MINING, BUSINESS AND STOCKS

ALMOST HAD A WHITEWASH.

Brokers Did No Business During The Regular Forenoon Call on 'Change.

SAVED ON THE OPEN BOARD.

Tonopah Stocks Quoted Weaker—Mammoth Maintained its Strength—Closing Quotations.

The brokers operating on the Salt Lake Stock and Mining Exchange came near getting a whitewash during the forenoon calls. Not a share was transferred during the regular call and all there was to the open board, was the transfer of a small lot of Daly-West and a 1,000 share lot of Martha Washington. This was a dull day all around and many of the stocks were passed without even a quotation. None of the Tonopah stocks were transferred. Tonopah, which has within its domain the original location on the famous Mizpah ledge was quoted weaker than yesterday, while its near neighbor, the Montana-Tonopah failed to make any display of strength. The stock was not wanted seriously, and a few brokers offered it as low as $1.70, seller 60. Goldfield Bonanza, which is to undergo vigorous development, was offered at 7 cents and 4½ was bid. Daly-Judge maintained its usual strength. Mammoth displayed no inclination to go backward. On the contrary brokers rather anticipate the stock will improve some.

The closing quotations and sales were posted as follows:

TODAY'S QUOTATIONS.

	Bid.	Asked.
Carisa		10½
Con. Mercur	26	31

GREAT IS THE JUMBO.

Ore of the Value of $1,000 Per Sack Taken Out by Lessers.

Ore worth $1,000 a sack is being taken from the drift on the 200 level of the Bowes-Kernick lease on the Jumbo, says the Goldfield News. In this drift a body of ore has been encountered which at present shows five feet wide and will assay $7,000 a ton.

Wonders, it seems, never cease with the great Jumbo, and this is the greatest of all. It means that the figures of $1,000,000 as the production of the Bowes-Kernick lease, given in the News two weeks ago, were not an exaggeration. It even looks as if they will be exceeded. Thousands of sacks of ore are now piled up around the ore house at this lease and a large number of men are kept busy sorting and sacking all the time.

The Jumbo is the wonder of the mining world—the marvel of "the greatest gold camp ever known."

UNITED STATES MINING.

Sixty Thousand Shares of New Stock to Be Issued.

Information has been received at the local officers of the United States Mining company to the effect that in a circular from the executive offices 60,000 new shares of stock are to be issued at $20 a share.

The Mammoth group, a recent purchase in Shasta county, California, is to be furnished with better equipment. The directors of the United States have subscribed for 25,000 shares of Mammoth stock at par, and are to receive from the syndicate 6,250 shares as bonus, a total of 31,250 shares, at a net cost of $20 per share, and the United States company has issued 60,000 shares of its own stock to be exchanged, share for share, for the 60,000 shares of the stock of the Mammoth company.

President Evans says the Mammoth mine contains ore in sight to the value of $1,000,000.

CRIPPLE CREEK'S FUTURE.

A Mining Engineer Believes Mines Will Become Exhausted in Five Years.

A mining engineer, who does not venture his name, who recently made investigations in the Cripple Creek district has expressed the opinion that the great Colorado gold camp will soon be on the wane. He is quoted as saying:

"People who are looking for an enlarged output of gold in the next five years must not forget that some of the gold camps will be exhausted before 1910, and that others must be discovered to take their places. Because gold is outpouring now in large amount it is not proven that the outpour will continue for a generation, although the improvement of gold processes and the improvement in gold dredging and the possibilities of making good profits by handling the low grade ores in large bulk—ores that were formerly discarded as worthless—will continue for some years to increase the gold output of many districts.

"Cripple Creek will, I figure, be exhausted in five years. It is a basin, and the bottom of it is being mapped out. The Independence mine being toward the rim of the basin, struck the granite bottom first; but recently I understand from the highest sources, the Independence ground towards the center of the basin has found the granite bottom of the district."

BUTLER-LIBERAL HOIST.

Plans Are Now in the Hands of Contractor J. J. Burke.

Preparations for the installation of the new hoisting plant at the Butler-Liberal mine in Bingham are going forward, the plans now being in the hands of Contractor J. J. Burke. The hoist will be placed over the shaft which is to connect with the main tunnel workings. Upraising from the shaft is now in progress and Manager Jacobs says good headway is being made with the work.

FARMINGTON OIL FIELD.

A Newspaper Man Visits the Guffy-Galey Well in Davis County.

The Davis County Argus, which is printed at Farmington, where the Guffey-Galey syndicate of Pennsylvania has been drilling in the hope of striking oil since the first of the year, gives the following account of conditions there:

There are well circulated rumors of some definite gushing on the part of the big oil well being driven by the Guffy-and Galey syndicate. With a view to finding out just what there is in these stories an Argus man visited the big derrick just west of town and found Chief Rumbaugh had gone off to Salt Lake with a report tucked in his vest pocket on which he had to use the "code" to telegraph his eastern employers of the recent development.

The heavy six inch pipe has penetrated old mother earth to something over 2,400 feet by means of an 1,800 pound hammer, operated by a 23-horse power engine, and the last 13 days has been required to pierce an eight-foot stratum of hard stone, that is so different from anything ever struck in Utah that what little samples were brought to the surface were carefully saved and an analysis taken to determine positively what experts believe to be the last blanket over an immense oil reservoir.

That such is the case is undoubtedly true, for during the past 10 days the water that comes to the surface is strongly impregnated with gas and large globules of oil are brought up that spread over the water in kaleidoscopic colors.

The air of secrecy in and around the field selected for this immense experiment in oil boring, is almost oppressive, but still there is suppressed excitement among the men that easily portends something doing within the next day or two. One of the employes admitted that all the indications of a strike were present. The formation which usually "bottles" up a gusher is just penetrated and the softer layers are now encountered; drilling has stopped pending the filing of reports, and general preparations are being made for the final drive into marketable oil.

UNITED VERDE COPPER.

Important Smelter Changes Being Made At Jerome, Arizona.

The United Verde has been a declining factor in the copper world since 1889, when it made its record production of 44,000,000 pounds of copper, says an eastern authority.

Senator Clark, however, is now preparing to increase the output. The smelter is being rebuilt, two of the 250 tons furnaces having been replaced with furnaces of 500 tons capacity each and a third furnace of the same size will be installed. A dust chamber of unusually large dimensions is also being constructed. The company has recently re-equipped its main shaft which will afford greater hoisting facilities.

It is believed that the management is preparing to treat a greater proportion of low grade ore.

Latham Officers Elected.

The annual meeting of the shareholders of the Latham Mining comapny, operating property in the Spruce Mountain, Nevada, district, has been held and officers for the ensuing year chosen, as follows: V. J. Yunek, of Nebraska, president; George P. Sigler, West Virginia, vice president; George L. Moats, treasurer and general manager; with R. E. L. Frymeier of West Virginia, completing the board of directors.

The financial statement shows that $41,775.71 has been expended for development purposes since the present company was organized. It has been decided to go ahead with the installation of the Catrow-Snyder dry concentrating process.

DRILL HAS STOPPED.

No Work Will be Done at Guffy-Galey Well for Several Days.

W. H. Rumbaugh, who is in charge of the drilling operations at the Guffy-Galey well at Farmington, was in the city during the day and reported that he has shut down for several days to await the arrival of some heavier pipe. He expects, however, to have the works started again by Monday morning. Mr. Rumbaugh stated that the drill has encountered a very hard sandstone formation, and consequently very slow progress is being made.

As to the late reports to the effect that some oil had been encountered, Mr. Rumbaugh was evasive. He did say, however, that he has encountered nothing worth talking about.

WILL RESUME WORK.

New York-Tonopah Has Raised the Cash To Go Ahead.

The New York-Tonopah, which has been re-organized as the New York-Tonopah Consolidated, is about to commence an active campaign on its property in the big Nevada gold camp.

The exchange of stock, in accordance with the new order of things is now being made, the basis being one share of the new for two shares in the old corporation, which gives the new company an asset of 500,000 shares in its treasury.

It was stated by a local shareholder during the day that enough of the stock had been underwritten to guarantee sufficient funds to keep the work going for an indefinite period.

The New York-Tonopah is equipped with one of the best hoisting plants in the Tonopah district and at one time it was considered to be the best.

SACRAMENTO WILL PASS.

Manager Bothwell Says No Dividen Will Come Next Month.

Those who anticipate a dividend from the Sacramento on the first day of next month will be disappointed. Manager Bothwell said today that he hardly believed the company would make another distribution for possibly two months.

A large shipment of quicksilver will be made in the near future, but the returns will not be in before some time next month.

In the mine considerable development work is being prosecuted and on the whole, conditions are satisfactory.

MINERAL EXHIBIT ATTRACTS NOTICE.

Huge Galena Specimen Donated By the Honerine Mining Company of Stockton.

TO BUREAU OF INFORMATION.

Of Salt Lake Real Estate Association—Other Exhibits Being Placed In Position.

A block of galena lead ore donated by the Honerine mine to the bureau of information of the Salt Lake Real Estate association attracted much attention today. It is only three feet in diameter, but it was a good sized load for the dray that hauled it up to the association's newly opened bureau in the Moran block last night. It stands on the sidewalk in front of the building, where it will remain permanently. The ore runs 65 per cent lead, in addition to a small showing of gold and silver, and the block donated to the association is said to be worth $70.

Other exhibits were placed in position yesterday, in the building which is rapidly asuming a display appearance. Ores from all the leading mines of the state, in all stages from the crude ore to the smelted product are being arranged in the mining display. Banners announcing the status of Utah's mineral wealth have been hung on the walls, and a big banner is being constructed to hang across the street, announcing the whereabouts of the bureau.

CONCENTRATES.

Capt. J. A. Black contemplates leaving on a trip to Goldfield, Nevada, next week.

Peter S. Condie denies that he is candidate for sheriff on the Republican ticket.

The value of the ore mined in the Cripple Creek district during August is estimated at $6,790,620.

The Lost Packer mine of the Loon Creek, Ida., district, is in the market today with a car of ore.

The east is filed with rumors to the effect that the Amalgamated Copper company will absorb the Utah Consolidated.

Manager Tony Jacobson of the Columbus Consolidated and Manager J. A. Jacobson of the South Columbus, departed for Alta this morning.

President William B. Mucklow of the Majestic company returned from the Beaver county mines yesterday morning and departed for the east last night.

The ore and bullion settlements reported late yesterday were, as follows: Crude ore and concentrates, $84,600; base bullion, $37,200; gold bullion, $13,100.

The Ohio Copper company drew down the proceeds from three cars of concentrates during the day. A lot of South Swansea lease ore is in the market.

President Knox of the Montana-Tonopah Mining company departed for the east last night. The other officials, who came here to attend the annual meeting, have returned westward.

Henry Catrow, manager of the Ohio Copper company, entertained some visiting Knights Templar from his native state during the day, who are en route home from the San Francisco convention.

A letter to a well known broker in this city from a San Francisco correspondent gives out the information that work is about to commence on the property of the Pennsylvania-Goldfield Mining company at Goldfield.

Charles Jacobus and N. N. Fowler, well known capitalists of Springfield, Mass., who have been inspecting mines in Bingham, have continued their journey westward. They will look into a mining proposition not far from Los Angeles.

On Saturday night last, the Democrats of St. George precinct held a primary, at which 16 delegates were chosen to attend the county Democratic convention, which convenes in St. George on the 16th inst., at 10 a. m., for the purpose of nominating a full county ticket.

On the south side of Farmington canyon, and adjoining the Sun Dance claim on the east is located the Rudelat claim, upon which considerable work has been done and from which very encouraging assays have been made. There is a large outcropping of decomposed iron and quartz on the property, which it is believed depth will prove to run high in gold.—Davis County Argus.

Major L. P. Derby has some very good property in the Sun Dance, adjoining the Little Gem, of which a more extended description will be given as soon as the writer has an opportunity to visit it. The ore from this property carries gold and copper. There is a thin seam of talc on the foot wall that in places has shown wonderful values in gold.—Davis County Argus.

The articles of incorporation of the Goldfield Great Bend Mining company, organized in this city recently, with a capitalization of $1,000,000, were filed yesterday. The properties of the company, known as the "Great Bend" group, are located near Diamondfield, in Goldfield mining district, Esmeralda county, Nevada. The officers are as follows: Frank A. Keith, president; F. B. Cook, vice president; Peter Porter, secretary and treasurer.

TEA

Her tea marks the woman; but so does her coffee; and she marks both.

Your grocer returns your money if you don't like Schilling's Best.

STOCKS STRONG AND ACTIVE.

Blocks of Several Thousand Shares Of Several Leaders Soon Changed Hands.

PROFIT-TAKING ABSORBED.

Some Slight Reaction, but Concerted Buying of Pennsylvania Juniors Stiffened Market.

New York, Sept. 15.—The stock market today opened active and strong with blocks of 1,000 to 4,500 shares of several of the leaders changing hands. Gains ran from ⅛ to ⅝. The opening sales of Erie were 4,500 shares at 32⅝ and 32½, compared with 31¼ last night, and United States Steel preferred opened with running sales of 3,000 shares at 67½ and 67⅝, compared with 66⅞ last night.

Profit taking after the opening was well absorbed for a time, owing to the sustaining effect produced by further advances in the United States Steel stocks and Pennsylvania. The pressure of offerings made inroads on prices later, and some of the opening advances were wiped out. A drop of 2¼ in Colorado Fuel and severe pressure against Reading facilitated the decline, Pennsylvania, however, moved up again. New York Central made a sympathetic rise of 1¼. United States Steel preferred rose ⅞.

With a rally in the grain markets prices reacted and the general level fell below last night. Some of the grangers and Pacifics showed losses of a large fraction. The local tractions and smelting stocks lost 1 to 1⅝ and Union Pacific ⅞. United States Steel preferred lost its rise and other gains were reduced. There had been gains of 1¼ in Canadian Pacific and Sloss Sheffield Steel and a point in some minor stocks.

Bonds were irregular at noon.

Concerted buying of the junior Pennsylvania stocks stiffened the market, but the western stocks did not rally very substantially. The buying first appeared in Norfolk & Western, then spread in turn to Chesapeake & Ohio and Reading, and finally assumed considerable dimensions in the United States Steel stocks. New York Central touched 128. Pennsylvania rose again to 132¾ and the United States Steel stocks brought 17¼ and 67⅞ respectively, Norfolk & Western and Chesapeake & Ohio also gaining a point each and Reading recovering to ½ over last night.

LIVESTOCK.

KANSAS CITY.

Kansas City, Sept. 15.—Cattle—Receipts, 10,000, including 1,300 southerns; market steady. Native steers, 4.00@6.10; southern steers, 2.50@3.75; southern cows, 1.50@3.60; native cows and heifers, 1.50@4.10; stockers and feeders, 2.25@4.00; bulls, 1.75@3.50; calves, 2.50@5.50; western steers, 1.50@3.25.
