GOOD ADVANCES IN THE PIT TODAY.

Made by Mammoth, Lower Mammoth and Star Consolidated.

ALL THREE SELL FREELY.

Mammoth Continues Active at Good Figures—Other Features of the Call.

Business fell off a little in the pit today, but despite this fact, proceedings were very interesting, as several advances were recorded, these being principally prominent with stocks of a higher order. The sales reached a total of 94,321 shares, which sold for the sum of $92,851.41.

Daly-West was a little backward in the bidding and had no best figure at $19.50 as usual, offerings at $19. Daly stood firm and made a sale at 58 cents, while Eagle was dealt in down to 18½ cents, the stock giving evidence of a slight decline. Flat Area was active at 40 figures and Grand Central sold at 19.05, after which a grand rush was made for Mammoth and the stock sold with frequency between $2.40 and $2.44 a share. Choice, there was a bid of $2.42½, while offerings were limited at $2.45 and the market closed easier and off back and sold down to $2.37½, the transaction causing many to wonder concerning the wisdom and wherefore of such a sudden drop. The closing bid was $2.35, with offerings at $2.37. The strength of the day, however, was the big demand for Lower Mammoth at advanced figures. This stock showed great and growing popularity and ran up to $1.16, sales being made all the way from $1.07½. At the close the stock was firm, there being many in the pit willing to take it at $1.12½. Northern Light was active but sold at declining quotations, transfers being made as low as 87 cents. Barcelona held its own around 50 cents, while Star Consolidated looked more healthy than usual and sold up to $1.36, the stock closing with a bid of $1.27½. Sunshine did a little business at 45 cents.

In the unlisted stocks Chloride Point was dealt in at $1.12½ and $1.15, after which Crown Point changed hands between 15 and 16 cents. Dalton held its own in sales of 3,500 shares, while Deserter showed strength and sold up to $1.05. Eagle & Blue Bird made a sale at $2.62 and Emerald dropped two shares at 12½ cents. Golden Eagle and Homestake responded at 55 and 11 cents respectively, while Hermosa was exceedingly active and did business on a declining scale, the stock changing hands between 16 and 19 cents. Bowers and Flowers Extension did heavy business, the former at a slight advance over yesterday's figure, the latter considerably below the standard of the day before. Midnight Bowers subscribed for a number between 1 and 5 cents, Manhattan a little below 4 cents and May Day 100 at 48 cents, while Monarch, which did not sell at the opening, finished out a total of 15,000 shares, the stock selling as high as 3½ and, taken with the Bowers, a total of 2½ South Bonanza sold on a stationary basis, while Tecla made up the balance of the day's business, these selling at very respectable figures.

More from Nebraska.

Their attendance required at the Mercur meeting, John Heinrich and Will E. Brown came in from Nebraska the morning, the latter being accompanied by Mrs. Brown. Mr. and Mrs. Baker, Bridge and Mr. Arthur Gibson, all of whom will sojourn in these parts about two weeks, taking in a visit to Nevada and Utah. Conditions in Nebraska are all right, they say, better, in fact, they believe, than in Utah, and there has been little or no position to judge and may possibly change their minds before returning. A shaft is being sunk on the property at Cherry Creek, Nev., Mr. Brown says work will be commenced along about April 1st.

Iron in the Superior.

For some time past, at great expense, but never without hope of striking "a good thing," Provo parties, backed by Salt Lake capital, have been working the Superior mine, located in the Tintic district. Word has just come from the property, accompanied by some fine samples of ore, that a splendid body of ore has been uncovered, and, notified by the showing in sight, the board of directors has decided to increase the force at work at once, with the intention of the owners to let the mine on the exchange this week. The samples brought in are said to assay well, and like other Tintic properties, which a few months ago were very superior, yesterday's showing may turn out, before long, to be a very profitable investment.

MARKET REPORTS.

NEW YORK MARKETS.

STOCKS AND BONDS.

New York, Jan. 25.—The relapse in stock market values yesterday was taken advantage of by speculation house patrons this morning and large purchasing orders were executed which carried many properties a point or more. Sugar and Pacific Mail were active and buoyant and bulls appeared seemed evident in other portions of the list. There was an entire absence of the excitement and sensational movement of prices which marked the early morning of yesterday's rush. Local transportation shares were heavily absorbed Metropolitan rising 4¾, which is the highest price ever made. Brooklyn Transit and Manhattan were driven up 2½@3, but Third Avenue sold 2½.

The general market which sagged in sympathy with weakness in sugar and tobacco, became very firm toward midday with N. Y. Central improving above 127.

Dealings in railroad bonds were light with variations unimportant.

SUGAR.

New York, Jan. 25.—Sugar, Raw steady; fair refining 3¾@3 15-16; centrifugal, 96 test, 4¼; molasses sugar, 3 13-16; refined, steady; crushed, 5¼; powdered, 5⅛; granulated, 5.

MONEY.

New York, Jan. 25.—Money on call nominally 2@3½ per cent; prime mercantile paper, 4@5½ per cent.

Sterling exchange steady with actual business in bankers' bills 4.84@4.84⅝ for demand and 4.82@4⅝ for 60 days' posted rates, 4.85½ and 4.87½; commercial bills, 4.81@4.82.

Silver certificates nominally 59½@60½.

Bar silver, 59½.

Mexican dollars, 47½.

Government bonds steady; Fs, 107½; ns 4s reg., 129½; do coupon, 129½; 4s reg. and coupon, 110; 2s, 96½; 5s reg., 113½; do coupon, 113.

CHICAGO MARKETS.

PRODUCE.

Chicago, Jan. 25.—May wheat opened at 72⅝@73, rose to 73¾.

Kansas City, Jan. 25.—Cattle—Receipts, 10,000. Market strong; native steers, $3.65@5.15. Texas cows $2.00@4.00; Texas steers $3.00@4.00; native cows and heifers, $1.50@4.60; stockers and feeders, $3.25@4.15; bulls, $2.00@4.00.

Hogs—Receipts, 17,000. Market steady; bulk of sales, $3.60@3.65; heavy, $3.55@3.75; mixed, $3.40@3.65; packers, $3.40@3.65; light, $3.30@3.65; pigs, $3.00@3.65.

Sheep—Receipts, 5,000. Market firm; lambs, $4.00@5.00; muttons, $3.50@4.50.

OMAHA LIVE STOCK.

Omaha, Jan. 25.—Cattle—Receipts, 2,700. Market 10 higher; native beef steers, $4.00@5.40; Western steers, $3.85@4.60; Texas steers, $3.00@4.25; native cows and heifers, $2.50@4.60; stockers and feeders, $3.00@4.60; cows, $2.50@3.60; bulls and stags, $2.50@4.00.

Hogs—Receipts, 10,700. Market strong, closed lower. Heavy, $3.60@3.70; light, $3.50@3.62½; pigs, $3.00@3.40; bulk of sales, $3.52½@3.62½.

Sheep—Receipts, 1,800. Market active; steady; native muttons, $3.75@4.25. Westerns, $3.80@4.20; stockers, $3.70@3.90; lambs, $4.00@5.80.

DENVER LIVE STOCK.

Denver, Jan. 25.—Cattle—Receipts 500. Market active and strong; beef steers fully 10 higher, $3.75@5.25; cows, $2.00@4.00; Texas steers $2.50@4.00; feeders F. O. B. $3.30@4.00; stockers $3.25@3.60; bulls and stags $2.00@4.00.

Hogs—Receipts 400. Market steady; light porkers $3.55@3.65; mixed $3.50@3.55; heavy $3.45@3.55.

Sheep—None.

SAN FRANCISCO MARKETS.

PRODUCE.

San Francisco, Jan. 25.—Wheat—Strong; May, 1.19½; cash, 1.12½.

Barley—Firm; May, 90½; cash, 1.27½.

WHITE SLAVES IN HUNGARY

Peasants Harnessed to the Plough Like Beasts of Burden.

(London Mail.)

Stephen Varkonyi, the leader of the peasant agitation, has just concluded Hungary during the early months of this year, has just been sentenced to one year's imprisonment for high treason.

The movement which was inaugurated by Varkonyi was a revolt against the remnants of serfdom which still exist in remote parts of Hungary. In these districts each peasant is compelled to work fifty days in the year for the land owner without pay.

These fifty days of compulsory labor are not successive, or at fixed intervals, but when the land owner has work to be done he sends a drummer through the village, and every male inhabitant of eligible age respond to the summons.

Thereupon so many men are selected as are required. The land owner almost invariably exacts the labor in the summer when the peasants' time is most valuable to him.

In summer the peasant can earn as much as one shilling a day; in winter not more than fourpence or sixpence. In winter the peasants are compelled to act as beaters in the magnates' hunts for a wage of twopence a day. The occupation is a dangerous one, and the time is not counted in the almost 50 days' compulsory labor.

The wives of the peasants are required to scoop and scrub the local manor house once a week without pay. Finally, many land owners use the peasants as beasts of burden, harnessing four men to the plow instead of two oxen.

Stephen Varkonyi, who instigated the revolt against these degrading conditions of labor, is a son of Hungarian Wat Tyler. He is the son of poor peasants, was educated in the farm yard and graduated in the fields.

He is quite a typical, horny-handed son of toil, is physically tall, sinewy built, with plenty of character in his sharp head, with small eyes with their suggestion of the Mongolian cast, and has that rough kind of natural humor that appeals to the simple peasant mind.

Varkonyi, whose power over the agricultural population of his district is unbounded, is one of the most interesting figures in modern Hungarian life.

CARTER'S LITTLE LIVER PILLS.
CURE
Sick Headache and relieve all the troubles incident to a bilious state of the system, such as Dizziness, Nausea, Drowsiness, Distress after eating. Pain in the side, &c. While their most remarkable success has been shown in curing
SICK
Headache, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cured
HEAD
Ache they would be almost priceless to those who suffer from this distressing complaint, but fortunately their goodness does not end here, and those who once try them will find these little pills valuable in so many ways that they will not be willing to do without them. But after a sick head
ACHE
is the bane of so many lives that here is where we make our great boast. Our pills cure it while others do not.
Carter's Little Liver Pills are very small and very easy to take. One or two pills make a dose. They are strictly vegetable and do not gripe or purge, but by their gentle action please all who use them. In vials at 25 cents, five for 1. Sold everywhere, or sent by mail
CARTER MEDICINE CO., New York.
Small Pill. Small Dose. Small Price.

ANNUAL REPORT OF THE MERCUR.

Submitted to the Company's Stockholders This Afternoon.

MINE'S OUTPUT FOR YEAR.

Strikes in the Mammoth and Lower Mammoth—Miscellaneous Mining Items.

The Mercur Gold Mining and Milling company held its annual stockholders' meeting in this city this afternoon. John Dern, president and manager, presiding. The meeting was attended by all the directors, representing the greater part of the company's stock, and was harmonious in every respect, so much so that acquiescence was evident in every recommendation made by those submitting annual reports.

John Dern's report as president and manager, was an interesting document, and was listened to with rapt attention. It disclosed the information that during the year ending Dec. 31, the company mined and milled 96,401 tons ore, this representing the amount of dry ore mined from 106,176 tons, the gross product of the mine. This ore was handled at a cost of $5.47 per ton, getting a yield of 1.03 ounces of gold, $21.31 per ounce, making a total expense per ton of $2.25. In this connection Mr. Dern calls attention to the fact that the expense of handling the ore was materially reduced during the year, the cost of mining being 28 cents less than that in '97, while milling was reduced 34 cents, making a total reduction of 34 cents per ton. The tonnage was 10 per cent greater than the year before, while the total expense for mining and milling was less than a per cent greater, or, in other words, an increase of 17,775 tons of ore was handled at an additional expense of $1.95.

During the year the company's total receipts amounted to $1,041,031.35, which added to $133,872.10, the amount of cash on hand Dec. 31, 1897, makes a total of $1,174,903.45. Against this was disbursed, for general expenses, exclusive from dividends, the sum of $286,786.97, which added to the cost of ore, $1,225,000, leaving a cash balance on hand Dec. 31, 1898, of $134,086.58. The year witnessed the payment of two dividends of $60,000 and seven of $25,000 each, the amount now being paid to stockholders therefore, for the year, including also dividends with buildings, which cost the company in the neighborhood of $15,000.

Commenting on work during the year, Manager Dern states that a large amount of base ore has been encountered, the treatment of which he considers worthy the attention of the company's officers. These ores have been found principally in the Lara and Nineteen workings, the former, however, showing a large vein of good milling ore. The report refers to the prospecting of the lower or third vein, which has been brought with considerable success, demonstrating a continuity of the vein throughout the entire property. The report also refers to the extensive improvements made on the company's plant, giving it a capacity of 400 tons, which capacity, in the opinion of superintendent Edwards, will be increased to 600 tons. Superintendent Edwards reports the general outlook for the property good, and calls attention to the Apex tunnel, which, says he, is nearing the ore chute. Mr. Edwards suggests the purchase of a gasoline engine, which he is also brought to the attention of the company by Mr. Dern.

STRIKE IN THE MAMMOTH.

High-Grade Gold Ore on the 900-Foot Level—No Dividend.

The flurry in Mammoth stock the past few days has caused much speculation as to the reason for such activity at advancing figures. A "News" representative called on Mr. McIntyre today and, from him learned that the miners had made a nine strike of ore on the 900-foot level, and that indications pointed to a new and similar strike on the 800-foot level. Mr. McIntyre would not venture an estimate as to value, but from outside sources it is learned that the ore runs high, especially in the yellow metal, some saying that it will go all the way from $10 to $50 in gold.

Asked concerning a dividend for January Mr. McIntyre stated that it looked as though the company would not pay one this month. Then he walked off.

LOWER MAMMOTH STRIKE.

Recent Disclosures Place the Mine Among Tintic's Bonanzas.

That the Lower Mammoth has developed into a mine capable of making regular shipments of high grade ore, is the assertion of Will Griffith, who returned from an inspection of the property last night.

Mr. Griffith brought with him an excellent lot of samples, some running as high as 40 per cent copper, 80 ounces silver and 58 per cent lead to the ton, as well as leaving values of from a few ounces to $2 per ton in gold, and encountered on the 500 and 600-foot levels, where the miners are stopping and working, and getting ready to make big shipments.

The Lower Mammoth, says the gentleman, is no longer a prospect, but a sizable bonanza and one that will vie well with its near neighbors, the Mammoth, Carisa and Colorado Central Bonanza, as soon as the ore bodies are gone into. Mr. Griffith estimates that the vein at present is from five feet wide, 40 ounces silver, $8 per cent lead and $2 per ton in gold, and that, this may be, the company will be well able to hand out handsome dividends.

A strike of ore on the 500-foot level, has also to connect with the ore bodies.

Mr. Griffith also visited the Crown Point, where he says there is a good showing at a depth of 18 feet in the shaft, the ore going $40 in copper and lead.

MINES AND MINING MEN.

Lead advanced 5 cents a hundred today.

George S. Eckrote, superintendent of the Mercur, came in from the mine last night to be present at the company's meeting this afternoon.

The Horn Silver at Frisco reported today with four cars of concentrates.

The Utah Sulphur company has opened an office at 60 McCornick building.

The Fremont Mining company has decided to put in a mill immediately. This property is located at Tintic.

Developments in Dagny ground are said to be promising very satisfactorily.

A strike of good ore is reported in a winze off the 300-foot level of the Star Consolidated, in Tintic district.

The Checkmate mine, located at Willow Creek, Ida., has made a shipment of ore assaying 34 ounces gold, 12.8 ounces silver and 5.5 per cent copper to the ton.

COPPER NOW A WORLD BEATER

Entire Output of the World is Being Snapped Up.

HIGHER PRICES WILL COME.

Outlook in Mining Circles Very Bright—Every Copper Property Offered is Eagerly Taken Up.

New York Jan. 25.—According to the official figures of copper production in the United States last year there was an output from the Michigan, Lake Superior and Arizona mining localities which exceeded that of 1897 by over 15,000 tons. The close of the year, however, notwithstanding the larger production, found stocks almost exhausted, but in this country and in Europe, Mr. John Stanley, the statistician of the copper manufacturing industries, in discussing the situation with a representative of the New York Times, takes the view that higher prices must come and that still greater increase of production will be necessary to meet growing demands.

Mr. Stanley said:

"With the production of copper for 1898 shows considerable increase over that of 1897 and is by far the largest production ever recorded in this country, the consumption has also been very large, especially since the close of hostilities with Spain. Stocks in Europe as well as in the United States at the close of the year were unusually low, there being during 28 months of the year, only in '97, while milling was reduced 34 cents, making a total reduction of 34 cents per ton. The tonnage was 10 per cent greater than the year before, while the total expense for mining and milling was less than a per cent greater, or, in other words, an increase of 17,775 tons of ore was handled at an additional expense of $1,95.

During the year the company's total receipts amounted to $1,041,031.35, which added to $133,872.10, the amount of cash on hand Dec. 31, 1897, makes a total of $1,174,903.45. Against this was disbursed, for general expenses, exclusive from dividends, the sum of $286,786.97, which added to the cost of ore, $1,225,000, leaving a cash balance on hand Dec. 31, 1898, of $134,086.58. The year witnessed the payment of two dividends of $60,000 and seven of $25,000 each, the amount now being paid to stockholders therefore, for the year, including also dividends with buildings, which cost the company in the neighborhood of $15,000.

Commenting on work during the year, Manager Dern states that a large amount of base ore has been encountered, the treatment of which he considers worthy the attention of the company's officers. These ores have been found principally in the Lara and Nineteen workings, the former, however, showing a large vein of good milling ore. The report refers to the prospecting of the lower or third vein, which has been brought with considerable success, demonstrating a continuity of the vein throughout the entire property. The report also refers to the extensive improvements made on the company's plant, giving it a capacity of 400 tons, which capacity, in the opinion of superintendent Edwards, will be increased to 600 tons. Superintendent Edwards reports the general outlook for the property good, and calls attention to the Apex tunnel, which, says he, is nearing the ore chute. Mr. Edwards suggests the purchase of a gasoline engine, which he is also brought to the attention of the company by Mr. Dern.

STRIKE IN THE MAMMOTH.

High-Grade Gold Ore on the 900-Foot Level—No Dividend.

The flurry in Mammoth stock the past few days has caused much speculation as to the reason for such activity at advancing figures. A "News" representative called on Mr. McIntyre today and, from him learned that the miners had made a nine strike of ore on the 900-foot level, and that indications pointed to a new and similar strike on the 800-foot level. Mr. McIntyre would not venture an estimate as to value, but from outside sources it is learned that the ore runs high, especially in the yellow metal, some saying that it will go all the way from $10 to $50 in gold.

Asked concerning a dividend for January Mr. McIntyre stated that it looked as though the company would not pay one this month. Then he walked off.

LOWER MAMMOTH STRIKE.

Recent Disclosures Place the Mine Among Tintic's Bonanzas.

That the Lower Mammoth has developed into a mine capable of making regular shipments of high grade ore, is the assertion of Will Griffith, who returned from an inspection of the property last night.

Mr. Griffith brought with him an excellent lot of samples, some running as high as 40 per cent copper, 80 ounces silver and 58 per cent lead to the ton, as well as leaving values of from a few ounces to $2 per ton in gold, and encountered on the 500 and 600-foot levels, where the miners are stopping and working, and getting ready to make big shipments.

The Lower Mammoth, says the gentleman, is no longer a prospect, but a sizable bonanza and one that will vie well with its near neighbors, the Mammoth, Carisa and Colorado Central Bonanza, as soon as the ore bodies are gone into. Mr. Griffith estimates that the vein at present is from five feet wide, 40 ounces silver, 8 per cent lead and $2 per ton in gold, and that, this may be, the company will be well able to hand out handsome dividends.

A strike of good ore on the 500-foot level, has also to connect with the ore bodies.

Mr. Griffith also visited the Crown Point, where he says there is a good showing at a depth of 18 feet in the shaft, the ore going $40 in copper and lead.

MINES AND MINING MEN.

Lead advanced 5 cents a hundred today.

George S. Eckrote, superintendent of the Mercur, came in from the mine last night to be present at the company's meeting this afternoon.

The Horn Silver at Frisco reported today with four cars of concentrates.

The Utah Sulphur company has opened an office at 60 McCornick building.

The Fremont Mining company has decided to put in a mill immediately. This property is located at Tintic.

Developments in Dagny ground are said to be promising very satisfactorily.

A strike of good ore is reported in a winze off the 300-foot level of the Star Consolidated, in Tintic district.

The Checkmate mine, located at Willow Creek, Ida., has made a shipment of ore assaying 34 ounces gold, 12.8 ounces silver and 5.5 per cent copper to the ton.

USED BY THE NOBILITY.

The Remedy That Makes People Well—Paine's Celery Compound.

In every civilized country rich and poor alike have found restored health and new vigor in Paine's celery compound.

"Hard-working people of ordinary means are to be congratulated," says an English exchange, "in a recent scientific work of the last quarter of a century, upon having so easily within their reach today a remedy which the southmost and most influential persons must themselves use if they would get the best that modern skill offers. Paine's celery compound proves that the science of medicine has kept pace with the wonderful progress which characterizes the life of the present generation."

The astonishing reputation that this most wonderful of all remedies has acquired is principally due to the word-of-mouth recommendations and endorsement of men and women of the highest business and social standing, as well as leaders of thought, but also imperial positions who have themselves discovered its merits.

Adding Confidence Testimonials, whose privilege it is to give, in a recent letter to the Wells, Richardson Company speaks of friends of hers who have been benefited by Paine's celery compound, and who first advised her to recommend it to her sick friends.

The contents, as is well known, is a prominent member of the Danish court. Her coming to this country has been much talked of. Her real object was one of charity, for she is using her great wealth and influence this winter in assisting the Danish people in the western states. She is stopping in Chicago, and from there writes her straightforward endorsement of Paine's celery compound.

Women who are easily excited, who waste energy in worrying over trifles, who are often sufferers from sick headache and nervousness should read the plain, unbiased statements of what Paine's celery compound has done for other women.

Among the diseases that cause a vast amount of needless suffering that may be readily cured by Paine's celery compound are biliousness, torpid liver, headaches, sleeplessness, constipation, dyspepsia and general nervousness and debility.

No man or woman who is continually ailing can successfully carry on business, or be of much real comfort to the household.

And only a thoroughly nourished body that has all the blood-up, and therefore healthy, material completely removed from the blood and tissues can be healthy. When either of these vital conditions of adequate nourishment or elimination are incompletely done, the organs need just such help as Paine's celery compound is fitted to give. No other remedy is so valuable.

Where other remedies have failed, Paine's celery compound will succeed.

DUTY
Should impel every head of a family to
FIRST
Furnish his home with these articles of furniture that are necessary.
PLEASURE
will simply follow the performance of this obligation.
AFTER
The necessaries are provided he should pay attention to the beautifying of his home.
