TEXAS APPEALS FOR AID.

Hope that Every City in the Union Will Respond.

Floods Affect 100,000 People—Twenty Populous Towns Inundated—Loss in $25,000,000 to $10,000,000.

Washington, July 12.—Representative M. H. Hainey of Texas, who is now in Washington, today made public the following statement with reference to the flood situation in that state: "The disaster which has overtaken the commonwealth in southern Texas is without parallel in our country. At some points the precipitation was three and one-half feet in eight hours, resulting in a flood of enormous proportions covering an area of many square miles to a depth of from five to twenty feet and a loss of from $25,000,000 to $50,000,000.

"No one then dreamt possible could have so devastated, as well as demoralized and wellnigh ruined, which today are in a complete state of destitution. Practically every work animal and every milk cow, together with all stock cattle and every variety of vegetable, has been swept away, leaving the country absolutely denuded.

"Within the influence of this awful disaster reside over 100,000 people, almost half of whom are in a state of destitution today, except as they may be provided for by those who are generous and able to assist them. Texas is alone in the effort to save life, and it cannot relieve the suffering. It is not only herself, but the State alone which has been instrumental in saving those people who come to it for relief.

"When the great Johnstown flood occurred, Pennsylvania could have easily taken care of their own if given time, but at time, as it is now, was the essential factor. One more, should be equal to a generous public everywhere, and from everywhere the relief was immediate, and in a most commendable manner.

"To the public the East district of Texas appeals today to supply the necessities of life until the harvest of the food shall have passed and the people shall be in a position to again address themselves to the task of reestablishing their homes.

"For this purpose I to urge throughout the land the different commercial bodies and municipal authorities of every city of the Union that the appeal be answered.

"For the distribution of this relief, a system is being organized throughout the flooded district, immediately under the direction of the governor of Texas, to whom all contributions should be addressed, at Austin, Tex., and under whose care every dollar will be faithfully and efficiently expended."

Grape Nuts
THE FAMOUS FOOD.
USE PRESERVES THE TEETH.

The finest specimens of teeth are seen in animals and human beings who chew the food thoroughly.

Dentists agree that teeth must be used to properly preserve them and therefore they urge people to chew their food thoroughly, but the perverted taste of modern civilization has brought about a disinclination to chew, among Americans and which fed on soft mushes and which fed on soft mushes and which fed on soft mushes and are taught to swallow the food without chewing.

Dyspepsia and bad teeth are the result if this practice is continued. The use of Grape-Nuts food is without detriment if the necessity of chewing is remembered. Grape-Nuts are crispy, crunchy, nutty and when one chews it is the taste that the user has not forgot to chew and thus the teeth and the necessary use and thus the glands of the mouth are made to give the juices that Nature intends shall be mixed with the food before it enters the stomach.

There are not the only reasons why those who eat Grape-Nuts look and feel and will feel.
