MINES AND MINING.

Work in the Mines and Mills of the Tintic District.

SIOUX MILL TO TREAT AJAX ORES

Something More About the Gold Mountain Properties—Today's Call on 'Change—Bids and Spurs.

(Special Correspondence of the NEWS.

EUREKA, Utah, Sept. 2, 1896.—The North Star mining company has just commenced the work of grading for a new shaft on its property. The mine is looking in good shape and will make a shipment in a few days.

The Sioux Consolidated has already shipped six carloads of concentrates this week and is loading up other cars for shipment by the end of this week.

It is reported here that the reason for the lay off by the Sioux Consolidated and Utah mines was to allow a trial of one months work by the Sioux mills and treat the Ajax ores. It has been stated that the Ajax company will run through the Sioux mills over three thousand tons of ore from the Ajax mine, part of which will come from the old workings of the Copperopolis which ore is said to be very rich in gold.

Should the Sioux mills treat the Ajax ores successfully it will only be a matter of a short time until the Ajax company will construct a mill of the same capacity as the Sioux mill; it will be built no doubt at the new camp of Robinson.

It is regretted that Mr. Ed. Stewart the superintendent of the Ajax mine, has been called upon to part with his little daughter, who died last night at Mammoth, at the age of twelve months.

Superintendent Mike O'Rourke of the Mammoth mill, who has been the right hand man at the mill for the past sixteen months has resigned his position. The reason for his resignation is not yet known but it is said that Mr. O'Rourke thinks very seriously of going to South Africa, where there are several large quartz mills in operation and others under construction. Should Mr. O'Rourke go to South Africa it is hoped that he will be as successful as he has been with the Mammoth company.

The Ajax mine is busy shipping first class ore and is now loading up four more cars.

Eureka is crowded with unemployed miners and there is also quite a number out of work in other parts of the Tintic district.

The Eureka Hill company will distribute checks to its employes on Saturday next, so lots of the boys will be supplied with the needful on Labor day.

Hon. C. E. Allen of the Centennial Eureka arrived at Silver City this evening and will address the members of the Free Silver club and the people of Silver City. It is expected that he will receive a warm reception from the Silver club of this new silver camp.

THE PAY ON 'CHANGE.

Sunshine and Dalton Goes With Sales to the Fore.

Today's call on 'Change proved a rejuvenation to the Sunshine stock, inasmuch as it caused a transfer of 100 shares, although not at a rejuvenating figure. The block went at $1.05 per share and more was bid for at $1.05, but holders wanted $1. This was the only business stock in the listed class, and during the unlisted call Dalton edged forward and gave to the day's trading 3,000 shares.

The closing figures were as follows:

MINES OF GOLD MOUNTAIN.

The Gold Queen Mine and the Great Copper Group Gaining Prominence.

Near the head of Mill creek, not far from the forks of Deer creek, in the Gold Mountain mining district, is located the Gold Queen mine, says the Blackfoot [Advocate. The Queen's territory is her nearest neighbor, the Silver King, one of the Deseret Mining and Milling company's best propositions, about one mile east.

Last summer there was done much development work on the company (including the existence of three-foot vein of gold ore), which upon assays showed a decided raise in the pan and assayed at from eight to twenty-one ounces, four ounces being the lowest from one and samples ranging. The Queen is owned by H. W. Renfroe, Hyrum Hansen, G. T. Bean and Orel Harrison. Last Friday Messrs. Bean and Hansen returned to Blackfoot after a two weeks' interview with their protege, and they have only the most glowing reports to make. While on the mine late they pushed the Queen's tunnel to twenty feet deeper and found the size of the vein steadily increasing and the quality of the rock improving. Hyrum Hansen and Barney Middlemiss stayed on the ground and will keep pegging away at this hole for three weeks longer. No assays have been made this season but a liberal assortment of samples was brought down to the city and sent north to test.

Messrs. Bean, Hansen and Renfroe own the Rainbow and report great results from that digging this year. The owners were just on the Rainbow's track by the finding of a treasure of rich ore high up on a hilltop. They went down from the croppings for enough to assure positioned that a good perpendicular vein was there and then abandoned the shaft for a crosscut which has been started 100 feet lower down. No ores have been made but reports were received that the hilltop had struck a crack O.K. While there recently the boys ran in twenty feet on their crosscut and let Hans Wilson to pass the hole about thirty-five feet farther, believing that at that distance they will strike the lucked for lode at the depth of about 100 feet from the surface croppings. To their surprise and delight the workmen in last twenty-feet tunnel ran across two small ledges of rich ore which are so diminutive to pay in themselves, but which clip towards what the men deem to be the main ledge and indicate the presence of a big body of valuable quartz.

Capt. Egan, of Salt Lake City is an influential member of the Gold Mountain Mining and Milling company, which now has control of the famous Grasshopper group in the Gold Mountain district. The capitalists and interested in the Ajax mine, located in the same region, are last week for took a run up on Mt. Baldy to look at his pets. These men are still working on the shipment from the River Bell, a recent discovery on Ophir hill. Ore of good quality and for a few days last week there were indications symptomatic that the sulphide lead would yield ore was about to pitch out, but the ore soon filled up. Capt. Egan is coming, however, a single rock discovered the last time the ledge had narrowed sharply to the right from a two foot vein and some indications led to the reports the lode was opening up into a fissure vein of size. The 840 average still holds Mr. Ed Bergquist and his associates of the gold quartz claim down to $800. The Blue Bird's tunnel is now 27 feet deep and the three men employed in its delving will continue about 15 feet farther, taking one as pay for their labor. Capt. Egan seems enraptured that the Bird is the making of a good mine. A new discovery was made on June 19th last to be paid on the 15th of last month. What distinguished these results will be said next Friday at Salt Lake, the company's place of business, and then the corporation will actively begin operations upon their fairly prospects of mine.

Attracting Considerable Attention.

The Big Four and Dyer mines are attracting considerable attention at present. These mines produce copper in what promises to be paying quantities.

The excitement at present, however, is centered about the Dunkle mountains, situated about sixty miles east of Vernal. Several promising copper claims have been located and many prospectors are turning their faces to that direction.

Considerable excitement is manifested in Vernal over the development of the mining claims in that vicinity.

Bids and Spurs.

A 25-ton shipment of high grade ore came from the Julia Dean in Bingham yesterday.

Colonel Dorsey of the Overland and Sunshine suspended work on its two mines this morning.

An assessment of one cent per share has been levied on the Dalton stock, delinquent on Oct. 22d.

A $3,000 dividend, payable on the 10th inst., has been declared by the Pan American Mining company.

It is reported that a vocal find in Cache county has brought to light a property yielding ore which runs 33 per cent by copper.

John Trewek has resigned his position as superintendent of the Mammoth mine. His successor is a Mr. Edwards, an old employe of the company.

A ledge of excellent ore has been encountered in the American Eagle mine in Cache county. It is shaft carries of per cent lead and 200 ounces in silver to the ton.

Mammoth Report: The new 120-horse-power Scott engine boiler at the Mammoth hoisting plant is set and the 40-inch stack home 30 last Saturday. The company has just tender a string of 12 new and improved steel ore cars at the mine from Silver Bros' shops, Salt Lake. This makes some forty 2,000 pound mine cars now in use in their main workings.....We learn that the John at the Yankee Girl has been temporarily idle off until some development work now under contract is completed. Our reports from this property early the former statements made in these columns, and the new not on are there all right.

AROUND THE COURTS.

The Vance Case Transferred to Judge Street.

THE VERNAL MURDER CASE.

E. H. Falk, E. Vangel Jones, Sheriff in Tow, Brings Them and Facts from Vernal.

The case of Morrison, Merrill & Co. vs. Samuel E. Vance was transferred from Judge Bolton's court to Judge Street's. Judge Bolton was a former counsel in the case, before the disqualified judge was found and Judge Street will sow on on the case.

Forty writs from date were granted in the case of Watson vs. Hayhurst to prepare and serve statement for new trial.

Has Been Naturalized.

George E. Murray, a former subject of Queen Victoria, now a resident of Salt Lake county, was admitted to citizenship by Judge Rolfe this morning.

In the Chancery Court.

Judge Street opened court this morning.

The case of D. C. McLaughlin vs. Molly was brought up and the 10th inst. set as the time to hear exceptions to the referee's report.

Salt Lake Co. vs. State of Utah hearing set for 2 p. m. Saturday.

Up from Vernal.

Deputy Sheriff M. E. Falk of Vernal, Uinta county, came up with Hans Oman, age 24, and James Hardy, age 23, who were charged with throwing fish in Ashley creek with plant powder. The young offenders were tried before Judge A. C. Hallet in the Fourth judicial district and sentenced to thirty days in the Sheriff's prison, thus being the lowest term of imprisonment the court could give. The prisoners were tried separately and arraigned in August 22.

Mr. Falk brought them to the city and Oman and Hard are now serving their term in the Sheriff's prison.

Mr. Falk enjoys the reputation of being the youngest deputy sheriff in Utah. He is but 22 years of age and has been in the business of dealing prisoners for the twelve years, and has been eminently successful in all his perilous undertakings, which speaks volumes for the young gentleman.

Assistant County Attorney Evans accompanied Mr. Falk, and they will leave shortly for Ogden to attend the trial of E. B. Cummins, W. E. Chittenden, alias Hall, Warner, and Wm. Wall, held to answer to the charge of murder of David Milton and A. H. Dimmick on June 8th of this year.

It will be remembered by the readers of the NEWS that Cummins and Miller were tendered the same mining property about 20 miles east of Vernal. They became involved in the same difficulty when Cummins withdrew from the mine where they were engaged, after returning with Warren and Wall. Another difficulty was the result, and in the melee Milton and Dimmick were shot to death and another wounded. The gentlemen will return to Vernal as soon as the trial is ended.

AMUSEMENTS.

THE PAYNE SHOW ON TONIGHT.

It is interesting to note that Clyde Fitch, the author of Bohemia, in which Charles Frohman's Empire stock company, headed by Viola Allen and William Faversham, is to appear at the Salt Lake Theater tonight, wrote the play while residing in the intense neighborhood in Paris, where condemnation of its author took place. This neighborhood is the famous "Latin Quarter" brought so conspicuously into vogue in Trilby. Fitch is a young man, but within the last six years he has become very successful as a playwright. He wrote Beau Brummell for Mansfield, Mistress Betty for Hodgeks, Frederick Lemaitre for Henry Miller, His Grace de Grammont for Otis Skinner, and other properties piece for Maria Wainwright, Mrs. John Wood, the London actress, Daniel Frohman and Mr. Sarah Bernhardt.

THE LYCEUM.

Very fair business is being done by the Alger company at the Lyceum in the comedy-drama Man and Maiden this week. Manager Osler Jarrett is say that this will be the Alger company's last week here, their engagement terminating with the evening performance on Saturday next. An inexperienced company will temporarily hold the boards, producing popular plays until the season thoroughly opens.

In the European Mission.

(Manuscript from August 20.)

Arrivals—The following named Elders arrived in Liverpool per American Line steamer Rhynland on August 19, 1896:

For the British mission—John Lloyd, Sanpete; George Westman, Draper; Joseph Smith, Granger.

For the Scandinavian mission—H. C. Hansen, Salt Lake City; G. A. Christensen, J. H. Dorthesen, Rosmont; Christian Nielsen, Lehi.

For the Swiss and German mission—Peter Lindemann, Kaysville; Carl E. Gertsen, Salt Lake City; Francis Balmer, Lehi.

With the company are also Elders John Beck, Peter Sorensen, James Robins and George Green who have been on genealogical missions and to visit friends.

Releases and Appointments—Elder Joseph R. Murdy has been honorably released from laboring as traveling Elder in the Liverpool conference, to return home August 29, 1896.

Elder George Whetman has been appointed to labor as traveling Elder in the London conference.

Elder John Lloyd has been appointed to labor as traveling Elder in the Welsh conference.

Elder Joseph Smith has been appointed to labor as traveling Elder in the Bristol district conference.

Junction City Jots.

Tonight is the big silver-Republican rally in Ogden.

Wm. Binfield, chief of the Ogden fire department, has commenced suit for $10,000 alleged to be due him as salary, and retained since an error in the city council reducing his pay.

The Ogden public schools open on Monday, September 7.
