CYCLISTS' ASSOCIATION.

The American Racing Cyclists' Association to Oppose the L. A. W.

MR. EDDIE C. BALD AS CHAIRMAN.

Gardner and Other Pedalists Say They are Out of the L. A. W. for Good.

Trenton, N. J., Sept. 26.—The American Racing Cyclist association was formed today as an opposition racing association to the League of American Wheelmen. At a meeting held in which a number of star racers took part, Eddie C. Bald was made chairman and F. Ed. Spooner secretary. An executive committee consisting of Spooner, Bald, Hardcastle and Arthur Gardner was organized, and a delegate meeting will be held in Philadelphia, Wednesday evening next, when further steps will be taken to perfect the organization of the association. A proposition to exclude amateur riders was voted down.

An agreement was prepared for circulation among the cyclists before the races of today at the Interstate fair, and a notice was adopted that those who did not sign the agreement before the spring board could only become members of the Union through formal application. Those who were at the meeting and who signed the agreement were: Eddie Bald, Arthur Gardner, Tom Cooper, Jay Eaton, Gerald Stevens, H. F. Temple, J. H. Anderson, W. S. Becker, R. B. Stevens, John Zimmerman, H. T. Harrow, W. J. Wignore, James F. Lodge, John Hall, H. A. Miller, F. P. Thompson and Ed Hunt. These men appointed themselves a committee at large to circulate among the remainder of the 41 professionals entered for today's races and appeal to them to sign the agreement.

Officers of the L. A. W. are here. They say that the order of suspension against Bald and others will be lifted upon payment of $10 each. They are confident that some settlement will be reached before the races start today. Gardner and others say they are out of the L. A. W. for good and that the new association will be permanent.

The Interstate Fair association, this afternoon paid off the fines of the racing men suspended by the L. A. W., and the races will now go on under American L. A. W. auspices. The breach between the L. A. W. and the men will therefore be a matter for future adjustment.

Our Disabled Soldiers.

Milwaukee, Wis., Sept. 26.—Soldiers of the Spanish-American war who are disabled that they cannot care for themselves will be admitted to the National Soldiers' Home. Senator John L. Mitchell says that while the law provides that the national homes are for disabled soldiers of the civil war, a new section is given the board of managers of the homes in a clause which permits such other soldiers to be cared for as in the judgment of the managers is deemed right.

THE WEEKLY CROP BULLETIN.

Report of Climate and Crop Service, Weather Bureau.

Weather in Utah the Past Week, and Reports from the State of the Condition of Crops.

U. S. Department of Agriculture, Climate and Crop Bulletin of the Weather Bureau, Utah Section, for the week ending Monday, September 26, 1898:

Salt Lake City, Utah,
Sept. 27, 1898.

During the past week, the mean temperature for the State was 65 degrees. Compared with the average there was a daily excess of 2 degrees. The weather has been exceptionally warm during the day, being sufficiently uncomfortable to cause pedestrians to seek the shade. At night the weather has remained cool and comfortable, at times chilly, though no frost occurred. No precipitation has occurred in the State since the 21st of August, which, according to reports of crop conditions, is without parallel since the State was settled. Frosts in High, variable winds occurred almost daily.

Though the weather has been exceptionally dry, it has been a disadvantage only to fall ploughing and seeding of the fall grain crops. It has been especially favorable to the threshers, enabling them to make such progress that at this date only a small portion of the grain crop remains unthreshed. The fields have realized expectations, and there is only a small portion of inferior quality resulting from the drought. All the grain unscathed is safely stacked. Farmers have been active in securing the corn crop, which will be below the average. Potatoes are ripe and ready to be dug; they will also be a short crop, most of the growth having gone into the vines, to the detriment of further developing or consequently the produce are small. The entire hay crop has been secured in good condition. Alfalfa that has been threshed yielded unusually well, having developed fairly a season of drought, a much smaller yield would have been surprising.

Some men digging much good progress and in some sections the work is being completed. At Kaysville the beet crop will be harvested during the succeeding week. All farm work is nearing completion. The crops to be secured are those that are the least subject to the instrumentation of the weather.

EXTRACTS FROM REPORTS OF CROP CORRESPONDENTS.

Brigham City—The weather has been warm during the day and cool at night. Threshing is nearly complete and corn is nearly gathered; a large part of the work of fall plowing and seeding is done and the seeding done of the rich harvest of the year will soon be commenced.

Mount Creek—The weather has been very warm in the daytime, and chilly at night, owing to drought the range feed is parched and dry; water is scarce; cattle are poor, cattle are in fair condition.

Hooper—The weather continues good for farm work, but very dry; threshing is nearly done; fall plowing is being done.

Fairview—Drought continues, but a storm seems to be gathering; threshing is being forced; only broken vegetation has been killed by the frost; the yield of all crops average very general satisfaction. It is found that there is very little grain that is shrunk.

Hooper—It has been windy and dry, so rain has occurred for over than a month; water is becoming very scarce but there is no particular reason for complaint since there are no crops that require irrigation.

Fillmore—The weather has proved quite warm (cold and) it is very dry, too dry for growing; only a few late crops are thought this week done by the frost.

Nephi—Threshing is progressing during this week under favorable weather and the yields are very good.

Paragonah—It is still hot and dry; all the grain has been threshed and the yields are not as good as were expected, the crops are average; the potato crop will be good; the peaches have been unexpected; some rotting; the fall fruit is in good demand.

Kingston—Cool and pleasant weather has prevailed; the grain is all threshed; wheat threshing is going on with satisfactory results as to yield, to mention, a growth of wild oats in the wheat lessened the yield; potatoes are fairly above the average.

Mill Creek—The weather remains the same as it was last week, warm and dry; all crops have been gathered; except potatoes and a portion of the third cutting of hay.

Taylorsville—Rapid progress is being made in gathering all farm crops; the last cutting of lucern is nearly stacked; most all the corn has been hauled; beets are being dug and received at the factory daily.

Centerville—A fine week for all kinds of outdoor work; threshing continues.

Lake Shore—Cool nights and warm days have been the character of the weather for the past week; lucern is being threshed for the seed and the yield is very good; corn and the third crop of lucern are being hauled; potatoes are better; most of the sugar beets in this section have been dug.

Lehi—There were warm and dry breezes last week, threshing is nearly done; sugar beet digging is making good progress; most all crops are gathered except potatoes.

Nayadle—The past week was very dry; the last crop is ripe and it will be harvested next week; alfalfa is being threshed for seed and it is yielding above the average.

Kingston Fork—The weather has been warm in the day time and cool at night; threshing is nearly done; fall apples are ripe and winter apples are ripening rapidly; most of the corn is secure; it is the driest season we have had for many years.

Payson—Warm and pleasant weather with a few showers and cool night were the characteristics last week; the roads are dry and dusty; farmers have nearly completed the work of the season and are ready for winter; potatoes and sugar beets are ready to be dug; corn is cut and heated; some fall plowing is being done; thirty-three cars of sheep have been shipped from Colbrook to the Utah Sugar company, being the young lords with heavy fleeces.

New Harmony—We have had pleasant weather; without rain to damage hay or fruit; the fruit is not an average crop; corn and potatoes are above the average.

Parowan—Threshing has been finished and the yield is thought to be under the average in some fields; potato tops have been killed by the ground; so far the present season is the most drought ever in the country was settled.

Uintah—The dryness continues; the grass and beans land is getting scarce; threshing is nearly done; the third crop of lucern has been secured in good condition.

J. H. SMITH,
Section Director.
Salt Lake City, Utah.

Autobiographical.

(Prof. Huxley.)

"The last thing that it would be proper for me to do would be to speak of the work of my life or to say at the end of the day whether I have earned my wages or not. Men are said to be partial judges of themselves—young men may be, I think, but old men are. Life seems terribly foreshortened as they look back; and the mountain they set themselves to climb in youth turns out to be a mere spur of inconsiderable higher range, when, with failing breath, they reach the top. But I may say of myself that, if I have had more or less difficulty in view some I learn the secret of my failure, they are largely those. The perpetual increase of natural knowledge and to forward the application of scientific methods of investigation to all the problems of life to the best of my ability, in the conviction—which has grown with my growth and strengthened with my strength—that there is no alternative for the sufferings of mankind except veracity of thought and action and the resolute facing of the world as it is, when the element of make-believe, by which poor hands have hidden its ugliness, is stripped off.

It is with this intent that I have administered any reasonable or unreasonable authority for scientific form which I may have permitted myself to entertain to other ends; to the population of men, to the direction of men and organization. At scientific societies, in the so-like series of lectures and addresses over evolution, did in initiating operations of that secular agent, the circulation, which in England, as everywhere else, and to whatever denominations it may belong, is the deadly enemy of science."

Editor of "The Forum."

"Dr. Miles' Heart Cure is certainly worthy all the praise given it. For 2 years I suffered from heart trouble and my condition was precarious. I was advised to try this valuable remedy, and I am happy to say it restored my health.
G. W. Friend, Tabor, Iowa."

DR. MILES' Heart Cure

is sold by all druggists on guarantee first bottle benefits or money back. Book on heart and nerves sent free. Dr. Miles Medical Company, Elkhart, Ind.

THE PIONEER MONUMENT.

Sunday Subscriptions.

Contributions in aid of the movement to memory of Brigham Young and the pioneers, should be sent by those charged with the duty of collection as frequently as possible to Elmer M. Wells, Salt Lake city, who will see that same are properly acknowledged.

ACKNOWLEDGMENTS.

The Brigham Young Memorial association acknowledges receipt of the following contributions to assist in the building of the Pioneer monument:

From West Layton ward, of David Stake, per Bishop David E. Layton	$ 5.00
From Monticello, Emery Stake, per N. Rasmussen	1.00
From Fruit ward, Sevier Stake, per Bishop Jensen	15
