ANNUAL REPORTS.

The Chamber of Commerce Heard Them Last Night—Elected Officers.

W. H. ROWE MADE PRESIDENT.

The Initiation Fee and Quarterly Dues Reduced—Financial Statement by the Secretary.

The annual meeting of the Chamber of Commerce for the purpose of hearing reports and electing officers was held last night. The proceedings are given in detail below.

President's Report.

Gentlemen—The year 1893 has been one of extreme disaster to many industries throughout the country. In fact there has been no place that has not felt the blight of hard times and the withering influence of a scarcity of money, caused by ruinous legislation. It is well and eminently proper to bear in mind the extreme depression throughout the country, the wrecks of financial, industrial and commercial institutions in nearly every city in the land. The civilized world has been, and is, passing through a financial and industrial depression which has seldom been visited upon an intelligent and enlightened race. For a country with such wonderful and unlimited natural resources, populated with a race considered to be the most industrious and capable the world has ever known, to be subject to the conditions existing in the United States today is most lamentable, and shows either a lack of knowledge of or honesty on the part of the representatives who should legislate for the welfare of the people. The people are beginning to think for themselves, and the remedy for evils which we now suffer will soon be found. It is well to bear in mind the general condition of the country when reviewing the developments and progress made in this city and territory during the year just closed. The prosperity shown by this city, and the substantial manner in which we have weathered the storm of distress and ruin which has visited so many cities has been the wonder and admiration of the people from the Pacific to the Atlantic coasts, and their surprise has been increased by supposing we were almost wholly dependent upon silver mining, little dreaming of the magnificent and varied industries which we have to draw upon.

The bank clearances for 1893 amounted to $505,115,000, showing a large increase compared with the previous year, not as compared with other cities throughout the country is highly satisfactory.

All the banks, national, state and savings banks, thirteen in number, have stood firm throughout the trying ordeal. Over 500 new houses have been built and occupied during the year. The real estate sales amounted to nearly $6,000,000, as compared with $5,000,000 the previous year.

Two hundred and seventeen thousand nine hundred and ninety-six dollars have been expended in the erection of the public school buildings, some of which were commenced in 1892 and completing the work at a total cost for the two years of over $600,000. Additional bonds for $225,000 were sold last month for $230,000, and that amount will be expended this year in still additional public school buildings.

No true American can ride through our city, noting the beautiful and expensive buildings of most approved architecture, adding also their number, and fail to be filled with pride at the opportunities afforded the young of this community. The corps of teachers consist of the best native and imported talent, who have perfected a system up to most approved lines, and fully answer with the best educational centers. Our school board deserves general commendation for the minute attention given to the details of lights, heat and ventilation. The poor cannot plead inability to educate their children on account of the expense of books and supplies, for these are generously furnished free gratis.

In addition to the public schools we have a correct Episcopal school, St. Mary's Academy for girls, (Episcopal) St. Ann's (Episcopal) for girls, Tabernacle Hall (Congregational), All Hallows (Catholic), Methodist Seminary and Presbyterian school, two business colleges, also the Latter-day Saints College, both in 1893, and the Utah University, with their side branches or rivals to higher education.

In music we are all familiar with the general surprise we found at the World's Fair created by the high order of work of the Mormon choir, which resulted in their being awarded second place in a very close contest, to which their worthiness for first prize was not without competent authority.

Among the high class exhibits under the great dome of the Fine Arts building was one from Mr. Dalley's House, which received such an Indian name, which gained for him a medal, twelve of which were awarded among a field of seventy competitors in American manufacture.

The city expended on city improvements $230,000, an increase over the previous year of $64,000.

The city and county building, which is now finished and nearing completion, both of Utah sandstone, two one of which will be finished, and the other of sandstone are done great credit to the skill of our local architects. All our principal business houses have been paved with Utah sandstone and more and more Utah material is to be used in the west.

One hundred and twenty-eight thousand dollars has been expended on a gravity sewer, and when completed will be a perfect and model system, and continue to keep out only the healthiest of its population in the United States, as the record for the past two years has shown it to be. Twenty thousand dollars has been expended on cement sidewalks, $100,000 on a water system, which is owned by the city and is valued at $1,500,000.

The free part of the road during last season produced 10,000 and 100 acres of land in nature a copper refinery and smelter. Three hundred and sixty-five thousand dollars has been expended on the plant so far, and when finished will have cost not less than $1,000,000, with forty-two tons refined copper per day, which other companies cannot equal, and employ from 250 to 300 men. This will develop many copper mines throughout the Territory and will make Utah a copper region.

Several square asphaltic, with a number of hose houses now have built Portland cement works, which will be in operation within a few days, and employ from thirty to forty men. This is an important industry for this section of the country, and it is the intention of the company to enlarge the plant to their full capacity. One year ago not over two people would look over yellow Utah for the purpose for this reason or the other one for the occasion of the great copper plant.

The Salt Lake Min Summer Resort, built in the heart of the city, upon which has been expended in this about $60,000, is a credit to the city, and will be its Lullvanal home in drawing home guests and in valid here.

A general market for now been by the Commercial Market company, at a cost of $40,000, and is a great benefit to the city.

The Wasatch Asphaltum Paving company has a capital stock of $1,000,000, completed in 1893, and has laid over 100 feet in the market now. This product is superior to a surface in use. Has and the asphalt are excellent.

The Salt Palace at Saltair Beach, which was by an outlay in the longest and most magnificent at any beach, was built by local enterprise at a cost of $50,000.

Utah's exhibit at the World's Fair has done much to bring this Territory into prominence, and the exhibits were not an index of great natural wealth here existing. Items were received in almost every department. The gold was at Chicago is being distributed by the united efforts of the several counties of the Territory in making a very unique and attractive exhibit at the Midwinter Fair at San Francisco.

In addition to the new industries already mentioned is the fact of the building of the Nevada Southern railroad from Salt Lake, Utah, to southern Utah, which is now running, and which will give a market to the east, iron and other minerals, the deposits of which are very rich and extensive. This will direct additional attention and immigration to Utah. Several large irrigation companies are now at work storing water in basins, taking water to irrigate several hundred thousand acres of as rich fruit and agricultural land as can be found in any part of the country, and are to be followed by under the direct and additional entries. Additional companies are now anxious to secure the Utah field. Several are now in correspondence with the chamber of commerce and the irrigation congress.

The Camp Floyd gold district is attracting much attention, and is believed to be very extensive, and great interest is manifested in gold properties in many other parts of Utah. A United States mint is needed at least for assay, and undoubtedly will be, this year is secure railroad connection to Corinne and reduce the price of coal materially in this city and stimulate manufacturing.

This season is the next future become a great manufacturing center. The bringing in to this city of the great power in the Big Cottonwood stream, reducing the price of power and of light, will also stimulate new industries and enable those now here to increase their business.

The rapid growth and success of the beet sugar industry, and the prosperity given to the farmers in that section, should be the means of adding of land, the raising of the industries—one in the county of Davis and one in the northern part of the territory.

The formation of a permanent bureau of information from all the counties will continue to have a beneficial influence, causing all to work together for the growth of the entire territory. It is one of the most important factors in the upbuilding of any community and one which has been long needed here.

Our climate, our hot springs, the Great Salt Lake, are all attracting due attention. Our coal, iron, copper, asphaltum, sulphur, gold, silver and rare earths calling capitalists, investors, and our agricultural and fruit lands the farmers, seems we need, and who will have much to do with the proper development of the country.

The hollowed which we stated under misconceived circumstances has turned out to be a blessing, and gives employment to many deserving workingmen who heretofore depended upon them. This drive will be a lasting attraction and benefit to the city, and the stimulation of business.

The Secretary's Growth.

The report of Secretary Harper was also submitted. It recited the letter of that gentleman since his acceptance of the office, and recommended the organization of a state board of trade and the formation of a territorial board of horticulture and agriculture and other matters of minor interest. Also the following financial statement:

Receipts for the year, including dues, $[illegible]

The election of officers was next proceeded with and resulted as follows: President, Wm. H. Rowe; vice president, D. C. Adams; second vice president, H. P. Grant; treasurer, James Sharp; secretary, Charles M. J. Gray; C. F. Mason, George M. Cook, Fred Simons, L. M. Terry, A. H. Cannon, Prof. H. Hinckenlay and J. E. Gillespie.

A vote of thanks was then given to the retiring officers, after which the following gentlemen elected by ballot were declared:

Whereas, it is deemed desirable that the interests of this city be represented in the affairs of the state board of trade, therefore be it

Resolved, that the president of the board of this chamber be elected to act as the representative of this city and the chamber on said board, and the president be and he is hereby authorized to take such steps as may be deemed necessary for the organization of said state board of trade.

Resolved, that the initiation fee of this chamber be reduced to $5, and the quarterly dues to $2, and that the secretary be and he is hereby authorized to take such steps as may be deemed necessary to carry into effect the foregoing resolution.

Resolved, that the secretary be and he is hereby authorized to make such changes in the constitution and by-laws of this chamber as may be deemed necessary to carry into effect the foregoing resolution.

Resolved, that the secretary be and he is hereby authorized to make such changes in the constitution and by-laws of this chamber as may be deemed necessary to carry into effect the foregoing resolution.

20 Miles from a Doctor

But Hood's Sarsaparilla was Equal to the Emergency

Paralysis, Chills and Fever—Sick Eye—Perfect Cure.

"After being very sick from the effects of la grippe, I was left in a very weak condition. My physician prescribed Hood's Sarsaparilla. When I had taken one bottle I was much improved in health. After a course of two bottles I was able to do my housework. I recommend Hood's Sarsaparilla to all who are in need of a good blood purifier." Mrs. A. H. Ellis, Fort Worth, Texas.

It Was Doing Me Good.

"I continued using Hood's Sarsaparilla, and found it was doing me good. I was able to do my housework, and I was in good health." Mrs. A. H. Ellis, Fort Worth, Texas.

Hood's Cures

Hood's Pills cure all liver ills, jaundice, biliousness, sick headache.

SAPONIFIER, and use no other. Peck's Salt Soda Co., Philadelphia.

DR. SCHENCK'S

Mandrake Pills have a value as a household remedy far beyond the power of language to describe. The family can hardly be true to itself that does not keep them on hand for use in emergencies.

MANDRAKE

is the only vegetable substitute for that dangerous mineral, Mercury, and while its action as a cathartic is fully equal, it possesses none of its pernicious effects.

In Consequence, Mandrake acts upon the bowels without disposing them to subsequent costiveness.

No remedy sold on directly on the force, nothing so speedily cures Sick Headache, Sour Stomach and Biliousness as these

PILLS.

For sale by all Druggists. Price 25c per box. Prepared only by Schenck & Son, Philadelphia. Full directions with each package.
