DISEASE MENACES MANILA

Crowding of So Many Spaniards Together, Without Knowledge on Their Part of Rules of Sanitation, is the Cause.

Spanish Prisoners Must Be Moved Soon—Typhoid Fever Increasing—Insurgents Have Entire Confidence in the American Government, and Will Give No Unnecessary Trouble.

New York, Sept. 20.—A dispatch to the Herald from Manila says:

As the result of the meetings of the ... assembly of Filipinos, ... there is now entire confidence in the American government on the part of the insurgent leaders.

All the members of the assembly express an earnest desire that the future relations of the Filipinos with the Americans may be of the most friendly character.

The condition of the Spanish prisoners is beginning to excite anxiety among the military officers here.

Eleven thousand of these prisoners are quartered in churches and other public buildings within the narrow confines of the walled city, where most of the Spanish people also live, where the American garrison is quartered, and where Gen. Otis has located the army headquarters.

Members of the sanitary corps are kept constantly at work clearing out filth that constantly accumulates, the Spaniards having not the least knowledge of the laws of sanitation.

The result is a condition threatening a general outbreak of disease at any moment. Typhoid fever is already increasing at an alarming rate.

Authorities feel it is absolutely essential to the health of the city to get the Spanish prisoners out of Manila at the earliest possible day.

Similar conditions are reported from Cavite, where the Spanish, in the hands of the rebels, are suffering from the lack of the necessities of life.

To make matters worse, the sailing of the hospital ship ... has been repeatedly delayed. It is now stated positively that that vessel will sail on Thursday. Probably by that time she will have considerable accession to her invalid passenger list.
