MINING, BUSINESS AND STOCKS.

TECOPA COMPANY IS PLANNING SMELTER

Southern Utah Ores to be Treated at New Plant—Will Care for Six Hundred Tons a Day.

The Tecopa Mining company of Nevada is arranging for the early construction of a four-furnace lead-silver smelter with a capacity of 600 tons a day to treat its own and custom ores, and unless the unforeseen intercedes, construction work will be commenced within a few weeks. The big plant will be one of the largest smelters in the entire southwest part of the state, and will be located at Tecopa. A 15-mile railway will be built from the plant to connect with the Gunsight and Noonday mines. Large bodies of ore have been developed at depth in the Tecopa mines, the recent uncovering of the Gunsight vein proving the persistent nature of the bodies of silver-lead ores.

With the erection of the smelter the company will be in a position to handle all the ore produced, while a large quantity of the silicious ores of Goldfield, Pioneer and other Nevada districts will also be treated. The fluxing Nevada ores will prove exceptionally valuable to treat in conjunction with the sulphide lead-silver Tecopa ore and will divert much of the Goldfield smelting to this point.

The Tecopa people were negotiating for the control of the Needles smelter, as announced several weeks ago, but owing to the refusal of the railroad to grant satisfactory freight rates the enterprise fell through. This led the Tecopa people to undertake the construction of their own plant.

STOCKS SHOW IMPROVEMENT.

Salt Lake Exchange Develops Better Market—Prices Remain About Same.

Conditions on the Salt Lake exchange this morning showed considerable improvement over yesterday and the volume of business was far in excess of the previous day. The public was in the market today with considerable money and the trading was not altogether professional.

All stocks on the board at the present time are remarkably low, unboubtedly due to conditions in the east. Persons who have been in the east for several months declare that interest in mining is just being revived and that with the lack of money in the west, mining stock markets are naturally slow. Utah, with its varied mining districts, is apparently better off than many of the states.

Columbus Consolidated showed considerable improvement today. The bearish movement was undoubtedly due to the story that was circulated that the end of the high grade at the property was in sight. This has been proved to be positively untrue and that shipping, if anything, is now heavier than ever.

Bullock was hit the hardest of any stock today and sold at 3¼ cents and 3 cents. Iron Blossom was again a heavy seller.

The number of shares of stock sold today was 62,730, while the amount represented was $48,874.97.

On the curb market there was considerable activity and a large array of stocks was out. Mammoth changed hands at $1.70, while old American sold for 15 cents.

TRACTION ENGINES FOR PIOCHE CAMP

Machinery Will be Used to Haul Ore Out of Famous Lead-Silver District —May Form Consolidation.

Traction engines for the hauling of the increasing supply of ore from the Ploche camp is the latest. The coming producers of that camp have for some time been unable to get teams and especially on the Prince Consolidated side of the camp. The lack of animals with which to handle the loads has held things back for some time and now it is understood that a number of the mining companies are figuring on putting in traction engines for the care of their products.

It is known that the Prince Consolidated contemplates putting on a traction engine with a train of ore wagons at an early date. Several other mine owners, who wish to ship at once are also getting estimates on hauling machinery.

At the present time the camp is shipping out 25 cars of rich ore each week. Within the next three months this amount will be more than doubled. For this reason it has been found necessary to get some means of handling the situation without giving long contracts to teamsters for the hauling of ore.

The Prince Consolidated now has another car of rich ore on the road to the United States smelter. It is declared that it is richer than anything that has yet come from the Prince property.

There is a possibility, although faint, that the interests in contol of the Ohio-Kentucky and the Nevada-Utah properties will get together. Both are at present in the Ploche camp, although no arrangement was made for the meeting.

On the same train that left for Ploche Tuesday night were George A. Learned, president of the Nevada-Utah, and C. H. Bergen, treasurer of the same company, Col. James L. Hackett, one of the stockholders and a director and A. H. Godbe, president and general manager of the Prince Consolidated.

Although negotiation for a consolidation of the properties in Ploche were broken off several weeks ago, it is possible that the parties may again get together. If it should prove true, it will mean one of the biggest deals made in Ploche in a long time and will do more towards making this camp than anything that has happened in years.

MADE MUCH THROUGH DEAL.

The 60,000 shares of the United States Smelting, Refining & Mining Co., recently bought by a local syndicate have all been sold to investors says the Boston Financial News. These shares were to be disposed of in blocks of from 2,500 to 5,000 and it is likely that both the syndicate and the investors have made a profit on the deal as both the preferred and common shares have been very strong in the past few weeks.

At the recent annual meeting the following directors were re-elected for four years: William Barbour, N. W. Rice, Frederick Ayer, Edward B. Bayley and D. A. Ritchie.

The prospects for the current year are considered particularly bright owing to the advancing prices of lead and silver of which metals the company is a large producer. It is estimater that if net earnings were maintained only at the rate of the last six months of the fiscal year ending December 31, 1908, profits would be equivalent to 11 per cent or $5.50 a share on the common stock and with the better metal market may run up to $6 or $7 per share.

ANACONDA COPPER STOCKHOLDERS' MEETING

Butte, Mont., May 27.—The annual meeting of the stockholders of the Anaconda Copper Mining company was held at Anaconda, Mont., at 11 o'clock today. Beyond the reading of the annual report of President John D. Ryan and the election of directors, no business was transacted. The following were the directors: John D. Ryan, F. P. Addicks, H. H. Rogers, Jr., William Rockefeller, George H. Church, U. H. Broughton and Percy J. McIntosh. The latter succeeds E. C. Bogart, H. H. Rogers, Jr., succeeds J. E. Judson and F. P. Addicks succeeds the late H. H. Rogers. The statistics were carried by the Associated Press a week ago.

DALY WEST QUARTERLY REPORT

Statement Shows Ore Reserves Have Been Heavily Drawn On.

Stockholders of the Daly West Mining company have been receiving the first quarterly statement of the company for the year 1909. The report bears date of May 14, and asserts that there was on hand on Jan. 1, 1909, $311,484.79 in cash. During January, February and March this year the receipts were: Sales of crude ore, 4,395 tons, $81,990.30; sales of concentrates, 1,571 tons, $50,568.02; miscellaneous receipts, $1,240.30.

The disbursements during the quarter amounted to $130,652.70, leaving a cash balance on hand March 31, 1909, of $314,630.71. The report then says:

"During the quarter a dividend of 30 cents per share, amounting to $54,000, was declared, but it was not payable until April 10, so does not show in cash statement.

"The caving of Ontario drain tunnel delayed development of the mine in depth for three years or more, with the result that the ore reserves were heavily drawn on, and at prsent are limited. On this account, for some time past, the mill has been running but one shift. Under these conditions, and with the heavy expense of connecting with the shaft and crosscutting to the vein on the tunnel level, but little profit can be expected. During the quarter, $36,990.10 was expended on this work.

"On account of the heavy snows during the month of February it was impossible to secure a constant supply of coal on account of the blocking of the high line, and during March our water supply failed, causing numerous shutdowns, which materially lessened receipts."

To the report is added the following, under date of May 1, 1909, in regard to the work being done:

"Raise under shaft up 93 feet, leaving 357 feet to connect. Crosscut to vein extended 483 feet from point where crosscut to shaft was started. It is expected that the vein will be cut within 500 feet additional drifting. Sinking of the Daly West shaft started. Station will be cut at the 1,700-foot level and a crosscut run to the vein."

SAN FRANCISCO MARKET.

James A. Pollock & Co., bankers and brokers, 6 west Second South street, furnish the following received over their private wire on San Francisco mining stocks:

CALUMET & HECLA.

Michigan Company Enters Montana Copper Field at Clinton.

The same persons as are interested in the Calumet & Hecla property are behind a big copper concern that is opening up the country around Clinton, Missoula county, Montana, according to H. A. Stephens, who is in Salt Lake on a townsite proposition. Mr. Stephens says that the Montana-Clinton Copper company, which is the name of the concern backed by the eastern copper people, now owns six claims in the district and is negotiating a deal that will involve something like $1,000,000 and a vast territory.

The company has new machinery on the grounds for the sinking of the present 600 foot shaft to depth and developing this rich copper camp. This machinery is being installed as fast as possible. Arrangements have also been made for the installation of a $100,000 power plant at Rock creek, to supply energy for a large concentrating mill near South-East Clinton, which is the townsite laid out by Mr. Stephens. At the mine the company has developed four levels that justify the erection of a large mill to treat its ore, it is said.

CONCENTRATES.

D. P. Rohlfing has gone to Beaver county to look after the properties he has in charge there.

Dyke V. Keedy of the firm of Dietz & Keedy, well known metallurgists of Boston, is in the city.

George Graham Rice of the Goodwin and Scheftels companies of Nevada and New York, is in this city.

An electric drill outfit has been purchased of the Richmond Maeninery company by the British American Developing company of American Fork.

It is announced that the Lion Hill Consolidated Mining company from which considerable ore has been shipped in the past, will again be a steady shipper after June 1.

Leslie Runyan Ford, son of Governor Franklin Ford of New Jersey, with Mrs. Ford, were the guests of Mr. Ford's cousin, Arthur Thomas, yesterday. They are on the way to the Seattle exposition.

The Progressive Mining company has let a contract for the continuation of the drift off the 150 foot level. Secretary Mixer declares but a short distance further in the drift a cross fissure should be tapped at a verticle depth of 500 feet.

According to Secretary Groesbeck of the Victor Consolidated, the leasers on the 800 foot level are opening up a nice body of copper ore. At present this Tintic property has two cars of ore in the market, one sampling 12 per cent copper and the other 14 per cent.

None of the larger sellers of copper will contract for August deliveries, says a Boston dispatch. There are inquiries in the market for August copper, but this far no trade has resulted. There have been very heavy sales of the metal for delivery up to and including July 31, and orders for spot copper are being filled only at advance prices. The selling interests are practically sold up for the next two months and are taking 14-cent copper or better within a short time.

PRICES SHOW LITTLE CHANGE

New York, May 27.—There were more stocks which sold at unchanged prices from last night at the opening today when those that advanced or declined. The changes were small and mixed. Erie rose 5 and the first preferred 1. Great Northern Ore Certificates declined ¾.

Buying orders became more numerous but there was no demand of consequence for the leading stocks outside of Reading, which rose to 155. Some of the railroad equipment stocks were in demand and a few of the low priced stocks also showed decided firmness. National Lead preferred advanced 1¾. Delaware & Hudson 1½ and Wabash preferred, Western Maryland and American Car 1. National Railways of Mexico first preferred declined 1¼. Strength in the Gould group wakened slight response in the general list. St. Louis, Southwestern preferred was marked up 1¾, Wabash preferred, Reading 1¼, American Car preferred, and General Electric 1. St. Louis and San Francisco second preferred declined 1.

Bonds were firm.

Metal stocks absorbed the bulk of the dealings. National Lead preferred improved 3½. Bethlehem Steel preferred and Republic Steel preferred 1¾, the common 1 and U. S. Steel ⅞ to 61¾, a new record price. Wabash rose 1, the preferred 2⅜ and Sloss-Sheffield 2¼.

Intense dullness prevailed but the market maintained the slight gains of the morning. United States Steel touched 61. Third Avenue got up 1¾. Canada Southern receded 1⅛ and Wheeling and Lake Erie first preferred 1.

LIVESTOCK.

Chicago, May 27.—Cattle—Receipts, estimated at 4,500; market steady. Beeves, 5.10@7.25; Texas steers, 4.75@6.35; western steers, 4.75@6.35; stockers and feeders, 3.60@6.65; cows and heifers, 2.50@6.40; calves, 5.00@7.00.

Hogs—Receipts, estimated at 26,000; market steady, strong. Lights, 6
