The times in a leader says that the notice in the Gazette of Jan. 8 warning mariners not to approach the Spanish coast east of Bilboa n account of Carlist batteries planted there, will suggest the thought that our government is treating a Gad D serious matter too lightly. Being at peace with Spain we have a right to trade with any part of her territory, and the government of Spain is bound to protect the property of our countrymen when within three miles of her coast. Were any of our seamen murdered or ships burned in one of her harbors, we should insist on punishment and compensation being made. Spain might plead that it was too weak tocontrol its unruly subjects, and too poor to pay; i such an excuse were false we should invite that government to do justice or prepare for reprisals, which would amount to a declaration of war. If the government were really powerless we should have the right to take its place, and Braby B defend the lives and property of our subjects. These elementary facts suffice to show the duties of our government in the present case.
