MINING, BUSINESS AND STOCKS.

MARKET WAS MORE FIRM TODAY

Daly Appears to Have Struck Bottom and Turns Upward.

GRAND CENTRAL STRONG.

Daly-Judge Continues in Good Order—Naildriver Brought $2.15 on The Open Board.

While the volume of sales of mining shares on the stock exchange was not heavy this forenoon, the condition of the market was somewhat more firm than the quotations of yesterday indicated. Daly seemed to have hit bottom yesterday, for this morning the stock showed a decided improvement; only one sale was recorded, 100 shares at 3.15; the closing bid was lower, 3.01. Grand Central was also in better tone, one block selling at 5.65; the demand, however, being light, the last price bid during regular call was lower. On the open board a board lot transferred at 5.62. Daly-Judge opened at 10.30 and raised 10 cents during call; Lower Mammoth appeared a shade to the better; May Day opened at 14 cents, but weakened; Sacramento held firm, while New York held steady around 23 cents per share. Naildriver was called out on the open board at 2.15. There were a few calls for the sugar stocks on the open board, but no orders were filled.

The closing quotations and sales posted were:

Loans money on stocks at bank rates. Room 26, Walker Bank building.

AMALGAMATED EARNINGS.

Annual Output Estimated at 250,000,000 Pounds Refined Copper.

Although the next dividend, says the Western Mining World, on Amalgamated copper stock is not due for at least six weeks, there is already talk of an increase in the rate at the next meeting. The advance in copper has materially increased the revenues of the Amalgamated company from this source.

Whether or not the next dividend will be at an advance over the previous rate is one for the directors to decide, but one thing is certain that earnings for the first half of the present quarter have been upon a basis to warrant expectation of a better return, and if sales are made during the next six weeks on an average equal to the basis at which sales have been made during the past six weeks, Amalgamated will certainly be a much stronger financial position than it was at the close of the calendar year.

The output of the Amalgamated per annum may be placed conservatively at 250,000,000 pounds of refined copper. Every cent advanced in the price of the metal represents therefore an increase of $2,500,000 in Amalgamated earnings.

Sales of Amalgamated copper during the past six weeks have been at an average of 12½ cents the pound. Carried out for the balance of the year this would mean, at a cost of production of say nine cents per pound, earnings for 1903 of about $8,750,000.

LEAD ORES FROM THE UNCLE SAM

Six Car Loads at Mine Ready for Shipment.

TO BE FORWARDED TODAY.

Product is High Grade—No More Low Grade Ores Are to be Moved To Market.

From Manager James Chipman it was learned today that six carloads of lead ores from the Uncle Sam mine, of Tintic, are ready to leave for the valley smelters and will be forwarded sometime during the day.

The product is all of high grade, and when settlements are made it is expected that the certificates will show values close to 50 per cent lead.

None but the higher grade ores are being mined at the Uncle Sam at the present time and it is expected that no other kind will be, until concessions of some kind can be had from the smelting and transportation companies, or some method of treatment on the ground is found which will insure their movement more profitable.

Other mines of the Tintic district show a disposition to persue the same course; the contention being, as has been frequently stated in the past few weeks, that the producers cannot move their low rade ores profitably under the ban of the $15 limit allowed them by the railroads under the $1.50 rate on this class of ores. Mr. Chipman declares that he has tried his best to make it pay to move the low grade ores under the present restrictions; but he finds that the expense of sorting, and the possibility of piling in ores which would run the average to a little more than $15, in which event $1 per ton more is added to the freight bill, makes the proposition too uncertain. If the tariffs were modified in a manner that the producers could break the ore down in their mines just as it comes, the condition would be, in his opinion, eminently more satisfactory.

Mr. Chipman believes that if the $15 limit applied to the net price received for the ores would be quite satisfactory, or even to extend it to $20 gross, the situation would be materially improved.

These are all matters to be worked out later and it was this difficulty complained of by the Tintic producers which formed the neucleus for the formation of the proposed state association.

WINTER IN BEAVER.

Arrivals Report the Weather as Having Been Unusually Severe.

Reports received from the Beaver county copperbelt is to the effect that the winter has been unusually severe this year. Naturally the operations at some of the smaller properties have been more or less interrupted, but at the Majestic and other larger mines development has been pushed forward with commendable zeal.

GONE TO MANILA.

Fred L. Schroeder Accepts Position Under Maj. F. A. Grant.

Mr. Fred L. Shroeder, who has filled the position of bookkeeper for the brokerage firm of Hudsons & Sons Co., departed last evening for Manila, P. I., where he goes to accept a more lucrative position under Major F. A. Grant, now in charge of the quartermaster's department of the United States army. Mr. Schroeder is a young man of excellent reputation and enjoys a large circle of friends in Salt Lake, who, along with the members of the firm which he has just left, deeply regret to lose him from their midst, but rejoice in knowing that he has taken advantage of the opportunity to better his condition.

Mr. Shroeder served under Major Grant in the Philippines when the Utah batteries were stationed there during the late insurrection.

CONCESSIONS TO EMPLOYES.

Better Hours and Wages by American Smelting and Refining Co.

Chicago, March 6.—The American Smelting and Refining company has made important concessions to its 350 employes at the Chicago plant. Engineers are to receive the same wages for an eight hour day they had been paid for twelve hours; firemen will receive 10 cents more for the shorter day; and other employes are similarly affected.

GOING TO HANNAPAH.

A. J. Bettles Will Leave on Inspection Trip Shortly.

Persuant to the request of Supt. F. B. Work, of the Hannapah mines, A. J. Bettles, who is at the head of the metallurgical department of the Newhouse mines and who also has a big slice of his own in the Hannapah, will leave for the west in a few days for the purpose of making an inspection of that proposition.

When Mr. Bettles last visited the property, the principal workings were represented by a hole in the ground 30 feet deep; since that time the shaft has been continued to the 150 level and in a drift run off from that point is where the recent six-foot strike of $100 ore was made. Mr. Bettles will probably recommend the sorting and shipment of the higher grade ores. The samples received at the local offices have been greatly admired by those who have called to see them; the character of the ores is considerably different than that of the Mizpah ledge.

Joseph Comes Back.

Harry Joseph returned to the city last night. He states that he started for the Galena mine at Fish Springs, but after getting out about 40 miles he was compelled to turn homeward on account of the severe storms.

Johnny Mine Expansion.

The Johnny Mining company, operating at Stateline, has purchased two claims from Lon Bast. The property lies adjoining the territory of the Johnny.

WOOL.

ST. LOUIS.

St. Louis, March. 6.—Wool, dull, unchanged; territory and western medium, 16@18; fine, 13@16½; coarse, 13@15.

INCORPORATED IN NEW JERSEY

Utah Consolidated Now an American Corporation.

CAPITALIZED FOR $1,500,000.

Divided Into 300,000 Shares—New Company Absorbs Property of English Concern.

The Utah Consolidated Mines company was incorporated in New Jersey yesterday. This is the American company which absorbs the old English company. The headquarters of the concern will be on his side of the Atlantic hereafter and in the future the English cousins across the way cannot exact the heavy tax which they have been accustomed to collecting in the past.

The new corporation is capitalized for $1,500,000, 300,000 shares, of a par value of $5 per share. The stock of the old company has been active on the Boston market for some time and it is quite generally conceded that the Standard Oil crowd has been on the buying side; H. H. Rogers was a heavy purchaser of the stock at $24.

A Boston publication said recently:

The Standard Oil people originally purchased control of this property from the Clark-Ward-Armtrong-Newhouse interests at an average of $34.50 per share, taking 150,000 shares of the stock in three blocks, 50,000 at $24, 50,000 at $29 and 50,000 at $40. The stock under the 17cent copper boom was advanced to $54 and the Standard Oil interests sold the larger part of their 150,000 shares at an average profit of better than $10 per share. Since that time they have controlled the management through their selling agency contract and right of suffrage from the stockholders, but Utah has developed into such a valuable property that the Standard Oil interests have again secured control. They secured a considerable portion of the London stock around $20 per share and kept the price in this market down until they had accumulated more.

The Lewisohns are heavy shareholders in the Bingham mine.

UNITED STATES STATEMENT.

Circular Issued by Voting Trust Shows A Good Exhibit.

An official statement from the voting trustees of the United States Mining company was received in this city late yesterday afternoon from the company's offices in Boston. The statement bears the date of Feb. 28, the day on which the trust expired by limitation. Attached are singnatures of R. D. Evans and S. W. Winslow.

The financial exhibit shows that the present indebtedness of the company, exclusive of the bonds of $300,000 which are redeemable in stock, does not exceed $300,000. At the present time the company's receipts, it is claimed, exceeds $125,000 per month net, so it is only a matter of a short time until the debt will be raised.

The text of the statement issued is as follows:

"We believe that almost every possible labor-saving device known at the present time has been placed in your smelter, the chief object in view being the economical handling of a large amount of ore with as little manual labor as possible. The best machinery has been purchased from the Allis-Chalmers company; the company has built its own railroad tracks to connect the smelter with the tracks of both the Rio Grande and Oregon Short Line railroads; steel cars have been bought to avoid the danger of any failure of ore supply by reason of shortage of railroad equipment, and in general the attempt has been made to provide a first class plant in every detail."

Regarding the operations of the big plant up to date, the report adds:

"Prior to Jan. 1, 1903, only four carloads were shipped east from the smelter, containing 244,680 pounds of bullion ready for refining, worth, according to the assays, 29.3 cents per pound. Since Jan. 1 21 carloads, containing 1,276,440 pounds of bullion, and worth, according to the assays, 29.7 cents per pound, have been shipped east. These values are based upon silver at 47 cents per ounce and copper at 11½ cents per pound. Your trustees are advised and believe that there is no reasonable doubt that your properties will earn during the year 1903 $1,500,000 net. The costs of mining and smelting are both being gradually reduced and when the smelter is running at its full capacity, the costs ought to be still further reduced. Even with the necessarily large costs naturally incident to the opening up of a new plant, we have been already able to make a payment of $125,000 upon the liabilities of the company.

"A contract has been made for the refining of all the product of the smelter, and all the bullion has been sold for a term of three years, the price per ounce of silver and per pound of copper or lead to depend upon the market price from day to day."

The annual meeting of the shareholders of the corporation will be held in April, at which time a still more gratifying condition may be reported.

MINING CONCENTRATES.

A. J. Bettles is inspecting the Cyclone mine at Stockton today.

Six cars of Gemini ores ore at the valley samplers today.

Manager M. J. True, of the Blackbird mines, is in the camps.

The Tonopah producers reported with four cars of ore in the local market today.

Walter C. Orem, of the York mine of Bingham, is visiting that property today.

Supt. C. E. Allen of the Centennial-Eureka, went out to Tintic this morning.

The dividend declared yesterday by the Daly-West company is payable on March 16.

M. M. Johnson went out to Bingham today to look over conditions at the Boston Con.

The Bingham-Centennial Mining company has established offices in the Commercial block.

W. H. Cunningham, formerly with the De Lamar mines, came in from San Francisco today.

J. J. Burke departed for Stateline last night to see that things are running all right at the Johnny mill.

J. A. Czizek, manager of the Lost Packer mine on Loon creek, Ida., departed for camp last night.

The Taylor & Brunton sampler reported the receipt of 13 cars of ore today, four from Nevada and nine from Tintic.

Willard F. Snyder will depart for New York and Boston tomorrow. He will attend the Bingham Con. meeting in the Hub city.

G. A. Land, one of the principal shareholders of the New York-Tonopah mine, reached the city yesterday from an extended trip east.

Of the Montana-Tonopah, the Bonanza says: "Crosscut has been started from the 512-foot level. Exciting developments are expected."

The new shaft for the gasoline engine, which was ordered to replace the one broken, has reached the Utah mine at Fish Springs and has been installed.

W. L. Goodsell has returned from the Goodsell mine in American Fork canyon, of which he is the manager. He found conditions decidedly favorable there.

The management of the Yankee Con. of Tintic has decided to equip that property with a six-drill air compressor plant. The machinery was ordered yesterday.

Judge Riner of Wyoming will relieve Judge Marshall in the Federal court in the trial of the Kempton-United States conflict, which is scheduled to come up later in the month.

The ore and bullion settlements reported at the close of business hours yesterday afternoon were as follows: Base bullion, $42,500; gold bullion, $2,100; gold, silver, copper and lead ores, $38,800.

The newly elected directors of the Daly-West Mining company met at 4 o'clock yesterday afternoon and organized by electing J. E. Bamberger president and general manager; J. D. Wood, vice president; W. S. McCornick, treasurer; Josiah Barnett, secretary, and A. W. Mountenay, assistant secretary.

STOCK PRICES WERE BETTER

Higher Quotations for Americans In London Helped.

ADVANCE OVER YESTERDAY

ade jby Those That Led Decline—Speculation Sentiment Favored Long Account.

New York, March 6.—Opening prices for stocks showed that support was accorded the market as was foreshadowed by the higher prices for Americans in London before the opening hour. The severest sufferers in yesterday's decline led the advance. Canadian Pacific rose ⅞. Southern Pacific ⅝ and Union Pacific on large takings. Manhattan also rose nearly a point. The most prominent stock to show a decline was U. S. Steel, preferred, which was shaded a small fraction.

Speculative sentiment favored the long account when it was seen that active buying was going on in all prominent stocks. Room shorts helped along the rise by covering largely in the transcontinental stocks. A number of yesterday's weak features made advances of a point or over, including St. Paul, Union Pacific, Canadian Pacific, Atchison, Missouri Pacific, New York Central, Rock Island, Sugar and the local tractions. Realizing sales depressed the list before 11 o'clock. Sugar reacted a point.

There were some further advances in prices, Northwestern rising 3, Canadian Pacific 2, and Amalgamated, Tennessee, Smelting and a few specialties a point. Heavy selling of Southern Pacific then developed and the gains were about wiped out all around. The market became dull at about last night's level. Some minor stocks showed losses running to a point. General Eectric and Hocking Valley pfd., lost 2, Colorado Southern second pfd., 3, and New York Chicago and St. Louis second pfd, 4¾.

Bear traders hammered the market on the maintenance of the stiff money rate and the prospect of a favorable bank statement. Unimportant market leaders were singled out for attack, especially St. Paul, Sugar and New York Central. The entire list fell below yesterday's close but in most cases the net loss was trifling. Delaware & Hudson declined 3, New Jersey Central, Colorado Fuel 2, and New York Central, the St. Louis & San Francisco stocks and Sugar 1. Pittsburg, C. C. S. & St. Louis dropped 3½, Cleveland, Lorain & Wheeling 1½ and the preferred 6¾. There was some improvement in the market's tone at 1 o'clock, Amalgamated rising to the best and New York Central recovering fully, but the demand otherwise was light.

Buying order became more abundant late in the day, the inability of the bears to put the list much below last night producing a better demand for both accounts. Recoveries from the lowest ran to about a point in Sugar, Delaware & Hudson, Southern Pacific, St. Paul, Missouri Pacific and Tennessee Coal, Amalgamated, New York Central, Rock Island and Atchison touched the best, reflecting a net rise of a point.

SUGAR.

Sugar—Raw, strong; fair refining 3-5-16; centrifugal 96 test 3⅝; molasses sugar 3 7-16; refined, firm; crushed 5.40; powdered 4.90; granulated 4.80.

Burlington Route
In the Heart Of Chicago.
The Uunion Passenger Station in Chicago, into which all Burlington Route trains run, is located in the very heart of the city.
The principal hotels—the largest stores—the best theaters—the biggest establishments—are only a few blocks distant.
To reach them it isn't even necessary to take a street car.
To reach Chicago it IS necessary to take the Burlington Route—that is, if you want the best there is.
Chicago trains leave Denver at 4.15 p. m. and 10 p. m. St. Louis trains at 2.30 p. m. and 10 p. m.
R. F. NESLEN, Gen. Agent,
79 W. Second South Street,
Salt Lake City.
P. S.—Thro' sleepers for Chicago leaves Salt Lake City 3:15 p. m.
