BIG TINTIC PRODUCER.

The Centennial-Eureka Showing Good Bodies of High-Grade Ore

MINERS WILL CELEBRATE THE FOURTH.

With the Stock Brokers on the Exchange—The Northern Light—Dealer Dexter Stock.

Hon. C. E. Allen, manager of the Centennial-Eureka at Tintic, came in from the mine last evening, and with that cheerful smile so characteristic of the gentleman, told a "News" reporter this morning that conditions were in good shape at the property, the development work furnishing a store of valuable much to be encouraged over. While there were not strikes, such as are reported from other sources daily, said he, the mine is showing good ore bodies, and upwards of 300 tons of ore are being shipped monthly from the property. The mine is working two shifts and seventy-five men, whose names adorn the monthly payroll, were today compensated for their labor, a feature much appreciated as close to the nation's great holiday.

MINERS WILL CELEBRATE.

Monday being Independence Day, and a day upon which the patriotic miner as well as those of every other profession love to assert their loyalty to the nation, the Centennial-Eureka will close down tomorrow evening and resume work on the 6th, allowing their men a day extra in order to fit themselves for a good start on Wednesday morning. That most of the other big companies throughout the State will do likewise, was the assurance given the "News" today by several managers, all of whom believe that of all days of the calendar, July 4th should be a day of joy and rejoicing. May it be so with the man who digs in the earth for the precious metals.

WITH THE STOCK BROKERS.

Fair Volume of Business in the Pit—Attack on Sunbeam.

The stock brokers were normally good-natured and alert on the exchange today, and did business to the extent of 1,600 shares, the trading being mostly distributed between the listed and unlisted stocks. The former Alice Dalton and Lark fluctuated a degree of activity and sold at 10 cents, while Beaconsfield, against 300 shares at $1.01½ and Sacramento gave out 1,000 at 6 cents. Of those not selling not much can be said other than that a firm tone generally prevailed although no particular advances were noticeable.

Calling unlisted stocks, Swansea was the first to materialize and had a bid of $2.42½ as against offerings at $2.47½. Chloride Point stood about stationary and made sales at 81 cents, with the stock freely sought after at this figure. Dalmatia kept up its good show, but did no selling while Richmond Anacondas handed out 1,000 shares at 5½ cents, a sale which made a sleepy broker feel the kicking horse. Sunbeam surprised the talent by its downfall, the stock going down like Mollie's and selling as low as 9½ to 9 cents, 3,000 shares finding takers around these figures. Dexter was strong and held a bid of $1.35 while seekers after Scottish Swansea showed their liberality by bidding $1.12½ for the stock.

The closing figures were as follows:

LISTED STOCKS.

Stocks.	Bid.	Asked.
Anchor	25	75
Alice	10	17½
Bullion Beck	3 65	6 50
Centennial Eureka	22 00	40 00
Daly	77½	85
Daly West	3 50	4 50
Dalmatia	9	16½
Eagle	2	10
Fort Lyon	4½	10
Horn Silver	75	78
Iron Silver	1 00	1 05
Mammoth	1 47½	1 60
Mercur	4 00	7 00
Northern Light	55	60
Ontario	3 25	4 50
Sacramento	60	65
Sunbeam	10	20
Silver King	10 00	15 00
Utah	47½	60

UNLISTED STOCKS.

Stocks.	Bid.	Asked.
Swansea	2 42½	2 47½
Chloride Point	81	84
Dalmatia	25	30
Dexter	1 35	1 42½
Sunbeam	9	12½
Richmond Anacondas	5½	6½
South Swansea	1 12½	1 20
Buckeye	2½	3
Omaha	25	35

THE WEEK'S BUSINESS.

During the week shares have changed hands as follows:

	Shares.	Value.
Monday	1,500	$ 467 50
Tuesday	3,100	1,208 25
Wednesday	8,600	3,242 40
Thursday	8,600	1,767 40
Friday	5,400	212 10
Saturday	3,800	1,201 55
Totals	24,000	$8,127 80

THE NORTHERN LIGHT.

A Key 0 Sunshine Seems to be Striking Lion Hill.

Notwithstanding the evil days that seem to have fallen on the Northern Light, miners are not so hopeless with their prospects as many people suppose, almost surrounded as it is, by mines that are steadily coming into public favor. So far most of the work done has been on the eastern part of the property and here quite a number of Utah's leading capitalists made their first start. The eastern part is geologically virgin ground, and Superintendent Long is directing his attention to exploring it. A tunnel is being run in from the gulch which it is expected will cut the rich vein found in the Hercules and Chloride Point, far below the old workings in the Northern Light. Should Mr. Long be able to demonstrate his theory, that the east side is rich as the west side, the Sunset old property has for many years of prosperity ahead of it. Recent developments in the neighboring properties suggest the probability of the existence of a rich body of ore at no great depth, and every effort is being made to reach the vein.

The mill is not entirely idle, a number of the bucks are kept full of knocking ore, and the crusher is run as often as necessary to make the tailing. About twenty men are employed, and the expenses are not in the least possible degree commensurate with the advantageous working of the property.—Mercur Mercury.

Deal in Dexter Stock.

A deal involving the ownership of 30,000 shares of stock in the Dexter Mining company was consummated in Chicago yesterday. Messrs. John Dern, John R. Lakin and others taking up the interests of Dekaven, Hills and Ellis at $1.25 a share or $37,500 for the block. It will be remembered that some time ago Dekaven visited Salt Lake and the mine at Tuscarora, Nev., and finding things in satisfactory shape, left himself in readiness to make a deal if one could be had on satisfactory terms. This condition presenting itself a few days ago, the return of Mr. Dern from Nebraska brought it to a culmination.

Good News from Stockton.

We learn from C. C. Newell, who came in from Rush Lake Thursday that matters are moving along smoothly in that district. Four thousand five hundred pounds of ore shipped from a vein 18 inches wide in the Oliver gave a net return of $73. A California company and one from Salt Lake have processed some locations and are doing considerable prospecting. A three-foot ledge of $20 free milling ore has been opened up in the Gold Bell mine, and in fact all claims where any work is being done are showing up nicely. The Pioneer mill is closed for the present on account of fuel air in the Grecian mine, the usual case supply has been cut off. As soon as the air mine is finished the usual flows will be put on at the mill and the mine.—Pioche Messenger.

THEY TOOK THE MINE.

Nevada Mining Company Finds Itself in Financial Straits.

The change which occurred in the affairs of our local mining company, though not surprising, has caused considerable comment, as it is the direct cause of determining the future of our camp from a business standpoint, says the Pioche Messenger.

The Nevada M. & M. Co., consisting of Wm. Lloyd, A. H. Godbe, John Cook and E. L. Godbe, have been operators in the Pactolus tunnel and Summit mill under a lease from the P. C. M. & M. Co. for the past 18 months, during which time four payments were made to landowners, ranging from $6 to $8 per cord. Several of the laborers became dissatisfied and drew time checks which they cashed at a discount of 10 per cent. These checks remained, having appointed H. W. Turner, a disinterested party, as receiver, pending a decision as to whether they themselves, paying the current expenses and then divide up, pro rata, any surplus that may be left after all creditors. This was decided upon at a meeting of the employes on Saturday, who treated the attachment and filed the bond. Several of the creditors refused to sign the list, thinking more satisfactory arrangements could be made. The company claims and offers proof that they have extracted some 10,000, which has been legitimately expended, and that the present indebtedness will not exceed $1,000, which they can easily adjust if given time. The men are satisfied with the condition of the property and assert that improper management drove them to the wall.

Everything had been arranged by the laborers to begin work yesterday morning, when a telegram was received from W. S. and A. H. Godbe to stay further action, as they would be here tonight from Salt Lake and adjust everything satisfactorily.

Snake River Gold Mining.

George T. Burroughs of the gold mining firm of Sweetzer & Burroughs of Pocatello, who are operating a section of placer ground for saving the fine gold on Snake river, Idaho, near Minidoka, on the Short Line west of Pocatello, returned yesterday from a visit to the big gold dredge at that place, where he went to gain some idea for the more successful operation of their gold-saving machines. Mr. Burroughs says that they are having special success with their process, which he describes as a gold dredge with suction pumps for lifting the sand and allowing it to pass over plates and burlap. He returned to Pocatello on last night's passenger.—Dillon Tribune.

Tips and Spurs.

Silver, 59¾; lead, $3.75.

Thomas Weir of the Highland Boy visited Bingham today.

The Chloride Point mill it is thought, will be on a steady run in a day or two.

Preliminary work for the erection of the Overland mill is said to be progressing nicely.

Parmenter Dern of the Mercur and Gepser-Morton will return from the coast this evening.

Ore averaging 30 ounces silver and 25 per cent lead is being taken from the Columbia on Lion Hill.

A strike is reported in the bottom of the Hercules which, the ore going 250 ounces silver and 15 per cent lead.

Building touches are being put on the Tintic mill at Mercur and a start will be made shortly after the Fourth.

Local stock brokers will celebrate the Fourth, consequently there will be no call Monday next on the stock exchange.

Exploratory work in the different parts of the Mercur mine has opened up very satisfactory ore chutes near the surface.

The Highland Boy company has acquired title to the site of the present smelter near Murray, the trust company is seeing to it.

Messrs. Newhouse and Weir of the Highland Boy at Bingham are preparing to establish valuable exhibits in the Mining Congress at that property.

The Golden Gate people have brought the old Surprise shaft into requisition and are now hoisting ore to fill it for active service in the operation of the big mine.

Judge Green, the author of the Buckeye, is in the city. The judge is pleased with conditions in the property mentioned, and says he shipped a car of ore the other day.

Tintic Miner: An important change is reported this week in the Treasure Hill and regular shipments are prominent hereafter. The ore is reported to run on an average of 80 ounces silver and from $ to $20 in gold.

Tintic Transcript: N. Duncan came in from Deep Creek this week. Next week he can give the prospects there. He has left of work, and some to spare for a while at least. Plenty of ore bid fair for from market.

Tintic Miner: The new steam hoist at the Plesant mine at Silver City, which is a conversant of the South Swansea, is working like a charm. Two shifts are now at work and another will be added immediately since the Fourth. The shaft which is now down 60 feet will be sunk as fast as possible, at least down the 6th.

Dillon Mont., Tribune: A Tribune representative busied his eyes for a moment yesterday on some of the richest gold quartz that he has seen in many a day. The specimens fairly stood all over it. The parties seeing the rock were very reticent about giving information, but it is understood it came from a mine not many miles from town. We are promised particulars later.

Oregon Short Line to Eureka.

There will be horse races at Calder's Park, Monday, July 4th.

Fusion in Emery.

Ten mile sulfit Morris race for purse of $200 at Calder's Park, Monday, July 4th. Fusion in Emery.

THE SEASON AT BRIGHTON'S.

Opens July 1st.

The rate to Brighton's and return this season has been reduced to $1.00 via rail to Park City and stage to Brighton's. This is the best and quickest way to reach the resort. Stage connects at Park City with Utah Central trains in both directions. 50 lbs. of baggage free on railroad. No baggage on stages. Tickets good to ride one way via Park City and the other way via Commercial Canyon at same rate. All tickets will be on sale at the Oregon Western Ticket Office, Dooly Block Corner, Regents the Canyon will open same place daily at 7:30 a. m. after July 4th. The Hotel at Brighton's is being refitted with all the accommodations of a Mountain resort and the fishing will be excellent. Brighton's will be more popular this year than ever before.

Horse Races at Eureka.

There will be horse races at Calder's Park, Monday, July 4th.

The Head is the highest grade baking powder known. Actual tests show it goes one third further than any other brand.

ROYAL BAKING POWDER Absolutely Pure

ANOTHER WAR SPECIALTY.

Helping Stocking the Merchants.

At a great expense the management of the Lagoon have secured another great specialty for their patrons, owing to the fact that thousands were unable to see the great war spectacle, performed by the Sham Battle, which was accompanied with so much success and business at Lagoon on last Sunday evening, the management will, on the evening of July 4th, portray the latest, newest and most sudden spectacle, "Storm Scene on the Atlantic Ocean." Great stress will be paid to magnificent and realistic effects for engines and other heavy of war, and it is positive, by the test it is to be given, the Lagoon management is able to do patrons this treat.

Monday, July 4th.

"An American Hero's Sacrifice for His Country."

Magnificent Grounds accompany the production.

Calder's Park Sunday.

Grand Sacred Concert at Calder's Park, Sunday afternoon and evening, by Dooly Military Band.

Every home can have incandescent Gas Lights by adopting the De Vall system, one candle power gas generator, which is necessary to produce great storm light of 10 candle power and less than common oil lamps. Suitable for cities, towns and villages a specialty.

Agents wanted to handle our lamps and generators. Address Utah Gas Light Co., 55 E. Second South, Salt Lake City, Utah, Colorado and Montana. Address Utah & De Vall Inc. Gas Light Co., 55 E. Main St., Salt Lake City.

The annual meeting of the stockholders of the Bonneville Mining Company will be held on Tuesday, the 12th day of July, A. D. 1898, at 12 o'clock noon, at its office in the Deseret National Bank of Salt Lake City, for the purpose of electing Directors to serve for the ensuing year, and for the transaction of such other business as may lawfully come before it.

ELIAS A. SMITH,
Cashier.

Salt Lake City, July 2, 1898.

ASSESSMENT NO. 3.

Bonneville Mining Company.

Location and principal place of business, Salt Lake City, Utah.

Location of mine, Lakeside District, Tooele County.

Notice is hereby given that at a meeting of the Board of Directors of the Bonneville Mining Company, held on the 29th day of June, 1898, assessment No. 3, of one-half cent per share, was levied on the capital stock of the corporation, payable June 30th, 1898, to the secretary at his office, No. 15 North Main St., Salt Lake City, Utah.

Any stock on which this assessment remains unpaid on the 30th day of August, 1898, will be delinquent, and will be advertised for sale at public auction, and unless payment is made on the 20th day of August, 1898, such stock will be sold to pay said delinquent assessment, together with cost of advertising and expense of sale.

By order of the Board of Directors.

JOHN WELLS, Secretary.

The Standard Dress Cutting Academy

is well arranged with chairs and tables for the comfort of all visitors while a class of students are constantly at work that callers may see how the system of Dress Cutting by the Sawyer Tailor Measurement is taught.

New students are daily entering the classes. We ask you to visit the school and let us show you wherein our system is an improvement over all other dress cutting arrangements.

THE SQUADRON THAT IS TO ATTACK SPANISH SEAPORTS.

The cruiser Newark, flagship; the battleships Iowa and Oregon, the auxiliary cruisers Yosemite, Yankee and Dixie and the collier Alvarado and Alexander compose the squadron under Commodore John Crittenden Watson that is to bombard Spanish cities and capture the Cuban ports. Commodore Watson's command is to be known as the eastern squadron, and its best all around ship is undoubtedly the battleship Iowa. She has a speed of 17½ knots. Her battery consists of 48 guns, so that she is a floating fortress in herself. Four of these guns are of 12 inch caliber, weighing 60 tons each, and there are eight 8 inch guns in turrets, six 4 inch quick firers, twenty 6 pounders, six 1 pounders and four Gatlings.

The Iowa has splendid armor protection, with a belt of 18 inch steel 7 feet 4 inches broad around her vitals, with citadel backing and most powerful turrets. The Oregon is a sister ship to the Indiana and has just earned a world's record as a cruising battleship by making the long run from Bremerton to Cape Cod. The battery in her turrets is four big turret guns are of 12 inch caliber. The battery is in other respects similar to that of the Iowa, the Oregon is fitted with torpedo tubes and carries two torpedoes. The coal capacity of the Oregon is set down at 950 tons as against 1,500 tons for the Iowa, and her radius of action at 10 knots is placed at 5,000 miles as against 7,000 miles of the Iowa.

The flagship Newark is what is known as a protected cruiser, her only protection in the matter of armor being a protected deck of armor [illegible] the engines and boilers. She was built in 1890 and so is not fully up to date, but the recent extensive repairs made at Norfolk have made her a valuable cruiser, with a speed of about 19½ knots. Her steaming radius is 16,000 miles on 850 tons of coal and 45 knots. Her displacement is 9,892 tons.

The cruisers Yosemite, Yankee and Dixie were recently three Morgan line steamers plying between New York and South American ports. They are all of the fast, stanch steel vessels of 5,000 tons, which have been transformed into excellent cruisers, first, by the addition of good batteries of ten 5 inch rapid fire guns each, second, by the addition of belts of laminated armor over the vitals of the ships. The cruisers are nothing more than merchant ships [illegible] for war carrying and without armor, but carrying two guns each. The Suwanee is of 2,341 tons displacement, and is capable of 8,000 miles at 10 knots. The Scorpion is of 2,000 tons displacement, and is capable of 8,000 miles at 10 knots. The collier Alvarado, Captain Charles [illegible] and the collier Alexander, Commander W. E. Barrett, collier Abarenda, Lieutenant Commander [illegible] Commodore Watson was the gallant young officer who lashed Admiral Farragut to the rigging during the battle of Mobile Bay.
