MINING, BUSINESS AND STOCKS

AUSTIN MINES GETTING ACTIVE

F. D. Gordon Talks of His Home Camp and Incidentally Boosts For Salt Lake.

PROPERTIES BEING REOPENED

Which Were Once Great Producers—Visitor Identified With Nevada Mining and Banking.

F. D. Gordon, father of Louis D. Gordon the discoverer of the rich gold ledges of the Round Mountain district, came in from the west yesterday afternoon and will accompany his son east next Saturday to be present on the occasion of the marriage of the latter to an accomplished New York girl, which takes places early in July.

The senior Gordon resides at Austin, Nev., where he has been engaged in the banking and mining business for a number of years. Of conditions in this old time camp, Mr. Gordon says improvement is noticed daily, due to the interest being taken in mining in that section. Some of the old mines which produced extensively years ago are being re-opened and indications point to a long season of prosperity. It begins to look like old times again for Austin.

Mr. Gordon is greatly impressed with the beauty of Salt Lake and has a longing to make this city his home at no distant day. "I have realized the geographical importance of Salt Lake City," said he today, "for a long time, but this fact was never impressed so forcibly upon my mind as it has been during this visit to your city. I have noticed vast changes since I was here last. Surrounded as it is by so many mining districts, productive of almost every known metal, with ores coming from all of them for reduction in the greatest smelting plants of the world, with railroads radiating in every direction and a climate that cannot be excelled anywhere, I cannot see what is going to prevent Salt Lake becoming an immensely large city."

PARK CITY HAD INNING.

Bulk of Forenoon Trading Done in Stocks From That Camp.

Park City stocks attracted the most attention during the forenoon sessions of the Salt Lake Stock & Mining exchange today. Daly Judge was bid for and 400 shares came out at $12.12½ and $12.25. A small lot of Daly West sold at $16. New York Bonanza starting at 27 cents, fell to 26 and then back to 27 again. Little Bell weakened, while Thompson went at 43½ and 44 cents. Honerine of Stockton participated at $2.50. Lower Mammoth, Carisa and Beck Tunnel were the only Tintic stocks that participated, while Alta was represented by Columbus Consolidated, which fell to $8.55. The closing quotations and sales were:

DIAMONDS IN THE U. S.

Precious Stones Have Been Found But Location is Unknown.

Never before in the history of the United States has there been such a demand for diamonds as there was in 1905. Large quantities were imported, but the country produced none. In 1903 it produced diamonds to the value of $50, in 1901 it had an output worth $100, in 1900 its production was valued at $150, and in 1899 the country boasted native diamonds to the value of $200. Diamonds have been discovered in the United States in four different regions, but their actual place of origin is in every case unknown. All have been found in loose and superficial deposits, and all accidentally. It is not at all improbable, however, that some day the original sources of this queen of gems may be discovered.

The high price of diamonds has made the recent search for these precious stones in the United States and Canada keener than ever before. A careful watch for diamonds was kept during the examination by the United States geological survey of many samples of gold and platinum sands at the Lewis and Clark Exposition in Portland, Or. A look-out for diamonds has also been kept by a number of people who have been dredging for gold on an extensive scale in the rivers of California. In neither case have any finds been reported.

The occurrence of diamonds in the United States has been treated in some detail by Mr. George F. Kunz in a report which the Geological Survey will soon publish.

FROM PARKER MOUNTAIN.

Idaho District Is Looking up—Shipment of Ore Coming.

O. F. Riebel, who is extensively interested in the Parker Mountain, Idaho, district, is in the city and brings some cheering news from that northern mining region, where recent developments indicate that it is going to take its place among the bonanza fields of the neighboring state. Mr. Riebel is particularly interested in the Ed. Williams group of lode mining claims. The surface, contains much float carrying high values in gold, but up to within the last seven weeks, the location of the ledges from which this rock came could not be definitely determined, and then only after taking a long chance and spending a great deal of money in tunneling into the mountain. The ledge is a fissure in porphyry and contains values up to $500 to the ton, with about 15 per cent of the metals showing in silver and the balance in gold.

Another tunnel is being pushed ahead and is intended to cut the ledge lower down, or at about 155 feet. This tunnel has been run for a distance of 230 feet and 100 feet more ought to take it into the ore.

In speaking of the Parker Mountain country in general, Mr. Riebel says although the operations in the camp are limited to but a few concerns, conditions are good and wherever development work is being done quite satisfactory results are obtained. Were it not for the fact that the region is yet lacking in transportation facilities, Mr. Riebel believes the country would develop very rapidly and that it will become the location of some big producers.

At the Parker Mountain mine, operated under the direction of Clarence E. Allen, mine manager of the United States Smelting, Refining & Mining company, development work is progressing steadily and a shipment of high grade gold ore is being brought out as far as the first wagon road on pack animals. The ore will be thence conveyed to Mackey and forwarded by rail to the United States smelter at Bingham Junction.

TURQUOISE IN FAVOR.

The turquoise mines of New Mexico and Arizona have lately not been as productive as formerly, says Mr. George F. Kunz in a report on the production of precious stones in 1905, which the United States geological survey will soon publish. The turquoise properties of California and Nevada have, however, been increasing their output. Considerable quantities of turquoise have been taken from the mines in the desert region of San Bernardino county, Cal. Many of the stones range from 50 to several hundred carat in size. Some of them have sold as high as $1,100 each. The color is pale, but it has gained favor, and large quantities of the stones have been sold in the form of beads for necklaces.

BULLION, NEV., DISTRICT BUSY.

A Goldfield Mining Man Predicts This Camp is Going to Have a Boom.

ENGINEER OF SAM. NEWHOUSE

Goes in to Examine Property—Colorado Mining Men Reminded Of Cripple Creek.

A correspondent writing from Bullion, Nev., states that much interest is being manifested in that camp at the present time by Goldfield, Salt Lake and Denver mining men. It is claimed that those hailing from the Centennial state have found geological conditions there very similar to Cripple Creek and naturally the camp has its attractive features for them.

James T. O'Hara, a broker of Goldfield and Manhattan, was in camp last week and became enthusiastic over the possibilities of the district, predicting a big rush within 60 days. He secured short time options on several claims.

Edward Harper has sold two claims to Colorado Springs mining men among whom is Congressman Brooks. Active operations have commenced with H. A. Mills in charge. Rich ore has been uncovered at the surface in a ledge that measures six feet. The ore runs from $62 to $800 in gold and occurs in a phonolite dyke.

A representative of Samuel Newhouse has been looking over the camp and inspected the property of the Gold Quartz company. The Giant shaft of the Gold Quart company has been sunk to a depth of 50 feet where three feet of ore has been uncovered that average $200 a ton. This company has several shafts in which they have shipping ore.

A new town has been platted on ground near the Dutchman mine where the rich strike was recently made and about a half mile east of Montgomery's. It has been named Tenabo, after the high peak on the Cortez range and there is splendid opening for lodging houses and restaurants as many mining men are coming in on reports of the sensational strikes recently made.

SEARCHLIGHT MINES.

Much Activity Being Displayed in This Southern Nevada Camp.

Special Correspondence.

Searchlight, Nev., June 18.—The Vanina-Searchlight company is operating on the Dorothy group west of Searchlight, as well as on the Maple Leaf group in El Dorado canyon. The immense size of the ledge on the Dorothy will necessitate the sinking of a number of shafts to best determine where the richest ore shoots are located.

Sinking on the Cyrus Noble Extension continues daily. The much sought for extension of the Cyrus Noble ledge has undoubtedly been found. The shaft started three weeks ago is down to a depth of 60 feet in solid formation similar to that on the Cyrus Noble and between well defined walls.

The Quartet stamps are constantly dropping on 70 tons of ore daily. The cross-cut on the 900 has cut through the ledge just where it was expected to be. The main shaft is in the foot wall and a 70-foot cross-cut is necessary to reach the hanging wall.

The management of the Searchlight-Broncho is prospecting the big ledge located on that company's property. The lodge contains hemotite with average gold values of $5 per ton and is over 40 feet in width. It will take some time to put the property in shape for production but it is the intention to push the work as rapidly as possible.

Upon the Searchlight-Diamond, preparations are being made to more thoroughly exploit the property. A force of men is now sinking in the main shaft, which will be sunk to the water level.

At the 150-foot level of the Silver Legion mine belonging to the Eldorado-Nevada Mining and Milling company, located in the Nob Hill district, six feet of sulphide ore, said to average better than $40, has been opened. In the center of the ledge 18 inches of the ore runs much better. The ore is a sulphide carrying gold, silver, iron and lead. It is the intention of Supt. Roberts to drift in both directions on the vein as he expresses himself as being satisfied that the character of the formation at the 150-foot level will justify such a course of development. The Eldorado Nevada lies in a district that has been proven to be highly mineralized and a region that has been a big producer in the early days, when mining was being accomplished by the very crudest methods and under the most difficult conditions.

CITY ROCKS SHIPMENT.

A Car Load of Good Ore to be Forwarded This Week.

Manager Robert Edwards of the City Rocks Mining company, operating at Alta, departed for Alta again this morning on an inspection trip.

Mr. Edwards will complete arrangements while in camp for the movement of a carload of ore taken from the new shoot opened into less than two weeks ago. The ore will run, it is said, about $75 a ton.

THINGS RUNNING SMOOTHLY.

A. F. Schneider, general manager of the Nevada-Utah Mines & Smelters corporation, returned from New York yesterday afternoon, and during the day has been in conference with Col. John Wier, president of that corporation. Mr. Schneider declared, when seen by a "News" representative, that he had no news of public importance to give out just at this time, any more than that things are moving along smoothly at the several properties where development work is being done.

CONCENTRATES

Ed Copley, the Chicago broker, returned east yesterday afternoon.

Superintendent Giddings of the Continental Alta mines at Alta came down from camp last night and will return again tomorrow morning.

The ore and bullion settlements reported late yesterday by McCornick & Co., were: Crude ore and concentrate, $40,000; base bullion, $42,000.

Word comes from Phoenix, Ariz., to the effect that Joseph McGhie, who was connected with the mill department of the Ontario Silver Mining company a number of years ago, died in that place on the 19th inst.

Fred G. Shaffer, the Denver mining operator who has interests in this state as well as in Nevada, came in from the east yesterday. The Mystic Shrine property at Bingham is being developed under the direction of Mr. Shaffer.

Mr. M. K. Shaler of the United States geological survey has been detailed to the Durango-Gallup coal field of Colorado-New Mexico for the purpose of determining the economic value of certain coals occurring along the western border of the field.

General Manager Lafayette Hanchett of the Newhouse mines returned this morning from Beaver county. He did not go out to the Cactus properties on this trip but put in his time having a tussle with the board of equalization of Beaver county.

Manager Walter C. Orem of the Utah-Apex and New Red Wing mines of Bingham departed for the Mason Valley copper district near Yerrington, Nev., today. His objective point is the Douglas copper mine, recently acquired by Mr. Orem and associates.

A general reconnaissance of Arizona will probably be made, during the coming summer, by geologists of the United States geological survey. Mr. F. L. Ransome will do the work in the eastern half of the territory and Mr. Waldemar Lindgren that in the western half, including particularly a study of the Mojave, Yuma, and Yavapai districts.

One hundred De Forest Wireless stock at $3.00 Must be sold at once, so give us a bid, E. M. West & Co., Tel. 165. 327 D. F. Walker block.

E. M. WEST & Co., stock brokers, D. F. Walker Blk. Tel. 165; res. 3519-x.

New York Stock Exchange, New York Cotton Exchange, Boston Stock Exchange, Chicago Board of Trade.
We Handle All Prominent Utah Mining and Commercial Stocks.

SELLING WAS ORDER OF DAY.

Majority of Stocks Opened Small Fraction Higher But Gain Soon Lost.

PRICES CARRIED DOWNWARDS

The Pennsylvania, Transcontinental And Metal Groups Were Most Affected.

New York, June 21.—The majority of stocks today opened a small fraction higher than last night but some of the prominent market leaders were among the few exceptions. The United States Steel stocks, Union Pacific, Pennsylvania and L. & N. sagged a smal fraction. National Biscuit fell 1½. Anaconda advanced 2¼. Great Northern preferred 2, and New York Central and Interborough Metropolitan stocks and Hide and Leather preferred large fractions. Three thousands shares of Baltimore & Ohio sold at the opening at 119¾ and 119¼ compared with 119¼ last night.

Fair progress was made in getting a few stocks higher, notably St. Paul, Illinois Central and Canadian Pacific, but selling at other points kept the market irregular. Selling of United States Steel was prominent and the weakness developed in Pennsylvania, Reading and the gas stocks. The entire market then became reactionary. Consolidated Gas dropped 3 points, People's Gas 2 and United States Steel, Pennsylvania, Reading, Union Pacific, Northern Pacific and Interborough Metropolitan 1. The advances of 1¼ to 1⅝ in St. Paul, Illinois Central, Canadian Pacific, Delaware & Hudson and Kansas City Southern preferred were reduced.

Selling became more active and carried prices sharply downwards throughout. Losses in Pennsylvani, Smelting and Colorado Fuel ran to 2 points, Sloss-Sheffield Steel 2¼, Anaconda 2¼, Great Northern preferred 1¾, Union Pacific 1⅝, Reading, Northern Pacific, New York-N. H. & H. and U. S. Steel stocks 1½, Norfolk & Western and Distillers' Securities 1¼ and L. & N., Missouri Pacific, St. Louis Southwestern 1⅛, Amalgamated, Republic Steel preferred, National Lead and Brooklyn Transit about 1. The market became dull when the decline was arrested.

Bonds were irregular at noon.

Very active selling began again between 12 and 1 o'clock, and the market went down precipitately. The Pennsylvania, Transcontinental and Metal groups were the most affected. Losses of between 1 and 2 were general. The important declipes reached 2¾ in Northern Pacific, Great Northern preferred, Reading, Smelting an Colorado Fuel, 2⅜ in Union Pacific, Southern Pacific, Erie, Atlantic Coast Line, Amalgamated, Brooklyn Transit and Pressed Steel Car and 1 to 1¼ in St. Paul, Baltimore & Ohio and Locomotive.

Business continued on a large scale as long as the market was going down but as soon as the list showed signs of stiffening and prices had rallied a trifle, speculation became very quiet. All classes of stocks were driven to a much lower level. Michigan Central slumped 10, Anaconda 6¾, Smelting & Northwestern 4, Colorado Fuel 3¾ and Missouri Pacific 2.

LIVESTOCK.

Chicago, June 21.—Cattle—Receipts, 1,500; market steady. Beeves, 4.00@6.05; cows and heifers, 1.40@5.10; stockers and feeders, 2.75@4.60; calves, 5.00@6.50.

Hogs—Receipts, 32,000; market weak to 5 cents lower; estimated tomorrow, 18,000. Mixed and butchers, 6.30@6.65; good heavy, 6.50@6.62½; rough heavy, 6.35@6.45; lights, 6.30@6.60; pigs, 5.40@6.30; bulk of sales, 6.50@6.57½.

Sheep—Receipts, 10,000; market steady. Sheep, 4.75..6.25; lambs, 5.90@7.60.

OMAHA.

Omaha, June 21.—Cattle—Receipts, 3,300; market steady to stronger. Native steers, 4.25@5.50; cows and heifers, 3.00@4.55; western steers, 2.50@4.40; canners, 2.00@2.85; stockers and feeders, 2.10@4.25; calves, 3.00@6.25; bulls and stags, 2.75@4.25.

Hogs—Receipts, 15,000; market shade lower. Heavy, 6.27½@6.35; mixed, 6.25@6.30; lights, 6.20@6.30; pigs, 5.00@6.00; bulk of sales, 6.25@6.30.

Sheep—Receipts, 5,000; market steady. Yearlings, 5.75..6.25; wethers, 5.50@6.15; ewes, 5.00@6.00; lambs, 6.00@7.00.

KANSAS CITY.

Kansas City, June 21.—Cattle—Receipts, 4,500; market strong. Native steers, 4.00@5.70; native cows and heifers, 2.25@5.10; stockers and feeders, 2.75@4.25; bulls, 2.50@4.00; calves, 2.50@6.00; western fed steers, 3.50@5.25.

Hogs—Receipts, 16,000; market 5 cents lower. Bulk of sales, 6.30@6.42½; heavy, 6.40@6.50; packers, 6.35@6.45; pigs and lights, 5.50@6.40.

Sheep—Receipts, 3,000; market strong. Muttons, 5.00@6.40; lambs, 5.75@6.75; range wethers, 5.00..6.50; fed ewes, 4.75@5.90.

WOOL.

St. Louis, June 21.—Wool, steady. Territory and western mediums, 26@29; fine mediums, 21@25½; fine, 16@20.

PRODUCE.

Chicago, June 21.—Trading was heavier in the September option of all grains today than in July. The wheat market, although easier, showed little change in prices. September opened unchanged to ⅛ higher at 83⅞ to 84.

The corn market was firm on higher cables and poor weather for the crop. September opened unchanged to ⅝ up at 42¾ to 52⅝.

September oats opened steady, ¼ to ¼ higher at 36½ to 36⅝.

Provisions were inclined to be weak. September pork was 10 cents lower at 16.70; lard was down 2½ at 8.90, and ribs were 5 cents lower at 9.20.

Later the market became strong but the gain was lost on profit-taking. September closed a shade lower at 83⅝@83⅞.

Corn—September closed off a shade at 52⅝@52¾.

Cash: Wheat—No. 2 red, 84@87; No. 3 red, 83@86; No. 2 hard, 83@85; No. 3 hard, 78@83; No. 1 northern, 86@87; No. 2 northern, 84@86; No. 3 spring, $1@85.

Corn—No. 2, and No. 3, 52½..52¾.

Oats—No. 2, 35½; No. 3, 38.

Francis G. Luke, Gen'l Mgr.
Wm. STONEMAN AND M. S. ROCK
Two soft hearted (not stone nor rock) grocers, fed two men and their families during the hard winter of 1894. One dead beat stonecutter went to Canada, the other, a railroad clerk, went to Omaha and then into bankruptcy, but we caught them both.
