MINING, BUSINESS AND STOCKS.

TINTIC STOCKS IN DEMAND TODAY.

Star Consolidated Sold at Advance On Salt Lake Mining Exchange This Forenoon.

TETRO BUYERS WERE SCARCE.

Yankee Con. Remained Firm at Saturday's Prices—New York Bonanza Higher—Forenoon Quotations.

The week opened with the sale of 26,840 shares of mining stocks on the mining exchange this forenoon, for which was checked out the sum of $7,468.63.

Tintic stocks were still in big demand and in most cases displayed more strength than on Saturday. Star Consolidated opened in fine order and it remained so to the end of the calls. Tetro was offered at 37½ cents, but there were no buyers in the pit willing to pay that figure. Yankee Con. held up to last week's closing quotations, but none was brought out. Martha Washington came out in good form on the open board; it selling up to 2½ cents.

Sacramento seemed to be in fair demand at an advanced price. Rumors have been persistent for some little time that there is a likelihood of an increase in the regular dividend soon; this, however, is emphatically denied by the management. At the present rate of production an "extra" at the close of the year may not be unexpected.

New York Bonanza stiffened, closing with 28½ cents bid for it.

The closing quotations and sales were posted as follows:

WHEELER & WILSON SHIPMENT

Initial Lot to Come From Big Cottonwood Property this Week.

A shipment of ore, the initial lot, will come from the Wheeler & Wilson mine in Big Cottonwood canyon this week. E. W. Kelly, one of the largest stockholders ,paid a visit to the property yesterday and returned last night very well satisfied with the progress being made with development work. The upraise being made on the ore indicates that the vein is permanent. A tunnel is being run to tap it lower down the mountain and considering its dip, as shown in the upper workings, it should be encountered within the next 30 or 40 feet.

AT THE UTAH MINE.

New Shoot of Ore Has Been Opened on The Fifth Level.

A letter received at the offices of the Utah mine this morning brought the information of another new strike in that property. All the officials know about it was the simple statement that "a shoot of ore from one to two feet wide has been encountered in the face of the east drift on the fifth level."

In speaking of the general conditions at the mine the writer stated that they have never looked better and in the places where ore has been previously exposed improvement is noticed all along the line.

MINING IN IDAHO.

Wayne Darlington, State Engineer, Speaks of White Knob Mine.

Wayne Darington, state engineer of Idaho, who has been in attendance on the Irrigation congress at Ogden is registered at the Knutsford. Mr. Darlington is a well known mining engineer of wide experience, who inaugurated the immense undertaking of the White Knob Copper company at Mackay, Idaho, and who is at present opening the Valley Creek mine in Stanley Basin. Mr. Darlington says the White Knob company is developing into what its friends promised for it two years ago. The Valley Creek mine is adding 10 stamps to those already installed, making 20 stamps in all, all of which will soon be dropping on ore.

As state engineer, Mr. Darlington is thoroughly familiar with the irrigation projects now under way, all of which, he says, are making rapid progress. He says Idaho is exceedingly prosperous, and that the era of prosperity has only just begun.

TINTIC ORE SHIPMENTS.

District Contributed 108 Car Loads to Smelters Last Week.

Special Correspondence.

Eureka, Sept. 19.—The Eagle and Blue Bell is again entered among the list of shippers. One hundred and eight car loads of ore left the Tintic district for the smelters this week distributed among the different mining properties as follows: Grand Central, 19; Carisa, 1; Mammoth, 5; Black Jack (iron), 1; Ajax, 2; Lower Mammoth, 1; Dragon (iron), 16; South Swansea, 1; Martha Washington, 2; Whiting & Co., (iron), 1; Star Consolidated, 3; Bullion-Beck, 6; Gemini, 12; Centennial-Eureka, 25; Eagle and Blue bell, 2; Yankee Consolidated, 6; Uncle Sam, 2; Tetro, 3.

Two cars of ore are on the tracks at the Tetro and Little Chief mine awaiting shipment.

Majestic's August Pay-Roll.

Asst. Treas. Merriman, of the Majestic Copper Mining & Smelting company, will leave for Milford this evening with the pay checks covering the August pay rolls which became due today. Altogether the checks aggregate about $20,000.

Mining Property Transferred.

Special Correspondence.

Provo, Sept. 19.—D. B. Higgins et al have conveyed by mining deed for a consideration of $1 and other valuable considerations, to the Colton Wax Mines and Oil company, the following mining property: The Colton Wax mines Nos. 4, 5, 6 and 7.

HOOSIER OIL FIND.

Second Important Strike in the Bonanza Fields in Wyoming.

(Special to the "News.")

Cheyenne, Wyo., Sept. 19.—Word has been received here of a second strike of oil by the Hoosier company in the Bonanza oil fields southeast of Basin City, in the Big Horn Basin. About a month ago, the Hoosier company struck a flow of oil at a depth of about 1,100 feet. The well was plugged, the rig and machinery moved to another site, and a new well started. The second flow was struck at a depth of a little over 800 feet. Operations have ceased for two weeks to await the receipt of oil tanks and additional machinery. The well will be drilled deeper and then "shot" to thoroughly test the fields. The casing for the first well is completed. A third well will be drilled this fall.

The Hoosier company, which is composed of Indiana and Illinois capitalists, is now satisfied that aside from the product of the Bonanza fields being the richest illuminating oil ever found in the world, that it also exists in large quantities. The company has secured big tracts of land in the fields, and is preparing to operate on a large scale. The Whittier company, which was the first to strike oil in the fields and which has a plugged well about four miles from one of the Hoosier wells, is also securing additional land and will resume operations in the spring.

Thousands of acres of land have been staked, but it is predicted that the real rush will set in in the spring. The fields are believed to be from 75 to 100 miles long and from 30 to 60 miles wide. Expert oil men believe that the Bonanza fields will soon prove to be the greatest the world has ever seen.

AT MAJESTIC MINES.

Railway Grade to Ore Bins Will be Completed by Tonight.

Manager W. H. Alexander of the Majestic Copper company has returned from a trip to camp.

Ten teams are at work on the railroad grade leading to the tressles to be used as approaches to the ore bins and the contractor expects to have the job completed by tonight. The San Pedro railway has the material on the ground and as soon as the graders finish, track laying will commence, so it will only be a matter of a few days until all the switches and approaches to the smelter will be completed and ready for use.

The teams hauling ore from the mines have delivered upwards of 800 tons. The bins will hold about 1,500 tons; the platforms built for that purpose will make room for 500 tons more, so by the time every detail is attended to and "blowing-in" day arrives there will be a reserve of at least 2,000 tons of ore on hand.

TROUBLE OVER TETRO STOCK.

The Departure of Former Broker N. A. Page is Vividly Recalled.

There is likely to be a contest over the ownership of 300 shares of Tetro stock which was issued to Peter Greaves of Ephraim, but which is now in the possession of Joseph Oberndorfer. The latter claims the stock belongs to him by right of purchase from the National Bank of the Republic when the affairs of the late broker, N. A. Page, were closed out. Anyway Mr. Oberndorfer believes the bank is at least responsible to him, and if anyone is to stand a loss he should not suffer. Mr. Greaves claims that the stock is his and that he sent the certificate, number 1281, to Broker Page with intentions to sell. He has submitted an affidavit to the company setting forth this fact; that Page simply held the stock in trust for him until a certain price should be obtained for it. Upon the showing made to the company the latter will refuse to re-issue the certificate until the rightful ownership is determined.

At Bamberger-DeLamar Mines.

The De Lamar Lode in speaking of conditions at the Bamberger-De Lamar mines says:

"The smoke at the refinery proclaims the fact that the work of reducing the auro-cyanides to gold bricks has commenced. There is a large stock of product on hand and it will take some time to catch up.

"Around the mill there is considerable work to be done, such as putting in the windows, repairing places that necessary alterations have created, running steam pipes through the buildings and in other ways preparing for the approaching winter.

"Owing to the work going on for increasing the power of the plant in the Wash Superintendent Keith availed himself of the opportunity and closed the mill down Friday to do some repair work. The motors, some of which have been overtaxed, have been changed, some leaks along the pipe line have been fixed and in short every effort is being made to have things in the best condition, so that when the power plant is again ready the mill will be able to run to its full capacity, which is about 600 tons per day."

HIGH GRADE ORE FROM TETRO MINE.

Superintendent Brown Says He Will Get Out Several More Car Loads This Month.

ACTING MANAGER WOOLLEY

Visited That Tintic Property Yesterday—Conditions at the Martha Washington Mine.

Among those who patronized the Rio Grande Western excursion to the Tintic mining district yesterday was Acting Manager Edwin G. Woolley, Jr., of the Tetro Mining company. During the day he escorted a number of persons through the property, among them being Lafayette Holbrook of the Grand Central Mining company, Manager Alviras E. Snow of the Martha Washington, and Broker M. M. Miller.

In speaking of conditions at the mine today Mr. Woolley expressed a sense of gratification at the manner in which things are working out since the Tetro became so prominently before the public. The drifts are proceeding both ways on the vein with nothing to indicate anything discouraging. In the upraise ore is being broken down and Supt. Brown believes he can land four or five more cars of high grade product at the samplers yet this month.

The location of either wall is yet to be determined. Apparently there is no limit to the vein and what was once thought to be the hanging wall has since proven to be an intrusion in the shape of very high grade silver-lead ore. Everywhere, Mr. Woolley says, the ore is strong and the vein bears indications of permanency.

After seeing the sights at the Tetro the party was escorted underground in the Martha Washington, by Manager Snow. Mr. Woolley says he was very agreeably surprised with what he saw there, and he was willing to be placed on record as saying that the Martha Washington mine is in a much better condition than ever before. He paid a nice compliment to Supt. Frank Jarline, who, he says, is doing some telling work.

In the drifts run on the Antelope and Martha Washington veins and also in the upraise in the latter is a favorable showing of ore.

Manager Snow states that the shipments now being made more than pay the expense of operation.

SILVER QUOTED AT FIFTY-NINE TODAY.

Producers have no reason to feel bad over the condition of the metal market today. Silver only needs another shove to land it at 60 cents; the quotation today being 59 cents. This is exactly in line with the prediction made some time ago by President Jacob Bamberger, of the Daly-West Mining company, that the white metal would rise to 60 cents before being quoted at 50 cents again. Mr. Bamberger is probably the best posted man in Utah and is a recognized authority in such matters. Silver is quoted higher today than it has been in almost three years.

CONCENTRATES.

W. C. Thomas, of the Newhouse mines has returned from a trip east.

Two cars of Tetro second class ores are at the samplers today.

Twenty additional men have been put to work at the Gemini in Tintic.

The Wide West mill at Cherry Creek, Nevada, is in successful commission.

The annual meeting of the Wabash Mining company is scheduled for this afternoon.

Samuel Newhouse is expected to arrive in the city soon. He may be here the latter part of the week.

Joseph Dederich has gone to Beaver county to look after the wrok in progress along the Wah Wah springs pipe line.

President John Dern, of the Consolidated Mercur Gold Mines company, has returned from a flying business trip to Nebraska.

The excavations for the new Uncle Sam mill in the Tintic district are completed and the work of laying the foundations have commenced.

J. B. Thompson departed last Saturday to inspect Nevada mining interests. He will visit Ely, Munsey Creek and Cherry Creek before returning.

W. L. Maas manager of the Superior-Alta property, has returned from camp where he arranged for the commencement of development work there today.

A rich strike was made in the Buck this week. A four-foot vein was uncovered carrying about 100 ounces in silver and $9 in gold to the ton.—Stateline Oracle.

Sam C. Dunham, editor of the Tonopah Miner, is in the city for a few days' vacation. He was a delegate to the Irrigation congress at Ogden from Nevada.

The Shawmut & Nevada Co. are constructing a new road over which the ore from the Buck and Ross mines will be transported to the new mill.—Stateline Oracle.

The La Plata Con. Mining company operating in the La Plata district north of Ogden, is about to let a contract for 250 feet of additional tunnel work. Developments at that property are said to be quite satisfactory.

A three-foot vein of $100 ore has been encountered in the lower workings of the Homestake mine. This valuable property under the management of Mr. Hackett is rapidly developing into a bonanza.—Stateline Oracle.

A message was received from Hartford, Conn., this forenoon announcing the arrival of President W. B. Mucklow of the Majestic Copper company. A meeting of the directors of the company will be held there tomorrow. Mr. Mucklow is expected to return before the close of the present month.

The reports of the experts employed to examine the properties of the Pioche Consolidated at Pioche have been submitted to Senator W. A. Clark, and the probability of a deal being consummated soon is favorable, which will mean the early building of a branch of the San Pedro into the famous old camp.

J. F. Gibbs has sold the Marysvale Free Lance and will hereafter devote his time to his various mining interests around Marysvale. The purchasers are A. B. Williams, John W. Woodring and B. Stringham Young, of Richfield, who will continue the publication of the paper.

Water flow from Dalton & Lark long tunnel is again increasing and is now not less than 2,200 gallons. Breast of tunnel was yesterday in quartzite. The 1,050 level of the mine is now visible for the first time since the company began operations, and work will soon begin there.—Bingham Bulletin.

The Clara Copper company is planning to install a copper leaching plant at its property 20 miles south of Thompson's Springs, in Grand county. W. C. Tracy, who has been in charge of the Wheeler & Wilson mine in Big Cottonwood canyon, has accepted the superintendency of the Clara and has taken his departure to assume his new duties.

The entire working force at the Mammoth mine was laid off again Sunday. For some time the company has been trying to make arrangements with the railroads and smelter companies whereby the lower grade ores from the mine could be marketed. On the 17th of last month the railroad and smelter put a satisfactory rate into effect temporarily. Saturday last the smelting company served notice that no more ore would be taken until other arrangements were made, and consequently Supt. McIntyre closed the mine down. About 75 men are affected.—Eureka Reporter.

OPENED LOWER, TENDENCY UPWARD

U. S. Steel Largely Dealt in, First Advacing and Then on Second Sale Receding.

DECLINES RATHER GENERAL.

After Shorts' Demands Had Been Satisfied, More Active Specialties Fluctuated Irregularly.

New York, Sept. 21.—A few stocks opened lower than Saturday's close, but the general tendency was upwards. United States Steel gained ⅜ on the transfer of 3,500 shares but the next 4,000 shares carried it back ¼. The professionals took advantage of the higher opening to realize. Liquidation of the specialties and an attack on Erie induced liberal offerings at other points. United States Steel was forced down to 17¼ and preferred to 67⅝, but the weakness of kindred stocks was not so marked as last week. Standard stocks dropped 2 points, and Smelting, Amalgamated and Republic Steel 1 point. Declines elsewhere included 2 in General Electric, 2½ in United States, 3 in Cast Iron Pipe and about a point in Erie and the second preferred, St. Paul, New York Central, Northwest, and in a few others of less importance. The market made some recovery for a time when Smelting got to 43, but the rally did not hold.

Prices yielded after the demand from shorts in some of the industrials was satisfied. United States Steel fell to 16⅞. Anaconda broke 5½, Railway Steel Spring 2¾ and Northwestern 2½. Declines reached 1 to 1½ in Pennsylvania, Reading, Erie first preferred, Missouri Pacific, Rock Island, Wabash preferred, Chicago & Alton, Amalgamated Copper, Tennessee Coal, American Car, Pressed Steel Car and Brooklyn Transit. The market was dull and steady at noon. Westinghouse Electric rose 9.

Bonds were heavy at noon.

The more active specialties fluctuated irregularly and were considerably less active than during the forenoon. Anaconda and American Car recovered fully while American Car Spring extended its loss to 3¼ and United States Steel after stiffening slightly fell below 17 again. Railroad stocks continued heavy and more neglected.

Western stocks recovered slowly to last week's final prices on small purchases. The coalers and various iron and steel stocks ruled above the lowest, but the demand became light on the rise. Some minor stocks made wide changes. Toledo, St. Louis & Western losing 4, Peoria & Eastern 3, Des Moines and Fort Dodge and Lackawanna 2 and Minneapolis & St. Paul 1⅛. Westinghouse Electric declined 11. Hocking Valley advanced 2 and Sloss-Sheffleyw Steel and pressed Steel Car preferred 1@1¼.

LIVESTOCK.

CHICAGO.

Chicago, Sept. 21.—Cattle—Receipts, 20,000. Steady. Good to prime steers, 5.40@5.80; poor to medium, 3.90@5.00; stockers and feeders, 2.40@4.15; cows, 1.50@4.50; heifers, 4.00@4.75; canners, 2.50@3.00; bulls, 2.00@4.50; calves, 3.50@7.00; Texas fed steers, 3.25@4.40; western steers, 3.25@4.50.

LIVERPOOL.

Liverpool, Sept. 21.—Close: Wheat—September, 6s 3¾d; October, 6s 4d; December, 6s 4⅜d.

CHICAGO WHEAT.

Chicago, Sept. 21.—December wheat opened ⅝@⅞ lower at 78⅜ to 78⅝, strengthened to 79⅛ on buying by locals and then held at about 78⅞.

Later the market gave way before large quantities of long wheat and the close was a shade above the bottom, at 78¼@78⅜ for December, a loss of 1¼@1⅜.

WOOL.

ST. LOUIS.

St. Louis, Sept. 21.—Wool—Steady; territory and western mediums, 17@18; fine medium, 15@17; fine, 15@16.

BAR SILVER.

New York, Sept. 21.—The prices of commercial bar silver advanced to 59 cents an ounce today, the highest price since July 1, 1901.

BUSINESS NOTES.

Mrs. Anneta C. Banker has purchased the seven-room house of Mr. Robert Conhams, located on Cannon street, the price paid being $1,600. The Brown real estate office made the transfer.

* * *

There has been a slight delay in completing the west wall of the Federal building owing to a mistake in the plans as to the location of a window. This has been rectified at Washington, and the wall will shortly be up to the second story. The pillars for the second story are now going up.

* * *

The Liberty Park greenhouse will be enclosed in three weeks, so that plants placed there then will be protected from the frosts.

* * *

F. M. Teets has bought the residence at Ninth East and Sixth South streets from J. D. Reavis for $4,500.

* * *

The contractor says that the Emery-Holmes apartment building will be under roof in six weeks, and three carloads of roofing slate are already here. Most of the suites of rooms are already rented.

* * *

Manager Rust of Dun's agency reports local business as picking up along all lines as the cool weather continues.

* * *

All Hallows college opens this year with the largest number of students in its history. Students have come from Wyoming, Nevada, Utah, Montana, Idaho and Nebraska. The day school has doubled in attendance that of former years, and classes are in full working order, with 35 applicants for membership in the brass band in addition to those already in. The old chapel is being fitted up for a musical studio, intended to be the finest in the city. Five football teams and gymnasium classes have been organized in the school.

* * *

Architects J. A. Headlund & Co. have completed plans for a $4,500, two story brick and stone residence for Perry J. Anson at Second and F. streets, and the contracts were let today, as follows: Cushing & Chapman, mason work, $1,400; W. P. Howley, carpenter work, $1,533; Green & Reeve Co., plumbing, $317.

* * *

Building permits were issued during last week as follows:

Joseph Bond, 927 west North Temple, brick cottage, six rooms, $1,700; Joseph Bond, 937 west North Temple, brick cottage, six rooms, $1,700; Joseph Bond, 928 west South Temple, six room cottage, $1,700; Joseph Bond, 938 west South Temple, six room cottage, $1,700; Joseph Dederich, 643 east Second South, 12 room brick residence, $8,000; G. Ashliman, 804 west Seventh South, two room brick cottage, $250; J. B. Bean, 72 Eighth East, brick addition, $200; A. Burlington Route

Burlington Equipment.

The Burlington has the best equipment made on all its through trains. The strongest he biggest cars, the safest cars. It doesn't make any difference what kind of cars—coaches, chair-cars, tourist-cars, palace sleeping-cars—they're the best that money can buy.

It's the cheapest plan. We don't have break-downs from poor equipment, and our patrons are pleased.

Chicago flyers leave Denver 4:15 p. m. and 9:45 p. m.; to St. Joseph, Kansas City and St. Louis, 2:00 p. m. and 9:45 p. m.
