

NEWS FROM LONDON.

SURE AND THE CRUSADE
THEIR HABITUE.

THE VISIT OF LI HUNG CHANG.

THEATRE.—*Paris*—*London*—*New York*.

LONDON, Aug. 22.—[Unpublished, 1000, by the Associated Press.]—The past week has been the quietest of the year politically, socially and in every way. The only feature of interest here is the silver question in the west and the Cuban insurrection in the east.

LADIES' TROUBLES.

The dull season has brought the usual differences among the ladies and aristocrats and the long three-weeks' strike seems coming to a head. The men at several of the naval harbors works are already on strike, having joined the miners, which the latter brought against the Irish government. It appears that Mr. Fisher proposes to recruit his forces again during the month of September, 1896, and that he will be compelled to make good his losses, which he has incurred by his negotiations, hiring horses, wagons, carriages, cooks, etc., and will pull considerable expenses. But Fisher's plan to leave England and then negotiate in India, Australia and New Zealand, so far as the world has been swindled.

THEATRICAL NOTES.
One of the last enterprises of the late August fairs was the experiment with a revolving stage mechanism whereby the changing of scenery might be greatly expedited. The mechanism is now complete and the new play by Mr. Lewis entitled "Cleopatra," which opened at the Criterion last Thursday evening, Aug. 20th, it is a comedy in four acts, and the curtain order is the same as in the first and second acts of "Monte Carlo" and that of the third and fourth acts of "Langdon castle."

Oiga Shishir's next American tour begins at Brooklyn on November 1st. Owing to the failure of Carmen in London, Miss Nethercot has determined to drop the play from her repertoire.

Mrs. Farnesque, who has been cast in the title rôle of "Cleopatra" in a new company and will be seen in London during the autumn in a round of Shakespearean characters, will be supported by Mr. Farish, who went to America with Beaumont upon the liberal £1,000.

THE TOTAL ECLIPSE.

A splendid view obtained by New Jersey.

NEW YORK, Aug. 22.—The total eclipse this morning.

The following communication has been received from Miss Mary Princeton, the late Professor R. A. Princeton:

"Miss Princeton from New York on June 23 on the steamship Ohio, for the purpose of obtaining a view of the recent total eclipse of the sun, the vessel having stopped on a point off the Horns, Norway, and the head of the midnight sun:

"Steamship Ohio, Thursday morn, Norway, Aug. 10.

"The passengers on board the ship of the American and had a glorious view of the total eclipse of the sun which occurred on the morning of August 9. The sky was cloudless and the atmosphere clear. We had a perfect view of the total eclipse. The planets Jupiter, Mercury and Venus were plainly to be seen during the total eclipse, and also many well-known constellations.

The temperature fell two degrees from 70° to 50°, during the totality and a perceptible chill was felt at the time.

The eclipse was viewed from a most favorable point, northwest of the Island of Svalbard, in the high seas of Norway, latitude 60° 50' north, longitude 13° 30' E.

The longitude of the date of the total eclipse was 120° 15' E.

The total duration of the obscuration was 2 min. 10 sec. The moon passed out of a totality and a penumbra, casting various shades of light on the clouds, and the sky was darkened.
