It was proposed to destroy \$66,000,000, and the bare proposition would create a panic and disorder. But Congress was wiser than the President and will pay no heed to the recommendation. The Secretary evidently wants to drive silver entirely out of circulation. He claims he can't circulate, the silver in the vaults, yet shows \$66,000,000 paper based on this very coin is circulating freely. There are \$100,000,-000 silver circulating according to his uncandid report, and yet he alleges silver is a drug and the people don't want it. THE KING FORTUNE-MAKER

A New Process for Preserving all Per-Animal and Vegetable, from Fermentation and Putrefaction, Retaining their Odor and Flavor.

" OZONE-Purified air, active state o. Exygen."-Webster.

This Preservative is not a liquid, pickle, or any of the old and exploded processes, but is simply and purely 02ONE, as produced and applied by an entirely new process. Ozone is the antiseptic principle of every substance, and possesses the power to preserve animal and vegetable structures from decay. There is nothing on the face of the earth liable to decay or spoil which Ozone the new Preservative, will not preserve for all time in a perfectly fresh and palatable condition.

The value of Come as a natural preserver has been known to our abler chemists for ears, but, until now, no means of producing it in a practical, inexpensive, and simple maner have been discovered.

Microscopic observations prove that decay is due to septic matter or minute germs, that decay and feed upon animal and vegetable structures. Ozone, applied by the Prentiss method, seless and destroys these germs at once, and thus preserves. At our offices in Clin or mati can be seen almost every article that can be thought of, preserved by this trocess, and every visitor is welcome to come in, taste, smell, take away with him, and test in every way the merits of Ozone as a preservative. We will also preserve, free of charge, any article that is brought or sent prepaid to us, and return it to the sender for him to keep and test. that is brought or sent prepaid to us, and return it to the sender for him to keep and test.

FRESH MEATS, such as beet, muiton, veal, pork, poultry, game, fish, &c., preserved by this method, can be shipped to Europe, subjected to atmospheric changes and return to this country in a perfect state of preservation.

EGGs can be treated at a cost of less than one dollar a thousand dozen, and be kept he an ordinary room six months or more, thoroughly preserved; the yolk held in its normal condition, and the eggs is fresh and perfect as on the day they were treated, and will sell astrictly "thoree." The advantage in preserving eggs is readily seen; there are seasons when they can be bought for 8 or 10 cents a dozen, and by holding them, can be sold for an advante of from one hundred to three hundred per cent. One man, with this method, can be serve 5,000 dozen a day.

FREUITS may be permitted to give to their retire.

The juice expressed from fruits can be beid for an indefinite period without fermentation—hence the great value of this process for producing a temperance beverage. Cider can be held perfectly sweet for any length of time.

VEGETABLES can be kept for an indefinite period in their natural condition, retaining their odor and flayor, treated in their original packages, at a small expense. All grains, lour, meal, etc., are held in their normal condition. Dibrell announced the death of Mr. M. P. O'Connor. The usual resolutions of regret were ado; ted, and the House adjourned till Monday.

BUTTER, are held in their normal condition.

BUTTER, after being treated by this process, will not become rancid.

Dead human bodies, treated before decomposition sets in, can be held in a natural condition for weeks, without puncturing the skin or mutilating the body in any way. Hence the great value of Ozone to undertakers.

There is no change in the slightest particules in the

served, and no trace of any foreign or unnatural odor or tasts.

The process is so simple that a child can operate it as well and as successfully as a man. There is no expensive apparatus or machinery required.

A room filled with different articles, such as eggs, meat, ash, etc., can be treated at one time, without additional trouble or expense.

137 In fact, there is nothing that Osone will not preserve. Think of every thing you can that is liable to sour, decay, or spell, and then remember that we guarantee that Osone will preserve it in exactly the condition you want it for any length of time. If you will remember this, it will save asking questions as to whether Ozone will preserve this or that article—it will preserve any thing and every thing you can think of.

There is not a township in the United States in which a live man can not make any amount of money, from \$1,000 to 10,000 a year, that he pleases. We desire to get a live man interested in each county in the United States, in whose hands we can place this Preservative, and through him secure the business which every county ought to produce.

FORTUNE Awaits Any Man who Secures Control of OZONE in any Township or County. OZONE in any Township or County.

A. C. Bowen, Marion, Ohio, has cleared \$2,000 in two months. \$2 for a test package was Woods Brothers, Lebanon, Warren County, Ohio, made \$8,000 on eggs purchased in a usual and sold November 1st. \$2 for a test package was their first investment.

F. K. Raymond, Morristown, Belmont County, Ohio, is clearing \$2,000 a mouth in handing and selling Ozone. \$2 for a test package was his first investment.

D. F. Webber, Charlotte, Baton County, Mich., has cleared \$1,000 a month since August. \$2 for a test package was his first investment.

J. B. Gaylord, 30 La Salle Street, Chicago, is preserving eggs, fruit, etc., for the commission men of Chicago, charging 11-20. per dozen for eggs, and other articles in proportion. He is preserving \$4,000 down eggs per day, and on his business is making \$3,000 a month clear. \$2 for a test package was his first investment.

The Cincumstif Feed Co., \$66 West Seventh Street, is making \$5,000 a month in handling brewers malt, preserving and shipping it as feed to all parts of the country. Malt unpreserved sours in \$4 hours. Preserved by Coone it keeps perfectly sweet for months. ces which we have asked the privilege of publishing. There are scores of others. Write to any of the above parties and get the evidence direct.

Now, to prove the absolute truth of every thing we have said in this paper, we propose place in your hands the means of provine for yourself that we have not claim; half enough. To any person who doubts any of these statements, and who is interest sufficiently to make the trip, we will pay all traveling and hotel expenses for a wish to the city, if we fail to prove any statement that we have made.
