

OUR OWN STATE.

PROVO.

TEACHERS' INSTITUTE.

Provo, Utah Co., June 6.—Increased interest is noted in the Utah County Teachers' Institute. Yesterday's program as published in the "News" was carried through in a spirited and able manner. At this forenoon's session instructive and interesting lectures were delivered by Professor Brimhall and Royance. This afternoon Professor Young gave instructions in drawing, after which the members took a trip to the foothills for the purpose of studying the geological formation of the mountains. Professor Caleb Tanner was in charge of the geological excursion. This evening H. L. A. Culmer, president of the Utah Art association, will deliver a lecture on art.

IN THE DISTRICT COURT.

Mrs. Sarah J. Konold of Springville has filed a petition for letters of administration in the estate of Wm. Konold, deceased, husband of the petitioner. June 6th has been set for hearing the petition. Wm. Konold is the man who was killed in a railroad accident on the R. G. W. in Salt Lake City, April 23 of this year. The estate, as set forth in the petition, amounts to \$3,120, exclusive of claims for damages. Brimhall and Royance, for the petitioner, and H. L. A. Culmer, for the respondent, Richard A. Allison are attorneys for Mrs. Konold.

In the divorce suit of Lora A. Beeley vs. John A. Beeley, the case was submitted yesterday afternoon, and taken under advisement till this morning.

LICENSED TO WED.

Marriage licenses have been issued to Daniel B. Thomas, 26, and Ethel Pratt, 21, both of Provo; Wm. Christensen, 22, and Elizabeth Jane Thomas, 21, both of Spanish Fork.

Miss Florence D. Pike and Mr. Albert L. Woodhouse were married last evening at the home of the bride's parents, Doctor and Mrs. Walter R. Pike. The interesting ceremony was performed by the Rev. Mr. T. H. Vincent. The bride is the eldest daughter of Dr. Pike, a most amiable young lady, beloved by all her friends for her many superior qualities of mind and heart. The groom is the Utah manager of the Telephone Power Transmission company, a very capable and highly respected young man. Many guests were present to shower congratulations and good wishes upon the happy couple, and the beautiful feast of the bride and groom was the scene of the most delightful social event ever witnessed within its hospitable walls. Mr. and Mrs. Woodhouse will reside in Provo.

This morning a party of Provo people left over the J. & W. on a trip to Pennsylvania, where they go to visit relatives. Mr. Homer, who is an alternate to the Republican convention, will attend that gathering. The following is the party: Mr. T. H. Vincent, Mr. E. Vincent, Messrs. Wm. F. and Simon Snyder, Miss Lydia Vincent, daughter of Mr. and Mrs. T. H. Vincent, who will accompany the party to Ohio.

John G. Coltrin is suffering from the effects of a paralytic stroke, which affected his left side. He is, however, able to sit up and to hold the attack will have no serious consequences.

Mr. Coltrin's son, Zebadiah Coltrin came down from Salt Lake when he learned of his father's illness, and this morning both went to the capital.

William Peterson, Peter Mortenson and Alfred Hansen, three of the Spanish Fork boys who are charged with fornication by Sarah Johnson, have appeared before Justice King, waived examination and were committed to the district court in default of \$250 bail.

Provo's building boom.

Provo has a building boom—first in order of account of value and second in order of account of number of buildings. The new school house, which will cost somewhere near \$100,000, a real little school house is also being erected in the Pleasant View ward.

Jesse Knight and Son's new business block on the site of the old East Co-op is being raised above the foundation—the east wall well under way.

Ed. Looze & Co.'s newly completed store will be opened on the ninth inst. as a drug store, handling and fitting the new elegant style.

Judge John E. Booth's residence on the north of town is rapidly nearing completion.

A Relief Society hall for the third ward is being built behind the old sanctuary site of early days.

Holma Smith's large commodious dwelling house is nearly finished, the walls up and roof on.

Israel Penrod's addition to his old headquarters is well along completed.

Edvard Van Wazensen's new brick residence is so far advanced as to ensure the fact that another neat and attractive home will be added to the Third ward, together with the three other buildings named.

THE "NEWS" BOOM.

A Deseret News boom is also on at Provo: through the exertions of your enterprising local agent, K. J. Dugdale, one hundred and thirty new subscribers have been added to your list.

John W. Hoyer, Sr., proprietor of the Excelsior mills, who is a sufferer from a light form of paralysis, is often seen on our streets in his motor chair. His wife, Mrs. W. Hoyer, of the Third ward, is in very poor health, confined to his room. He has been ailing for many months.

A Wealth of Beauty.

Is often hidden by unguishful Pimples, Eczema, etc. Bucklen's Arnica Salve will glorify the face by curing all Skin Eruptions, also Cuts, Bruises, Burns, Boils, Felons, Ulcers, and worst forms of Piles. Only 25 cts. a box. Cure guaranteed. Sold by Z. C. M. I. Drug Disp.

CROYDEN.

Town Now Boasts of a Telephone and Railroad Station.

Special Correspondence.

Croyden, Morgan Co., June 5.—We feel to put on airs now. We have a telephone in the town and can talk to Ogden and Salt Lake.

The Union Pacific is making improvements at Croyden—building a station and repairing the tracks as though they meant to get more traffic.

Mining is quiet, only one prospect is being worked.

The Deseret News is greatly appreciated, and the Deseret News is taken to three households and six Tribunes.

A Monster Devil Fish.

Destroying the victim is a type of Constipation. The power of this malady is felt on organs, nerves, muscles and brain. But Dr. King's New Life Pills are a safe and certain cure. Best in the world for Stomach, Liver, Kidneys and Bowels. Only 25 cents. at Z. C. M. I. Drug Disp.

TO WOMEN WHO DOUBT.

Every Suffering Woman Should Read this Letter and be Convinced that Lydia E. Pinkham's Vegetable Compound Does Cure Female Weakness.

"I have been troubled with female weakness in its worst form for about ten years. I had leucorrhoea and was so weak that I could not do my housework. I also had falling of the womb and inflammation of the womb and ovaries and at menstrual periods I suffered terribly. At times my back would ache very hard, I could not lift anything or do any heavy work; was not able to stand on my feet. My husband spent hundreds of dollars for doctors but they did me no good. After a time I concluded to try your medicine and I can truly say it does all that you claim for it to do.

Ten bottles of Lydia E. Pinkham's Vegetable Compound and seven packages of Sanative Wash have made a new woman of me. I have had no more trouble since taking the fifth bottle. I weigh more than I have in years; can do all my own housework, sleep well, have a good appetite and now feel that life is worth living. I owe all to Lydia E. Pinkham's Vegetable Compound. I feel that it has saved my life and would not be without it for anything. I am always glad to recommend your medicine to all my sex, for I know if they follow your directions, they will be cured."—Miss A. M. Thompson, South Hot Springs, Ark.

One grand feature about the building, when completed, is that it will be absolutely fire proof. The Benton Fire Proof company are now busily engaged replacing all the old lumber floors with concrete which in order to complete the whole building it is estimated will require ten car loads of cement, 400 cubic yards of concrete and 200 cubic yards of gravel.

The concrete is interlaid with hog wire every four inches to give the floor tensile strength. This idea of using hog wire originated with the Benton Fire Proof company and was tested to stand 652 pounds to the square foot, with a deflection of half an inch in a six foot span in the clear.

All the wooden stairways will also be replaced with iron, not leaving a work of wood whatsoever in the building and the only possibility of a chance of a fire would be in the roof and that is now being covered with slate or roofing making it almost fire-proof, and as the building is constructed of concrete "should a fire break out in any place in the building it could not do any material damage—not even enough to have to stop the factory."

The management has not only had in view the equipping the factory with all the latest machinery but they have also had in mind the interest of the employees and they are now having good ventilation constructed right over the process, which will make the work pleasant for the employees and particularly the press men.

The excavation has just begun for the new two-story brick warehouse, which will be 60x120 feet and all the frame work of this building too will be constructed with structural steel being iron stairway, etc. The sugar just as it is manufactured will be carried directly to this warehouse by a conveyor and after packing, weighed with an automatic scale.

The old trolley line which has been used in carrying out the refuse line will be something of the past and in lieu thereof, the refuse will be mixed with water and expelled under great pressure into the pond. The Utah Sugar company has also in contemplation the washing of the pulp into the silos by running a galvanized iron pipe under the factory, all the old and out-of-date machinery will be utilized in various ways and nothing will be thrown away or wasted.

UTAH MADE AUTOMOBILE.

Mr. Utah Devey, head blacksmith of the Utah Sugar company, expects to be the owner of the first automobile made in Utah as he now has one under course of construction, which he is making himself, having sent East for the motor and chassis. In a couple of weeks says Mr. Devey, he will let the good people of Utah witness the running of a horseless carriage.

Unnecessary Loss of Time.

Mr. W. S. Whodan, Cashier of the First National Bank, writes, "I feel that the remedy for the cure of the First National Bank is to be made by a carpenter working for me who was obliged to stop work for several days on account of being troubled with diarrhoea. I mentioned to him that I had been similarly troubled and that Chamberlain's Colic, Cholera and Diarrhoea Remedy had cured me. Every day the remedy from the drug store had made me feel that one dose cured him, and he is again at his work."

Hand-made Chocolates, our finest for sale at a pound.

Butter Scotch, 15 cents a pound. Koltz stores, Saturday, 2 to 6.

RICHFIELD.

Board of Equalization—Schools Non-partisan.

Special Correspondence.

Richfield, Sevier Co., June 6.—The county board of equalization has been in session for the past two days but comparatively few taxpayers have appeared to object to their assessments.

SCHOOLS NON-PARTISAN.

Yesterday the executive committees of the Democratic and Republican parties of the county entered into an agreement to elect the county superintendent of schools upon a non-partisan vote, and accordingly a call was made, signed by the chairman of both parties, for a non-partisan county convention to be held June 12th for the purpose of nominating said officer.

P. D. Gardner, representing the agricultural department of Washington, D. C., in co-operation with the agricultural college of Utah, is now located in our county for the purpose of making tests of the soils of this valley to ascertain what per cent of alkali they contain and for what they are best adapted and to further determine what effect the present of alkali in the soil has upon the crops. A report of his labors will be published hereafter.

A marriage license was issued yesterday to R. H. Pool, 23, and Della Buchanan, 19, both of Glenwood.

Last evening the members of the ward choir gave a farewell party to their leader, Miss M. Jones, who leaves in a few days for Salt Lake City where he is going to further pursue his musical studies. An appropriate program consisting of music and speeches was rendered, and during refreshments served. Brother Jones leaves with the best wishes of all the people of the ward and the community.

For the past three years to advance the interest of our ward choir, and the progress made by that organization testifies of his efficient work.

The Deseret News is greatly appreciated, and the Deseret News is taken to three households and six Tribunes.

BEECHAM'S PILLS

cure bilious and nervous illness, sick headache, disordered liver and impaired digestion. 10 cents and 25 cents, at all drug stores.

BANK STATIONERY.

And printing specially attended to at the Deseret News Office. Estimates promptly furnished. Rush orders a specialty.

THE UTAH SUGAR FACTORY

Vast Improvements and Additions Now Completed—Those Under Way.

Four Hundred Employees Engaged—Factory Will Have Every Modern Improvement.

Lehi, Utah Co., June 6.—The Utah Sugar company has now over 400 employees busily engaged at its factories and a person visiting the central factory at Lehi will be amazed at the stupendous machinery that is now rapidly being set up; the twenty-two boilers having a capacity of 100-horse power each, are now about ready for action and the five new carbonators of the latest invention together with all the old ones are erected ready for operation. The iron columns which form the framework of the whole building are now up and the eighteen crystallizers each weighing seventeen tons, are being hoisted to their respective places. This old vacuum pan which has heretofore stood on the fourth story together with a new one of double its capacity. Heretofore the milk of lime used in the carbonation has been mixed by a man using a common hoe, but now this method will be replaced by a machine, and the old cable elevator which carried the lime rock and coke to charge the kiln has been removed and replaced by an upright elevator which will carry 400 cubic yards of coke every hour and the old kiln and also the new one lately erected.

One grand feature about the building, when completed, is that it will be absolutely fire proof. The Benton Fire Proof company are now busily engaged replacing all the old lumber floors with concrete which in order to complete the whole building it is estimated will require ten car loads of cement, 400 cubic yards of concrete and 200 cubic yards of gravel.

The concrete is interlaid with hog wire every four inches to give the floor tensile strength. This idea of using hog wire originated with the Benton Fire Proof company and was tested to stand 652 pounds to the square foot, with a deflection of half an inch in a six foot span in the clear.

All the wooden stairways will also be replaced with iron, not leaving a work of wood whatsoever in the building and the only possibility of a chance of a fire would be in the roof and that is now being covered with slate or roofing making it almost fire-proof, and as the building is constructed of concrete "should a fire break out in any place in the building it could not do any material damage—not even enough to have to stop the factory."

The management has not only had in view the equipping the factory with all the latest machinery but they have also had in mind the interest of the employees and they are now having good ventilation constructed right over the process, which will make the work pleasant for the employees and particularly the press men.
