CALL LONG AND DRAWN OUT

Activity in Northern Light at New Figures—Chloride Point Creates a Surprise.

Today's call on the exchange consumed just two hours and three-quarters and was productive of sales amounting to 66,350 shares, represented by a selling value of $21,430.74. Proceedings were quite spirited at times, but on the whole the call was drawn out to an unbearable extent, long tiers being made on stocks which at no stage of the game showed even the possibility of transfers.
