PARK CITY.

PARK CITY, UTAH, FEB. 5, 1895.

IN THE BUSTLING PARK.

Progress at the Mines and Mills—General Advancement.

From all general appearances spring has nearly arrived in the Park as the past week has been one of unusual sunshine and clearness, but still the snow stays with us pretty well. The bottom of the past few days has injured the ice shipping, but now the ground is splendid condition to receive more snow.

The several producing mines, the Anchor, Dale, Ontario, Daly-West and Silver King, have been holding down the lids on the most of the week, heavy shipments are being made from the concentrating mill every day. The Silver King has with a daily output of nearly seventy-five tons at 30 cents.

At the Daly-West work is moving along as usually and shipments of ore have been regular. During last week this mine received a new spiral engine to operate the fan and blower, and has not received a large number of 7 rails for the new workings. It is expected that hoisting will resume work in a few days, and increased ore will be taken out to the concentrator. No difficulties are to be encountered in the hoisting of the ore, and it is expected to be the output of the Daly-West, in the landlord.

At the Alliance, work on the new shaft is being pushed, and the entry with which the owners take hold of this work, now on the 7 foot they are one of striking such a large body of ore. Col. Nick Trenton, the gentleman superintendent of this property, has been in camp at work and says right with the works during his entire time.

During the many years in which this camp has been in existence, there has been no time when so much mining timber has been brought into camp as has been brought in during the past two weeks. It is a usual sight every day to see as many as twenty teams come into the camp at once, loaded down with mining timbers, and as each is put down for the timber, the surrounding country has plenty of time to circulate.

The saloons claim from the Marion mill have been unusually busy during the week, and much complaint is heard on all sides that the management does not lose the matter to hand and try to settle the case. Something ought to be done, as the injury to individuals is quite severe.

Opposition companies have been playing nightly at the two amusement halls, and Park City people have patronized them very well. Popular price shows do well here, but dollar shows might as well stay away from the camp.

The trains on the Utah Central railway have been on time every day during the week, which fact is remarkable considering the great amount of snow which the trains have to contend with between here and Salt Lake.

The city marshal has been around during the week notifying property holders that the sidewalks in front of their places must be cleared of snow, and the order is being generally complied with. Salt Lake City citizens seem a mean from Park City in the matter of keeping sidewalks clear of snow.

Deputy U. S. Marshal Timoney has been in the Park calling the week rounding up witnesses to be taken to Ogden the grand jury at Salt Lake on several different cases. In one day the Park City delegation numbered fifteen, and more yet to come.

The ice ponds below town have about completed storing their crop of ice, and for next summer there will be no lack of this needed commodity. The Lodge ice company will soon commence shipment of ice to Salt Lake to store up their large home house.

The doctors report the number of cases of sickness as being small for this time of the year and during the month of January only four deaths occurred in the camp.

Ten cars of blacksmith coal from Crested Butte, Colorado, arrived in the Park during the week.

The case of salon Hahn, which was decided against him in the police court for fast driving, has been appealed to the district court for trial. The cause for fast driving is said to be sufficient so far, and the case will by greater heats it is likely settled.

The men at both the Daly and Ontario are to be paid all back wages the early pay-day will be much appreciated by all. WILL.

"Can you give me a little breakfast, sir?" pleaded the tramp. "I'm hungry and cold. I dropped my last nickel, and the rain came in shortly."

"You should have got in between the sheets," said the hard-hearted man as he motioned him to the door.—Boston Home Journal.

PAYSON.

PAYSON, UTAH, FEB. 7, 1895.

Notes and News.

A case of typhoid fever is reported in the family of Mr. Hanson Dalton, her eldest son, Lafe, being afflicted with the dread disease.

Mr. David Sargent, son of David and Fanny Sargent, and Miss Rosa Z. Wright, daughter of Bishop Lorenzo C. W. Wright, were joined in the bonds of matrimony on Tuesday 12.

A dance is to be held at the Opera House in advertised for tonight and a valentine party will be given at the same place on Thursday night next.

For several years so all difficulties have arisen concerning one of the large streams of business property in Payson, owned by the Douglass estate, opposite the flour mill, and we understand the parties interested have agreed to make it out in the matter there is a permanent settlement. During the last few days some very good concrete work has been put down and the sidewalk in front of the store, and the main entrance is being filled in proper and further work, further improvements will be undertaken by all who do business in the world centered and prosperity of Payson.

Latest reports from the bedside of Mrs Adelia Wilcox, the Mr. V. Ann Wilcox, who is dangerously ill at Fort Peck, show that the condition of the young lady is rapidly improving.

One of the pleasantest outside parties of the season was tendered Professor Spencer's dancing class on Monday night at the residence of the members of the Brown ward choir. Mr. Dunn has given the world other big surprises and regular bookkeeping shows his expenditures and to monitor care that leaves the surprise is a work of appreciation and esteem. The evening was pleasantly spent in singing and other recreations.

Mr. Ralph Archbold or "Alaska Wright," as he is more popularly known, intends spending most of the city in New York, where he has a large interest in a silver mine in a large copper house. Mr. Wright is one persons and citizens in the intending, and it is also the place of his birth.

Mr. Nephi Fillmore, the grocery man, has been confined to his home for several days with a severe attack of rheumatism and kindred troubles.

A grand reunion of veterans of the Black Hawk and other Indian wars, resulting in and around Payson, was held at the Opera House on Wednesday last. A program of exercises was rendered in the afternoon at which appropriate speeches were made by Messrs. J. S. Page, W. S. Pace, Thomas R. Daniels, George W. Lambert, George Hunt, Daniel Stark and others, songs rendered by Miss Emma Romney and Mr. Isaac Hansen, accompanied by the Payson Silver band. A number of the legal of the good things of the earth were then dispensed by those in attendance and dancing indulged in until a late hour.

Messrs. Frank D. Hatch and O. A. Dansie have built photogen gallery under their and report business good for this season of the year.

Miss Elizabeth Crook has accepted a position as assistant clerk in the postoffice here.

Three fine locks ply between town and the railway depot and meet every passenger train. Although one could do most accommodate the traveling travel, the office is stingy of their friendly favors to the old law that "competition is the life of trade."

A very enjoyable concert was given at the Lyn Academy on Tuesday evening by Mrs. Mary Yates Francis, assisted by her pupils and other musical people. The audience were all well rendered, but the child was too patronized as largely as it merited.

A musical performance by local talent will probably be an attraction of the near future.

The snow is fast disappearing and the weather is warm and unfinished.

BARNYARD MANURE.

Important Conditions Which Determine Its Value—How It Is Best Applied.

Barnyard manure is the most important economic resource of the farm. In some cases the value of the manure is followed to cattle feeding to convert largely if not entirely to the profit of feeding.

The amount and value of manure produced by different kinds of farm animals may be judged from the following summary, which is the result of a number of the Middle States: Horses, 15.1 pounds of manure per day, worth 1.3 cents; cows, 37.8 pounds, worth 1.7 cents; young cattle, 25.9 pounds, worth 16.7 cents; sheep, 14.1 pounds, worth 1.7 cents; and hogs, 16.9 pounds, worth 2.4 cents, making value different of value on market prices of commercial fertilizers.

The manure is the most valuable part of the articles of animals. It is rich in nitrogen and potash, but deficient in phosphoric acid. It should, as a rule, be used in connection with the soil thing, the one that supplying the deficiency, the other and feeding a more even and balanced ration.

Barnyard manure is a very valuable fertilizer. The conditions which determine its value are not one kind of material used and the quality of food, personal of other and method of management. Its value is determined by the value of its manure is determined by the value of the food that by any other means. The amount of fertilizing constituents in the food also stand in close relation to those in the food, as regards the ratio of nutrient proteins. Concentrated food, as oil, such as meal, cottonseed meal, linseed meal and wheat bran stand first, for instance plant food, as grain, grass, clover, Hungarian Hay, straw, cornstalks, etc. Roots and succulent food, such as beet, turnip, and mangel wurzels, last.

The determination of manure results from four chief causes—fermentation and leaching. The fifth may be added, namely preserved by the use of absorbents and preservatives, such as gypsum, superphosphate and Eleat and by keeping the manure moist and compact. Loss from leaching may be prevented by storage under cover or in tight pits. Fermentation and leaching ought to be avoided, and methods and methods of preservation by the effort to be sought. To this end it is advisable to save the manure from the effects of storage thoroughly in the heap.

When practicable, it is best to apply manure in the fresh condition. If the preservation of the mechanical condition of the soil is the object sought, fresh manure is best for this purpose to keep soils and well aired manure to light soils. When greater action of the fertilizing constituents is desired the best results will probably be obtained by applying fresh manure to the light soils, although excessive applications should be avoided on account of the danger of "burning out" of the soil in dry seasons. Fresh manure has a fertilizing effect and is better suited to grasses and forage plants than to plants grown for seed, such as cereals. Direct applications to fruit trees, such as apple trees, peaches are injurious often proves injurious. The manure should be spread which, exposed to the field and not left in heaps to leach. One of the best ways to utilize barnyard manure is to combine it with such materials as superphosphate, gypsum, potash, and other ingredients. The best results are likely to be obtained in using commercial fertilizing materials in connection with barnyard manure, either in compost or separately. As to soil needs, barnyard manure is lacking in phosphoric acid, and in many cases need not be applied so frequently as the more potent and quick acting superphosphate, potash and nitrogen salts, etc.—Farmers' Bulletin.

The Farmers' Institutes.

The season for farmers' institutes is here. Of all plans yet tried Wisconsin's is perhaps the most successful. Times the world is under the direction of the college of agriculture, with a competent superintendent in charge. In some states the work based of agriculture has reached, while in others a certain sum is given each county annually which is used for institute purposes. But in many cases this work is monopolized all, and the farmers are gotten by a few leaders in the community. While it is well to get hearty men home interested in the institutes, the farmers' institutes are for the farmers first, last and all the time. Agricultural papers are now carbonadoing discussions.

AUTOCRACY PALACE,
ST. PETERSBURG, DEC. 6, 1894.

"HER MAJESTY, EMPRESS MARIE FEODOROWNA, FINDING GREAT BENEFIT FROM THE USE OF YOUR TONIC-WINE, REQUESTS THAT A CASE OF 50 BOTTLES VIN MARIANI BE SENT IMMEDIATELY, ADDRESSED TO HER MAJESTY THE EMPRESS."

Mariani Palace,
St. Petersburg, Russia.
41 Boulevard Haussmann,
Paris, France.

VIN MARIANI

"The Ideal Tonic Wine."

Fortifies, Nourishes and Stimulates the Body and Brain.

Restores Health, Strength, Energy and Vitality.

MARIANI & CO., 52 W. 15TH., New York.
Sold by all druggists.

PIONEER MONUMENT.

St. Johns, Arizona, Respects the Doughty Pioneers.

CONTRIBUTIONS NOT SHIFT BUT SURE.

Some Good Reasons Why the People Should Come Forward Now and Build the Historic Monument.

LETTER FROM THE FIRST PRESIDENCY.

Salt Lake City, Jan. 25, 1895.

Notice is hereby given that contributions to the monument to be erected in Salt Lake City in memory of Brigham Young and the pioneers will be called, and until further notice, be acknowledged through the columns of the DESERET NEWS. It is expected that approval for the collection of funds or title worthy purposes will be solicited in early week in all the Stakes, and that the money, with the lists of names of the contributors, will be forwarded as frequently as convenient to Heber M. Wells, secretary of the Pioneer Young Memorial Association, Salt Lake City, who will see that same are properly acknowledged in the newspapers mentioned. We earnestly hope that the people will respond promptly and promptly to this call, so that it may be the monument may be completed, dedicated and devoted to the purpose by the 24th day of July next.

WILFORD WOODRUFF,
GEORGE Q. CANNON,
JOSEPH F. SMITH,
First Presidency of the Church of Jesus Christ of Latter-day Saints.

ST. JOHNS, ARIZONA, Jan 6, 1895.

The Brigham Young Memorial association gentlemen: Enclosed find the following contributions to wind in behalf of the Pioneer monument:

From Salt Lake City.

John R. Bean, 5th ward	$ 1 00
John T. Lewis, 5th ward	1 00
Mrs. Ann Lewis, 5th ward	1 00
Thomas Pickard, Pioneer Stake Tenders	1 00
Total	4 00

From St. John's, Arizona, Jan 6, 1895.

A. C. Gibson	$ 1 00
J. S. Lemon	1 00
Thomas Lemon	1 00
Alma Lemon	1 00
J. J. Lemon	1 00
J. J. Jackson	1 00
J. H. Jackson	1 00
Mrs. Jackson	1 00
Mahlon Lemon	50
Mahlon Lemon, Jr.	50
Mahlon Lemon, 3d	50
Mahlon Lemon, 4th	50
Mahlon Lemon, 5th	50
Mahlon Lemon, 6th	50
Mahlon Lemon, 7th	50
Mahlon Lemon, 8th	50
Total	13 00
