NEWS OF THE WEST.

One Miner Kicks Another to Death in a Quarrel.

KILLED BY A BULLSE 100.

Big ards an Irrigation Company—Cupid's Cupid Compared to Lightning—Fort Lapheme.

Giovanni Bertarelli, a native of Italy, was killed Saturday at Dewey's mill, near Sauk Creek, Cal., by a bullet coming from him.

Capsule Sessions of the Utah Statehood bill enough to give heartburning to Utah's Wilson, is not way. Salt Fort Townsend's Port Gardner Bulletin say it will, and there is no doubt of it. Seattle, Wash., Sunday.

Charles Williams, a miner, who resided with his wife and child near Orange, Cal., Tuesday night by a party and died at the county hospital Saturday night from concussion of the brain caused by violence to the right temple. Williams was a man named Pesley were quarrelling about a mining claim, when Cary took a club in the fight and killed the unfortunate man.

Articles of incorporation of the Calaveras Irrigation, Land and Water company were signed at Angels, Arizona, Saturday. The incorporators are Alexander O. Hubbard, Washington, D. C.; Harper B. Wise, Robert Fley and D. F. McIntyre. The principal place of business is Calaveras, A. T. The capital stock is $2,000,000 divided into 8,000,000 shares. The object of the company is to acquire property and construct canals for irrigation purposes.

Saturday evening Mrs. F. G. Smith of Madera, Cal., eloped for life by swearing her parents' voice. Only recently she left her home in Boston to come to California to live with her daughter, as she did not like the treatment she was receiving in her former home. It seems she was befuddled at Madera also, without any opposition. Sunday evening she attended a festival, and as she expected anything out of the ordinary until her new granddaughter came rushed from the woodshed and with grandma was making for Dixie Mrs. When the woman saw the number of the house sending urbanes her she made a desperate dash and in a few minutes expired.

Two cans of ore, one containing gold and the other silver, represent a sum of more than $1,000, were stolen from the street of a case in the office of the superintendent of Lowenson & Jacobs's wine warehouse, San Francisco, in broad daylight Saturday. The hour was about 11 o'clock in the morning, and there were half a dozen customers in the office at the time. It was necessary for the thief to leave upon the desk in order to get at the money, yet he succeeded in doing so without detection. It is believed the theft was committed by a discharged employe by the name of Eddie Prevell, who is now sweating in the tanks of the city prison, and executed by a man of the employ of Lonnman & Jacobs, who is still at large.

Articles of incorporation of more than ordinary interest were filed in California on Saturday, giving legal existance to a company with a capital of $2,500,000. The new corporation is called the California Beet Sugar Estate & Land company (limited), and, as the monthly mass would indicate, it is an English affair. The formation of this company marks the Chino ranch deal as an English syndicate, to which a Rothschild wealthy London banker became the owner of 40,000 acres of sugar beet land, comprising the Chino ranch of Richard Gird, for the sum of $1,600,000. Of this amount $162,000 was paid in March last and $238,000 will be handed over within the next few days upon the delivery of the title deeds, now held in escrow by the Anglo-California bank.

A frightful and fatal accident happened at the Summit mine, Cal., on Saturday morning. John Durbin of Grass Valley, one of the miners, and A. O'Donnell, an engineer, are the injured parties. As Durbin came up from the mine after more blasts and caps. In company with O'Donnell he went to the powder-house. They proceeded to try a piece of the fuse to see how it burned, as they had some doubt as to its quality. While the experiment was being made Durbin held a box of giant powder caps in his hand. Suddenly there was a loud report. The cartridges had exploded with awful force. Those who reached the spot first were horrified at the sight. Young Durbin's right eye has been blown out, his left hand was torn off and he has sustained fatal injuries about the abdomen. O'Donnell was also badly hurt.

Ex-Postmaster Oscar Brevstant of Alameda, Cal., has just received a letter from Shanghai, China. There is nothing particularly unusual in such an occurrence, but this particular letter has been chasing itself around the globe, often to the exact place of its sender, right in Alameda, for the last seven years. It was Brevstant travel-stained, and the postage that has been spent on it would exceed a pretty sum, while the things it carries are remarkable for the extent were caught in Philadelphia. The letter originated in a practical joke some seven years ago when Shattuck was postmaster in Alameda, and it has been kept on the go ever since. Shattuck sent a letter to Mr. Brevstant, addressed to him with postage due. Something told the postmaster was the author of the hoax, the box too letter sealed and returned to him from Sac. Jack Shattuck then sent it to a gentleman in Bombay, India, who mailed it to Miss Shattuck again with postage due. Women refused to receive it and then it stopped the game, and again the unlucky letter was transferred to return from the sender. Although it has gone to all the ends of the great globe, it is still in good condition and is not yet two the end of its journeyings.

Advance of Women Since 1870.

Three thousand women authors, against 124.

Two hundred and forty women lawyers, against 5.

Eleven thousand women sculptors and painters, against 412.

Twenty hundred and thirty-seven women musicians, against 34.

Eight hundred and eighty-eight women journalists, against 23.

Three thousand, nine hundred and ninety-nine actresses, against 405.

One thousand two hundred and twenty-five women preachers, against 61.

Ninety-four thousand and forty-eight merchants and clerks, against 8,075.

Twenty-one thousand one hundred and ninety-five clerkhand writers, against 2.

In 1890 there were in the United States 4,556 women doctors, against 525.

Thirty-four thousand five hundred and eighty-six women stenographers, against 4,274.

One hundred and eighty women land surveyors and engineers, against none at all.

A Remarkable Woman's Plea.

Brooklyn, thanks to Brooklyn, is to have a woman's club. A club woman from the City of Churches, visiting the island, found that Brooklyn women were culpably lacking in interest in the matter of Pendleton legislation. She immediately set to work and the result is a woman's club, incorporated, in accordance with Albany law, at Troy. Among those interested in the movement were the Rev. Dr. Rutherford H. Emerson, United General Secretary, the Rev. Dr. Lyman Abbott, Mrs. Frederick Cook, Mrs. Arthur Brooks, Mrs. Arthur Arthur, the daughter of a member of Garfield's Cabinet, Tuesday evening in the Eastern home of Jesse Mrs. B. E. Dugan, wife of a member of the senate, it resulted in the formation of the club. Mrs. Dugan is president of the club. Mrs. Allard is a native of Kimberley, South Africa, and was sent to attend a case of pneumonia in Brooklyn. When she arrived there she found herself in the midst of a smallpox epidemic. She had no one to help her, but was not discouraged. She immediately started a hospital in a vacant place and cared, assisted, 200 sufferers and in white patients, being out of that large number only one woman and two children, a record of which many physicians with all modern conveniences and a corps of trained assistants would be proud.

Curing Sugar-Cane.

Most people think it should be kept before curing. I think, for most all speak of curing cane in the field. I always mean to cut mine when it first begins to show blooms, weather permitting. I cut it in the morning and mean to leave it if it has been a good day. If you have room to pitch it over some after it has been housed two or three days to give it an airing, it pays to do it. It should not be put in without some drying if the cane is very tight, and not in large quantities, as it may heat and mold. I do not like a tight fine mow, it, as that stops all chance for the air getting to the bottom.

If in doubt about it not being dry enough to put in the day of cutting, put it in good sized bundles, and open a bit the next day, and be sure and put it out and put it in early.—Cor. Florida Farmer.

Curing Sugar Cane.

A correspondent of the Texas Farm and Ranch writes:

Cut when in stiff dough, before the fodder begins to burn. Let lay the way the manure left it from 24 to 48 hours if sun shines, longer if not. Rake into small shocks and let it remain for a week or two, owing to the weather. Make your shocks as high as possible, not broad, as the sun bleaches it. Make your stack from 16 to 18 feet across at the bottom. Put your sweeps through the center of your stack the longer. When it settles, the center will be the highest. Make your stack from 8 to 12 feet in height. Lay a weight across the stack to hold the sweeps. Many like to cut in dew. I don't. It has too much trouble to cut with a cane knife.

Stock Misunderstood.

Bachelor Sheriff—Madam, I have an attachment for you.

Blushing Widow—Oh, this is so sudden.

Bachelor Sheriff—I beg your pardon, I think you don't understand me. You must proceed to court.

Blushing Widow—Of course! So I must. I feel really forgotten all about this being leap year. Well, how must I begin?

Bachelor Sheriff—Come, now, this is no time for trifling. The judge is waiting.

Blushing Widow—But, my dear, wouldn't it be nice to have a husband?

Gladness Comes

With a better understanding of the wonderful action of the many physical ills which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, laxatives or other remedies are then not needed. If affected with any actual disease, you may be assured it will not be benefited by them, but if in need of a laxative, you should have the best, and with the multitude everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

PRIDE OF JAPAN (TREE) TEA

THE UNIVERSITY OF UTAH

Messrs W. J. Brandenstein & Co
Gentlemen:
The sample of tea, "The Pride of Japan," submitted to me for examination comes within the range of unadulterated tea, a conclusion partly drawn from the percentage of ash, 5.1—free from gypsum, indigo, prussian blue, graphite and foreign leaves, substances used in adulterating tea.

Respectfully Submitted

Watch Movement Recently placed upon the market by the Waltham Watch Co., is the nearest approach to mechanical perfection in construction of any time piece heretofore produced. This movement is small and thin and "Keeps time with the sun." In a recent trial of one of these time pieces the variation at the end of 5 days was ONE (1) SECOND. This means the variation of ONE (1) MINUTE in one year. Is not this perfection?
