the required number will be placed. Mr. Rood stated that he did not know just what the next move would be as conditions are so changeable that it is impossible to see and plan work ahead any length of time. A cement bulkhead has been built across the entire face of the drift so that all work is being carried on in absolute safety to workmen. There is nothing to give out concerning future work as all depends entirely upon circumstances.

UTAH AND EASTERN.

Manager Doolittle Returns and Reports Satisfactory Conditions.

Manager C. H. Doolittle of the Utah & Eastern Copper company properties in Washington county returned to the city from the south this morning. He reported conditions at both the mine and smelter as being very satisfactory. The new shaft is now being used and all are being brought to the surface through it. The smelter went into commission again about two weeks ago.

The roads between the San Pedro tracks and the mine have dried up and are in good shape for the movement of freight.

Michigan Mill Man Here.

Thomas Cummings, for a quarter of a century connected with the mills of the Osceola and Tamarack mines at Hubbell, Michigan, is in the city, accompanied by his wife, and are the guests of Mrs. Pat Condon, Mrs. Cummings being a sister of the late Mr. Condon. Mr. Cummings is now superintendent of the mills operated by the companies, with whom he has been associated so long. He is on his way home from a trip to California, where he has property interests.

The Mayflower Property.

Special Correspondence.

Lehi, May 1.—The Mayflower mine in West Canyon, west of here, which is mostly owned by Lehi people is showing some promising values. Through energetic development, a vein of lead and copper ore has been opened.

Today's Metal Quotations:

Local settling prices as reported by the American Smelting and Refining company:

LEAD, quiet,	4.50@$4.60
COPPER, quiet,	15@15¼

NEWHOUSE MEN AT PELICAN POINT.

Records Show That Transfers of Land Have Been Made to Lafayette Hanchett.

MAY BE FOR THE BOSTON CON.

Mill and Smelter Site—Samuel Newhouse Not Ready to Confirm This—Railroad Men Busy.

Special Correspondence.

Lehi, Utah, May 1.—There are very good reasons to believe that Utah county is to be the home of a great smelting industry, and that Pelican Point, about 15 miles from this town will be the location. It will be recalled that a few months ago some unknown parties took options on all the land in that section and did not attract much attention at the time; but, during the past few days, agents have been busy, and a number of parcels of land have been deeded to Lafayette Hanchett, manager of the Newhouse mining interests in this state. This has led to the belief that Mr. Newhouse is interested in these purchases and that the land and water rights are being obtained for the use of the Boston Consolidated company. Some others contend that the site is being obtained for other purposes; possibly for the location of smelters and mills in which the iron ores of iron county will find treatment. But the latter purpose seems the most unlikely.

There is no more desirable site in Utah county than the one mentioned in the foregoing. The land is practically valueless, except that several ranchers feed a few herds of cattle there and the price they are getting for the land is far in advance of what it is worth to them. Between this site and the Utah county farms and orchards, is the Utah lake, a distance of 15 miles, and to the west are the Black hills; so that, no damage could be done by the issue of smelter smoke or fumes, if works were built at Pelican Point.

By looking at the map, one can see at a glance that the Pelican Point site is located in the central part of the mining belt; easily accessible, either from Bingham, Eureka, Mercur, American Fork and other mining centers. Spurs could be easily run over a flat country in this county either from the R. G. W. or S. P. L. A. & S. L. railways' tracks, a distance of 15 miles to this site.

Much more interest has also been awakened by the presence of a party of railroad officials in Lehi during the past few days and who have been making trips on horseback from Lehi to Bingham and across the flats to the Pelican Point site.

People who have watched these gentlemen aver that they have been looking over the country to approximate the cost and length of a railroad from the famous copper camp of Bingham to Pelican Point; all of which would lead one to believe that this site is intended for a great smelter for the Boston Consolidated Mining company, and that this movement is one of Samuel Newhouse's master strokes.

The foregoing communication from the "News" correspondent at Lehi was shown to Mr. Newhouse shortly after his return from a trip to the Cactus mine in Beaver county, but he would neither confirm nor deny that the Pelican Point land was being obtained for the Boston Consolidated. He declared, however, that he had under consideration several sites for the proposed concentrating mill, but that no definite decision had been reached as to which would prove to be the most advantageous one. However, some conclusion will probably be reached during the present week.

CONCENTRATES.

Simon Bamberger is still sojourning in Los Angeles.

About 300 miners are said to be employed in the mines of Alta.

Joseph Bush, a pioneer of the Hiko, Nev., district, is in the city.

Herman Green of the Bingham Consolidated is in Bingham today.

The May Day Mining company has five cars of ore at the samplers today.

Ore assaying $300 to the ton has been encountered in the Alta-Quincy mine at Alta.

Another car of ore is reported enroute from the Utah mine at Fish Springs.

Broker E. M. West was in Tintic yesterday and made on inspection of the May Day mine.

Ben Hite and Herman Horne were visitors to the New York Bonanza mine at Park City yesterday.

President Samuel McIntyre of the Mammoth Mining company is expected in from his Nevada ranch today.

The T. & B. samplers reported the arrival of 13 cars from Tintic and the same number from Nevada today.

Manager John Dern of the Uncle Sam Consolidated and Lower Mammoth mines will go to Tintic this evening.

The Pioneer sampler reported two cars of ore from Alta, two from Bingham, one from Nevada and two from Tintic today.

Caller Ira B. Jones of the Salt Lake Stock & Mining Exchange, has returned from a trip to Los Angeles, very much improved in health.

L. F. Peer of this city is developing the old Illinois group of claims at Hiko, Nevada. Some eastern parties are interested with him in the proposition.

A new mining exchange has been organized in Los Angeles and the name of J. Donnan Reavis, formerly of this city appears among the list of charter members.

Manager L. A. Copeland of the Taylor & Brunton Sampling company expects to participate in the Commercial club excursion to Los Angeles next Saturday.

William H. Alexander expects to inspect the Frisco Contact at Frisco during the week. He will leave for the south tomorrow night and expects to go east next week.

The ore shipments from Park City last week amounted to a total of 3,416,290 pounds. The Silver King sent out 1,977,220 pounds; Daly-West, 1,205,000 pounds; Ontario, 234,000 pounds.

The ore and bullion settlements reported late Saturday afternoon were as follows: Crude ore and concentrates, $65,000; base bullion, $45,000; gold bullion, $20,000. Total settlements for the month aggregated $2,192,500.

News was sent out today by the management of the Montana-Tonopah company ythat they have again encountered the famous south ledge in their ground and that it is as rich as ever. This ledge paid more than a hundred thousand dollars in dividends before it was lost a year or so ago. Active work has been going on since that time to regain it, with reward for the company at last.—Goldfield Sun.

LOCAL MARKETS.

The markets are well filled with good things today, and prices as a general thing remain unchanged, with the exception that strawberries and butter are becoming cheaper. There is an increasing demand for bananas, and the quality of this fruit is improving. Oranges have been arriving in plenty, but the navel variety from California is being followed by Mediterranean sweets as the California article becomes scarcer. California cabbage is being received in fine condition, with new potatoes. Dry onions are becoming scarce, and are selling at $5 per cwt. There are no more oysters, the first month without an R was ushered in this morning, and it will be September before the regular season begins again. The prices obtaining today in the local markets are as follows:

RETAIL.

Corn, per cwt	$1.45
Corn, cracked, per cwt	1.50

STOCK MARKET WAS CONFUSED.

Vigorous Support Was in Evidence And Effective in Many Prominent Stocks.

GOOD DEMAND FROM EUROPE.

Shorts Disposed to Cover—Breaks Carried Many Stocks Through Saturday's Prices.

New York, May 1.—The stock market opened in confusion and disorder with wide changes both ways. The closing day of the London exchange left operators in stocks without the usual preliminary intimation of the tone of the speculation and a feeling of great anxiety remained as a result of Saturday's events. Vigorous support was in evidence and was effective in many prominent stocks, but in others there were considerable declines. Opening gains were shown of 1 to 1⅝ in Louisville & Nashville, Illinois Central, Canadian Pacific, Northern Pacific, Atchison, Reading and Union Pacific. The last named opened wide with simultaneous sales of 6,500 shares from 119½ to 119, compared with 118⅛ on Saturday. The price then dropped to 113⅝. United States Steel preferred was down ⅞ on running sales and a wide opening in the common stock on 10,000 shares showed prices at 30⅞ and 31, compared with 31⅝ Saturday. American Smelting was down 1⅝, Tennessee Coal about a point and Pennsylvania ⅝. Northwestern dropped 4. There were some recoveries at the extreme declines, and some reaction from the wide advances immediately after the opening.

Foreign commission houses reported a demand for stocks from all part of Europe and considerable advances were made in prices. The failure of confirmation of Saturday's rumors of financial troubles made shorts disposed to cover. The success of the supporting tactics seemed to induce the withholding of selling orders, but in the second half of the hour there were some threatening breaks again. Atlantic Coast Line rose 3½, Great Northern preferred and Kansas City Southern 3, and the Eries, Rock Island, Missouri Pacific, Norfolk & Western, Amalgamated Copper, Colorado Fuel, the Metropolitan stocks, General Electric had got up 1 to 2. On the break Smelting slumped 4⅝. New York Central 3. New York, Chicago & St. Louis 2. The second preferred 3½. Locomotive 2½ and Reading, St. Paul, Pennsylvania, Southern Pacific, the United States Steel stocks, Tennessee Coal, Colorado Fuel and others 1 to 2. Union Pacific reacted from 119⅝ to 117⅞ and Great Northern preferred from 173 to 168. Cleveland, Lorain & Wheeling broke 5.

The break carried many stocks through the low prices made on Saturday, which would serve to affect additional margins. Some of the stocks which opened strong recovered to the best later. Canadian Pacific rose 2⅝. Erie rallied 1½. The market became much quieter.

Bonds were steady at noon.

The bulls obtained absolute control of the market for a time after midday and pushed prices resolutely upwards. Outstanding shorts became alarmed and covered frantically at a level from 1 to 3 points above Saturday's closing. Business was very heavy while the rise was in progress. Among the more notable gains were Atlantic Coast Line 5½, Louisville & Nashville 4¼, General Electric 3½, United States Rubber preferred 4, and a number of the Pacifics, Southwesterns, Coalers, Independent Steel companies, the Metropolitan stocks and Amalgamated Copper 2 to 3. Northwestern rallied to 2 points over last week's final figures. Lackawanna preferred declined 3. Chicago, St. Paul, Minneapolis and Omaha and Rubber Goods preferred 5½.

The market ran off 1 to 1½ for a few stocks on professional realizing but rallied to above the highest again and became comparatively quiet.

The market became very quiet when the urgent demand from the "shorts" became satisfied. Late in the day the advance was renewed, carrying prices to the highest of the day. Minneapolis, St. Paul & Sault Ste Marie rose 5. Northern Pacific 5½. Nashville, Chattanooga & St. Louis 6, and Union Pacific, Canadian Pacific, Illinois Central and the Metropolitan stocks rose 3 to 3½. Gains generally ranged from 1 to over 2 points. There were slight recessions again, but the closing was steady.

LIVESTOCK.

CHICAGO.

Chicago, May 1.—Cattle—Receipts, 18,000; market steady. Good to prime steers, $5.75@6.90; poor to medium, 4.25@5.40; stockers and feeders, 2.75@5.25; cows, 2.75@4.75; heifers, 2.50@5.30; canners, 1.50@2.40; bulls, 2.50@4.75; calves, 3.00@5.75.

Hogs—Receipts today, 27,000; tomorrow, 22,000; market strong to 5 cents higher. Mixed and butchers, 5.10@5.32½; good to choice heavy, 5.15@5.35; rough heavy, 4.70@5.00; lights, 5.00@5.37½; bulk of sales, 5.10@5.25.

Sheep—Receipts, 21,000; market steady; lambs, steady. Good to choice wethers, $5.00@5.60; fair to choice mixed, 4.00@4.50; western sheep, $5.00@5.60; native lambs, $5.00@6.50; western lambs, 6.70@7.40.

OMAHA.

South Omaha, May 1.—Cattle—Receipts, 3,000; market steady. Native steers, 4.25@6.25; cows and heifers, 2.25@5.10; western steers, 3.50@5.00; canners, 1.75@3.10; stockers and feeders, 2.75@5.10; calves, 2.00@6.00; bulls, stags, etc., 2.50@4.25.

Hogs—Receipts, 3,500; market steady. Heavy, 5.10@5.15; mixed, 5.10@5.12½; lights, 5.05@5.15; pigs, 4.50@5.00; bulk of sales, 5.10@5.12½.

PRODUCE.

CHICAGO.

Chicago, May 1.—Covering by local shorts and smaller world's shipments than anticipated created a firm tone in wheat today. Deliveries on May contracts were liberal, at 525,000 bushels. July opened unchanged to ⅛ to ¼ higher, at 82 to 82⅛@82¼ and sold up to 82⅝. May opened unchanged to ¼ lower, at 87 to 87¼, and sold up to 88½. Minneapolis, Duluth and Chicago reported receipts of 253 cars against 152 cars a year ago.

Buying by several prominent commission houses caused firmness in the corn market notwithstanding lower prices at Liverpool. July opened ¼ lower to ⅛ higher at 45⅝ to 45¾, and advanced to at 46⅛. July oats opened unchanged to ⅛ lower at 28⅝ to 28¾ and sold up to 29¼.

Fear that the teamsters' strike might spread to the stockyards district had a depressing effect on the provision market. July pork was unchanged at 12.15.

Lard also was unchanged, at 7.25.

Ribs were a shade higher, at 7.15.

Cash: Wheat—No. 2, red, 86@92; No. 3, red, 84@90; No. 2, hard, 86@90; No. 3, hard, 84@89; No. 1, northern, 92@93; No. 2, northern, 88@94; No. 3, spring, 84@90.

Corn—No. 2, 45@45½; No. 3, 46⅝@47.

Oats—No. 2, 29½@30; No. 3, 29½@29¾.

NEW YORK PRODUCE.

New York, May 1.—Sugar, raw, nominal. Fair refining, 4; centrifugal, .96 test, 4⅝; molasses sugar, 3¾.

Refined—Dull. Crushed, 6.85; powdered, 6.25; granulated, 6.15.

Coffee—Steady, No. 7 Rio, 7⅛.

LIVERPOOL GRAIN.

Liverpool, May 1.—Close—Wheat, May, 6s, 5½d; July, 6s, 6½d; Sept., 6s, 4⅝d.
