LOOKED OVER THE CAMP

The Klondike Boys Return from Mercur Delighted with Their Visit.

REVENUE NINE-OWNERS CAN ECONOMIZE.

The Failure to Meet Wages—Good Tally in the Columbia—Stock Brokers Improved—Mining in Idaho.

The Messrs. Kimball of Boston, Jno. Jacobs of Philadelphia and others are for a week past, or longer, guests of Mr. John Chen, E. H. Allen, and W. C. D. Allen at the Mercur camp. The Kimballs are the McCormick block, the owners of their extensive world famous reapers are interested in the mines of the Silver Lake and other mining properties, it is rumored they were looking with an eye to the future, and doubtless will be interested in the mines of Utah. Mr. Jacobs is a director in the Mercur Gold Mines company, and with Messrs. Allen and Chen had left Salt Lake on Tuesday for a visit to the mine, and returning they came to the city on Friday. Mr. Jacobs said to a News reporter that the visit was a pleasant one, that the company had made more development work than was generally known, and with greater results than had been expected. The mill is now in operation, and he was well satisfied with the work it was performing. The Messrs. Kimball, who are known to and well acquainted with Mr. Jacobs, were also very favorably impressed with the Mercur and its surroundings, and if what he has told them of the mine is borne out by the results of the mill, they will be pleased to be numbered among the Mercur people. The visitors were entertained while in the city by Mr. Chen, who is a director in the company, and who is well known to the mining men of Utah, and who is also interested in the Mercur.

The Failure to Meet Wages.

According to W. S. Hubbard, the well known mining man, the failure of the Ophir company to meet the payroll of last week was due to the fact that the mill at Ophir, in Tooele county, is making a small run of production, while the ore mined is being stored in the mine for a time when the mill will be in a position to run more regularly and more to the best advantage. Mr. Hubbard says he is now in the city, and will remain for a few days, and he is confident that the Ophir will be a valuable addition to the ranks of producing mines which averages $15 to the ton in gold, and the ledge is reported to be from 10 to 15 feet, and the showing is most promising.

Good Pay in the Columbia.

Word from the Columbia, on Lake Ill., mainly stated by J. D. Kelly, is to the effect that the mill is full of ore and the mine is in good shape. He was taking hold of the mill, the week before, Mr. Kelly says that by going back with the stuff, mill will yield over $20 per ton, and with the Columbia has a chance to make a good showing. The Columbia has a chance in the mill, which will undoubtedly mark the mining connection.

Big Force for the Western.

Mr. Dickinson came in yesterday from the property of the Western Mining company, and left today with a force of 40 men to push work upon the mine so that the stamps can be started this year. This property is one of the Mineral Point lots, and the Western is working on the west end of Stephens, though being outside of the Mineral Hill mining district. The work now started shows good values in the ore, and the company is prepared to push the work of development.

DEFERRED STOCK DIVIDEND.

Yankee Girl Orders and Filed These on the Exchange Today.

Business was much improved on the Exchange today. It actually had the tickers had orders to buy and sell stocks without hesitation whatever, and that the opportunity presented itself. As a result there was the usual supply for nearly a week, and the prices in old stock on the board showed some improvement. Yankee Girls, number bringing a good cash value of $1,041.16.

In the previous issue of the News, Eugene Jacobs wrote in the association affairs here and there a single week of the Yankee Girls, and to be interested in the Boston Block, which is now located at 40 to and round here, and this week passed the 50 mark. Dispatches with a bid of 40, but no offer received, were received. The Yankee Girls was worked, a check issued for its share at 10 cents of the 10 cents dividend declared the time. The market indicates in Deferred stock, but Grand Central, Mammoth and Ontario were fairly firm, although the week's sales in the day's business.

Sales were made in Deferred Chloride and took the initiative and sold from 10 to 15 cents and 15 cents. Crystal, the Ontario, Mammoth, Grand Central and Ontario were also sold, and Mammoth and Ontario were also sold, and the Mammoth and Ontario were also sold, and the stock going at 15 cents a share.

The closing prices were as follows:

MINING IN IDAHO.

Short Talks with Men Who are Successfully Operating Good Properties.

Among the arrivals yesterday, were the Boise Statesman, was Hon. A. J. Marshall of Salmon City, President of the mining business in his county this season. Mr. Marshall said the placer output was very satisfactory, it could not give figures by hand, because the big mining companies were very reticent and shipped their gold without making any statement regarding it, but he felt sure the output would be fully as good as last year, and he was confident the lode mines would be found to be much more productive than last year, and he felt sure that with greater facilities for getting out the ore, and with greater skill in the reduction of the ore, the output of the lode mines would be much greater than last year, and he felt sure that
