TWO MESSAGES.

President Harrison Accepts Chile's Apology and Ex-Minister the Government.

THE STARS AND STRIPES MUST BE SALUTED.

Act Necessary to Refer the Question of Indemnity to Arbitration.

BY TELEGRAPH TO THE NEWS.

CHILE'S APOLOGY.

Has Officially Accepted, but our Flag Must Be Saluted.

New York, Jan. 29.—The Herald's Washington special says: President Harrison will send tomorrow a message to Congress on the Hills-South American troubles. In substance the news was sent from here at an early hour this morning.

Lima, Santiago, Chile.—President Harrison accepts Chile's apology in the bond and generous spirit in which it was offered.

BLAINE.

And a cable to this effect will follow:

Lima, Santiago, Chile.—While Chile's apology is in terms all this country could ask, yet there is one thing more to be done before the dignity of the United States shall be fully satisfied. Chile must salute the States and flag.

BLAINE.

Such was the decision at a meeting of the cabinet late this afternoon. The first cable—that is, the one accepting the apology—also states that the question of indemnity to the families of the two sailors killed and the four others wounded can be settled only by arbitration. The second cable or the one demanding that the state and stripes shall be saluted, includes the question of indemnity. The official notes will give emphasis and expression to Peters's apology, which we make it mainly gratifying to the people of this country, and he is to understand that this country will insist on it.

FALSE STATEMENTS.

English Papers Contradicted in Washington.

WASHINGTON, Jan. 29.—The attaches of DeWitt Warner, member of Congress from New York, was today asked to contradict articles in the London Times and Daily Telegraph, charging President Harrison for commissioning the Chilean minister to Congress, and having been informed by Minister Hunt that Chile was to tender an apology. The Times and Telegraph, in the articles referred to, say that an interview with Warner called in London by the Daily Telegraph agency, in which the New York Congressman stated that he had it from reputable authority that Hunt, the Chilean minister, had informed Secretary Blaine and President Harrison officially, but that an apology would be tendered by him. The Daily Telegraph further stated that Minister Montt and President Harrison personally on the matter, as he feared that the information regarding Chile's message would be had previously given Blaine, would not reach the President.

"That's not true," said Warner decisively, after reading the cable dispatch, alluding to the purported interview. "I have given out no such interview as that, and so far as I have stated or heard, the facts are not exaggerated, though of course, I do not know what may have occurred. This is the first intimation I have had that anything was definitely known on Saturday last as to Chile's intention to apologize.

Cleveland Democrats Gather.

NEW YORK, Jan. 29.—Over sixty of the most prominent Cleveland Democrats assembled this evening at Murray Hill Hotel, including Tellery Anderson, ex-Mayor Grace and ex-Secretary of the Treasury Fairchild. Mr. Anderson was the call for the meeting, which made no mention of Hill's name, and said it had been signed by gentlemen who do not favor machine politicians controlling the State. Ex-Mayor Grace made a suggestion that the anti-machine Democrats hold a convention of their own and elect delegates to the national convention to express the will of the people. After discussion of the talk, resolutions were adopted stating that a convention for the selecting of delegates for February 22nd and asserting that the outcome of a convention held in accordance therewith would be a call cannot be fully representative of the Democratic sentiment of the State; that the action of the State committee is unprecedented in the history of the party, and the signers of the resolution invite their sympathizing fellow Democrats who are able to be named later, to consider and decide upon the necessary measures to secure the good interests of the Democratic party. The call was signed by all the gentlemen at the meeting, Truesdell P. Wheeler, in a speech, said that an immediate call should be issued addressing to Democrats in the State of Cleveland's Party in advance who should be selected for the Presidential nomination.

Where is Garza?

SAN ANTONIO, Jan. 29.—An unofficial report has been received here stating that Garza is thought to be in Mexico, with a rapidly increasing force which Diaz has ordered to disperse. No raid is yet made, but there is considerable excitement on account of the raid on the town of Los Vegas. The news is disquieting, however, and Garza is believed to be still dodging about in the brush on the Texas side of the lower Rio Grande border.

SIGNED EXCHANGED.

A squad of Texas rangers, all under Sergeant Robertson, ran across a party of five or six Mexicans yesterday near Palm Branch. Shots were fired on the rangers, but the Mexicans escaped.

A Mexican captured a few days ago by the rangers stated that Colonel Hinojosa was about to be executed. He admitted having been with Garza when the latter first crossed the river, and said that Garza had 250 men, and Hernandez only fifty, and that it would be taken matters for Hernandez to take a battle, and that he was in no way connected with the outlaws. Captain Hearne, Company B, Rangers, believes that the country is still full of the Garza followers, to bands of four or five, and that if the troops are withdrawn, the movement will immediately start afresh.

Smoking Among New York Women.

The statement made the other night in New York women to smoke in public places in New York was not the first time that women in New York had been detected smoking, it might be the first time that it was made public, and made so far as the public knew, without any denial from the women who were said to have been smoking in public places. As the matter was discussed in the public press, it was generally understood that the women in question were those who belong to the "Bohemian" class, and it was generally supposed that the women who were thus said to be smoking in public places
