WATER SUIT DECIDED BY JUDGE BOOTH.

Settlement Effected Between Eden And Plain City Irrigators Over Ogden River.

NEARLY FIFTY MEN LET OUT

From Railroad Shops in Interest of Economy—Jurors for May—Serious Charges Against Wife.

Ogden, April 21.—The orders of General Manager Bancroft of the Oregon Short Line and the Harriman lines in Ogden went into effect yesterday afternoon, when nearly 50 men were given their time, not because of any failure on their part to do their work properly, but because the Harriman policy is to cut down expenses, and to get as much work out of the employes as is possible. All of the departments in the local shops were affected by the orders. In the car shops, where the greater number of men are employed, 34 men were given their time. In the machine department 10 men received notice to lay off. Four of the round house employes were let out and one from the paint shop, and there are still others who will receive their discharge during the next few days, it is said. This will reduce the running expenses of the local shops about $4,500 per month.

IMPORTANT WATER SUIT DECIDED.

Judge J. E. Booth, who heard the case of George A. Fuller et al., representing the Eden Irrigation company, against Milo Sharp et al., representing the Plain City Irrigation company, which was tried the latter part of last summer, has now rendered his decision in the case, which is in part as follows: "The court finds that the defendants are older in right to the use of the waters of Ogden river than are the plaintiffs; that before irrigation was applied to the bench lands in the Eden Irrigation district there were three second-feet of water arose below the Eden dam, and at the mouth of the North fork, where it joins the Ogden river; that the plaintiffs are entitled in all parts of the irrigation season to the excess of the waters of the North Fork of Ogden river over the amount found in the said North fork at the Eden dam, and three second feet in addition thereto belong to the defendants by prior appropriation; that in counting the three second-feet all the waters running into the Middle fork of the Ogden river from and including the Ritter Hollow and below, should be so counted, whenever the waters at the mouth of said North fork and the waters running into the Middle fork through the Ritter Hollow and below do not exceed three second-feet more than the water in the North fork of the Ogden river at the Eden dam, then the plaintiffs are required to turn out of their canal at a point most convenient and economical for saving water, sufficient water to make said amount at the Eden dam with three second-feet additional."

The plaintiffs pay the costs, and that each of the parties pay their own witnesses.

This suit was fought hard by both sides, and a great deal of expert testimony was introduced. The matters decided have been in litigation for over 20 years.

SERIOUS CHARGE AGAINST WIFE.

Norman Christensen, the shoe merchant, has filed an answer in the Second district court to the complaint for divorce filed against him by Lulu Brown Christensen, wherein she alleged cruelty and failure to provide. Mr. Christensen denies the allegations of his wife as to cruelty, etc., and for a defense thereto alleges that he and his wife lived happily together until about Oct. 1, 1904, when the plaintiff became acquainted with one Will Shipley, with whom he alleged she has had illicit relations. Wherefore defendant prays judgment of no cause of action and dismissal of his wife's complaint and for such other and further relief as he may be entitled to. Mrs. Christensen has filed a denial to the serious charges of her husband.

TO UNITE IRRIGATORS.

Mass Meeting at Spanish Fork April 26 To Consider Strawberry Project.

Special Correspondence.

Payson, Utah Co., April 20.—A meeting was held yesterday in the Spanish Fork city hall to consider the Strawberry water project plans, as outlined by the board of government engineers. There were present Chairman Hyrum Lemmon and the entire local Strawberry water committee, the presidents of all irrigation companies using water from Spanish Fork river, Prof. George L. Swendsen of the board of government engineers, State Engineer Caleb Tanner and some of the corps of surveyors now in the field.

After due consideration it was decided unanimously to accept the plan of the government board of engineers, viz., to form a general water users' association as outlined in a recent issue of the Deseret News, the same to embrace all irrigable land under Spanish Fork, Spring and Santaquin creeks.

It was clearly shown that the government is endeavoring to benefit the people of this part of the state and there will be no inconvenience or danger of old users of water in forming a water users' assocaition, comprising all people using water under the creeks above mentioned, together with the Strawberry water, all coming under one general head and management, thus making a more perfect system of irrigation. And in order to prosecute the work as fast as possible everyone interested should co-operate with the government in this project and bring untold good to this part of the state.

A mass meeting will be held next Wednesday, April 26, at Spanish Fork, at 10 o'clock for everybody interested. This of course will include all old users of water under the above four named creeks, and all contemplating to be irrigators under the proposed new system.

The purpose of the meeting will be to consider the propositions the various committees have agreed to. All interested are urged to attend, so that a clear understanding can be had and no one entertain a wrong idea of this beneficial undertaking.

Surveyors are already in the field in this vicinity, making calculations of land, canals, etc.

About Rheumatism.

There are few diseases that inflict more torture than rheumatism and there is probably no disease for which such a varied and useless lot of remedies have been suggested. To say that it can be cured is, therefore, a bold statement to make, but Chamberlain's Pain Balm, which enjoys an extensive sale, has met with great success in the treatment of this disease. One application of Pain Balm will relieve the pain, and hundreds of sufferers have testified to permanent cures by its use. Why suffer when Pain Balm affords such quick relief and costs but a trifle? For sale by all druggists.

Weekly Crop and Weather Bulletin.

United States department of agriculture, Idaho section, climate and crop service, weather bureau.—Weekly crop bulletin for the week ending Monday, April 17:

Boise, Ida., April 18.—Changeable weather prevailed during the week; the average of temperature was slightly above normal, but the nights were cool and several frosts occurred. Some localities were visited by copious showers, while in others there was almost entire absence of precipitation; some snow fell in elevated districts. High winds were of frequent occurrence.

CROPS.

Fruit—In favored districts later fruits are rapidly coming into bloom, and much bloom has fallen from early trees. Frequent frosts have wrought considerable injury to peaches and apricots, and in some instances to hardier varieties. The damage to apples appears to have been most serious in the case of the Ben Davis.

Grain—Seeding of spring grain was somewhat retarded by unfavorable weather; growth of grain has been slow but most of the crop is in thrifty condition; in northern counties wheat is reported to be stooling well. A considerable amount of alfalfa land has been plowed up and is being sown to grain. Germination of some recently sown grain has been retarded by drying winds.

Grass—Hay crops and range grass are reported to be doing well though growth during the week has not been rapid, having been retarded by low nocturnal temperatures. Grass in southwestern foothills is the best in years.

Vegetables—Garden planting continues; planting of sugar beets is progressing rapidly in many localities, while in others farmers are delaying planting owing to lack of moisture in the soil.

Stock—Cattle, sheep and horses are being turned upon the range in increasing numbers; the general condition of stock is better than usual at this time of the year.
