The Land Office

The secretary of the interior has written the Salt Lake City land office relaying the application of Charles H. Moore for a homestead entry of 160 acres in section 13, township 1 north, range 1 west. The lands were patented by Grover Cleveland to Charles Hagaye, January 25, 1893. The patents were secured with Chippewa scrip. The commissioner holds that the land are patented and not open for entry as public lands. They are located near the Hot Springs.

The secretary of the interior has likewise notified the department that the in-lieu sections in the case of Jedediah Fraser vs Wm. A. Haw has been vacated and a new hearing will be given Haw. The case involved the sores in section 24, township 15 north, range 3 west.

William W. Miller, of Plymouth, Box Elder county, has filed an affidavit of contest in the land land office against the timber culture entry of Lyman H. Miller, for 160 acres in section 33, township 11 north, range 3 west.

Alice C. Thomas, of Farmington, Davis county, has filed an application in the land office for a homestead entry of 160 acres in section 27, township 2 north, range 3 west.

Moses Barnes, of Ferron, Emery county, filed an application for a homestead entry of 80 acres in section 24, township 19 south, range 7 east.

William H. Simmons, of Molen, Emery county, filed an application for a homestead entry of 160 acres in section 13, township 21 south of range 7 east.

Hans Danielson, of Dover, Sanpete county, filed an application for a homestead entry of 160 acres, in section 23, township 19 south of range 1 west.

Henry Leigh, of Cedar City, Iron county, filed an application for a desert entry of 160 acres in section 7 and 18, township 36 south of range 12 west.

Sarah L. Reynolds, of Castle Dale, filed an application for a desert entry of 320 acres in section 6, township 19 south of range 6 east.

James C. Reynolds, of Castle Dale, filed an application for a desert entry of 160 acres in section 6, township 19 south of range 6 east.

Jacob Kofford, of Pine, Cattaraugus county, filed proof for his homestead entry of 160 acres in sections 18 and 19, township 14 south of range 13 east.

Patents have been received at the land office from Washington as follows:

M. E. No. 1,305, to Charles H. Blanchard and Thomas W. Jennings for the West Mammoth lode claim, covering lot No. 839, in the Tintic mining district, Juab county. The claim covers an area of 5.32 acres of ground.

M. E. No. 1,306, to the Niagara Mining & Smelting company for the Niagara and Palos lode mining claims, situated in West Mountain mining district, Salt Lake county. The two claims contain an area of nearly 20 acres.

Percy Hagerman, of Colorado Springs, Colo., has filed an application in the land office for a mineral patent for the B. H., Surprise and Maggie lode mining claims. The claims are designated as United States mineral survey, No. 2,971, and are situated in Camp Floyd mining district, Tooele county. The claims contain an area of 37.15 acres. A small portion of one of the claims is in conflict with the Noonday lode survey No. 2,949.

Percy Hagerman has filed an application in the land office for a mineral patent for the Pinkerton lode mining claim, designated as mineral survey No. 2,972, in Camp Floyd mining district, Tooele county. The claim contains an area of less than an acre.

Chemistry Class.

At last evening's session of the Church University class Dr. Talmage proceeded with the metals, silver, mercury and aluminum, stating that less details would be taken up in evening lectures and more left for day class study.

Mercury is the only liquid metal known and it and bromine are the two elements that are naturally liquid. Mercury usually occurs as cinnabar, and Spain formerly contained most of the world's supply, though California now furnishes most of the mercury. The artificial compound of mercury is vermilion, which is chemical combination in the same as cinnabar. This mercury is obtained from the ores by combining by many processes, the most modern being the Idria process. Mercury is much used for making barometers and thermometers as its high specific gravity makes it possible to have less bulky instruments than with lighter liquids. It is also much used in forming amalgams, thus silver or gold dissolved in mercury is silver or gold amalgam.

The compounds mercuric calomel (vermilion) and mercuric chloride (corrosive sublimate) are known and are the terms as a purgative the latter in medicine. It has two chlorides, the lower chloride, is the calomel of pharmacy. Various mercuric compounds have bright colors in many cases. The name was given from old because it was used to keep lead or tin from sticking to the pots in which it was sent to Peoriaville the galena mercury.

Silver, man's highly valued metal, is now commonly more common and cheaper. Its ores occur in many forms the more common being the silver chloride or horn silver. Silver is usually found in lead ores, and is taken out by concentrating. In smelting silver from the ores the Mexican assayer, Joseph Warden, is an interesting process of obtaining a button from a button. When the mercury is driven off by heat. As the use of silver for coining, it is alloyed with copper to make it hard. In Latin United States silver has not coined since 1873 and England never had it. Silver per cent copper in the case metals. Silver coins, as the dimes, quarters and dollar are affected by light, and upon this depends the art of photography. Silver is used for plating, in electroplating ornaments, and occasionally making coin vessels.

A question in "The metal of the present" and is very large, as it has to range over almost the whole field. We will be at least. Aluminum being so shiny is used in place of silver, tin, copper, nickel, bronze, bronze and gold. Tom metal is used in all ways and has only lately become the common base metal.

The discussion of the metals was lively, especially because of the interesting meeting being at the evening time.

Alabama and Florida.

Today the NEWS received a call from Miss Jennie H. Alder, of Corinne, and Rosie C. Lorenzo, of Cheno Bluff, Idaho. They left Salt Lake City last evening for Pensacola, Apalachicola, Bluff Junction and Alabama one place. In that Alder's Rose was born in South Alabama, though a portion of it time was spent in Florida. Mr. Lorenzo accompanied their home to the people, and only on the return journey was written Miss Jennie's acquaintance, and has in high wonder the few minutes around that received him out of the town in Fort Lowd, Montgomery county, Alabama. After which engage at the hospitality of the people, and the town was near Lowdend. The interested in Pensacola, Sale relating to one of the finest resorts in the United States. He remembered very well in his memory was, and is thankful for his experience he was gained in preaching the Gospel. Both Miss Jennie and her mother starting their new home.

Street Work Commences.

A force of men began breaking ground this morning for the commencing of the street in a mile and a half long Eighth South street, and the work is to be pushed with all the speed possible to other that the grading may be completed as soon as the broken rock is to be used in macadamizing. Operations were begun yesterday in the quarries in Parley's canyon, and the rock will be supplied according to agreement. Another improvement, that will be appreciated by the county people, is the construction of a stone and brick culvert across Big Cottonwood creek on State street. The work will also be placed in proper condition or macadamizing street experiments about to be made have proved successful.

For Adultery.

Another continuance was yesterday taken in the case of the United States vs John Hogan and Josephine Bowen, wherein the charge is adultery. The matter will now be investigated by Commissioner Norfolk on Wednesday morning at 9 o'clock. The women is in the penitentiary while Hogan is out on bonds.

Miss E. Irene Morris
Brooklyn, Conn.

Fought for Life

Long Siege of Dangerous Illness

Left in Low Condition—Gives Health and Strength by Hood's Sarsaparilla.

"Gentlemen—I have been suffering a terrible siege of illness, and was so prostrated I could do no work. I was very weak and nervous, and was in a low condition. I had no appetite, and my friends advised me to take Hood's Sarsaparilla. This I did, and it has done me a world of good. I am now able to do my work and I feel considerably stronger than I did before I took Hood's Sarsaparilla. I do not hesitate to recommend it to my friends." J. E. Morris, Cashier.

Consumption.

I was sick a terrible cough and have all symptoms of consumption. I continued to get worse and had no medicine to do me any good. Seeing Hood's Sarsaparilla advertised I thought I would try it. I gave the strength and benefit to my system, and I feel better than I was two months ago." Mrs. Ella Gaskill, Ashland, Ky.

A Change for the Better

Did they were glad to have the medicine. The second bottle did not so much good as the first one, it gave me strength and brought me back to health. I am now able to do my work and I feel better than I was two months ago." Mrs. Ella Gaskill, Ashland, Ky.

Hood's Sarsaparilla Cures

Hood's Pills are mild and efficient, all men in action. Sold by all druggists. 25c.
