# MINING, BUSINESS AND STOCKS

## OHIO SHAFT IS CLEARED OF WATER

### Connection With Mascotte Tunnel Now a Matter of Only Short Time.

### GOOD PROGRESS BEING MADE

**Six Hundred Seventy Feet Yet to Go On Incline—Values in Wall Rock.**

The unwatering of the Ohio Copper mine shaft in Bingham has been accomplished and nothing now stands in the way of pushing work for as it is worth until connection is made with the Mascotte tunnel. A force was put in the shaft sinking last Saturday morning and in the meantime, work in the face of the tunnel is going along at a rapid pace.

The face of the tunnel is less than 300 feet from where a rise will be made to connect with the shaft, while the distance dividing the bottom of the shaft and the tunnel level is 670 feet on the incline and 610 feet vertical.

It is understood that progress has been made in the tunnel lately at the rate of 75 feet per week, and if continued at this rate it is easy to figure out that it will take about four weeks to reach the point directly under the path of the shaft. At any rate, giving due allowance for any bad ground encountered, the men working in the tunnel should be ready to start the raise towards the bottom of the shaft not later than December 1. Then, by vigorous work at both ends, it is safe to perdict that the connection will have been made by Jan. 1.

Although the face of the tunnel is a considerable distance away yet from the main resource of the mine, good values in gold and copper have been encountered. The foot wall rock is carrying close to one per cent copper and from 60 cents to $1 in gold.

### ON MINING EXCHANGE.

**Mason Valley Moves Up a Few Points —Closing Quotations.**

The week opened with trading brisk on the mining exchange today with a marked demand for Mason Valley which sold all the way from $2.10 up to $2.25. South Columbus and Iron Blossom were also called for and both recorded good advances. Sioux Consolidated moved forward, closing on a sale at $1.30; while Uncle Sam Consolidated brought $1.02½ and $1.05. There was little doing in the unlisteds, Uintah Treasure Hill sold at 18 and Western Nevada Copper at 37 cents.

The closing quotations and sales were:

### NEVADA DOUGLAS COPPER.

**Manager Orem Returns With Good News From Mine.**

General Manager Walter C. Orem of the Nevada Douglas Copper company has returned from a flying trip to Yerington, Nevada.

"There is nothing particularly new at the mine," said he to a "News" representative today, "but everything is looking first rate and work is being pushed at a rapid rate. We have two faces of ore on the 550 level that look mighty good."

## PRICE CON. NOW REGULARLY LISTED

### Stock Was Called on the Mining Exchange Today for the First Time.

### GREAT TONNAGE OF ORE.

**Management Estimates 2,000,000 Tons Of Profitable Material In Sight.**

The stock of the Prince Consolidated Mining company has been listed on the Salt Lake Stock & Mining exchange and was called for the first time today. This is the first one of the Pioche mines to receive recognition by the exchange organization and is taken to indicate that it will not be the last one. Recent developments in Pioche have been of such a character that its importance as a producer of ore in the future has become well recognized. The camp contains several great silver-lead mines and Prince Consolidated is one of them: Ohio Kentucky is another; the Nevada Utah properties possess great merit and there are probably a dozen more mines in the district, probably more than that number, that will make a good account of themselves when the camp is provided with mill and smelter facilities.

But Prince Consolidated is one of the recognized leaders. It has the backing of experienced mining operators, as the work done there plainly indicates, as well as men of large means.

The company is capitalized for 1,000,000 shares, par $2. Of this, 200,000 shares is treasury stock, of which 100,000 shares have been sold. The company has no debts, no litigation and no clouds on the titles of its properties. James L. Hackett of Louisville, Ky., is president of the company, and Anthony H. Godbe of this city is secretary and treasurerer. There is cash in the treasury amounting to $12,260. The property consists of four claims, one of which is patented and the others in process of patenting. In addition to this, the company owns 900 acres of patented land in Dry valley, and 200 acres at the old smelter town of Bullionville, a few miles out of Pioche.

The management of the property estimates that there are at least 2,000,000 tons of silver-lead-iron ores blocked out and in sight in the mine, and the statement giving the amount of development work performed shows that there is a shaft 470 feet deep; 1,100 feet of winzes, 200 feet of raises, and 500 feet of cross-cuts. The great mass of the ore is low grade, but will pay a profit of several dollars a ton when handled on a large scale. In the mine, however, are several veins of high grade ore from which shipments made returned a profit of approximately $100 a ton.

In addition to the tonnage exposed in the mine proper, the company owns the Bullionville tailings dump, consisting of 171,000 tons and containing gold, silver and lead values averaging all of $10 a ton. By re-treating the tailings by modern methods, the company will reap a handsome profit.

The Prince Consolidated mine is splendidly equipped. It has a 40-horsepower gasoline hoist, including the buildings for the housing of this and the 100-horsepower Ingersoll-Rand compressor, with all appurtenances. There is a boarding house for 200 men, six bunk houses, two dwellings, assay offices, company office building, carpenter and blacksmith shops, store house, stable, horses, wagons, etc.

At Bullionville the company owns a large mill, equipped with boilers, engine, stamps, rolls and crushers, together with all other euipment and necessary buildings, together with a perpetual water right for 500 gallons per minute, and the estimated cash value of these improvements is placed at $100,000. The company also owns three miles of water pipe line to its mines, and 13 miles of telephone line. From its mines to the railroad is only three miles, and at the present time a force of 30 men is kept on development work at the property.

### BUYS COPPER APEX.

**Jesse Knight Displays More Faith in Park City Mines.**

"Uncle Jesse" Knight, Utah's mining wizard has faith in Park City. Not only has he expressed himself in so many words on this question, but he has backed up his assertion by putting into the camp $50,000 cash, receiving in return one-half interest in the Copper Apex, property, one of Park City's very promising prospects, says the Park City Record. These facts are known, through the details of the re-incorporation of the company, and other arrangements are not yet complete. It is probable, however, that the new company will be incorporated for 1,100,000 shares, a satisfactory distribution of the same to be made between Mr. Knight and the stockholders of the company, providing for present indebtedness and the like The Knight engineers and experts will have charge of the development of the mine.

Work is at prsent going along nicely and in the winze ore which occurs in a manner indicating that there is much of it nearby has been uncovered. The recent assessment was practically all paid up, there being but a few small parcels of delinquent stock for sale.

Everyone in the least interested in the mining industry in Utah, is well aware of the success which follows "Uncle Jesse's" ventures; of his judgment, energy and determination in securing and developing mining interests, and his advent into the Park City district is one of the finest "boosts" the camp could be given. Park City is on the eve of a great revival and "boom" and Mr. Knight, being convinced of this fact, got in on the ground floor, first in the Uintah-Treasure-Hill and now at the Apex The new company when its organization is completed will at once begin the installation of the new machinery and will get down to work without delay.

### UTAH COPPER ROAD.

**Proposed Garfield Line Will Cost Million Dollars.**

The next important move to be undertaken by the Utah Copper Co., will be the building of its own standard-gage railroad between its mines and mills at Garneld, a distance of 19 miles, says the Boston News Bureau.

It will cost $1,000,000 to build this road, including the necessary equipment. It is too early to definitely determine whether the management will attempt to build this road out of surplus earnings or will issue bonds to cover its cost. If bonds are issued, they will not be convertible into stock.

When dividends were commenced last month at the rate of $2 per share the company could continue such payments on 13-cent coper and meet all prospective construction charges out of earnings. The company is now earning about twice its dividend requirements. Every one cent advance in the price of copper adds about 75 cents per share to the divisible earnings.

It is very necessary that the company insure itself against interruptions to production and it cannot always rely upon the Rio Grande Western. It is not the policy of the Utah Copper manaagement to wait until the Rio Grande Western has failed in its ability to handle the enormous tonnage of ore which must be shipped every day from Bingham to Garfield, before seeking a remedy.

After the building of this railroad, the Utah Copper Co., will consider the enlargment of its mill to handle 12,500 tons of ore per day, as against 7,000 tons daily at the present time.

### MILL IN COMMISSION.

**Utah-Arizona Plant Now Producing Gold Bullion.**

A telegram received at the local offices of the Utah-Arizona Gold & Copper company today conveyed the information that the mill installed recently conveyed the information that the new mill recently was placed in commission this morning. The message came from General Manager L. G. Burton, who stated also that in the Pride of the West and Blue Jay claims where development work has been in progress for sometime conditions are most encouraging.

Mr. Burton is very enthusiastic about the Utah-Arizona property, and has expressed the utmost confidence that it is going to make good.

### TINTIC MINING NEWS.

**Mammoth Ore Consigned to Garfield—Smelter Starts This Week.**

(Special to the "News.")

Eureka, Oct. 26.—The Mammoth mine is still shipping copper ores to the Garfield smelter. Last week the company sent out 20 carloads, but this ore was taken from the bins which have been filled to overflowing for the past few months.

The Swansea Extension company, owning ground to the nort and adjoining the Swansea, has placed an order with a Salt Lake concern for a small gasoline hoist to be installed at once. The shaft in the tunnel at this property has reached a depth of 75 feet and it has been necessary to discontinue sinking until the new hoist is ready for use. The force has been put to work cutting out for the new plant.

It has been ascertained from the office of the smelter at Silver City that at least two of the lead furnaces will be started this week.

Al Nelson has commenced the assessment work upon a group of claims in North Tintic, owned by himself and brother, Nels Nelson, of Council Bluffs, Iowa.

### NEW FREIGHT RATES.

**Montana Mine Owners Can Compete With American Smelter Now.**

Special Correspondence.

Spokane, Wash., Oct. 22.—Wilbur D. Greenough announced in Spokane on his return from Ponderay, Idaho, that freight rates have been secured which will make it possible for the company to assemble ore from all points in Montana, Oregon, Idaho and Washington, also a rate of $2 out of the Coeur d'Alenes. This places the company on an equal footing with the American Smelting and Refining company's branch at East Helena. The rates from Montana points range from $2.50 to $3.35 a ton. Five thousand tons of ore are now in the bins at the smelter, which will be blown in this week. This will be the first actual work at the plant at Ponderay. Its first run a year ago was cut short by the panic. It has been arranged by the Mine Owners' association of Montana to run a the plant for the opening, and brokers and mining men in Spokane and eastern Washington have arrenged for a special train from Spokane.

Will Sell

HENRY P. RICHARDS,
Administrator of the Estate of William P. Richards, Deceased.

Date of first publication, Oct. 26, A. D. 1908.

Young & Snow, Attorneys for Administrator.

## STOCKS DULL AND HEAVY

New York, Oct. 26.—A narrow and indecisive movement of prices accompanied the opening dealings in stocks today which were only moderate in volume. A rise of a point in Amalgamated Copper was the feature.

The absence of realizing orders and a demand for Union Pacific helped prices to harden. Purchases, however, diminished when the general rise exceeded 1½. Union Pacific and Northern Pacific gained 1¼ and Utah Copper 1.

Trading was so dull as to leave the market almost stargant. The undertone, however, was firm.

Bonds were irregular.

Higher prices prevailed, but the fluctuations were slight. National Lead rose 1, Union Pacific 1⅝ and Northern Pacific 2 above Saturday's close.

The market closed heavy and intensely dull. American Smelting got up 1⅝.

### LIVESTOCK.

OMAHA.

Omaha, Oct. 26.—Cattle—Receipts, 4,000; market active 10 to 15c. higher. ### WOOL.

ST. LOUIS.

St. Louis, Oct. 26.—Wool, unchanged. Territory and western mediums, 17@20; fine mediums, 15@17; fine, 12@14.

### PRODUCE.

CHICAGO.

Chicago, Oct. 26.—The local wheat market opened quiet and steady, prices at the start being a shade lower to ⅛ higher compared with Saturday's close. Cables were firm but this influence was offset by continued wet weather in the winter wheat belt. December opened at 99 to 99⅛, sold at 99¼ and then reacted to 99.

Corn opened firm on buying brought out by wet weather but soon eased off because of selling by several leading commission houses. December opened ⅛ to ¼ higher at 63⅝ to 63¾ and sold off to 63⅜.

Oats were dull and steady. December opened unchanged at 47½@47⅝, sold at 47½ and then up to 47⅝.

A 10-cent advance in live hogs brought out an active general demand for provisions which caused a sharp advance in all products. Prices at the start were 12½ to 32½ higher, with pork leading in the advance. Receipts of live hogs at western packing centers were much less than for the corresponding day a year ago.

Trade in which was quiet all day and price fluctuations were narrow, the range being limited to ½. The close was steady with December up ⅛@¼ at 99⅛@99¼.

Sentiment in the corn pit was rather bearish the latter part of the daw owing to sharp declines in the price of the cash grain. The close was steady, December unchanged at 63½.

Close—Wheat—Dec., 99@99¼; May, 1.02½; July, 97.

Corn—Oct., 63½; Dec., 63½; May, 62⅝@62¾; July, 62⅛.

Oats—Dec., 47¾; May, 49⅝; July, 45.

Pork—Oct., 13.85; Dec., 13.90; Jan., 15.77½; May, 15.70.

Lard—Oct., 9.62½; Jan., 9.40; May, 9.45@9.47½.

Ribs—Oct., 8.62½; Jan., 8.40; May, 8.52.

Rye—Cash, 74@75; Dec., 73½; May, 79.

Barley—Cash, 53@81.

Timothy—March, 3.80.

Clover—Oct., 8.50.

SUGAR AND COFFEE.

New York, Oct. 26.—Sugar, raw, firm. Fair refining, 3.56@3.59; centrifugal, .96 test, 4.06@4.09; molasses sugar, 3.31@3.34.

Refined—Steady. Crushed, 5.90; powdered, 5.30; granulated, 5.20.

Coffee—Quiet. No. 7 Rio, 6?; No. 4 Santos, 8.

BUTTER AND EGGS.

Chicago, Oct. 26.—Butter — Steady. Creamery, 20@26; dairy, 18@23.

Eggs—Firm. Firsts, 25.
