MINING, BUSINESS AND STOCKS

COMFORTS CAN BE FOUND ON DESERT

The Modern Automobile Has Worked Wonders in Development of Nevada Camps.

GROWTH OF BULLFROG CAMP.

A Year Ago Water Was Scarce in the Town, While Today it is Plentiful.

Special Correspondence.

Bullfrog, Nev., Aug. 30.—Come to the Nevada desert, if you want some really up-to-date automobiling. Every time you start from Tonopah or Goldfield to reach Bullfrog in a machine, you will have a part in an endurance test, such as can never be found in any other part of the country. The distance from the original mining cam of Tonopah to Goldfield, the newer settlement, is about 27 miles, and from Goldfield to Bullfrog, the latest of the great mining districts, that Nevada is now offering to the world, it is 70 miles or more, and there is nothing but desolate desert between the points. There are old-fashioned stages of the Deadwood style that "Buffalo Bill" has made famous, that traverse these desolate distances, but the twentieth century way of traveling is by auto, over roads that have been especially constructed for the traffic. When you go to buy your ticket, you get an immediate realization of the fact that prices are high when you are moving about in a newly prospected mining country. From Tonopah to Goldfield, the fare is $6, and it takes you only a little more than an hour to traverse the distance. Each auto carries from four to seven passengers, and the man who drives the machine over the desert gets $6, or the amount of a single fare, for each trip that he makes. From Goldfield to Bullfrog, the fare is $25, and the auto will not send out a load of less than four passengers. If you want to travel single you can have the machine at an expenditure of the full $100, but otherwise you must wait until enough passengers have been gathered to make the necessary complement. Most of the Goldfield-Bullfrog trips are made by night, and they take anywhere from six to a dozen hours, according to the ability of the chaffeur and the stability of his machine. Be your luck good or bad, you will always have a better notion of the desert by the time you have reached your destination. You will never forget your first breakdown, when you are customarily 30 or 40 miles from the nearest center of civilization.

The nights in the desert are usually intensely cold, just as the days are extremely hot, and a breakdown for any length of time means the maximum of discomfort.

When all things have been said and done about the communities that have so magically arisen in this dread and overwhelming desert, the palm for picturesque location and for useful environment must be awarded to this tented town of Bullfrog, nestling, as it does, at the feet of those famous, gold-bearing mountains, Bonanza, Ladd, and Montgomery.

It was with the greatest wisdom that Millionaire H. H. Clark chose Bullfrog for his townsite, soon after the discovery of gold by "Shorty" Harris on what is now the Original Bullfrog mine and the Bullfrog Extension mine, three or four miles away to the westward. The first Bullfroggers would have had their city close to that original mine, and there was a period when even Mr. Clark himself, after he had come into mammoth mining possessions on Ladd mountain, would have had the homes of hiself and his followers into the district in that section three miles from what are now the principal gold-producing eminences. But he was quick to realize the importance of the later discoveries, and under his leadership those who had first camped on the western border of the Amergosa desert quickly removed their habitations to where the present prosperous town of Bullfrog is now so advantageously situated.

The marvels of a desert town are many, but not all of them have even yet been exemplified in Bullfrog. When the first prospectors went into the desert, water was scarce and almost as valuable as gold itself. With the passage of one short year, however, Bullfrog now boasts of a tremendous supply, piped from mountain springs more than 15 miles away. Where not more than 12 months ago a man inexperienced in desert ways would almost surely have lost his life from thirst, it was only a recent occurrence that a water main, bursting, so flooded the cellar of a leading business establishment that merchandise valued at many thousands of dollars was almost completely destroyed.

When Bullfrog was just a year old, on Aug. 9, a wondrous change had been worked in the geography and importance of the state of Nevada. North and south, from Tonopah to Las Vegas, more than 200 miles, the deserts had been travelled by trains of burros, stages and automobiles, carrying thousands of men and women of nerve, energy and perseverance. Commenting upon the marvelous advancement, former United States Senator Stewart, who is not only one of Bullfrog's leading citizens, but who is its present historian, said: "We have builded substantial towns and communities; we have developed great mineral producing areas, and where one brief year ago the Indian alone knew the far end of the lonely trail, and the deserts in all their vastness and desolation held fast the secrets of centuries, the white man has come to seek out and find and bless a land long thought impossible to anything but material for stories of an uninhabitable wild west. The achievements of a year in Bulfrog, the farthest isolated mining camp of importance in Nevada, have caused the mining world to marvel. Not only in the opening of ore deposits, but in the launching of big enterprises in advance of the development of the mines, has the mining world found reasons for directing attention Bullfrog way. There has been nothing slow in this district. The community has moved, and moved ahead. Phenomenal has been its development in every sense. Capital has shown its confidence in an emphatic manner. Business men have not been slow to grasp the fact that oe of the greatest mining camps ever known is in its infancy here."

MARKET DEVOID OF LIFE.

The Forenoon Trades on Mining Exchange Confined to Three Stocks.

There was not much life to the mining stock market today and during the forenoon calls only three stocks participated in the trades. New York Bonanza proved to be the most conspicuous of the trio and holders displayed a determination to sell, while on the other hand, the stock offered was pretty well absorbed, but at down prices. From 30 cents a share, a decline to 30 cents was noted, followed by a slight stiffening on the open board. Lower Mammoth and May Day were the other stocks sold.

There was a weakness in prices all the way down the line with little demand for anything.

The closing quotations and sale were as follows:

Life's Change.

Much Suffering at This Critical Period Saved by Dr. Miles' Nervine.

"Change of Life" is one of woman's greatest and most dangerous troubles.

Often it is not recognized, and the distressing symptoms are mistaken for Dyspepsia, Liver, Womb Trouble, etc.

The depressing constitutional effects of Change of Life, and the female Disorders so common at that period, are best treated with a general nerve restorative which will give tone to the entire system—Dr. Miles' Nervine.

The beneficial effects of this celebrated medicine are very quickly felt, and the constitutional disturbances tided over. Pain and anxiety are relieved, and fresh energy infused into mind and body.

It is the medicine which acts on the nerves which regulate the organs of the body.

Such distressing troubles as Backache, Headache, Bearing-down Pains, Bloating, Indigestion, Menstrual Irregularities, Irritability, Dizziness, Loss of Appetite, Tired Feeling, are relieved and cured by Dr. Miles' Nervine.

"My wife was a sufferer from an attack of nervous prostration, brought on by female weakness, and was in very poor health. After reading one of Dr. Miles' advertisements, she concluded to try Dr. Miles' Nervine. She obtained good results from the start, and now after taking second bottle enjoys good health. Words cannot express our appreciation of what it has done for us."—E. J. AUGUSTINE, New Orleans, La.

FREE Write us and we will mail you a Free Trial Package of Dr. Miles' Anti-Pain Pills, the New, Scientific Remedy for Pain. Also Symptom Blank for our Specialist to diagnose your case and tell you what is wrong and how to right it. Absolutely Free. Address: DR. MILES MEDICAL CO., LABORATORIES, ELKHART, IND.

MORE SMELTERS ARE MUCH NEEDED.

Present Ones Are Unable to Take Care of the Silicious Ores of Tonopah Mines.

SO SAYS CHARLES O. SNYDER

Of Nevada—The Building of the Garfield Plant by American Will Bring Desired Relief.

Charles O. Snyder, manager of the Western Ore Purchasing company's sampling mills in Nevada, is in the city on one of his periodical business trips and during the day had a conference with the management of the American smelters.

Manager Snyder has for a long time been enthusiastic over the new gold camps of his state and was among the first to extoll the merits of Tonopah and Goldfield to the world.

"Within a year," Mr. Snyder said today, "the mines of Tonopah can easily furnish an output of 25,000 tons of ore per month and the only thing that stands in the way of this being accomplished will be the lack of smelting facilities. Now that the railroad is broadguaged all the way into Tonopah and soon will be into Goldfield, the question of transportation is settled. The railroad will be able to take care of all the business furnished it, but there is a necessity for greater smelting facilities, and until we have them the output of ore must necessarily be curtailed. Shippers have experienced quite a little difficulty already in inducing the smelters to accept their silicious ores, they being so well supplied, but we are in hopes that much of this difficulty will be overcome when the Garfield plant of the American Smelting & Refining company is completed. The starting of the United States Mining company's mammoth smelter in Shasta county, Cal., will probably relieve the situation somewhat by drawing on the Nevada camps for several hundred tons of silicious ores per day."

The coming of cooler weather, said Mr. Snyder, has already started travel into the gold camps and everyone is looking forward to a boom and a big campaign of development.

There seems to be no longer any doubt about the Tonopah Railroad company extending its system on to Bullfrog and tapping other mining districts in the south. The engineers sent into the Bullfrog district to investigate have reported that the mines of that camp have been developed to the point that would justify the building of the road. The articles of incorporation of the Bullfrog-Goldfield Railroad were filed last week in the office of the secretary at Carson.

LEASE HAS EXPIRED.

A. H. Mayne Now Busy With Shipments From Sandstorm Mine.

The Mayne lease on the Sandstorm, generally known as Lease No. 6, expired yesterday at noon, says the Goldfield Sun. Up to the last minute no time was lost in extracting the ore from the exceptionally rich shoot that was encountered over a fortnight ago. Lessee Mayne is now directing shipment of the ore to the Goldfield sampler. No ore has been shipped since the rich shoot was opened up, as every effort was directed toward the extraction of the rich stuff. By next Monday or Tuesday the returns will be in from the consignment, and then Mr. Mayne will know exactly how much he has cleaned up on his rich lease. That the amount is of very considerable importance is known at this time.

BROKER SHEETS HERE.

Says Business Has Been Light on the Coast as Well as Here.

Ed L. Sheets, a former active member of the Salt Lake Stock & Mining Exchange, but now prominent in San Francisco brokerage circles, came in from the west this forenoon and was greeting old friends during the forenoon calls of the local exchange.

To a "News" man Mr. Sheets says the mining stock market has been dull on the coast, as well as here, but the prevailing opinion among the fraternity is that business will pick up rapidly from now on, the hot summer weather being over.

Mr. Sheets is going up into Wyoming for a couple of weeks, after which he will return to the coast.

RED ROVER CASE.

United States Mining Company Wins—Col. Wall the Plaintiff.

A decision was handed down in the federal court yesterday by Judge Marshall in the case of Col. E. A. Wall vs United States Mining company, in which judgment was entered in favor of the defendant.

This is known as the Red Rover case and has occupied the attention of the federal court for several months past. The trial of the case was begun late last fall and was postponed until in the spring when the court could visit the ground in question, after the snow had disappeared. The chief question involved in the controversy was whether the limestone of the United States company's property extended far enough to the west to give it the apex and take in the ore bodies in dispute and the court finds that it does.

The case has been hotly contested and has been followed with considerable interest in local mining circles. This is the second time that the United States gained a victory over Col. Wall during the year. The other case being that in which the question of title to the Kempton lode was involved.

CONCENTRATES.

H. H. Douglass, superintendent of the West Tonopah mine at Tonopah, is dead.

Chief Metallurgist Pettjes of the Newhouse mines is in Beaver county today.

The annual meeting of the stockholders of the Tetro Mining company has been called for the 23rd inst.

Manager Lafayette Hanchett has gone to Colorado on business connected with the Newhouse mining interests.

Manager Whitley of the American Smelting & Refining company spent the day out at the site of the Garfield plant.

The annual meeting of the shareholders of the American Flag Mining company is being held in Park City this afternoon.

A party of San Francisco brokers will leave the latter city on the 14th inst on a trip to the camps of Tonopah and Goldfield.

Tomorrow is dividend day at the offices of the Consolidated Mercur Gold Mines company. Checks aggregating $75,000 will be ready for the mails this evening.

The bond held on the Chiquita property at Good Springs, Nev., by local mining men has been taken up, the payment having been made a month ahead of time.

F. M. Taylor of the Taylor and Brunton Sampling company arrived in the city during the day on one of his regular inspection trips to the local plants of that company.

The ore shipments via the Tonopah railroad for the week ending last Friday, were as follows: Tonopah Mining company, 1,270 tons; Montana-Tonopah, 198 tons; North Star, 60 tons; Midway, 59 tons; Belmont, 110 tons; Tonopah Extension, 455 tons; Goldfield Sampling Ore company, 12 tons; Combination, 22 tons.

Manager D. C. Jackling would not venture an opinion as to what action would be taken at the Jersey City stockholders' meeting today in regard to the filing of the suit of Col. Wall. The meeting being a special one, called for the purpose of increasing the capital stock and authorizing a loan of $3,000,000, secured by a mortgage on the property, it would seem that little else can be done but to adjourn until the pending injunction is removed.

PRICES WERE ON THE JUMP.

New York, Sept. 5.—Prices jumped in the opening dealings in the stock market to a level sharply above the closing of Saturday, helped by the advances effected in London during the holiday interval. Smelting rose 2½, Canadian Pacific 2¾, Minneapolis, St. Paul & Sault Ste Marie 1¾, Union Pacific, Rock Island preferred, Norfolk & Western Tennessee Coal and Sloss-Sheffield Steel was a point and a number of other active leaders a large fraction. The absorption was on a large scale and the demand was widely distributed throughout the list.

Many additions were made to the list of stocks that established gains of a point or more during the first hour's business. Of these St. Paul, New York Central, Missouri Pacific, and Amalgamated Copper were the most prominent. Tennessee Coal and Locomotive rose 2¼ and Canadian Pacific and Smelting 3 points. Scarcely any of the favorite stocks failed to get up substantially. The demand abated considerably toward 11 o'clock, but price recessions were small and were followed by recoveries.

Trading was quieter during the second hour, but the tone was notably firm and some of the trunk line railroads and metal stocks rose to a higher level. Lead made an advance of 3¼ with a reaction of a point. The firmness of the money market induced some caution.

Bonds were strong at noon.

Excited buying of Reading moved it rapidly to 129⅝, a rise of 4⅞. Some of the other coalers improved fractionally in sympathy but the general railroad list was sluggish. Smelting continued to advance and reached 127⅞.

LIVE STOCK.

CHICAGO.

Chicago, Sept. 5.—Cattle—Receipts, 1,500; market 10 cents lower. Beeves, 3.10@6.00; stockers and feeders, 2.40@4.30; cows, 1.25@4.00; heifers, 1.25@4.60; Texas fed steers, 3.25@4.00; western steers, 3.10@4.75.

PRODUCE.

CHICAGO.

Chicago, Sept. 5.—Higher prices for wheat at Liverpool resulting from reports of damage to the crop in Russia and Argentine, had a steadying effect on the wheat market here today. Offerings were light. December opened a shade lower to ⅛@¼ higher at 83⅛ to 83¼, sold at 83⅜@83⅝, and then reacted to 81½. Minneapolis, Duluth and Chicago reported receipts of 976 cars against 1,098 cars a year ago.

Lar[illegible] receipts and lower cables caused a weak tone in the corn market. Another factor that had a depressing effect was the failure of frost to materialize in the corn belt. Pit traders and commission houses were fairly active sellers. December opened ¼ lower at 49⅝ and sold off to 49@49¼.

The oats market was influenced mainly by the weakness of corn. A prominent elevator interest was the chief seller. December opened unchanged at 26½ and sold at 26⅝@26¼.

Lower prices for live hogs caused an uncertain tone in the provisions market. October pork was off 2½, at 15.10. Lard was down 2½ at 8.00, and ribs were 5 cents lower at 8.75.

Cash: No. 2, red, 81½; No. 3, red, 79½@81; No. 2, hard, 80½@83½; No. 3, hard, 79@83; No. 1, northern, —; No. 2, northern, 90@93; No. 3, spring, 80@81.

Corn—No. 2, 52½@52¾; No. 3, 52½@52¾.

Oats—No. 2, 24½@25; No. 3, 24½@24¾.

Later December declined to 81@81⅛ on liberal primary receipts. The market closed easy with December off ⅛@¼ at 81⅜.

Corn—The market continued weak the entire session, final quotations on December being off ⅜@½ at 49½@49¾.

Closes: Wheat—Sept., 79⅝; Dec., 81⅜; May, 83⅞.

Corn—Sept., 52½; old, 52¾; Dec., 49½@49¾; old, 44⅞; May, 47⅞.

Oats—Sept., 25; Dec., 26⅝; May, 28½.

Pork—Sept., 15.10; Oct., 14.90; Jan., 12.37½.

Lard—Sept., 7.85; Oct., 7.90; Nov., 7.40; Dec., 6.97½; Jan., 6.82½.

Ribs—Sept., 8.00; Oct., 8.70; Jan., 6.37½.

Rye—Cash, 61½@62.

Flax—Cash, northwest, 1.12.

Timothy—Oct., 1.23.

Clover—Cash, 12.00.

Barley—Cash, 38@51.

NEW YORK PRODUCE.

New York, Sept. 5.—Sugar, raw, firm. Fair refining, 3⅝; centrifugal, .96 test, 3 15-16; molasses sugar, 3½.

Coffee—Steady. No. 7 Rio, 5¾.

Butter—Unsettled. Street price extra creamery, 20@21; official prices, creamery, common to extra, 17@20½; western imitation creamery extras, 19; do. firsts, 17½@18; renovated, common to extra, 15@17½; western factory, common to extra, 17@19½; western factory, common to extra, 15@17½.

Cheese—Firm. State full cream small white fancy, 12; do. fair to choice, 11¼@11¾; do. colored fancy, 12; do. fair to choice, 11¼@11¾; do. large white fancy, 12; do. colored, 12.

Eggs—Steady. Western extra first, 21@22; do. firsts, 20.

WOOL.

ST. LOUIS.

St. Louis, Sept. 5.—Wool steady. Territory and western, 28@31; fine medium, 22@26; fine, 18@20.

BOSTON.

Boston, Sept. 5.—The wool market has been less active but remains firm. Consumers both large and small feeling that prices will not become easier soon, are absorbing all the suitable wools at full market values. There is a constant demand for three-eighths and higher grades of Montana, Wyoming, Utah and Oregon wools. Fleece wools are generally strong. Some Ohio and Pennsylvania grades have sold at 33 cents. Sample bags of XX Ohio have been sent to mills on the basis of 37 cents. Washed Delaine is quoted at 39 and unwashed at 30@31. Fine unwashed is sold at 27@28.

SCHOOL OF MINES.

The State School of Mines offers complete four year courses in mining engineering, mechanical engineering, electrical engineering, civil engineering, and chemical engineering. All of these courses lead to the degree of Bachelor of Science in Engineering.

The Utah School of Mines has one of the best metallurgical laboratories in the United States, as well as splendidly equipped laboratories in chemistry, physics, mechanics, electricity, mineralogy, geology, etc.

The School of Mines is one of the three state schools that comprise the University of Utah.

Lewis' 98 % Lye,

Powdered and Perfumed (Patented.)
The strongest and purest made. Unlike other Lyes, it is finely powdered, packed in a can having two lids, one easily cut and the other removable for constant use. It will make the best Perfumed Hard Soap in 20 minutes without boiling. It is the best for cleansing waste pipes, disinfecting sinks, closets, cleaning paints, bottles, barrels; washing trees and killing insects; for engineers' and machinists' uses; for painters, to remove old paints, etc.
