MINING, BUSINESS AND STOCKS

LAST YEAR'S WEEK WAS MORE ACTIVE

Salt Lake Mining Stock Exchange Closes Erratic Six Day Run.

DALY JUDGE IN LIME LIGHT.

Various Causes Are Offered for Light And Timid Trading—Confidence Growing Gradually.

The week just ended in the local mining stock exchange does not compare at all favorably with the corresponding week last year. The totals for the past week are 216,781 shares transferred with a total selling value of $162,773.69. Those for the corresponding week last year were 460,874 shares sold with a selling value of $218,268.37. The past week lacked favorable features and all in all was quiet. When compared with preceding weeks, however, it shows a slow restoration of confidence resulting in more activity, naturally. Speculative trading is not anywhere near its former magnitude and is becoming less noticeable right along.

One prominent feature of the week just ended was the slump in Daly Judge. Not many days ago this stock was wanted at prices around the $12 mark and this morning it closed the week at figures over one-third below the high price. It is no longer puzzling to many mining men—this rapid slide of Daly Judge as they have assured themselves that the "bearing" is directed towards the stock has a purpose and is the plan of a crowd to acquire large holdings in what is now considered one of Park City's best mines, and that's saying a whole lot. It is known that one large stockholder has been letting good sized blocks go in such fashion as to cause a decline. The last few days have marked a stand-still for the stock as several sales have followed attacks of the bears.

The decision of the banks to allow no overdrafts under a new ruling has had some effect upon the market as dealers must confine their trade to money-at-hand. Speculative dealing is thus eliminated as dealers do not care to take big chances with nothing but their own pocket-books backing them up. The influence of eastern conditions is about at an end. Numerous big deals under way or being figured out involving in one or two cases the richest areas in Utah's best districts is keeping followers of the stock game on tip-toe and selling and buying are being done with these deals in mind. A better week is expected to open Monday. The morning sales, closing quotations and totals follow:

DAISY-EASTERN BORN.

Property is Bright Youngster Among Tintic's Coming Bonanzas.

The Daisy Eastern Mining company is Tintic's infant company. Mark Hopkins, of this city, is president; D. Moore Lindsay, vice president, and U. U. Hiskey, secretary and treasurer. The company was incorporated for $500,000, divided into as many shares, and of this number 400,000 shares were placed in the treasury, affording late shareholders equal footing with the original incorporators. An allotment of 100,000 shares was placed on the market at 10 cents per share to raise money for development. This was oversubscribed in quick time, so the company sees money enough in sight to carry on active work. The property comprises six claims and fractions lying east of the Sta. Con. and south of the Carisa. Besides its northeast and southwest fissure, the ground has two north and south fissures, and an east-and-west vein.

The Colorado Beck tunnel developments have been watched sclosely by the Daisy Eastern people and they believe something equally as big if not larger will result when their property is opened up. There is a shaft 210 feet deep in the venter of claims and drifting is already in progress. The vein is being followed both ways from the shaft. Mark Hopkins and an associate paid $1,000 for an option on the property as far back as 1900, but upon finding a flaw in the title, surrendered this amount. Several attempts to open the property at various times have been nipped in the bud by the imperfect title, but now that this is clear, Mr. Hopkins and his associates, comprising a large number of Tintic wage earners, will have an opportunity of seeing for themselves just what is in the property.

W. A. CLARK BUYS E. & F.

Holding of Col. A. C. Ellis in Bristol District is Transferred.

W. A. Clark, Jr., son of Senator Clark of Montana, has taken over the E. & F. mine in the Pioche district. Col. A. C. Ellis has held the property and it is understood will get a price in the neighborhood of a quarter of a million dollars for his possession. The mine is in the Bristol district 25 miles northwest of the camp of Pioche and close to the Day mine owned by the Nevada-Utah syndicate. It adjoins the Bristol Copper, regarded as a good property.

The E. & F., "in the good old days," was known as the Bay State mine and was worked extensively for silver finds but with the advent of a railroad its copper looks good to mining men. Col. Ellis and O. J. Salisbury took over the mine about six or seven years ago and in that time have blocked out big bodies of ore, feeling confident that a railroad would some day be built into Pioche. Only enough ore was taken from the mine to pay the expenses of development and exploration. The mine is about two miles from the terminus of the "Jack Rabbit" railroad running from Pioche to Bristol. It is said that Mr. Clark made the purchase upon the report of Al. Frank, an expert on the Heinze staff. Mr. Clark and Mr. Frank were seen in Pioche together and this was the base of a rumor which joined the Heinze and Clark acquisitions in Pioche. This was not correct as Mr. Frank was borrowed, simply to examine the E. & F.

EUREKA REPORTS STRIKES.

Deprezin and Uncle Sam Have New Finds—Snow Flake Idle.

Special Correspondence.

Eureka, April 5.—The report is current upon the streets here that the Centennial Eureka Mining company has opened up ore in the Deprezin ground upon which the Centennial Eureka has a bond. It is in the drift which has been run into the new property from the 600 level in the Centennial Eureka that the ore has been encountered. It is not a strike of any great magnitude, as the ore presents itself in small stringers, but it is nevertheless an important disclosure as it goes to show that the ore bodies of the famous old Centennial Eureka mine extended into virgin ground and eventually may mean a great deal for the Tintic district. There is no doubt but what the Deprezin claims will be owned by the United States Mining company before the end of the year.

The Snow Flake mine at this place has been temporarily closed. The officers of the company saw that a larger and more modern boiler is needed, and that the mine will probably continue quiet until this and other new machinery is installed.

It is reported from the Uncle Sam that ore has again been opened up on the 550 foot level after a great deal of searching, and that this with the disclosures of ore on the 800 level will greatly increase the output from that mine this month.

SALT LAKE BANK CLEARINGS

Totals	$6,124,144.69	$5,339,789.76

Increase, $784,354.93.

CARDIFF GETS BUSY.

Plans to Sink and Drift for Ore in Lower Workings.

The new Cardiff Mining and Milling company is a youngster, who is commencing to do things right from the jump. A contract was let yesterday for the sinking of the shaft in the property at Alta. The mine was at one time known as the Mountain Chief and adjoins the Columbus Con. on the north. It is the purpose of the Cardiff aggregation to drop the shaft from a depth of 270 feet to 350-feet and to drift from this depth under the ore exposed in the surface workings. A great deal of good ore has been taken from these bodies in the past. The property has been operated by various individual owners in the past but now that a new company has been formed concentrated action is to be taken and great things are expected of the mine. The officers and directors of the Cardiff company are: Fred W. Price, president; Edward E. Jenkins, vice president; H. A. McMillin, secretary and treasurer, and these with Charles R. Hancock and John M. Wheeler constitute the board of directors.

GOOD SPRINGS GROWS.

So Does Fitting District—Nevada's Newest Territories.

J. B. Jenson is back from a trip to Good Springs, Nev., where he, with associates, has acquired the "29" copper property, considered one of the best prospects in that territory. "We will have a force at work in a short time," says Mr. Jenson. "In fact we have had two men doing exploratory work for some time. The district is growing rapidly but there is nothing spasmodic in its strides towards the front. One of the best signs for the camps is the evident efforts of those coming in to keep affairs quiet until the territory can be gone over carefully." In addition to the "29" group Mr. Jenson and companions have options on two other properties at Good Springs. While nothing but surface work has been done so far, there is every indication to show that the prospects will be good mines. The main property is on the contact of the Heinze property, where the sulphides are coming into porphyry. All told there are five companies in the district and active though quiet development is on in earnest.

Regarding the Utah-Esmeralda in the new Fitting district near Acme on the Southern Pacific, Mr. Jenson says he is confident that a good copper property has been acquired. The mine is within four miles of the new town of Acme, thus having excellent shipping advantages. A gang of 10 men will be put to work in a short time, sinking a shaft on a body of ore already located. From a ledge between 10 and 12 feet wide a shipment of ore, going 20 per cent copper, has been gathered. The ore goes down at an angle and an incline shaft will be sunk to follow it. Mr. Jenson reports that six big outfits are in the district and development in real fashion is about to begin. Schwab is heavily interested in the new district and will begin work on his holdings immediately. The New Strike has between 10 and 15 tons of ore going between 40 and 60 per cent ready for shipment.

JENNIE MILL A SUCCESS.

J. A. Kearns Exhibits Gold Amalgam Scraped From Plate After Run.

The Jennie mill put into commission recently is proving a success. J. A. Kearns, a member of the company, is preparing to build a dozen cottages and a couple of store buildings at Gold Springs for the accommodation of the men working at the mine. Mr. Kearns is in the city and brought with him an eight-ounce sample of amalgam with gold in it. This bulb was scraped from a three-foot spot on a plate after a 24-hour run of the mill. This stuff, explains Mr. Kearns, was obtained while a clean up of dump rock was being run through the mill, and for this reason is not a fair sample of what the mill can do. Mr. Kearns has lots of good things to say about Manager C. A. Short, to whom all credit is due. As a result of the Jennie's activity the district surrounding Gold Springs in Beaver county is booming.

Mr. Kearns also brings with him a sample of ore from the 115-foot level of the Jennie. This shows free gold in good quantities. The ore body from which this sample was taken has been followed for a distance of 300 feet on each side of the shaft and maintains a width of about 12 feet. The main vertical shaft is being sent down from this level and it is the intention of the company to go to a 200-foot mark where the vein will be opened up as fast as judgment will dictate and money and men permit.

EUREKA SHIPMENTS.

Tintic Sends One Hundred and Forty-Four Cars to Market.

Special Correspondence.

Eureka, April 5.—The mineral shipments from the Tintic district for the weeking closing tomorrow are as follows:

OUTSIDERS INTERESTED.

Chicago Operator Will Visit Gold Springs to Examine Gold Properties.

Joseph Donovan, an old timer in Utah mining circles, is in this city from Gold Springs, one of the most active districts in this state at the present time. He, with his brother, P. J. Donovan, has taken up four claims grouped under the name of the Jumbo Extension. This adjoins the Jumbo. The Jumbo is a winner, says Mr. Donovan. Within the past two weeks rapid work has been devoted to open up a big strike made there some time ago. An 80 foot ledge carrying two feet of rock with free gold all through it, was opened up and values as high as $208 have been obtained from the two foot vein. The ledge can be traced along the surface for 300 feet as plain and well defined as anything could be. The Jumbo is owned by James Johnston who is sinking on the ledge to test its depth. In Mr. Donovan's opinion the Jumbo is going to be one of the best things in Utah and with the Jennie and other mines in that territory, will play a big part in running Utah's gold totals up to big figures. Hence his confidence in his own property is great. "We are tunneling and are now in a distance of 50 feet," he said this morning. "The Jumbo ledge runs through that property in a north and south line and crosses our property. It can be traced easily."

In connection with information about the Jumbo Extension it may be explained that J. C. O'Neil, the prominent mining man and mine operator of Chicago who was registered at the Knutsford a week ago had his attention called to the Jumbo Extension and the Gold Springs district in general while here and upon his return trip from California he will visit the district with the intention of taking up several of the best propositions. With Mr. O'Neil at the head of a company interested in Gold Springs that district will fairly hum and according to present conditions should develop into a big gold producing region to say the least. It has been learned that Mr. Donovan's visit here is made to meet Mr. O'Neil who will go with him to Gold Springs and from there continue towards Chicago. That something good may be announced for the district in a short time is a foregone conclusion.

The Independence group of claims owned by C. A. Short of Gold Springs and Local Agent Ally of the Rio Grande in this city is to have a mill in a short time, says Mr. Donovan and this will help the district in great shape. The Snowflake has $200 ore, too, says Mr. Donovan who is thoroughly enthusiastic over the showings being made by his neck of the woods.

The Deseret Building Society.

No 18 East South Temple Street, (Ground Floor of Templeton Building), is organized to enable its members to save money in monthly installments; and to build, buy or improve homes.

For those who have money they wish to earn a fair interest and yet who want the money so invested that it can be readily converted into cash the Society issues

PAID UP STOCK $100 PER SHARE BEARING 6 PER CENT interest per annum.

The money paid for this paid up stock can all be withdrawn under the regular rules of the Society, and the investor is sure of 6 per cent interest if the money is left to the end of the year. This department of the Society is meeting with much favor from those who have investigated it. The officers are: Nephi L. Morris, President; Rulon S. Wells, vice president; Jos. Nelson, treasurer, and Quayle Cannon, secretary. No trouble to answer questions.

BROWN'S BRONCHIAL TROCHES — A FOR COUGHS AND COLDS
Cure hoarseness and sore throat caused by cold or use of the voice. Absolutely harmless.

BANK STATEMENT AFFECTED PRICES

Not Very Strong at Any Time Yielded Below Last Night's Level on Its Appearance.

HARRIMAN PACIFICS GAINED.

This Tended to Harden a Weak Market When Profit-taking Became the Feature.

New York, April 6.—Prices of stocks at the opening moved with hesitation and within a narrow range. The Harriman Pacific made large fractional gains and Amalgamated Copper rose 1¼. Canadian Pacific fell 1¾, and St. Paul ⅞. Transactions were on a moderate scale.

Prices improved all around after the opening. The market then fell back sharply but hardened when the Harriman Pacifics rose again. A good demand prevailed for many specialties.

The important gains were Chicago Terminal preferred 2¾, Amalgamated Copper, Smelting 2, Union Pacific 1½ and Anaconda 1¼.

The market closed weak at the lowest. A variety of minor stocks made gains but in the active list there was obvious profit-taking under cover of the strength in the Harrimans and the coppers. The effect became more pronounced after the appearance of the bank statement when prices yielded to generally below last night.

LIVESTOCK.

CHICAGO.

Chicago, April 6.—Cattle—Receipts, 300; market steady. Beeves, 4.25@6.70; cows, 1.80@6.00; heifers, 2.75@5.40; calves, 5.25@7.50; good to prime steers, 5.50@6.70; poor to medium, 4.25@6.40; stockers and feeders, 2.85@5.00.

Hogs—Receipts, 13,000; market 5 cents lower. Light and mixed, 6.50@6.82½; heavy, 6.45@6.80; rough heavy, 6.45@6.60; pigs, 6.00@6.70; good to choice heavy, 6.70@6.80.

Sheep—Receipts, 3,500; market steady. Natives, 4.50@6.85; westerns, 4.00@6.65; yearlings, 6.50@7.50; lambs, 6.25@8.50; westerns, 6.50@8.35.

OMAHA.

Omaha, April 6.—Cattle—Receipts, 100; market unchanged.

Hogs—Receipts, 4,500; market 5 cents lower. Heavy, 6.40@6.50; mixed and lights, 6.42½@6.47½; pigs, 5.50@6.25.

Sheep—Receipts, none; market steady.

WOOL.

ST. LOUIS.

St. Louis, April 6.—Wool, steady. Territory and western mediums, 24@27; fine mediums, 18@21; fine, 14@17.

PRODUCE.

CHICAGO.

Chicago, April 6.—The wheat market opened easier today with longs selling freely. The failure of the Liverpool market to respond to yesterday's advance here and the slight rains reported from Kansas and Nebraska were the chief strengthening factors. May wheat opened a shade lower at 77 and sold at 76⅞@76¾. The corn market was quiet and prices were easier. Many pit traders were inclined to sell. The fact that local receipts were below the estimate steadied prices. May opened ⅛ lower at 46.

The oats market was steady, but trading was exceedingly dull. May opened ⅛ to ¼@¼ higher at 42⅞ to 42⅞@43 and declined to 42¾.

The provisions market was quiet and prices were easier in sympathy with a 5@10 cent decline in the price of live hogs. May pork opened 2½ lower at 16.10. Lard was down 5@7½ at 8.85@8.87½ and ribs were 5 cents lower at 8.57½.

The market became weaker as the trading progressed and May declined to 76⅝. The close was weak with May off ¾@⅞ at 76¼.

Corn—Prices held steady all day. The close was steady with May down ⅛ at 46.

Close: Wheat—May, 76¼; July, 78⅝.
Corn—May, 46; July, 46½.
Oats—May, 42⅝; July, 37⅝@37¾.
Pork—May, 15.85; July, 15.95.
Lard—May, 8.77½; July, 8.85.
